

2011 IEEE International Symposium on Computer-Aided Control System Design

(CACSD 2011)

**Denver, Colorado, USA
28-30 September 2011**

**IEEE Catalog Number: CFP11CAC-PRT
ISBN: 978-1-4577-1066-7**

TABLE OF CONTENTS

COMPUTING AND CONTROL

Dynamic Resource Allocation in Urban Settings: "Smart Parking" Approach	1
<i>Yanfeng Geng, Christos G. Cassandras</i>	
On the Optimal Design of Hold-Zero Control for Networked Control Systems with Control Missing	7
<i>Xu-Guang Li, Wenjuan Jiang, Arben Cela, Silviu-Iulian Niculescu</i>	
An Experimental Evaluation of Akamai Adaptive Video Streaming Over HSDPA Networks	13
<i>Luca De Cicco, Saverio Mascolo, Chaouki T. Abdallah</i>	
Incentivizing Cooperation in Sensor and Control Networks	19
<i>Joud Khoury, Chaouki T. Abdallah, Jorge Chrichigno</i>	
Control in Computing Systems: Part I	25
<i>Jose Marcio Luna, Chaouki T. Abdallah</i>	
Control in Computing Systems: Part II	32
<i>Jose Marcio Luna, Chaouki T. Abdallah</i>	

ROBUST MODEL-BASED CONTROL: PART I

Robustness Preserving Antiwindup: Examples and Counterexamples	37
<i>William Paul Heath, Rafael Mauricio Morales, Guang Li</i>	
Robust Suboptimal Control Over Lossy Networks Using Extended Input Schemes	43
<i>Markus Koegele, Rolf Findeisen</i>	
Efficient Polynomial-Time Outer Bounds on State Trajectories for Uncertain Polynomial Systems Using Skewed Structured Singular Values	49
<i>Masako Kishida, Philipp Rumschinski, Rolf Findeisen, Richard D. Braatz</i>	
Robust Model Predictive Control: The Random Convex Programming Approach	55
<i>Giuseppe Calafiore, Lorenzo Fagiano</i>	
A New Approach to Stabilization of Uncertain Nonlinear Systems	61
<i>kai liu, Dengfeng Sun, Yu Yao, Venkataramanan Balakrishnan</i>	
A New Condition and Equivalence Results for Robust Stability Analysis of Rationally Time-Varying Uncertain Linear Systems	67
<i>Graziano Chesi</i>	

OPTIMIZATION

Min-Max Approximate Dynamic Programming	73
<i>Brendan O'Donoghue, Yang Wang, Stephen P. Boyd</i>	
Symbolic Computer Algebra Algorithms for Factorizations of Sylvester Mappings with Applications to the Production of Linear Matrix Inequalities in Systems and Controls	81
<i>Mauricio C. de Oliveira</i>	
Vector Optimal Smoothing Spline Curves with Constraints	87
<i>Hiroyuki Fujioka, Hiroyuki Kano</i>	
Optimal Control Software for Constrained Nonlinear Systems with Delays	93
<i>John T. Betts, Stephen L Campbell, Karmethia Thompson</i>	
Extension of the GarSD-Toolbox: Polynomial Method for Guaranteed Performance Design of Sampled-Data Control Systems with Non-Zero Static Error and Pure Delays	99
<i>Vladislav Rybinskii, Efim N. Rosenwasser, Bernhard P. Lampe</i>	
Energy Amplification in Channel Flow Over Riblets	105
<i>Stephen Duncan, Antonis Papachristodoulou</i>	

ANALYSIS AND CONTROL OF UNCERTAIN SYSTEMS

Distributed Connectivity Preservation of a Team of Single Integrator Agents Subject to Measurement Error	111
<i>Farzad Salehisadaghiani, Amir Ajorlou, Amir G. Aghdam</i>	

