

2011 International Conference on Electromagnetics in Advanced Applications

(ICEAA 2011)

**Torino, Italy
12-16 September 2011**

Pages 1-728

**IEEE Catalog Number: CFP1168B-PRT
ISBN: 978-1-61284-976-8**

TABLE OF CONTENTS

		pages	
SESSION 1:Nano-Magnetism, Magnetic Materials and Applications, Organized by V. Metlushko			
Sautner J., PUNCHIHEWA K., Ilic B., Vavassori P., Metlushko A., Metlushko V.	3-D Magnetic Nanostructures	1100	1103
Vavassori P., Porro J.M., Berger A., Grimsditch M., Metlushko V., Ilich B.	Artificial tuning of magnetization reversal in nano-sized magnets	631	631
Allenspach R., Eib P., Schwarz F., Bischof A.	High-resolution imaging of domain walls under the influence of spin currents	130	131
Bhat V., Woods J., Hastings J.T., De Long L.E., Sklenar J., Ketterson J.B., Heinonen O., Rivkin K., Metlushko V.	Low-field FMR studies of magnetic confinement effects in patterned ferromagnetic thin films	718	721
Lin S.-H., Milosevic M.V., Peeters F., Janko B.	Novel Andreev bound states in nanostructured superconductors	1084	1085
Moutafis C., Rhensius J., Bisig A., Büttner F., Barton C., Morrison C., Thomson T., Tieg C., Schaffert S., Pfau B., Günther C.M., Eisebitt S., Klau M.	Skyrmions in Perpendicular Magnetic Anisotropy Dots: Imaging and Simulations	1121	1123
Cowburn R.P.	Towards 3-dimensional magnetic data storage	981	981
SESSION 2:Future Challenges in Mathematical and Computational Electromagnetics and Its Applications, Organized by G.N. Georgiev and M.N. Georgieva-Grosse			
Bonev I.B., Barrio S.C.D., Franek O., Pedersen G.F.	A Modified Metamaterial Inspired Antenna Solution for Reduction of the Specific Absorption Rate in the Head	769	772
Hasanoglu (Hasanov) E.	Beam Tracing Theory in Minkowski Space	1440	1441
Mesa F., Medina F., Garcia-Viguera M., Rodriguez-Berral R., Gomez-Tornero J.L.	Circuit Approach for a General Study of Frequency Selective Surfaces	122	125
Georgieva-Grosse M.N., Georgiev G.	Comparative Study on the Computational Modeling and Application of the Classes of A, B, C Numbers	660	663
Withington S., Thomas C.N., Craeye C.V.	Determining the natural absorption and radiation modes of lossy periodic structures using energy absorption interferometry	155	158
Kyriacou G.A., Zekios C.L., Lavdas S.J., Lavranos C.S., Aitidis E., Allilomes P.C.	Eigenanalysis of Arbitrarily Shaped 2-D and 3-D Closed and Open-Radiating Structures: A Review	339	342
SESSION 5:Electromagnetic modeling of devices and circuits			
Andriychuk M.I.	Electromagnetic Wave Scattering by Small Bodies and Creating Materials with Desired Permeability: Numerical Implementation	243	246
Al-Jarro A., Bağcı H., Benson T., Sewell P., Vukovic A.	Explicit Solution of the Volterra Integral Equation for Transient Fields on Inhomogeneous Arbitrarily Shaped Dielectric Bodies	668	669
Topa A.L.	Full-Wave Analytical Methods for the Electromagnetic Characterization of Metamaterial Waveguides	1269	1270
Gevorkyan E.	Losses of Electromagnetic Energy in the Time of Interaction of Counter-Propagating Waves in the Absorbing Plate, Placed in a Waveguide	72	74
Yakhno V.G., Yakhno T.M.	Maxwell's equations for bi-anisotropic materials as a symmetric hyperbolic system: theory and computer application	50	53
Sautbekov S., Alkina G.	On the Classical Electrodynamics of Uncharged Particles	847	848
Nilsson B., Nordebo S., Karlsson A., Cinar G.	Simulation of electromagnetic pulses in waveguides at large distances	640	643
Georgiev G.N., Georgieva-Grosse M.N.	Theory of the L Numbers: Definition, Computational Modeling, Properties and Application	544	547
SESSION 6:Applications of Electromagnetic Precursors, Organized by K. Oughstun			
Oughstun K.E.	A Brief Overview of Electromagnetic Precursors	287	290
Bleszynski E.H., Bleszynski M.K., Jaroszewicz T., Albanese R.	Analysis of dispersive effects and enhanced medium penetrability in wide-band pulse propagation through sparse discrete media	235	238

