2011 34th International Spring Seminar on Electronics Technology

(ISSE 2011)

Tratanska Lomnica, Slovakia
11 – 15 May 2011

IEEE Catalog Number: CFP11509-PRT
ISBN: 978-1-4577-2111-3

Table of Contents

Interconnect Technologies Using Carbon Nanotubes: Current Status and Future Challenges
C. Bailey and H. Lu 1

Inkjet Printed Electrically Conductive Structures for Microelectronics
Jan Felba 6

Capacitors Embedded in Photovia Substrates
Jan Řeboun, Aleš Hamáček 12

The Design Concept of System Integration Based on Heterostructure
Stanislav Slosarčík, Pavol Cabúk, Wlodzimierz Kalita, Reinhard Bauer, Wieslaw Sabat, Slavomír Kardoš 17

Organic Materials for Humidity Detection
Tomáš Džugan, Aleš Hamáček, Jan Řeboun, Petr Kuberský, Silvan Pretl, Robert Vik 22

Compensation of Die Warpage by Capillary Action
Max Froemmig and Klaus-Juergen Wolter 27

PCB Thermal Performance for Power LEDs
Petko Mashkov, Tamara Pencheva, and Berkant Gyoch 33

Lamp with Rigid LED Strip – Design and Thermal Management
Petko Mashkov, Tamara Pencheva, and Berkant Gyoch 39

Electron Beam Curing of Pastes for the Polymer Thick Film (PTF) Technology
Jan Schulze, Christian Sedlacek Reinhard Bauer, and Gerhard Eckart 45

Contribution to Thick Film Interdigital Capacitor Characterization
Jiri Pulec, Ivan Szendiuch 50

Test of Wettability of Lead–Free Solders
Jiří Podzemský and Jan Urbánek 53

Low Temperature Soldering on Biopolymer (PLA) Printed Wiring Board Substrate
Attila Géczy, Vilmos Léner, István Hajdu, and Zsolt Illyefalvi–Vitéz 57

Influence of Capping SiO_2 Layer on Stability of NiO Thin Film Under Thermal Stress
Jakub Grochowski, Marek Guziewicz, Michał Borysiewicz, Zuzanna Sidor, Renata Kruszka, and Anna Piotrowska 63

TiAl–Based Ohmic Contacts on p–Type SiC
Marcin Mysliwiec, Mariusz Sochacki, Ryszard Kisiel, Marek Guziewicz, and Marek Wzorek 68

Planar Heterostructures Based on Organic Semiconductor
Silvan Pretl, Aleš Hamáček, Jan Řeboun, Tomáš Džugan, and Karel Hromadka 73

Photopolymerazed Sol–Gel Optical Layers Deposited on LTCC Substrates
Rafał Tadaszak, Anna Łukowiak, and Leszek Golonka 79

Shear Strength of Joints Made of Lead–Free Solders
Jiří Podzemský, Jan Urbánek, and Karel Dušek 84

3D Thermal Profiling of an Experimental Vapour Phase Soldering Station
Attila Géczy, Zsolt Péter, and Zsolt Illyefalvi–Vitéz 89

Boundary Value of Rheological Properties of Solder Paste
Alena Pietriková and Michal Kravčík 94

Thermal Properties of SiC–Ceramics Substrate Interface Made by Silver Glass Composition
R. Kisiel, Z. Szczepański, M. Sochacki, M. Chmielewski, M. Guziewicz, A. Strojny, T. Fałat, M. Jakubowska, E. Tymicki, and M. Jarosz 98

Assembly and Interconnection Technologies for MID Based on Thermally Conductive Plastics for Heat Dissipation
Johannes Hoerber, Martin Mueller, Joerg Franke, Florian Ranft, Christoph Heinle, and Dietmar Drummer 103

On the Application of 3D LTCC and Flexible Structures Based on Galvanized Layers
Michal Nicák, Josef Šandera 109

Mechanical Properties of Thermosonic Thin Gold Wire Bonds
Reka Batorfi, Zsolt Illyefalvi–Vitez 112

Correlations Between Mechanical and Electrical Parameters of Modified Electrically Conductive Adhesives
David Bušek, Jiřina Šelepová, and Pavel Mach 118

Laser Power Converters for Optical Power Supply
Sebastian Sohr, Ralf Rieske, Krzysztof Nieweglowski, and Klaus–Jürgen Wolter 122

