

2011 14th International Conference on Interactive Collaborative Learning

(ICL 2011)

**Piestany, Slovakia
21 – 23 September 2011**

**IEEE Catalog Number: CFP1123R-PRT
ISBN: 978-1-4577-1748-2**

2011 14th International Conference on Interactive Collaborative Learning

Table of Contents

Evaluation in life-long learning	pp. 1-4
The set-up and implementation of fully virtualized lessons with an automated workflow utilizing VMC/Moodle at the Medical University of Graz	pp. 5-9
The introduction of a new virtual microscope at the Medical University of Graz	pp. 10-15
eLearn central – the journey to e-learning	pp. 16-23
Dynamic Tools in Mathematical Education	pp. 24-29
How to improve listening skills for technical students?	pp. 30-31
Architected based Prototypes for Mobile Collaborative Learning to improve Pedagogical activities	pp. 32-41
TEL for Programming Courses – Experiences and Comparison	pp. 42-45
AVATAR Course:Teacher Training for Teaching in 3D Virtual Worlds	pp. 46-50
A Qualitative Approach towards Discovering Microblogging Practices of Scientists	pp. 51-57
Implementation and Evaluation of a Collaborative Learning, Training and Networking Environment for Start-Up Entrepreneurs built on a Virtual 3D World	pp. 58-66
Assessment of usability benchmarks: combining standardized scales with specific questions	pp. 67-75
Automatic analysis of messages in discussion forums	pp. 76-81
Foreign-language Learning and Training Environment using Web 2.0 Technologies	pp. 82-88
Case studies of assessment ePortfolios	pp. 89-94
Common problems of mobile applications for foreign language testing	pp. 95-97
Remote laboratory for advanced servo control of electric machines	pp. 98-101
Using Computer Aided Learning Software for Teaching and Self-Learning of a Programming Language	pp. 102-106
Teaching Strategies for Direct and Indirect Instruction in Teaching Engineering	pp. 107-114
E-learning at the Department of Languages of FEI STU	pp. 115-118
E-portfolio as a Technology for Assessment of Effectiveness Indicators of the Bachelor Program in Education in Russia	pp. 119-121
Use of electronic discussions as a pedagogical tool.	pp. 122-125
The Interactive Oral Assessment (IOA) project:“Using Talkback® for Listening and Speaking practice in Languages”	pp. 126-129
Linking Academic Quality to Online Faculty Development and Evaluation	pp. 130-133
Virtual and remote laboratories in education process at FCFT STU	pp. 134-139
Macro Level Blended Learning - Universities Cooperate in Online Teaching	pp. 140-144
Multimodal applications for foreign language teaching	pp. 145-148
A rule-based group management tool – Supporting organizational processes for collaborative learning activities in higher education	pp. 149-153
Assessing Backstage, a Backchannel for Collaborative Learning in Large Classes	pp. 154-160
Computer Engineering Online - Best Practice in Long Distance Approaches for Lifelong Learning	pp. 161-164
Cybernetics goes Digital	pp. 165-168
English for Science Using LMS Moodle	pp. 169-171
Language education of academic staff	pp. 172-174
Learning within Externally Funded Research and Development Projects in University of Applied Sciences: an Analysis	pp. 175-182
Interactive collaboration in distance learning based on remote control of server session	pp. 183-186
Past Meets Future: Online, Self-Paced Vocational Training Based on the Apprenticeship Model	pp. 187-190
Evaluation of Intelligent Agent Frameworks for Human Learning	pp. 191-194
A Practical Software Engineering Course with Distributed Teams	pp. 195-201
Exploiting XML-RPC: A framework for adaptive creation of Virtual Worlds in Second Life	pp. 202-208
Technological support of web based project work in Higher Education	pp. 209-213
Math Learning Materials Combining Print Materials and Web Based Training	pp. 214-218
Video-lectures in a Traditional Mathematics Course on iTunes U: students' feedback.	pp. 219-224
Personal development on Web2.0 Cloud	pp. 225-231
Teaching and learning in-world: lessons learnt from the AVATAR and the ST.ART projects	pp. 232-236
The influence of multimedia based e-learning techniques for the capability of adopting the knowledge by students 55+	pp. 237-240
Online design of Matlab/Simulink and SciLab/Xcos block schemes	pp. 241-247
Abstract: Construction of a remote laboratory aimed at augmenting knowledge on properties of materials.	pp. 248-252
Enhancing student performance through web-based learning and online teaching tools at Sri Lankan universities	pp. 253-255
Development of a learner-centered learning process for a course	pp. 256-263
How effective is the use of I.C.Ts in the teaching of reading and writing skills in English for Specific Purposes? A case study with instructive scenarios	pp. 264-268
Interactive whiteboards based on the WiiMote: validation on the field.	pp. 269-273
Interactive technology enhanced learning for social science students	pp. 274-278
Learner control in distance education	pp. 279-280
Real experiments marking in automatic control education	pp. 281-284
Implementation of blended learning scenarios for training of school teachers	pp. 285-289
A Model for Assessing the Degree of Formalization and Support of Learning Scenarios	pp. 290-295
TESLA Editor for TAO e-assessment platform: a simple way to describe the complex scoring variables	pp. 296-301

