Contents

Preface

Railway Research: Vehicle Track Dynamic Analysis and Related Environmental Problems
Special session organised by Z. Dimitrovová, J. Pombo and P. Teixeira

1 Modelling the Impact of Substructure Solutions in the Reduction of Vibration Levels and Maintenance Needs of Railway Tracks 1
P.A. Ferreira and A. López-Pita

2 Numerical Evaluation of Roadbed Performance subject to the Operation of Korean High-Speed Trains 17
T. Koh and M. Sagong

3 Stationary Approach for the Modelling of the Ballast Track Behaviour subject to Cyclic Loading 25
S. Costa D'Aguiar and P. Sicsic

4 Stiffness Transitions of Railway Tracks on Soft Soils 44
M.J.M.M. Steenbergen

5 Improving Track Transitions of High-Speed Lines 59
R. Sañudo Ortega, V.L. Markine and L. Dell'Olio

6 An Enhanced Moving Window Method: Applications to High-Speed Tracks 74
Z. Dimitrovová and A.F.S. Rodrigues

7 Prediction of Environmental Vibrations Induced by Railway Traffic using a Three-Dimensional Dynamic Finite Element Analysis 93
G. Kouroussis, L. Van Parys, C. Conti and O. Verlinden

8 Prediction Models for Building Structure Response arising from Railway Traffic 112
J. Benčat, O. Kubovćík and D. Papán

9 Noise from High Speed Trains: Harmonization of National and European Legislation 132
A. Bracciali, P. Firpo, S. Leth, L. Michelet and M. Sacchi

10 An Efficient Implementation for the Dynamic Pantograph-Catenary Interaction considering a Set of Transition Spans 144
N. Cuartero, E. Arias, F. Cuartero, T. Rojo and J. Benet

11 Environmental and Track Perturbations on Multiple Pantograph Interactions with Catenaries in High-Speed Trains 157
J. Pombo and J. Ambrósio

12 Improving Engineer Efficiency in the Design of Railway Electrical Systems by using a High Performance Computing Platform 180
E. Arias, T. Rojo, D. Cazorla and F. Cuartero

13 Vibrations of a Beam on a Pasternak Foundation subject to an Inertial Moving Load 193
P. Koziol

14 Stochastic Modelling of Track Irregularities 207
G. Perrin, D. Duhamel, C. Soize and C. Funfschilling

15 Simulation of the Impact of Mechanical Property Variability on Railway Behaviour subject to Static Loading 222
V. Alves Fernandes, S. Costa d'Aguiar and F. Lopez-Caballero

16 Non-Destructive Tests for Railway Infrastructure Stiffness Evaluation 234
S. Fontul, E. Fortunato and F. De Chiara

17 Improving the Performance of a Turnout by Optimising its Vertical Stiffness Properties 247
V.L. Markine, C. Wan and I. Shevtsov

18 Rail Straightness Control in Service 263
A. Bracciali, F. Piccioli and L. Di Benedetto

19 Development of an Analytical Model to study Railway Track Dynamics for the calculation of Vibration Levels arising from the Passage of Rail Vehicles 275
J. Otero Yugat, J. Martínez Miralles, M.A. de los Santos López and S. Cardona i Foix

20 Surface Damage and Fracture of Subway Rails 287
H.P. Rossmanith and E. Fischmeister

21 Modelling of Rail Rolling Contact Fatigue 297
C. Funfschilling, M.L. Nguyen-Tajan, S. Dieudonne, C. Rivron and P.E. Laurens

22 Rail Damage and Impact Phenomena at Dissimilar Welded Rail Joints 309
T. Weisz and H.P. Rossmanith

23 The Influence of Worn Wheels on Railway Vehicle Dynamics and on their Interaction with the Track 318
J. Pombo and N. Kuka

24 Interaction of High Speed Train and Railway Structure including Post-Derailment 345
M. Tanabe, H. Wakui, M. Sogabe, N. Matsumoto and Y. Tanabe

25 The Train Dynamics of Wheel Rail Contact and Longitudinal Lateral Interaction between Vehicles 360
L. Cantone, D. Negretti and V. Vullo