Olson T.E.	Everything is a precursor: The asymptotic singular value decomposition for transmission through absorbing media	335	338
Mojahedi M., Sarris C.	Precursors in Media with Abnormal Group Velocity and Their Applications	1070	1073
Cartwright N.A.	Precursors of chirped pulses in dispersive media	315	318
Palombini C.L., Oughstun K.E.	Reflection and Transmission of Pulsed Electromagnetic Fields through Multilayered Biological Media	283	286
SESSION 7: Electromagnetic theory			
Firouzeh Z.H., Moini R., Sadeghi S.H.H., Faraji-Dana R., Vandenbosch G.A.E.	A new method for transient analysis of a dipole above a lossy ground using quadratic B-spline temporal basis functions	982	985
Tayyar I.H., Buyukaksoy A.	A Wiener-Hopf Analysis of the Coaxial Waveguide Radiator	580	583
Barbiroli M., Carciofi C., Guiducci D., Guidotti A., Tarantino E., Riva G.	ADVANTAGES AND DISADVANTAGES OF THE INTRODUCTION OF IMT SYSTEMS AT 800 MHZ BAND	1184	1188
Semenikhina D.V., Semenikhin A.I.	Electrodynamic model of microstrip rectenna	175	178
Fernández Chapou J.L., Granados Samaniego J., Velázquez Arcos J.M., Vargas C.A.	Electromagnetic drift	331	334
Sorolla E., Mattes M.	Globally convergent algorithm to find the zeros of the cross-product of Bessel functions	291	294
Velázquez Arcos J.M., Vargas C.A., Fernández-Chapou J.L., Granados-Samaniego J.	Resonances on discrete electromagnetic time reversal applications	167	170
SESSION 8: Network Methods Applied to Electromagnetic Field Computation, by P. Russer			
Vairavanathan V., Chang C., Sood N., Sarris C.D.	A Reciprocity-Based Framework for the Efficient Modeling of Antenna-Wireless Channel Interaction	1271	1274
Bajon D., Wane S.	Electromagnetic Modeling and Analysis of Reconfigurable On-Chip and Off-Chip Antenna	1066	1069
Wane S., Bajon D.	Multi-Physics Power-Drive-Level Dependant Equivalent Circuit Models Extraction for Electro-Mechanical Resonators	873	876
Russer J.A., Russer P.	Network Methods Applied to the Computation of Stochastic Electromagnetic Fields	1152	1155
Dionigi M., Mongiardo M.	Network Representations for Wireless Power Transfer Realized with Resonant Inductive Coils	940	943

Chen Z.D., Yu Y.	Node-Based Methods: A Unifying Approach to Developing Numerical Techniques	737	740
Ivrlac M.T., A. Nossek J.	On the association of power-flow with circuit terminals	869	872
So P.	Transmission line matrix algorithms for high performance computing hardware with graphics processing units	929	930
SESSION 11: Numerical Methods in Electromagnetics, Organized by R.D. Graglia and D.R. Wilton			
De Gregorio M., Tiberi G., Monorchio A.	A Characteristic Basis Function (CBF) Approach for the Electromagnetic Radiation by Large Conducting Structures with Apertures	1298	1301
Lancellotti V., de Hon B.P., Tijhuis A.G.	A Domain Decomposition Method for Solving 3-D Complex Structures	195	198
Heldring A., Rius J.M.	Accelerated direct solution of the MoM linear system using block compression and nested factorization	636	639
Francavilla M.A., Jackson D.R., Wilton D.R.	Acceleration of the mixed-potential layered-medium Green's functions for problems with thin layers	1029	1032
Tasic M., Kolundzija B.	Advances in PO driven MoM	1124	1127
Wiedenmann O., Eibert T.F.	An investigation of near-zone preconditioning techniques for integral equation solutions by method of moments	199	202
Yang M.-L., Sheng X.-Q.	Computation of Scattering by Large Inhomogeneous Targets Using Hybrid h- and p-Type Multiplicative Schwarz (h-p-MUS) Preconditioned FE-BI-MLMFA	1342	1345
Canning F.	Designed basis functions for speed and stability	839	842
Polimeridis A.G., Tamayo J.M., Mosig J.R.	Efficient machine precision computation of impedance matrix elements in surface integral equation formulations	1334	1337
Ozdemir N.A., Simovski C., Morits D., Craeye C.V.G.	Efficient Method of Moments Analysis of an Infinite Array of Triangular Nanoclusters in the Optical Frequency Range	359	362
Lezar E., Davidson D.B.	GPU acceleration of electromagnetic scattering analysis using the method of moments	452	455
Bertuch T., Guarín Cardenas G.M., Galvis Salzburg C., Vecchi G.	Improvement of the Efficient Integral Equation Modeling of Printed Antennas on Coated Cylinders	163	166
Alfonzetti S., Borzì G., Salerno N.	Improving the Integral Equation of the Hybrid FEM-RBCI Method	690	693
Jakobus U., Bingle M., Burger W., Ludick D., Schoeman M., van Tonder J.	Method of Moments Accelerations and Extensions in FEKO	62	65
Johnson W.A., Langston W.L., Basilio L.I., Warne L.K.	Modeling Braided Shields Via Multipole Representations for the Braid Charges and Currents	1338	1341