Climatic Resistance of Electrically Conductive Adhesive Modified with Silver Nanoparticles
Seba Barto, Pavel Mach 128

Influence of Surface Finish on Resistance of Contacts Between ECA and Pad
Pavel Mach, Jakub Cinert 131

Photoimageable Details on LTCC Ceramic
Piotr Markowski 135

Investigating Whisker Growth on Annealed and Recrystallized Tin Platings
Balázs Illés, Barbara Horváth, and Balázs Lipák 141

Parameter Monitoring of Electronic Circuits for Reliability Prediction and Failure Analysis
Rajmond Jánó and Dan Pitică 147

Void Formation on PCB Surface Finish During Reflow Soldering
Thomas D. Ewald, Norbert Holle, and Klaus–Jürgen Wolter 153

Yield and Defect Level Prediction of Designed Printed Circuit Board Assembly Based on DPMO Metric
Radek Soukup 162

Detection of Printed Circuit Board Failures Based on Signal Frequency Analyses
Tomáš Blecha 168

Determination of Recombination Centers in c–Si Solar Cells from Dark I–V Characteristics
Ladislava Cerna, Vitezslav Benda, and Zdenek Machacek 172

Long–Term Behavior of IMCs in Lead–Free Solder Joints
Tomas Novak, Tomas Hujer, and Frantisek Steiner 176

Reliability Accelerated Tests for Microsystems
Marius Bâzu, Lucian Gălăteanu, and Virgil Emil Ilian 182

Study of Temperature Profiles of the Infrared Continuous Furnace
Karel Dušek, Tomáš Váňa 188

Influence of Different Surface Finishes of PCB on the Solder Spread
Karel Dušek, Michal Novák, and Alexandra Rudajevová 192

Comparing the Intermetallic Layer Formation of Infrared and Vapour Phase Soldering
Olivér Krammer, Tamás Garami 196

Investigation of Electronic Properties of Crystalline Silicon Solar Cells
Martin Kusko, Vladimír Šály 202

Contradictory Electrochemical Migration Behavior of Copper and Lead
Bálint Medgyes, Balázs Illés 206

Electronic and Structural Properties of Amorphous N–Doped Silicone Carbide
Perný Milan, Šály Vladimír, Mikolášek Miroslav, Huran Jozef, and Országh Juraj 212

Studies of Surface Mount Technology and Its Risk Analysis
Jan Jirsa, Karel Dušek 216

Control Tools for Process Improvement in Electrical Engineering
Larisa Tarba, Pavel Mach 220

Homogeneity of Joints Made of Electrically Conductive Adhesive
Pavel Žák, Marek Tučan, and Ivan Kudláček 225

Tin Coating of Connectors – Reliability Risk for Electrical Equipment
Pavel Žák, Marek Tučan, and Ivan Kudláček 229

Success Case–Study Lean Production in Electronics Manufacturing Workshop
Olga Zhuravskaya, Martin Michajlec, and Pavel Mach 234

Problems of Noncontact Thermography Measurements of HICs
Anna Andonova, Snezhana Pleshkova 241

Failure Analysis of Adhesive Joining in Electronics
Evgenia Povolotskaya, Pavel Mach 247

Recent Advance in Solder Ball Interconnections Reliability Examination
Olga Švecová, Michal Nicák, Petr Kosina, and Josef Šandera 253

Post–Curing Behavior of Two–Component Electrically Conductive Adhesive
Pavel Žák, Marek Tučan, and Jan Urbánek 258

Mechanical Stress Tests of SMT Attachments
Pavel Žák, Marek Tučan, and Jan Urbánek 262

The Ontology Based FMEA of Lead Free Soldering Process
Martin Molhanec, Olga Zhuravskaya, Evgeniya Povolotskaya, and Larisa Tarba 267

Thermal Stability Analysis of Power LED During Aging
Anna Andonova, Rumen Yordanov, and Irena Yordanova 274

Transport Characteristics of CdTe Radiation Detectors
Alexey Andreev, Ondrej Sik, and Lubomir Grmela 279

An LabVIEW Implemented Boundary–Scan Tester
Ioan Lie, Szilard Hegy, and Aurel Gontean 282

Influences of Organic Materials on Packaging Technologies and Their Consideration for Lifetime Evaluation
Daniel Ernst, Thomas Zerna, and Klaus–Jürgen Wolter 288