26 A Standard Procedure for Complex Bogie Modeling and Analysis: The Specific Case of the LDE2100-1668 Locomotive Design 371
A. Girotti, E. Salvati, F. Vivio and V. Vullo

27 On the Steady State Interaction between an Asymmetric Wheelset and Track 388
T. Mazilu and M. Dumitriu

28 Vibrations in Signalling Equipment: Limitations and Improvements of Current Standards 407
A. Bracciali, F. Piccioli and L. Di Benedetto

29 Comparison of the Linear and Nonlinear Analyses of the Stabilization of the Hunting Motion of Railway Vehicles 425
D. Baldovin and S. Baldovin

Sustainable and Healthy Building Technology
Special session organised by J.T. Kim

30 A Sustainability Appraisal Framework for the Design of Steel-Framed Buildings 433
A.H. Oti and W. Tizani

31 Identifying Consumer Response to a Newly Developed Social Mix Building Technique for Healthy Communities 448
Y.S. Lee, K.M. Kim, J.Y. Lee, Y.W. Park and C.H. Ahn

32 Reconstruction in Urban Residential Areas and the Measurement of a Right to Sunshine 458
K.H. Moon, J.S. Do, C.S. Kim and Y.S. Kim

33 Identifying the Effect of an Alternative Environment to Improve the Care of the Elderly in Korea 470
Y.S. Lee, J.H. Hwang, Y.J. Lim, C.H. Ahn and H.S. Lee

34 An Analytical Investigation of the Deflection of Composite Beams with Storey Height Reduction Capability 484
G.T. Lim, W.K. Hong, S.C. Park and S.Y. Jeong

35 Window Design and Lighting Control for Low Carbon Buildings 495
H. Kim, H.J. Kong, J.D. Choi, J.T. Kim and G.Y. Yun

36 Analysis of the Carbon Dioxide Emission used in the Transportation of Precast Concrete Members 503
C.Y. Lim, S.H. Lee, G.J. Lee and S.K. Kim

37 Bond Strength of Deformed Bars in Polymer-Modified Lightweight Aggregate Concrete 515
M.S. Kim, Y.H. Lee, D.J. Kim and H. Kim

38 A Comparison of the Luminous Environment in a Modern House and a Traditional House in Korea 526
E. Lim and J.T. Kim

39 Daylight and Energy Performance of a Light Pipe System in an Underground Carpark 535
J.Y. Shin, G.Y. Yun and J.T. Kim

40 A Comparative Analysis of the Luminous Environment of School Classrooms with Different Orientations 543
Y.J. Kim and J.T. Kim

41 Validation of a Sky Luminance Measurement System using the CIE Quality Control Test 555
H.J. Kong and J.T. Kim

42 A Study of Path Models for Analyzing Energy Saving Effects in Residential Areas of Apartments 564
S.H. Cho, N.N. Kang and T.K. Lee

Steel and Concrete Composite Structures
Special session organised by L.F. Costa Neves, J.G.S. da Silva and P.C.G. da S. Vellasco

43 On the Postbuckling Analysis of Thin-Walled Frames 578
N.L. Rizzi and V. Varano

44 Fatigue Analysis of Composite Steel-Concrete Highway Bridges subjected to the Dynamic Action of Vehicles 592
F.N. Leitão, J.G. Santos da Silva, S.A.L. de Andrade, P.C.G. da S. Vellasco and L.R.O. de Lima

45 Optimum Design of Steel Frames considering Semi-Rigid Beam-Column Connections 609
J.P. Freitas, G.A.S. Falcón, J.G. Santos da Silva and F.J.C.P. Soeiro

46 Structural Analysis of Transmission Line Steel Towers subjected to Wind Induced Dynamic Actions 624
M.I.R. de Oliveira, J.G.S. da Silva, S.A.L. de Andrade, P.C.G. da S. Vellasco and L.R.O. de Lima

47 Evaluation of the Dynamic Behaviour of a Standard Power Transmission Steel Tower in Japan during an Earthquake 643
T. Mazda, E.C. Kandemir, M. Matsumoto, N. Oka and N. Ishida

48 Failure Analysis of Transmission Towers subject to Downbursts 650
W. Qu, Y.-L. Pi and M.A. Bradford

49 Composite Semi-Rigid Joints Optimization with Genetic Algorithms 668
F.B. Ramires, S.A.L. de Andrade, P.C.G. da S. Vellasco and L.R.O. de Lima