Feng X., HU J., Wang G., Nie Z.	Solving Electromagnetic Scattering from 3D Composite Penetrable Structure and PEC by the IE-FFT method	733	736
Cigánek J., Raida Z.	Temporal discretization schemes of finite element methods: a critical comparison	307	310
Remis R.F.	The FDTD Method and Its Relation to Fibonacci Polynomials	271	274
Marchand R.G., Davidson D.B.	The method of manufactured solutions for the verification of computational electromagnetics.	487	490
Cinosi N.E., Walker S.P., Bluck M.J.	Time-Domain BIE Analysis of Large Electromagnetic Scattering Problems with Impedance Boundary Condition	1172	1175
SESSION 12:Multi-Physics Modeling and Simulations, Organized by J.-F. Lee and Y. Shao			
Bracken J.E., Polstyanko S.V., Pytel S.G., Waldron I.	Coupled Thermal–Fluid–Electrical Simulation for Printed Circuit Board Design	1005	1008
Zhao K., Commens M.H., Lambert N.	Hybridization of different numerical methods using domain decomposition	722	725
Shao Y., Peng Z., Lee J.-F.	Multi-physics Analysis of High-power ICs using Non-conformal Domain Decomposition Method	1058	1061
Songoro H., Gjonaj E., Weiland T.	Numerical simulation of water droplets in presence of strong electric-fields	504	507
Farina D., Hammes P., Thoma P.	Simulation of temperature dependent materials in high-frequency filters using CST STUDIO SUITE™ 2011	1041	1043
SESSION 13:Electromagnetism and Signal Processing for Distributed Radar Sensing, Organized by D. Erricolo, J.T. Parker, M.C. Wicks			
Baker C.J.	Cognition and Radar Systems	1326	1329
Miranda A., Cheney M.	Imaging moving targets in a multi-path environment using multiple sensors	227	230
Fuller D.F., Hack D.E., Sutara S., Tempelis A., Jussaume M., Saville M.A., Jackson J.A.	Integrating electromagnetics and signal processing into new radar algorithms	1330	1333
Sammartino P.F., Tarchi D., Baker C.J.	MIMO radar topology: A systematic approach to the placement of the antennas	114	117
Alqadah H.F., Parker J., Ferrara M., Fan H.	Space-frequency sparse regularization for the linear sampling method	421	424

Moore L.J., Parker J.T., Gorham L.A., Majumder U.K., Minardi M.J., Scarborough S.M.	Staring RF signal processing challenges	279	282
Yazici B., Wang L., Duman K.	Synthetic Aperture Inversion with Sparsity Constraints	1404	1407
Cordill B., Metcalf J., Sequin S.A., Chatterjee D., Blunt S.D.	The Impact of Mutual Coupling on MIMO Radar Emission	644	647
SESSION 14:Electromagnetic measurements			
Peverini O.A., Addamo G., Virone G., Tascone R., Orta R.	A hybrid TSD-RSOL technique for the measurement of non-insertable devices	566	567
Ghofrani P., Amindavar H.	A New Method for Finding the Electrical Charge Distribution	464	468
Koselj J., Bregar V.B.	Analysis of an open-ended coaxial probe measurement system for magnetic materials	187	190
Paffi A., Apollonio F., Colotti R., Aratari G., Mancini S., Lovisolo G.A., Liberti M.	Characterization of a train compartment scenario for the individual exposure assessment	1078	1079
D'Agostino F., Ferrara F., Gennarelli C., Guerriero R., Migliozi M., Spagnuolo D.	Compensation of the probe positioning errors in the spherical NF – FF transformation for elongated antennas	255	258
Savi P., Niyazov U., Maio I.A.	Complex Permittivity Determination from Measured Scattering Parameters of TEM Waveguide	1352	1355
Otto A.J., Reader H.C., Marchand R.G.	Complex Permittivity Measurements of Karoo Soil for the Square Kilometre Array	39	42
Loh T.H., Meng D., Huang Y.	Effects of antenna mount on a spherical scanning measurement of the radiation efficiency of a wire antenna	1176	1179
Abramowicz A., Lewandowski A., Wiatr W.	Electromagnetic and circuit modelling of the pin gap effect in coaxial connectors up to 110 GHz	777	780
Havrilla M.J., Bogle A.E., Hyde IV M.W., Rothwell E.J.	Electromagnetic Material Characterization of Conductor-Backed Media using a NDE Microstrip Probe	656	659
D'Agostino F., Ferrara F., Gennarelli C., Gennarelli G., Guerriero R., Migliozi M.	Laboratory tests on the direct cylindrical NF – FF transformation for volumetric AUTs	1408	1411
Daqys M., Kancleris Z., Raqulis P., Simniskis R.	Resistive sensor for high power microwave pulse measurement	43	46
Dal Forno M., Vescovo R., Craievich P., De Monte R., Borga A., Predonzani M., Ferianis M., Borden T.	The Cavity BPM for the microwave measurement of the transversal position of relativistic electron bunches travelling in a vacuum beam pipe	706	709
Zaoui A., Mitt S., Mesloub A.	Threshold Based Algorithms for UXO Detection Using Magnetometry	1229	1232