Investigation of Nonstationary Thermo–Photo–Elastic Effect Using the Polarization Modulation of Radiation
Ostap Oliinyk and Borys Tsyganok, Borys Serdega and Igor Matiash 294

Phase Evolution of Solder Alloys
Alena Pietriková and Juraj Ďurišin 299

Long–Term Stability of Resistors Embedded in Printed Circuit Board
Damian Nowak, Paweł Winiarski, Adam Kłossowicz, Andrzej Dziedzic, Wojciech Stęplewski, and Grażyna Kozioł 303

Electrical Stress on Film Resistive Structures on Different Substrates
Detlef Bonfert, Gerhard Klink, Karlheinz Bock, Paul Svasta, and Ciprian Ionescu 307

An Accurate Method for Thermal Conductivity Measurement of Thermally Conductive Adhesives
Bartosz Platek, Tomasz Falat, and Jan Felba 313

Methods for Pads Thermophysical Parameters Assessment in Terms of 4P Soldering Model
Ioan Plotog, Bogdan Mihailescu, Ioan Pencea, Mihai Branzei, Paul Svasta, Traian Cucu, and Mihai Tarcolea ... 320

The Contribution of Contact in Non–Linearity of CV Characteristic of Thick Film Resistor
Ivana Beshajová Pelikánová 327

Toolbox for Detection of Mechanical and Thermo–Mechanical Stress in Electronic Components
Sebastian Höll, Sören Majcherek, Sören Hirsch, Markus Detert, and Bertram Schmidt 331

Influence of Sintering Temperature on Complex Permeability of Ferritic LTCC in Wide Frequency Range
Andrea Marić, Ibrahim Atassi, Nelu Blaž, Goran Radosavljević, Ljiljana Živanov, Heinz Homolka, Walter Smetana, and Johann Nicolics 337

Reliability of SnAgCu Solder Joints During Vibration in Various Temperature
Przemysław Matkowski 341

A New Differential ELIN Low Pass Filter of "Sinh" Type in Bipolar Technology
Radu Gabriel Bozomitu and Vlad Cehan 348

Modeling of Microelectronic Structures and Packages Using ANSYS Software
Boleslav Psota, Ivan Szendiuch 354

Electro – Thermal Analogies for Temperature Calculation
Lucian Man and Eugeniu Man 358

Parasitic Influences in a Capacitive Transducer Behavior
Vlad Bande, Ioan Ciascai, and Dan Pitica 363

Using of Bond Graph for Mechatronics Systems
Alexander Gmiterko, Martina Vacková, and Ivan Virgala 369

Iterative Simulation–Based Optimization for Parallel Batch Scheduling Problems
Dirk Doleschal, Andreas Klemmt, and Gerald Weigert 374

Finite Element Modeling on Thermal Fatigue of BGA Solder Joints with Multiple Voids
Robert Schwerz, Sebastian Meyer, Mike Roellig, Karsten Meier , and Klaus–Juergen Wolter 380

Modeling of Heat Dissipation in SMD Chip Components
Radu Bunea, Paul Svasta, and Norocel–Dragos Codreanu 386

Radial Vibration of the MEMS Disk Considering its Mounting and Electrodes Form
Oleksandr Bogdan, Oleg Petrishev, Yurij Yakymenko, Iuliia Ianovska 391

A Comaprison between Sepic and Buck–Boost Converters Used in Maximum Power Point Trackers
Toma Patarau, Stefan R. Daraban, Dorin Petreus, and Radu Etz 397

Analyzing Crosstalk Effects on a Parallel Bus Using Eye Diagram
Mihai Daraban and Dan Pitica 403

Modeling and Simulation of LTCC Lamination Containing Embedded Channel
Eszter Horváth and Gábor Harsányi 409

Sensor Measurement Errors Detection Methods
Septimiu Pop, Dan Pitica, and Ioan Ciascai 414

Considering Copper Anisotropy for Advanced TSV–Modeling
Peter Saettler, Karsten Meier, and Klaus–Juergen Wolter 419

Model Assisted Process Control in Micro– and Nano–Fabrication Using Focused Ion Beam
Stoyan Stoyanov and Silvia Marson 424

Contact Resistance in Polytriarylamine Based Organic Transistors
Andreea Bonea, Detlef Bonfert, and Paul Svasta 430