50 A Novel Force-Based Element for Composite Beams in Frames 682
H.R. Valipour and M.A. Bradford

51 A Fast Incremental-Iterative Procedure for Ultimate Strength Analysis and Design of Composite Steel-Concrete Cross-Sections 697
C.G. Chiorean

52 Nonlinear Elastic-Plastic Analysis of Composite Steel-Concrete Members 716
Y.-L. Pi, M.A. Bradford and W. Qu

53 Development of an Innovative Hybrid-Composite Floor System 732
C.M. Abeysinghe, D.P. Thambiratnam and N.J. Perera

54 A Modeling and Experimental Study of Concrete Columns Highly Confined by Carbon Fibre Reinforced Polymer Sheets 744
J.F. Jiang and Y.F. Wu

Finite Element Analysis of Masonry
Special session organised by J.W. Bull

55 The Displacement Approach in No-Tension Structures 756
A. Baratta and O. Corbi

56 The Effect of Openings and their Locations on Masonry Infill in Steel Structures 769
M. Foroughi and M.A. Barkhordari

57 Compatibility Thermal Dilatation Limits of the Repair Material for Historic Masonry 783
P. Beran and M. Drdácký

58 Computational Analysis of Fibre Reinforced Polymer-Confined Masonry Columns 802
H.O. Köksal, S. Aktan, B. Doran and C. Karakoç

59 On the Statics of Masonry Helical Staircases 813
A. Baratta and I. Corbi

60 Finite Element Analysis of Adobe Masonry using Experimentally Derived Material Data 829
R. Illampas, D.C. Charmpis and I. Ioannou

61 Unilateral Analysis and Damage Identification in Masonry Structures 842
M.E. Stavroulaki, G.A. Drosopoulos and G.E. Stavroulakis

Design of Buildings: Structural Concepts and Modelling
Special session organised by L.F. Costa Neves and L. Lima

62 The Effect of Bracing Patterns on the Lateral Stiffness of a Simple Frame 862
X. Yu and T. Ji

63 Preventing the Progressive Collapse of Reinforced Concrete Buildings 880
M.N.S. Hadi and T.M.S. Alrudaini

64 Realistic Modeling of High Rise Structures subjected to Progressive Collapse 892
D. Stephen, J. Ye and D. Lam

65 Modelling of Steel Structures for Progressive Collapse Mitigation: The Contribution of Lateral Force Resisting Systems 907
O.A. Mohamed

66 A Conceptual Design of an Underwater Hotel 921
C.T.F. Ross, M. El-Hajj, A.P.F. Little and R.J. Rodriguez-McCullough

67 Numerical Modelling of Extended Endplate Beam-to-Column Joints Subjected to Bending Moment and Axial Force 947
M.C. Rodrigues, L.R.O. de Lima, S.A.L. de Andrade, P.C.G. da S. Vellasco and J.G.S. da Silva

68 Numerical Modelling of the Lateral Buckling of Steel I Beams Subject to Different Boundary Conditions 963
H.A. Sánchez Sánchez and C. Cortés Salas

Base Isolation and Energy Dissipation
Special session organised by A. Dusi

69 Seismic Displacement Control Design of Base Isolated Structures by Magneto-Rheological Dampers based on a Pseudo-Complex-Damping Rule 980
M. Ikenaga, K. Ikago and N. Inoue

70 Low-Cost Seismic Base Isolation using Recycled Tire Cushions 992
Y. Tsompanakis, P.N. Psarropoulos and V. Drosos

71 A Performance Comparison of Isolated, Dissipated and Fixed-Based Steel Buildings 1013
F. Comodini and M. Mezzi

72 A Base Isolation Option for the Full Seismic Protection of an Existing Masonry School Building 1026
M. Mezzi, F. Comodini and L. Rossi

73 Seismic Isolation: Available Devices, Recent Applications and Conditions for their Correct Use 1040
A. Martelli, M. Forni and A. Dusi