SESSION 15:Advances on Synthesis and Analysis of Large-Scale Antenna Arrays, Organized by C. Craeye, A. Massa, G. Oliveri			
Isernia T., Laganà A.R., Iero D.A.M., Morabito A.F.	Analysis and Design of Synthetic Radiometers: Some Tools and Comparisons	969	972
Arts M.J., Maaskant R., Kant G.W.	Analysis of the EMBRACE Aperture Array Antenna by the Characteristic Basis Function Method	959	962
de Lera Acedo E., Razavi-Ghods N., Gonzalez-Ovejero D., Sarkis R., Craeye C.	Compact representation of the effects of mutual coupling in non-regular arrays devoted to the SKA telescope	390	393
Oliveri G., Carlin M., Rocca P., Massa A.	Computationally-Efficient Analytic Techniques for Large Array Synthesis - Feasibility and Real-Implementations	86	89
Buttazzoni G., Comisso M., Vescovo R.	Deterministic and stochastic methods for the synthesis of large-scale antenna arrays	378	381
du Plessis W.P.	Efficient Synthesis of Large-Scale Thinned Arrays Using a Density-Taper Initialized Genetic Algorithm	363	366
Shinohara N., Ishikawa T.	High Efficient Beam Forming with High Efficient Phased Array for Microwave Power Transmission	729	732
Buffi A., Serra A.A., Nepa P., Manara G., Chou H.-T.	Near-Field Focused Planar Microstrip Arrays	761	764
Fuchs B., Skrivervik A., Mosig J.R.	Optimal Polarization Synthesis of Arbitrary Arrays subject to Power Pattern Constraints	118	121
Rajo-Iglesias E., Quevedo-Teruel O.	Thinned array synthesis including radiation pattern diversity in the elements	853	856
SESSION 16:Optical, sub-mm and mm technologies			
Athanasopoulos N.C., Makris D.V., Voudouris K.N.	5th Order Millimeter-wave Substrate Integrated Waveguide Band Pass Filters	98	101
Neumann N., Jennings M., Plettemeier D.	Millimeter Wave Generation with Increased Efficiency Using the Temporal Talbot Effect	371	373
Lioubtchenko D.V., Ovchinnikov V., Chicherin D., Räisänen A.	Millimeter wave phase shifters based on dielectric rod waveguide	789	791
SESSION 18:Frequency selective surfaces			
Elis K., Chabory A., Sokoloff J., Bolioli S.	2D interaction of a Gaussian beam with a dichroic surface for the modeling of quasi-optical systems	682	685
Addamo G., Virone G., Peverini O.A., Tascone R., Orta R.	Experimental Results on Compensated Joints for Large Dielectric Radomes	1275	1276

Lavdas S.J., Lavranos C.S., Kyriacou G.A.	Periodic Structures Eigenanalysis Incorporating the Floquet Field Expansion	1253	1256
SESSION 19:Printed and Conformal Antennas			
Viet H.T., Ha B.V., Kiem N.K., Chien D.N., Zich R.E.	A Compact Printed Extremely-Wideband MIMO Antenna with WLAN Band Rejection	877	880
Cure D., Weller T., Miranda F.	A Comparison Between Jerusalem Cross and Square Patch Frequency Selective Surfaces for Low Profile Antenna Applications	1019	1022
Wolansky D., Raida Z.	Antenna array of E-shaped patches for indoor receiving of the digital TV signal	757	760
Všetula P., Raida Z.	Axisymmetric Horn Antenna Based on TEM - TM - TEM Transform	753	756
Mikulasek T., Lacik J.	Microstrip Patch Antenna Fed by Substrate Integrated Waveguide	1209	1212
Lukes Z., Svobodova J., Raida Z.	Novel Planar Wideband Antennas Designed by Multi-Thread Hybrid Optimization Method	947	950
Colangelo G., Vitiello R.	Shared Aperture Dual Band Printed Antenna	1092	1095
Lacik J., Mikulasek T.	Substrate Integrated Waveguide Rectangular Ring Slot Antenna	1164	1167
SESSION 21:Hybrid Ray, Beam & Numerical Methods, Organized by G. Manara and P.H. Pathak			
Pathak P.H., Phaebua K.	A Uniform Geometrical Theory of Diffraction for Radiation by Antennas on a Smooth Convex Impedance Surface	405	408
Arias Lopez I.F., Letrou C.	Frame decomposition of scattered fields	1261	1264
Ando M., Kohama T., Ito K., Shijo T., Hirano T., Hirokawa J.	High Frequency Locality Embodied in terms of Fresnel Zone Number for Matrix Size Reduction in Method of Moments	1432	1435
Ghavami N., Edwards D.J., Tiberi G., Monorchio A., Manara G.	Huygens Principle based technique for Microwave Imaging of Objects with Inclusions	1044	1047
Calo Casanova A., Pathak P.H., Calvo Ramon M.	Modeling Windmill Interference via Hybrid Parabolic Equation and Equivalent Current Approximation Methods	275	278
Peng Z., Lee J.F.	Plane wave scattering from a partially coated air platform using a non-overlapping surface integral equation domain decomposition method	1412	1415
Daniele V., Lombardi G.	Scattering by a penetrable wedge structure	745	748
SESSION 22:Numerical Methods for Challenging Multi-Scale Problems (HIRF Synthetic Environment), Organized by G. Vecchi and F. Vipiana			