Performance Evaluation of a Thermoelectric Cooler Using Finite Element Analysis
Ciprian Ionescu, Norocel Codreanu, and Paul Svasta 436

A New Computer–Based Technology for Communicating with People with Major Neuro–Locomotor Disability Using Ocular Electromyogram
Robert Gabriel Lupu, Radu Gabriel Bozomitu, Vlad Cehan, and Dana Anca Cehan 442

Multimodal Biometric Securing Methods for Informatic Systems
Sorin Soviany, Mariana Jurian 447

Electrical Actuation of a Rolling Rotor Switched Reluctance Motor
Marco Franke, Oliver Punk, Heike Mrech, and Ulrich Schmucker 451

Analytical Analyze of Power Factor Improvement for Power Converter
Ionel Horea Baciu and Serban Lungu 457

Investigation of Dimensions Effect on Stress of Bi–Material Cantilever Beam
Rodica Voicu, Raluca Muller, and Marius Pustan 461

Digital Thermometer–Thermostat Implemented in a Programmable Circuitry
Ioan Lie, Anita Lăzărescu, and Aurel Gontean 466

About the Electromagnetic Properties of the Thin Films of Zinc Metaferrites in Microwave Range
Daniela Ionescu and Vlad Cehan 470

Offline Testing of an Electronic Control Module for a Regenerative Braking Drive System
Dragos Ion Guta, Corneliu Cristescu, Catalin Dumitrescu, and Ioan Lepadatu 475

An Analytical Model for a Two–Layer LTCC Beam
Michael Weilguni, Ibrahim Atassi, Walter Gschohsmann, Walter Smetana, Johann Nicolics, and Werner Goebl 481

SPICE Modeling of Thermal Behavior for Passive Components
Catalin Negrea, Marius Rangu, and Paul Svasta 486

Electrical Parameters of c–Si and CIS Photovoltaic Cells in Dependence on Temperature and Irradiance
Zdeněk Macháček, Vítězslav Benda, and Ladislava Černá 492

Compact Radio System for Remote Control of an Displaying Module
Ioan Lita, Daniel Alexandru Visan, and Mariana Jurian 497

Temperature Control System Based on Adaptive PID Algorithm Implemented in FPAA
Daniel Alexandru Visan, Ioan Lita, and Ion Bogdan Cioc 501

System with Microcontroller for Photometric Measurements in Technological Installations and Optical Communications Systems
Daniel Alexandru Visan, Ioan Lita, Ion Bogdan Cioc, and Rares Gardus 505

Life Cycle Inventories of LTCC Substrates
Manuela Franz and Michael Weilguni 509

Preparation of Freestanding Carbon Nanotubes Using Plasma Enhanced Chemical Vapor Deposition
Jan Pekárek, Radimír Vrba, Martin Magát, and Ondřej Jašek 515

AFM Nanoshaving: A Novel Prospect for the Structural Comparison of Bioreceptor Layers
Attila Bonyár and Gábor Harsányi 519

Dependency of Silver Nanoparticles Protective Layers on Sintering Temperature of Printed Conductive Structures
Anita Smolarek, Andrzej Mościcki, Andrzej Kinart, Jan Felba, and Tomasz Falat 525

Application of Copper–Carbon Nanotubes Composite in Packaging Interconnects
Lavanya Aryasomayajula, Ralf Rieske, and Klaus–Juergen Wolter 531

Properties of the SAC Solder Paste with Different Nanoparticles
Krystyna Bukat, Marek Kościelski, Janusz Sitek, Małgorzata Jakubowska, Anna Młożniak 537

Photoluminescence Investigation of GaAs Quantum Nanostructures
Bálint Pődör, Ákos Nemcsics, János Balázs, János Makai, and Andrea Stemmann 542

Carbon Nanotubes Modified Working Microelectrodes for Electrochemical Sensors
Jan Prasek, Jana Chomoucka, and Petra Businova 546

Nanotechnology in Sensing: Chemical Analysis and Medical Application
Jaromir Hubalek, Jana Drbohlavova, Jana Chomoucka, and Jan Prasek 551

Advanced Templates–Base Technique for Preparation of Nanomechanized Sensors Surface
Radim Hrdy, Marina Vorozhtsova, Jan Prasek, Jana Chomoucka, Jana Drbohlavova, and Jaromir Hubalek 554