74 Seismic Isolation of Nuclear Power Plants 1060
M. Forni and A. Poggianti

75 Analysis of Shake Table Tests on Sliding Seismic Isolators 1081
R. Medeot

Dynamics, Vibration and Stability
Special session organised by J. Náprstek

76 Free Vibration of a Rotating Tapered Rayleigh Beam: A Dynamic Stiffness Method of Solution 1097
J.R. Banerjee and D.R. Jackson

77 Quasi-Periodic Post-Critical Response Types of a Harmonically Excited Auto-Parametric System 1120
J. Náprstek and C. Fischer

78 Modelling Snap-Through of Thin Shallow Arches using Coarse Truss Models 1146
P.G. Papadopoulos, P. Lazaridis, H. Xenidis, P. Lambrou and A. Diamantopoulos

79 Large Displacement Stability Analysis of Columns using the Harmonic Coupled Finite-Strip Method 1161
D.D. Milašinović, A. Borković, Ž. Živanov, P.S. Rakić, M. Hajduković and B. Furtula

80 Enhanced Generalised Beam Theory Buckling Formulations to Handle Transverse Load Application Effects 1180
C. Basaglia and D. Camotim

81 A New Ball Balancer Model and its Application 1204
J.H. Kim, H.S. Seo, J.W. Chang and S.M. Jeon

Offshore Wind Turbines
Special session organised by L. Andersen

82 The Dynamic Stiffness of Surface Footings for Offshore Wind Turbines: Reliability Based Assessment 1214
M.J. Vahdatirad, L. Andersen, J. Clausen and J.D. Sørensen

83 Reliability-Based Assessment of the Natural Frequency of an Offshore Wind Turbine Founded on a Monopile 1232
L. Andersen, M.J. Vahdatirad and J.D. Sørensen

84 The Effect of Soil-Pile Interface Behaviour on Laterally Loaded Piles 1248
V. Zania and O. Hededal

85 Performance-Based Design Optimization of a Transition Piece for Bucket Foundations for Offshore Wind Turbines 1265
A. Nezhentseva, L. Andersen, L.B. Ibsen and E.V. Sørensen

86 Buckling Analysis of Bucket Foundations for Wind Turbines in Deep Water 1285
S. Madsen, L. Andersen and L.B. Ibsen

Probabilistic Approaches to Structural Mechanics
Special session organised by A. Elhami

87 A New Pattern Recognition Method for Parametric Modelling of Random Fields 1300
S. Klostermann, D. Vogt, S. Lippert and O. von Estorff

88 Advanced Response Surface Method for Structural Reliability 1313
D.L. Allaix, V.I. Carbone and G. Mancini

89 Reliability Based Design Optimization Analysis of Hydroformed Welded Tubes 1327
B. Radi, A. El Hami and A. Cherouat

90 Reliability-Based Design of Non-Linear Timber Structures subject to Seismic Loading 1339
H. Riahi, Ph. Bressolette, R. Moutou Pitti, A. Chateauneuf and E. Fournely

91 A New Approach for the Full Characterization of the Optimal Point of Stochastic Functions 1355
R.H. Lopez, J.E.S. de Cursi and A. El-Hami

Optimal Structural Design and Control under Stochastic Uncertainty
Special session organised by K. Marti, T. Vietor and G.I. Schuëller

92 On Optimal Topologies for the Case of Uncertain Load Positions 1368
J. Lógó, D.B. Merczel and L. Nagy

93 Solving Random Linear Problems: Expected Value Linear Programming 1380
I. Deák

94 Coupling Boundary Element Reliability Algorithms applied to Probabilistic Analysis of Crack Propagation in Structures subject to Fatigue 1393
E.D. Leonel, W.S. Venturini and A. Chateauneuf

95 Stochastic Optimal Open-Loop Feedback Control 1412
K. Marti and I. Stein

Topology and Shape Optimization
Special session organised by V. Pomezanski

96 The use of Topology and Shape Optimization of Trusses in Earthquake Architecture 1431
S. Šilih, S. Petrovčič and V. Kilar

97 Optimizing Construction Parameters of Customized Products with Conflicting Requirements 1447
E. Türck, A. Hortop, T. Vietor and S. Pullwitt