Bandinelli M., Guidi R., Bergigli M., Vecchi G., Vipiana F.	Advanced MoM techniques integrated into a single code to manage complex HIRF environments	1117	1120
Svobodová J., Koudelka V., Raida Z.	Aircraft equipment modeling using neural networks	627	630
Martorelli V., Kazik J., Galgani G., Milani F., Guidi R.	An OCT based modelling tool to fast evaluate statistical e.m. field distribution inside enclosure-like environments	1140	1143
Koudelka V., Svobodova J., Raida Z.	Impedance Network Simplification: A Combinatorial Optimization Approach	632	635
Schröder A., Brüns H.-D., South G., Schuster C.	Investigation of Field Coupling into a Carbon Fiber Aircraft Fuselage with the Method of Moments	311	314
Junqua I., Parmantier J.-P., Ridel M.	Modelling of High Frequency Coupling inside Oversized structures by Asymptotic AND PWB Methods	68	71
Parmantier J.P., Ridel M., Bertuol S., Junqua I., Giraudon C., Girard C., Terrade F., Moreau J.P.	Modelling of HIRF coupling on Complex Cable Architectures	219	222
Francavilla M.A., Vipiana F., Arianos S., Vecchi G.	Multilevel Domain Differentiated Analysis of Large Multi-Scale Structures inside the HIRF-SE Framework	944	946
Schippers H., Verpoorte J.	Multiscale electromagnetic modelling of metal braids	1025	1028
Ridel M., Savi P., Alberti M., Parmantier J.-P., Maio I.A., Nardone F.	Numerical Simulation of Aeronautic Cable Topology and Experimental Validation	1356	1359
Kunze M., Reznicek Z., Munteanu I., Tobola P., Wolfheimer F.	Solving large multi-scale problems in CST STUDIO SUITE - An aircraft application	110	113
Tallini D., Dawson J.F., Flintoft I.D., Kunze M., Munteanu I.	Virtual HIRF tests in CST STUDIO SUITE™. A Reverberant environment application	849	852
SESSION 24: Radar cross section and Radar imaging			
Eyraud C., Kerroum I., Nounouh S., Tortel H.	Characterization of the Near-Subsurface with a Single Frequency Multistatic Microwave System	1002	1004
Capozzoli A., Curcio C., Iudice I., Liseno A., Savarese S.	Fast imaging of vegetation on GPUs based on Non-Uniform FFTs	1205	1208
Marechal C., Pottier E., Allain-Bailhache S., Meric S., Hubert Moy L., Corgne S.	One year spaceborne full polarimetric time-series for mapping wetland processes	678	681
Privalova T., Yukhanov A.Y., Yukhanov Y.V.	PLANE WAVE SCATTERING ON VAN-ATTA ELECTROMAGNETIC REFLECTOR	347	350
Johnson D.G., Calleija M., Brooker G.M., Nettleton E.	Terrain mapping at the CM level using a real-aperture MMW monopulse radar	432	435
SESSION 26: Antennas and arrays			

Athanasopoulos N.C., Petropoulos I.K., Voudouris K.N.	A Phased Array Unit for Adaptive Backhauling in WiMAX Relay Networks	94	97
Kadlec P., Štumpf M., Raida Z.	Adaptive beam-forming in time domain	299	302
de Villiers D.I.L., Lehmensiek R.	Analytical Evaluation of the Efficiency Improvement of Shaped over Classical Offset Dual-Reflector Antennas Including Sub-Reflector Diffraction	191	194
Virone G., Addamo G., Peverini O.A., Tascone R.	Broadband Array Element for the SKA Low-Frequency Aperture Array	560	561
Comisso M., Vescovo R.	Fast power synthesis for reconfigurable arrays with dynamic range ratio reduction	374	377
Jacobs O.B., Odendaal J.W., Joubert J.	Quad ridge horn antenna with elliptically shaped sidewalls	259	262
SESSION 27: Special Session MATHEMATICAL ADVANCES IN ELECTROMAGNETICS, Organized by J.M. Arnold and P.D.Smith			
Yiğit H., Dikmen F., Tuchkin Y.A.	Analytical Regularization Analysis of Electromagnetic Wave Diffraction by a PEC Hollow Cylindrical Strip	520	523
Vinogradova E.D.	Diffraction of Plane Wave by Finite Ensemble of Cylindrical Cavities of Arbitrary Shape	1350	1351
Tuchkin Yu.A., Suvorova O.A.	Efficient calculation of Fourier coefficients of Green's functions on smooth contour	1189	1192
Remis R.F.	Electromagnetic Wave Propagation in a Time-Variant Medium: A State-Space Approach Via the Spatial Fourier Domain	263	266
Askarpour A.N., Uslenghi P.L.E.	Exact radiation from a prolate spheroidal antenna coated with isorefractive and anti-isorefractive confocal layers	231	234
Tsitsas N.L.	Inverse medium problems for spherical scatterers in the low-frequency region	1148	1151
Safonova G., Vinogradova E.D.	Investigation of Higher Propagating Modes in Shielded Transmission Lines with Arbitrary Profile Conductors: Rigorous approach	436	439
Shafalyuk A., Vinogradova E.D.	On Eigenfrequencies of an Open Resonator: Rigorous Approach	1306	1309
Knockaert L.	On the analytic calculation of multiple integrals in electromagnetics	595	598
Daniele V., Lombardi G.	On the Scattering by a Quarter-Plane	749	752
van Beurden M.C.	Scattering by periodic dielectric media via a spectral domain-integral equation: maintaining efficiency and accuracy	967	968
de Hon B.P., Arnold J.M.	Stable self-consistent Green's function diakoptics without spurious recurrences	1048	1051