2011 14th International Conference on Interactive Collaborative Learning

Table of Contents

Interactive computer aided learning in teaching English as a second language to adult learners	pp. 302-305
Energy concept taught using ICT	pp. 306-312
Web-design for learning primary school Science using LMSs: evaluating specially designed task-oriented design using young schoolchildren	pp. 313-318
Students' perception on using WALC platform for Automation and Process Control engineering studies	pp. 319-322
Enhancing and assisting laboratory teaching of electrical circuits using ICT: an evaluation of educational software	pp. 323-335
Key elements of an e-learning course evaluation survey: An empirical validation	pp. 336-343
Remote Laboratory Server Based on Java Matlab Interface	pp. 344-347
Remote control of real system with two electric motors	pp. 348-351
E-learning course for Scheduling of Computer grid	pp. 352-356
University Teacher as On-line Tutor	pp. 357-361
Design of the easy re-configurable virtual laboratory	pp. 362-367
Online Robot Simulation Contest	pp. 368-372
Modern Technology in Education	pp. 373-377
The Remote Experiment and Tangibility of Knowledge	pp. 378-381
Not what the computer can do, but what the learner must do	pp. 382-385
Combining various technologies in effective online math instruction - a nationwide secondary level math project	pp. 386-389
INFORMATION COMPETENCE AND EVOLUTION OF E-LEARNING TEXT WITH THE FOG INDEX	pp. 390-394
New Multimedia Teaching Tools using Remote Physics Experiments	pp. 395-399
Educational Resource Management and Optimization using Virtualization Technologies	pp. 400-403
Teaching Strategies to the Educational Didactical Planning of an Distance Learning System	pp. 404-408
Virtual Technology Utilization in Teaching	pp. 409-413
Web based dynamic modeling in school physics	pp. 414-416
Playing a game in Civil Engineering - The Internal Force Master for Structural Analysis	pp. 417-422
Specific tool for evaluation of eLearning	pp. 423-427
Using Virtual Reality for Teaching Solid Geometry: A Case Study for a Cube Section	pp. 428-433
Models in curriculum design	pp. 434-437
Developing an instrument to assess Teachers' Readiness for Technology-Enhanced Learning	pp. 438-443
Computer-based testing – the ideal tool to assess on the different	pp. 444-449
Remote desktop access us a method of learning of programming in distance study	pp. 450-455
Education of student's project team cooperation	pp. 456-459
Educational web tool for Statistical Process Control	pp. 460-464
Design of a computer-assisted assessment system for classroom formative assessment	pp. 465-472
Remote Laboratories – Multiple Task server	pp. 473-476
Creation of multimedia support study material and administration of LMS systems in virtual education environment	pp. 477-479
Virtual reality – creation, usage and education	pp. 480-483
Web-base tutorial methods improve creativity in Landscape architecture studies	pp. 484-486
Scientific Fair – Science you can see, hear and experience	pp. 487-491
Blended Learning at the Alpen-Adria-Universität Klagenfurt	pp. 492-497
Success for all in Knowledge Management	pp. 498-505
Computer Assisted Language Learning Implementation in the Military University Environment	pp. 506-509
Usage of interactive video in educational process to determine mental level and literacy of a learner	pp. 510-513
Modeling and simulation of production relocation in SIMPRO-Q web learning environment	pp. 514-518
Web-based Mentorship Module to facilitate Internationally Educated Nurses Transition into Practice in Canada	pp. 519-524
Social Software Applications in Academic Setting Awareness and satisfaction	pp. 525-531
How to teach the quality management	pp. 532-533
Using a Web-based assessment tool for accreditation and program improvement	pp. 534-538
Collaborative teaching in SPSPi with the use of ICT	pp. 539-541
Domain Model Relations Discovering in Educational Texts based on User Created Annotations	pp. 542-547
Learning by pleasure –powered paraglider control and other UAVs control	pp. 548-552
The impact of student's projects: a self reflection	pp. 553-555
Mobile learning environments and real world experiences for european visual arts higher education. State-private partnerships.	pp. 556-556
Schola Ludus, Serious Games, and Measurement of Interestingness	pp. 557-558
Incorporating an E-Book into Digital Control studies	pp. 559-564
Advanced technologies of e-learning in engineering education	pp. 565-568
Cloud computing – an advanced e-learning platform of school education?	pp. 569-570
Utilizing a Workflow Engine to Manage Semi-automatic Correction Processes across Domains	pp. 571-576
Informal Education and Social Climate	pp. 577-583
Cloud Computing for Education and Learning: Education and Learning as a Service (ELaaS)	pp. 584-588
Cloud Computing for Education and Learning: Education and Learning as a Service (ELaaS)	pp. 589-594

2011 14th International Conference on Interactive Collaborative Learning

Table of Contents

eLearning styles in foreign language instruction: research activities	pp. 595-601
SCHOLA LUDUS: New Eyes for Science Beauty	pp. 602-607
SCHOLA LUDUS virtual science centre - Building e-framework for new paradigm of teaching and learning	pp. 608-610
Gained and lost competencies of the students in the ICT supported education in selected faculties of Slovak University of Technology in Bratislava	pp. 611-614
SCHOLA LUDUS serious educational games - The problem of mechanic balancing in virtual and real games	pp. 615-619
REMOTE LABORATORY FOR DIGITAL SYSTEMS	pp. 620-625
Integrated and Enhanced e-Assessment Forms for Learning: Scenarios from ALICE Project	pp. 626-631
Creative Laboratory Engineering Education at Technical Faculties Educational (The pilot project)	pp. 632-636
Graph theory and algorithms: various approaches to utilization of virtual learning environment	pp. 637-642
Supporting educational developments at Austrian universities: Sharing practices among 12 higher education institutions	pp. 643-651
E-learning as an enabler for quality in higher education	pp. 652-655
Universities on Air: FNMA Working Group "Streaming Technology and Learning Innovation"	pp. 656-665
World's largest classroom	pp. 666-671
Long distance collaborative architectural education Methodics and practical applications at the Faculty of Architecture, Slovak University of Technology, Bratislava	pp. 672-677