98 Perimeter and Checkerboard Control of a Structure during Topology Optimization 1458
V. Pomezanski

99 Modified Subgradient Methods for Remeshing Based Structural Shape Optimization 1470
D.N. Wilke

Computational Modelling and Analysis on Structures under Extreme Loading
Special session organised by R.Y. Xiao

100 Studying Aircraft Impacts to Extend the Operating Lifetime of Structures 1485
G. Thillard, C. Baillis, R. Filippi and L. Auge

101 Stability of Steel Structures subject to Fire using OpenSees 1504
P. Kotsovinos and A. Usmani

102 Finite Element Analysis of the Punching Shear Behaviour of Fibre Reinforced Interior Flat Slab-Column Connections 1515
C.S. Chin, R.Y. Xiao, Z.W. Gong and R.T. Zhang

103 Numerical Modelling of Beam-to-Column Connections in Fire 1523
R.Y. Xiao, Z. Gong, C.S. Chin and S. Vary

Nuclear Power Plant and Related Analysis
Special session organised by M. Domaneschi

104 A Temperature Distribution Model for a Nuclear Waste Prototype Repository 1536
J. Novak

105 Modelling of Fatigue-Type Seismic Damage for Nuclear Power Plants 1544
T.J. Katona

106 Numerical Investigations of a Base Isolation System for Nuclear Power Plants: Safety Domain Definition and Analytical Model Identification 1560
G. Bianchi, L. Corradi Dell'Acqua, M. Domaneschi, D. Mantegazza and F. Perotti

Modelling of Tidal Flows and Material Transport
Special session organised by M. Hartnett

107 Adaptive Mesh Multi-Scale Modelling of Tidal Hydraulics and Material Transport 1578
S. Nash and M. Hartnett

108 Dilution of Effluents into the Gulf of Patras: Winter Regime and Glafkos Stream Influence 1592
N.Th. Fourniotis and G.M. Horsch

109 A Performance Assessment Protocol for Structured Mesh Multi-Scale Models 1606
S. Nash and M. Hartnett

Geographical Information Systems and Computer Aided Design Software

110 The Role of GIS and CAD Software as Aids to Sustainable Development of Wind Farm Projects 1619
J.M. Towns

111 An Industrial Knowledge Collaborative CAD System for Scaffolding Structures 1658
S. O'Neill, H. Zhang and M. Pawelak

Imaging Techniques

112 Detection of Bolt Load Loss in Metallic Bolted Joints using a Time Reversal Imaging Technique 1671
C.P. Providakis, K.D. Stefanaki and M.E. Voutetaki

113 Application of the Digital Image Correlation Method to Micro Hole Drilling 1682
S.H. Tung, M.H. Shih and J.C. Kuo

114 Innovative Three Dimensional Digital Image Correlation Technology for Dynamical Measurement 1694
M.H. Shih, S.H. Tung and W.P. Sung

Mesh Generation

115 Preparation of the Sizing Field for Volume Mesh Generation 1707
B. Głut and T. Jurczyk

116 The Insertion of Metric Sources for Three-dimensional Mesh Generation 1717
T. Jurczyk and B. Głut

High Performance Computing

117 Scalable TFETI based Dynamic Contact Algorithm 1730
J. Dobiáš, S. Pták, Z. Dostál, A. Markopoulos, T. Kozubek and T. Brzobohatý

118 Parallel Asynchronous Schwarz Alternating Method for Obstacle Problems on Grid Computing 1745
M. Chau, T. Garcia and P. Spiteri

119 Modelling of Chemical Reactors using Supercomputers 1765
I.G. Chernykh

120 Dynamic Analysis of Structures on Multicore Computers: Achieving Efficiency through Object Oriented Design 1773
R.I. Mackie

Elasto-Plastic Analysis

121 The Incremental Plasticity Method Applied to the Drucker-Prager Material Model 1786
D. Rakic, M. Zivkovic, S. Vulovic, D. Divac and N. Grujovic

122 A Nonlinear Algorithm for the Analysis of Elastoplastic Structures Modelled with Mixed Finite Elements 1796
A. Bilotta, G. Garcea and L. Leonetti