Arnold J.M.	Time domain discrete Green's functions for wave equations on simplicial networks	823	826
Shafalyuk O., Smith P.D.	Time-Domain Simulation of Electromagnetic Scattering in Axially-Symmetrical Open Resonators	1302	1305
Ioannidou M.P., Vardiambasis I.O., Moneda A.P.	TM-polarized plane wave scattering by an eccentrically loaded slit PEC cylinder	481	484
SESSION 28: Electromagnetic applications to nanotechnology			
Wu B.-I.	Asymptotic expressions for guided TM and TE waves in a graphene parallel-plate waveguide	460	463
Huang Y., Wu L.-S., Mao J.	Design of a switchable high impedance surface based on single-layer doped graphene for THz application	556	559
Aksornnum S., Watcharakitchakorn O., Silapunt R.	The Investigation of Read Layers Damage during the Electromagnetic Curing Process of Head Gimbal Assembly	183	186
Katsounaros A., Rajab K.Z., Hao Y., Mann M., Milne W.I.	X-Band Characterization of Multi-Walled Carbon Nanotube Films	516	519
SESSION 29: Materials and Metamaterials			
Rezaee P., Nasr Esfahani N., Knoechel R., Tayarani M.	Active Learning Method for Designing Miniaturized Waveguide Filters Loaded by Broadside-Coupled Split Ring Resonators	1074	1077
Panpradit W., Sonsilphong A., Wongkasem N.	Chirality control in metamaterials by geometrical manipulation	540	543
Zhu S., Ford K.L., Tennant A., Langley R.J.	Electrically Small Triple-band SRR Antenna	831	834
Michiels B., Bogaert I., Fostier J., De Zutter D.	Homogenization of an Ensemble of Swiss Rolls by means of the MLFMA	9	11
Nour B., Breinbjerg O.	Investigation of Bandwidth, Efficiency, and Quality Factor for Circular Patch Antennas with Magneto-Dielectric Substrate	815	818
Nasr Esfahani N., Rezaee P., Schünemann K., Knöchel R., Tayarani M.	Miniaturized Coaxial Cylindrical Cavity Filters Based on Sub-Wavelength Metamaterial Loaded Resonator	1086	1089
Sonsilphong A., Wongkasem N.	Novel Technique for High Refractive Index Manifestation	536	539
Tsuchiya A., Sugama H., Hidaka N., Miyamoto K., Tsujino S., Hashimoto O.	Temperature dependence of complex permittivity for polyimide film used in flexible printed circuit in microwave band	417	420
SESSION 30: Fields and Waves, Organized by K. Langenberg and L. Klinkenbusch			
Langenberg K.J.	A close look at creeping waves	495	495

Preisner T., Mathis W.	About modeling aspects for the simulation of magnetic force microscopes	548	551
Glahn T., Chiavaccini E., Schuhmann R.	FIT-TD Simulation of Non-linear Materials for Second Harmonic Generation in Periodically Poled Lithiumniobate Waveguides	27	30
Cimala C., Clemens M., Gödel N., Streckert J., Zang M., Wolfheimer F.	GPU-Accelerated time domain electromagnetic field simulations for numerical EMC testing applications	1017	1018
Greving G., Biermann W.-D., Mundt R.	Integrated Hybrid Scattering Analysis within System Simulations with Focus on RCS and Wind Turbines	710	713
Demarcke P., Vande Ginste D., Rogier H.	Low-rank Properties in the Hybrid Finite Element-Boundary Integral Method	785	788
Zhong Y., Lambert M., Lesselier D., Chen X.	On a new stable modeling of dyadic Green's functions of electrically uniaxial planar-layered media	215	218
Gustafsson M., Sjöberg D., Vakili I.	On the extraordinary transmission through sub-wavelength apertures in perfectly conducting sheets	1233	1236
Moeller C., Klinkenbusch L.B.	Shielding effectiveness for transient near-field sources	477	480
SESSION 31: Integral Equations and Hybrid Methods			
Altuncu Y., Temel R.	A Buried Object Approach (BOA) for the Scattering of Electromagnetic Waves from 2D Rough Surfaces	1113	1116
Bluck M.J., Cinosi N.E., Walker S.P.	A Multilevel Hierarchical Preconditioner for the Electric Field Integral equation	1180	1183
Trinh X.D., Brennan C., Mullen M., Bradley P.	Accelerated forward backward iterative solution for scattering from randomly rough lossy surfaces.	1290	1293
Arnautovski-Toseva V.	Approximate Closed-Form Solution of the Electric Field Due to HED within Finitely Conductive Earth	670	673
Martinaud J.-P., Nosal S., Salin G.	Domain decomposition techniques for the scattering by partly BOR objects – Application to the “antenna-radome” modeling	144	147
Lavranos C.S., Lavdas S.J., Kyriacou G.A.	Eigenvalue analysis of planar or curved shielded or open printed transmission lines loaded with full tensor anisotropic materials	1241	1244
Bogaert I., Cools K., Andriulli F.P., De Zutter D.	Low Frequency Scaling of the Mixed MFIE for Scatterers with a Non-Simply Connected Surface	951	954
Khairi R., Coatanhay A., Khenchaf A.	Modeling of Electromagnetic Waves Scattering From Sea Surface Using Higher-Order Moment Method (HO-MoM) and NURBS Patch	694	697