Multiobjective Robust Discrete Dynamic Output-Feedback Control Synthesis Based on Closed-Loop Reference Model	117
<i>Wagner Eustaquio Gomes Bachur, Eduardo Nunes Goncalves, Valter J. S. Leite, Reinaldo Martinez Palhares</i>	
LFT-Free μ-Analysis of LTI/LPTV Systems	123
<i>Yun-Bo Zhao, Jongrae Kim, Declan G. Bates</i>	
A Set of μ-Analysis Based Tools to Evaluate the Robustness Properties of High-Dimensional Uncertain Systems	129
<i>Clement Roos, Fabien Lescher, Jean-Marc Biannic, Gilles Ferreres, Carsten Doll</i>	
Robust Decentralized PI Observer for Linear Interconnected Systems	135
<i>Bahram Shafai, Rasoul Ghadami, Mehrdad Saif</i>	
Synchronization Seeking in Multi-Agent Dynamic Systems with Communication Uncertainties	141
<i>Dongkun HAN, Graziano Chesi, Yeung Sam Hung</i>	

ROBUST MODEL-BASED CONTROL: PART II

New Insights into the Dynamic Stability of Wholesale Electricity Markets	147
<i>Victor Zavala, Mihai Anitescu</i>	
Universal Approximation with Error Bounds for Dynamic Artificial Neural Network Models: A Tutorial and Some New Results	153
<i>Kwang-Ki Kim, Ernesto Rios Patron, Richard D. Braatz</i>	
Standard Representation and Stability Analysis of Dynamic Artificial Neural Networks: A Unified Approach	159
<i>Kwang-Ki Kim, Ernesto Rios Patron, Richard D. Braatz</i>	
Subspace System Identification for CO₂ Recovery Processes	165
<i>Ricardo Dunia, Gary Rochelle, S. Joe Qin</i>	

CONTROL

Feedback Design for the Acrobot Walking-Like Trajectory Tracking and Computational Test of Its Exponential Stability	171
<i>Milan Anderle, Sergej Celikovsky</i>	
Discrete-Time Gain-Scheduled Output-Feedback Controllers Exploiting Inexact Scheduling Parameters	177
<i>Masayuki Sato</i>	
Robust State Feedback LMI Methods for Continuous-Time Linear Systems: Discussions, Extensions and Numerical Comparisons	183
<i>Ricardo C. L. F. Oliveira, Mauricio C. de Oliveira, Pedro L. D. Peres</i>	
Observer-Based Controller Synthesis for LPV Descriptor Systems Using Dilated LMI Conditions	189
<i>Housseem Halalchi, G. Iuliana Bara, Edouard Laroche</i>	
Adaptive Controller Design for a General Class of Sequentially Interconnected SISO Linear Systems with Noisy Output Measurements and Partly Measured Disturbances	195
<i>Sheng Zeng</i>	
A Performance-oriented, Non-iterative, Local Design Method for Mismatch-based Anti-windup Compensators	201
<i>Andreas Ortseifen, J. Adamy</i>	

NEW TRENDS IN WIND TURBINE CONTROL SYSTEMS

Estimation of Wind Turbulence Using Spectral Models	207
<i>Mohsen Soltani, Torben Knudsen, Thomas Bak</i>	
A Wind Farm Controller for Load and Power Optimization in a Farm	212
<i>Maryam Soleimanzadeh, Arno J. brand, Rafal Wisniewski</i>	
Wind Turbine Modeling Using the Bond Graph	218
<i>Tore Bakka, Hamid Reza Karimi</i>	
Optimal Control of a Ballast Stabilized Floating Wind Turbine	224
<i>S. Christiansen, Torben Knudsen, Thomas Bak</i>	
A Computational Method to Optimal Control of a Wind Turbine System Using Wavelets	230
<i>Hamid Reza Karimi</i>	

IDENTIFICATION

Maximally Reduced Observers for Linear Time Varying DAEs	236
<i>Karen Bobinyec, Stephen L Campbell, Peter Kunkel</i>	
Online Identification of Unswitched Linear Output Error Models	242
<i>Jiadong Wang, Tongwen Chen</i>	
On a Control Oriented Notion of Finite State Approximation	248
<i>Danielle C. Tarraf</i>	
A Polynomial Chaos Based Bayesian Approach for On-Line Parameter Estimation and Control	254
<i>Faidra Stavropoulou, Johannes Muller</i>	
Numerical Simulation of Continuous-Time Stochastic Dynamical Systems with Noisy Measurements and Their Discrete-Time Equivalents	260
<i>Zaher Kassas</i>