Materials Modelling

123 The Effect of Strain Rate on the Total Response of a Structure subject to a Moving Load 1808
H. Aied and A. González

124 Multi-scale Analysis of Heat Transport in Hydrating Concrete Structures 1826
L. Jendele, V. Šmilauer and J. Červenka

125 Identification of Micromechanical Properties on Metal Foams using Nanoindentation 1840
J. Němeček, V. Králík, J. Vondřejc and J. Němečková

126 Thermoelastic Behaviour of Masonry-Like Solids with Temperature-Dependent Young's Modulus 1852
M. Girardi, C. Padovani, A. Pagni and G. Pasquinelli

127 Thermo-Mechanical Modelling of Continuous Casting Primary Zones 1873
M. Halilovič, N. Mole and B. Štok

Porous Materials

128 Modelling of Electrokinetic Processes in Civil and Environmental Engineering Applications 1891
J.M. Paz-Garcia, B. Johannesson, L.M. Ottosen, J.M. Rodriguez-Maroto and A.B. Ribeiro

129 Modeling Non-Isothermal Poroelastic Structures using Quaternions 1909
M.C. Suárez-Arriaga

Meshless Methods

130 Locking-Free Analysis of Shear-Deformable Beams by Coupling Finite Element and Meshfree Methods 1929
R.E. Erkmen and M.A. Bradford

131 Analysis of Errors in Local Meshless Methods with Different Domain Discretizations 1949
R. Trobec and G. Kosec

Isogeometric Analysis

132 Comparison of Numerical Quadrature Schemes in Isogeometric Analysis 1966
D. Rypl and B. Patzák

Developments in Finite Element Technology and Modelling

133 Interfacing Two Finite Element Solvers for Adaptive Analysis of Heat Transfer 1976
J. Kruis and P. Šolín

134 Numerical Analysis of Dam and Rock Mass Interaction 1986
M. Zivkovic, S. Vulovic, D. Divac, R. Slavkovic and N. Grujovic

135 Conformal Cylindrical Contact Force Model Verification using a Finite Element Analysis 1994
C. Pereira, A. Ramalho and J. Ambrósio

136 Analysis of Adhesive Failure Criteria in Structural Joints 2010
M.A. Madrid-Pérez, R. Castañeda-Balderas and A. Díaz-Díaz

Boundary Element Method

137 A Three-Dimensional Beam including Torsional Warping and Shear Deformation Effects arising from Shear Forces and Secondary Torsional Moments 2028
V.G. Mokos and E.J. Sapountzakis

138 Nonlinear Inelastic Analysis of Beams on a Nonlinear Foundation 2048
E.J. Sapountzakis and A.E. Kampitsis

Discrete Element Methods

139 The Assessment of the Influence of Extreme Temperature on Fiber Reinforced Concrete using the Free Hexagon Method 2061
P. Procházka and Š. Pešková

Particle Methods

140 An Infinitesimal Eccentric Rotational Damping Model for Rolling Resistance of Circular Particles 2079
Y.L. Chang, T.H. Chen and M.C. Weng

Computational Fluid Dynamics

141 A Numerical Study of the Effects of Wind acting in Different Directions on Clad Scaffolds Erected around a Low-rise Building 2089
C.A. Cortes-Quiroz, H. Irtaza and R.G. Beale

142 The Effects of Tidal Stream Turbines on Hydrodynamics and Flushing Properties 2126
M. Hartnett, S. Nash, N. O'Brien, F. O'Donncha and A. Olbert

Application of Optimization Models in Civil and Structural Engineering

143 The Solution of N-Multiobjective Optimization Problems using Modified Normal Boundary Intersection and Normal Constraint Methods 2139
R.S. Motta, S.M.B.A. da Silva and P.R.M. Lyra

144 Application of Surrogate Based Optimization to Reservoir Engineering Problems 2158
S.M.B. Afonso, B. Horowitz, R.B. Willmersdorf, J.D. Lira Junior and J.W.O. Pinto

145 Optimal Design Comparisons for a Prestressed Concrete Beam Designed using the ACI Code, BS8110 and Eurocode Requirements 2172
K.A. Taib, N. Kasim and N. Mohamad Basir