Naeem M., Maaskant R., Kant G.W., Kildal P.-S., Mittra R.	The Method of Equivalent Dipole Moments (MEDM) Combined with CBFM for the Fast and Accurate Solution of Dielectric Scattering Problems	1013	1016
Michiels B., Fostier J., Peeters J., Bogaert I., De Zutter D.	Towards an Asynchronous, Scalable MLFMA for Three-Dimensional Electromagnetic Problems	66	67
SESSION 32: Finite Methods			
Tan T., Taflove A., Backman V.	A Proposed Perfectly Matched Stratified Medium FDTD TFSF Sourced by Inhomogeneous Plane Waves	921	924
Franek O.	Efficient Calculation of Near Fields in the FDTD Method	1009	1012
Marais N., Davidson D.B.	High Order Explicit Convolution Free Time-domain Finite Element PML Implementation	1132	1135
Stefanski T.P., Chavannes N., Kuster N.	Hybrid OpenCL-MPI parallelization of the FDTD method	1201	1204
Guiffaut C., Boudy P., Rouvrais N., Ben'Mhamed B., Pecqueux B., Reineix A.	New thin coated wire formalism for FDTD method	386	389
Panaretos A.H., Diaz R.E.	Subcell Modeling of a Plasmonic Drude Nanosphere	211	214
SESSION 36: High-Power Electromagnetics, Organized by D.V. Giri			
Vega F., Rachidi F., Mora N., Daout B., Sallin M.	Design and Optimization of Mesoband Radiators using Chain Parameters	1310	1313
Nyffeler M., Giri D.V.	Design of compact helical antenna at 200 MHz	619	622
Gardner R.L.	Dr. Carl E. Baum's contributions to our understanding of the lightning return stroke	75	77
Kohlberg I., Szu H.	Electromagnetic Theory of Iris Detection	444	447
Gardner R.L., Stoudt D.C.	Extension of the hybrid modeling technique to the susceptibility of complex infrastructure circuits and systems	773	776
Tkachenko S.V., Nitsch J., Sonnemann F., Scheibe H.-J., Magdowski M., Vick R.	High Frequency Electromagnetic Field Coupling to Small Antennas in a Cylindrical Resonator	1056	1057
Giri D.V.	Peak Power Gain in Time Domain of Impulse Radiating Antennas (IRAs)	12	14
Clarke T., Taylor A., Estep N., Yakura S., Brumit D., Dietz D., Hemmady S., Duffey J.	Predictive modeling of high-power electromagnetic effects on electronics	429	431
Mora N., Vega F., Rachidi F., Nyffeler M.	RESPONSE OF CANONICAL PORTS TO A HIGH POWER ELECTROMAGNETIC EXCITATION	973	976

Sonnemann F.	Testing the Electromagnetic Vulnerability of Electrically Initiated Devices (EID) at High-Power Damped-Sinusoid Irradiation	1322	1325
SESSION 37: Electromagnetic Analysis of Packages and Boards, Organized by F. Canavero			
Asai H.	GPU-based acceleration of the time-domain electrical full-wave solvers in PI/S/EMI simulation	1392	1395
Vande Ginste D., Deschrijver D., Demeester T., Dhaene T., De Zutter D.	Broadband passive RLGC(f) modeling for on-chip interconnect design	1372	1375
Bencivinni M., Camarda F., Capriglione D., Chiariello A.G., Fusillo G., Girardi A., Izzi R., Maffucci A., Martines I.	Characterization and Modeling of the Electromagnetic Behavior of ICs and Packages	1368	1371
Araneo R.	Characterization of the Induced Effects on Electronic Boards Placed in Metal Enclosures with Loaded Apertures	1388	1391
Sudo T.	Experiments and Simulation of Electromagnetic Radiation due to Power Bus Structure in a Printed Circuit Board	977	980
Choi J.Y., Swaminathan M.	Modeling Methods for Power/Ground Plane Structures in Electronic Packages	1380	1383
Leone M., Friedrich M.	Modeling the electromagnetic behavior of parallel-plane interconnections	1396	1399
De Camillis L., Ferranti F., Antonini G., Vande Ginste D., De Zutter D.	Parameterized Sensitivity Analysis of Multiport Systems by means of the Partial Element Equivalent Circuit Method and Interpolation Schemes	1428	1431
Müller S., Duan X., Rimolo-Donadio R., Brüns H.-D., Schuster C.	Recent Developments of Via and Return Current Path Modeling	1376	1379
Pak J.S., Kim H., Cho J., Kim J., Kim K., Lee J., Lee H., Park K., Kim J.	Signal and Power Integrity Analysis of TSV-Based 3D IC	1384	1387
Torres F., Guiffaut C., Reineix A.	Susceptibility of PCBs Including Non Linear Elements: A Time-Domain Approach	1400	1403
SESSION 38: Inverse Scattering and Remote Sensing			
Eyraud C., Geffrin J.-M., Litman A., Merchiers O., Vaillon R.	Effects of Polarization on Microwave Imaging Reconstructions	998	1001
Baratonia A., Leone G., Pierri R., Solimene R.	Fault Detection in Grid Scattering by a Time-Reversal MUSIC Approach	804	807
Ziani T., Teguig D., Amine Takkouche M., Dérobert X., Benslama M.	GPR modelling applied to vertical and horizontal resolution of buried objects	1	4
Ozdemir O., Haddar H., Boldaz E.	Identification of thin coatings using asymptotic models	1052	1055
Paoletta S., Prato A., Turso S., Notarpietro R., Bertoldo S., Cucca M., Perona G., Gabella M., Ferrarese S., Richiardone R.	Identification, tracking, validation and forecast of local high resolution precipitation patterns observed through X-band micro radars	1436	1439