Printed Electroluminescent Structures Fabricated with Metal–Free Compositions Filled with Carbon and Ceramics Nanomaterials
Marcin Słoma, Małgorzata Jakubowska, and Michał Cież 558

Nanocomposite Materials on the Base of Polymer–Carbon
Oksana Telychkina, Alexandr Machulyansky, Dmitry Tatarchuk, and Yury Yakimenko 563

The Impact of the Planes Parameters on the Noise of a Power Distribution Network
Raul Fizeşan and Dan Pitică 566

Sensors Elements for Micro–Calorimetric Measurements
Petr Kubersky, Ales Hamacek, Michael Kroupa, and Jaroslav Freisleben 572

Sensor System of Detecting Defects in Wheels of Railway Vehicles Running at Operational Speed
Nencho Nenov, Emil Dimitrov, Vasil Vasilev, and Petyo Piskulev 577

Capacitive Sensor for Measuring of Intra–Abdominal Pressure
Michal Jurčišin, Stanislav Slosarčík, Alexander Gmiterko, and Pavol Cabúk 583

The LTCC Based Continuous Flow Optical Sensor for Absorbance Measurements
Paweł Bembnowicz, Karol Malecha 587

Multiple–Interface Design for FPGA–Based Measurement Systems
Oliver Punk and Uwe Heuert 592

System for Control of Limb Straining in Rehabilitation Process
Slavomír Kardoš, Stanislav Slosarčík, and Michal Jurčišin 597

Analyzer for Fluorescent Biosensing Application
Jiri Sedlacek, Sarka Bidmanova, Zbynek Prokop, Jiri Damborsky, Bretislav Mikel, and Jaromir Hubalek 600

Advanced Mobile Environment Monitor with Ability of Pollution Assessment
Jaromir Zak, Jaromir Hubalek, and Rene Kizek 604

Dynamic Reconfiguration in Smart Sensors' Design
Viktor Zavorotnyi, Yuriy Yakimenko 608

The LTCC Combustor for Ceramic Micro–Reactor for Steam Reforming
Marko Hrovat, Darko Belavič, Gregor Dolanc, Janez Holc, Marina Santo Zarnik, Primož Fajdiga, Kostja Makarovič, Marija Kosec, Stanko Hočevar, Jurka Batista, and Iztok Stegel 612

The Increase of Electrode Surface of Thick–Film Electrochemical Sensors by Unconventional Method
Martin Adamek, Michal Stekovic, Jiri Pulec, and Martin Bursik 616

Modelling and Simulation of Sensors for Position Control for Hydraulic Mechatronic Systems
Andrei Drumea and Paul Svasta 622

Evaluation of Inductive Displacement Sensors for a Basic Active Magnetic Bearing Test Rig
M. Recheis, J. Nicolics, H. Wegleiter, B. Schweighofer, and P. Fulmek 626

Third Stage of Hybrid Integrated Circuits – The Education Process in the Microelectronics Technology and Packaging
Ivan Szendiuch, Martin Bursik, Edita Hejatkova 632

CAD Tool for a Class E Tuned Power Amplifier Design
Alin Grama, Adrian Taut, and Ovidiu Pop 637

Educational Matlab Tool for Simulating of Forward Converters
Adrian Taut, Ovidiu Pop, Alin Grama, and Serban Lungu 641

MATLAB Graphical User Interface Development for Education Support
Jan Klasna 645

Provoking and Organizing Discussion and Gathering Information and Feedback on Message Boards Regarding MCM Design and Use
Rumen Yordanov, Anna Andonova, Irena Yordanova, and Juriy Ivanov 649

VPN Platform for E–Learning Technologies Focused on Group of Topics: Passive Components and Circuits, Electronic Materials, Electronic Technology
Ioan Lita, Stefan–Victor Nicolaescu, and Daniel Alexandru Visan 655

Animated Components in the Scope of the Electronic Technologies Education
Slavomír Kardoš, Igor Vehec, and Juraj Banský 660

Perspectives of CAD Education at the Department of Technologies in Electronics
Ľubomír Livovský, Juraj Banský, and Alena Pietriková 664

E–Learning System for Technologies in Electronics
Dominik Demeter, Juraj Banský, and Ľubomír Livovský 669

Authors Index 673