146 Competitiveness of Reinforced Concrete Floor Systems 2181
I. Merta and S. Kravanja

147 Optimisation of a Cantilever Retaining Wall 2192
N. Kasim and K.A. Taib

Design Optimization and Sensitivity Analysis

148 Experimental Verification of a Numerical Model of a Vertical Machining Centre 2202
J. Kosmol and P. Wilk

149 Optimal Design of Extrusion Dies in Metal Forming using the Finite Element Method 2211
A. Lotfi

150 Practical Recommendations on the Use of Moving Least Squares Metamodel Building 2222
E.L. Loweth, G.N. de Boer and V.V. Toropov

Reduced Order Models

151 Vibration Reduction of Structural-Acoustic Coupled Problems using Piezoelectric Shunt Damping Techniques 2235
W. Larbi, J.-F. Deü and R. Ohayon

152 A Reduced-Order Modeling Method based on the Proper Generalized Decomposition 2250
C. Heyberger, P-A. Boucard and D. Neron

Construction Engineering

153 Understanding Construction Bidding Behaviour Using Data Visualization and Data Mining 2261
T.P. Williams

154 A Methodology for Managing Electricity related Hazards in Construction Sites 2270
A. Xanthopoulou and A.P. Chassiakos

Recycled Aggregate Concrete

155 A Modified Algorithm for Assessing the Optimal Mixture of Concrete made with Recycled Aggregates 2286
C.Y. Chang, R. Huang, P.C. Lee and Y.Y. Tyan

Water Resources Management

156 Correction of Demand Patterns on the Basis of Pressure Measurements 2298
T. Koppel and A. Vassiljev

157 Methodological Overview of a Coupled Water Resources Management Model System 2307
Zs. Kozma and L. Koncsos

Energy Resources

158 Design of an Underwater Drilling Rig 2327
C.T.F. Ross, R.J. Rodriguez-McCullough, A.P.F. Little and M. El-Hajj

159 Optimizing Geothermal Energy Utilization in Bóly 2345
J. Pálné Schreiner and A. Csébfalvi

Aluminium Structures

160 Hot Spot Stress Comparisons for Aluminium Lifting Brackets 2354
J.W. Bull and F. Bai

161 Buckling Analysis Results for an Aluminium Shell Designed to Eurocode 9 Part 1-5 2366
J.W. Bull and D.C. Gibson

162 Parametric Analysis of Welded Aluminium T-Stub Connections 2379
G. De Matteis, T. Naqash and G. Brando

Timber Engineering

163 Simplified Finite Element Dynamic Analysis of Wood Floors Using OpenSees 2401
B. Coryell and A. Ebrahimpour

164 Evaluation of the Shear Constant of a Timber Beam using a Photogrammetric Approach 2419
H. Zhang, A. Mohamed and Z. Xiao

165 Numerical Analysis of Coupled Water Transport in Wood with a Focus on the Coupling Parameter Sorption 2428
T. Hozjan, G. Turk, U. Rodman and S. Svensson

Reinforced Concrete Modelling

166 Numerical Simulation of Chloride Front Movement into Stressed Reinforced Concrete 2437
F. Mukhtar and A.H. Al-Gadhib

167 Three-Dimensional Solid Finite Element Modelling and Analysis of Precast Hollow Core Floors 2451
D.F. Hodge, B.D. O'Rourke, J.J. Murphy and J.R. Harrington

Seismic Structural Engineering

168 Probabilistic Analysis of the Earthquake Resistance of Spatial Structures 2468
M. Danieli, J. Bloch and I. Alperin

169 A New Method of Seismic Analysis for Reinforced Concrete Frames 2481
K. Pohl and J. Máca

170 Optimum Multi-Modal Seismic Control Design of High-Rise Buildings using Tuned Viscous Mass Dampers 2495
K. Ikago, K. Saito and N. Inoue

171 Development of a Finite Element Model of a Church damaged during the 2009 L'Aquila Earthquake 2515
G. De Matteis, E. Criber and G. Brando

172 Numerical Calibration of a Simplified Procedure for the Seismic Behaviour Assessment of Masonry Building Aggregates 2530
A. Formisano, G. Florio, R. Landolfo and F.M. Mazzolani

173 Multi-Criteria Decision Methods for Structural Modification Interventions: Vertical Addition and Seismic Retrofitting 2558
A. Formisano, T. De Lucia and F.M. Mazzolani