Oliveri G., Poli L., Massa A.	Imaging Sparse Scatterers through Bayesian Compressive Sensing Methods	82	85
Economou D.P., Shubitidze F., Barrowes B.E., Uzunoglu N.K.	MUSIC algorithm applied to Advanced EMI sensors data for UXO classification	1160	1163
D'Alterio A., Solimene R., Pierri R.	Retrieving Half-Space Fresnel Coefficients By Multistatic Gpr Data	955	958
SESSION 39: Propagation Models for VLF to SHF EM Waves, Organized by J. Simpson			
Schmitz A., Kobbelt L.	Efficient and Accurate Urban Outdoor Radio Wave Propagation	323	326
Lehtinen N.G., Bell T.F., Inan U.S.	Full-wave method of calculation of electromagnetic fields in stratified media	327	330
Simpson J., Niu J.	Multiphysics modeling of VLF - HF propagation in the earth-ionosphere system for communications, surveillance, and navigation	726	728
Carrano C.S., Rino C.L.	SPLIT-STEP SOLUTION OF THE 4TH MOMENT EQUATION FOR PROPAGATION THROUGH INTENSE IONOSPHERIC DISTURBANCES	469	472
SESSION 40: Electrodynamics of nanowires and nanotubes, Organized by G. Slepyan			
Witzigmann B., Yu S., Kupec J.	Analysis of Semiconductor Nanowire Arrays for Photovoltaics	528	531
Slepyan G.Y., Nemilentsau A.M., Shuba M.V., Kuzhir P.P., Paddubskaya A., Bychanok D., Plushch A., Maksimenko S.A., D'yachkov P.N., Lapko K.N., Kurenva A.G., Okotrub A.N., Lakhtakia A.	Effective conductivity of a composite material containing carbon nanotubes in the GHz and THz frequency ranges	355	358
Forestiere C., Miano G., Chiariello A.G., Maffucci A., Maksimenko S., Slepyan G.	Electrodynamics of Multiwall Carbon Nanotube Interconnects	1109	1112
Mackay T.G., Lakhtakia A.	Modeling sculptured thin films as platforms for surface-plasmonic-polaritonic optical sensing	102	105
SESSION 41: Electromagnetic applications to biomedicine			
Attardo E.A., Borsic A., Halter R.J.	A Multi-GPU acceleration for 3D Imaging of the Prostate	1096	1099
Khan M.M., Abbasi Q.H., Alomainy A., Hao Y.	Investigation of body shape variations effect on the ultra wideband on-body radio propagation channel	1128	1131
Talcoth O., Rylander T., Lui H.S., Persson M.	Monolithic Multi-Scale Modeling of MR-Induced Pacemaker Lead Heating	599	602

Paffi A., Liberti M., Sammalı F., Stefanelli R., Trincherı D., Apollonio F.	Numerical evaluation of the electric field induced in a cubic phantom by different antennas at 2.45 GHz	1090	1091
SESSION 45: EMC/EMI/EMP			
Hoffmann C., Slim H.H., Russer P.	A Time-Domain EMI Measurement System up to 26 GHz with Amplitude Probability Distribution	448	451
Takahashi K., Yasuzumi T., Sano N., Hashimoto O.	An Experimental Study on Reduction of Mutual Coupling Between Closely Placed MSAs Using Wave Absorber	413	416
Tahar Belkacem F., Boutar A.-G., Bensetti M., Laour M., Moussaoui D.	Analysis of Shielding Effectiveness of a Rectangular Enclosure with Aperture Irradiated by Plane Wave Using the Intermediate Circuit Model	881	885
Schmidt M., Fischer T., Albach M.	Analytical Prediction of the Effect of Conductive Planes on EMC Filter Structures	686	689
Abadpour S., Dehkoda P., Karami H.R., Moini R.	Aperture Size Effect on the Susceptibility of a PCB inside an Enclosure	741	744
Leibinger A., Giese M., Weigel R.	Automated extraction of conducted emission relevant parameters in the case of a DC motor	568	571
Elsayed M., Abdelazid A.F., Hasna M., Trincherı D.	Exposure Assessment to WiFi Access Points by Simulations and Measurements	1442	1445
Araujo H.X., Kretly L.C.	Microwave Measurements of a GTEM Excitation Sector: Strategies for APEX Characterization	1217	1220
Werner D.H., Gregory M.D., Werner P.L.	Nature-Inspired Ultra-Wideband Array Synthesis Techniques	223	226
Pouh� D., Sandstede O., M�nıch G.	Optimization of the GTEM Cell Wideband Termination	1285	1289
Takano S., Yasuzumi T., Moriuchi K., Sakata T., Ozaki T., Hashimoto O.	Optimum Design of Wave Absorbers Using Foamed Polyimide Containing Carbon Black Based on Genetic Algorithm	664	667
Van der Merwe P.S., Otto A.J., Reader H.C.	Practical Definition of Interface Barrier Effective Shielding	58	61
