

2011 First IEEE International Conference on Healthcare Informatics, Imaging and Systems Biology

(HISB 2011)

**San Jose, California, USA
26 – 29 July 2011**

IEEE Catalog Number: CFP11HIB-PRT
ISBN: 978-1-4577-0325-6

2011 First IEEE International Conference on Healthcare Informatics, Imaging and Systems Biology

HISB 2011

Table of Contents

Preface.....	x
Organizing Committee.....	xi
Program Committee.....	xii
Panel Speakers.....	xiv
Plenary Speakers.....	xv
Invited Speakers.....	xvi
Invited Tutorial Speakers.....	xvii
Sponsors.....	xviii

Healthcare Informatics: Tele-health & Signal Data Analysis

Salient Segmentation of Medical Time Series Signals	1
<i>Jonathan Woodbridge, Mars Lan, Majid Sarrafzadeh, and Alex Bui</i>	
Fast Classification of Electrocardiograph Signals via Instance Selection	9
<i>Krisztian Buza, Alexandros Nanopoulos, Lars Schmidt-Thieme, and Julia Koller</i>	
A Prototype of Wireless Electrocardiogram Biofeedback Platform and Its Preliminary Evaluation on HRV Alteration in Unconscious Status	17
<i>Wanqing Wu, Yeongjoon Gil, and Jungtae Lee</i>	

Biomedical Imaging: Segmentation & Classification

Spinal Cord Segmentation for Volume Estimation in Healthy and Multiple Sclerosis Subjects Using Crawlers and Minimal Paths	25
<i>Chris McIntosh, Ghassan Hamarneh, Matthew Toom, and Roger C. Tam</i>	
Multiphase Level Set Model with Local K-means Energy for Histology Image Segmentation	32
<i>Lei He, L. Rodney Long, Sameer Antani, and George R. Thoma</i>	

Unsupervised Grow-Cut: Cellular Automata-Based Medical Image Segmentation	40
<i>Payel Ghosh, Sameer K. Antani, L. Rodney Long, and George R. Thoma</i>	
Cervical Cancer Classification Using Gabor Filters	48
<i>Rahmadwati, Golshah Naghd, Montserrat Ros, Catherine Todd, and Eviana Norahmawati</i>	

Computational Systems Biology

A Systems Biology Approach for Detecting Toxicity-Related Hotspots inside Protein Interaction Networks	53
<i>Kaushal Desai, David Brott, Xiaohua Hu, and Anastasia Christianson</i>	
Sequence-Based Enzyme Catalytic Domain Prediction Using Clustering and Aggregated Mutual Information Content	61
<i>Kwangmin Choi and Sun Kim</i>	
Quantitative Modeling the <i>Saccharomyces cerevisiae</i> FLR1 Regulatory Network Using an S-System Formalism	69
<i>Dulce Calçada, Susana Vinga, Ana T. Freitas, and Arlindo L. Oliveira</i>	
Subtyping of Leukemia with Gene Expression Analysis Using Compressive Sensing Method	76
<i>Wenlong Tang, Hongbao Cao, and Yu-Ping Wang</i>	

Healthcare Informatics: Information and Knowledge Modeling

Applying an Instance-Specific Model to Longitudinal Clinical Data for Prediction	81
<i>Emily Watt, James W. Sayre, and Alex A.T. Bui</i>	
Knowledge Discovery and Data Mining of Free Text Radiology Reports	89
<i>Jeffrey Friedlin, Malika Mahoui, Josette Jones, and Patrick Jamieson</i>	
Comparison of Semantic Similarity Measures for Application Specific Ontology Pruning	97
<i>Wei-Nchih Lee, Will Bridewell, and Amar K. Das</i>	
A Computational Framework for Search, Discovery, and Trending of Patient Health in Radiology Reports	104
<i>Robert M. Patton, Carlos C. Rojas, Barbara G. Beckerman, and Thomas E. Potok</i>	

Biomedical Imaging: Motion Capture and Analysis

Cephalometric Landmark Tracing Using Deformable Templates	112
<i>Yuxin Chen, Brian Potetz, Bo Luo, Xue-wen Chen, and Yunfeng Lin</i>	

Comparing Shape Tracking, Speckle Tracking, and a Combined Method for Deformation Analysis in Echocardiography	120
---	-----

*Colin B. Compas, Ben A. Lin, Smita Sampath, Lingyun Huang, Qifeng Wei,
Albert J. Sinusas, and James S. Duncan*

A Low-Cost Real-Time Three-Dimensional Confocal Fluorescence Endomicroscopy Imaging System	126
---	-----

Feng Zhao and T.M. McGinnity

Healthcare Informatics: Electronic Health Records

An Evaluation of Functional and User Interface Requirements for Pharmacogenomic Clinical Decision Support	134
--	-----

*Casey L. Overby, Peter Tarczy-Hornoch, Jim Hoath, Joe W. Smith,
Emily Beth Devine, and David Fenstermacher*

Decision Support for Patient Consent Management	142
---	-----

Qihua Wang and Hongxia Jin

Concept-Based Exchange of Healthcare Information: The LinkEHR Approach	150
--	-----

*Jose A. Maldonado, David Moner, Diego Bosca, Carlos Angulo, Luis Marco,
Ernesto Reig, and Montserrat Robles*

Biomedical Imaging: Content-Based Retrieval and Image Analysis

A Scalable Reference Standard of Visual Similarity for a Content-Based Image Retrieval System	158
--	-----

*Jessica S. Faruque, Daniel L. Rubin, Christopher F. Beaulieu,
Jarrett Rosenberg, Aya Kamaya, Grace Tye, Sandy Napel,
and Ronald M. Summers*

Consistent Information Content Estimation for Diffusion Tensor MR Images	166
--	-----

Brian G. Booth and Ghassan Hamarneh

Acceleration of Two Point Correlation Function Calculation for Pathology Image Segmentation	174
--	-----

Lee A.D. Cooper, Joel H. Saltz, Umit Catalyurek, and Kun Huang

Healthcare Informatics: eHealth

3G Smartphone Technologies for Generating Personal Social Network Contact Distributions and Graphs	182
---	-----

*J. Benavides, B. Demianyk, R.D. McLeod, M.R. Friesen, M. Laskowski,
K. Ferens, and S.N. Mukhi*

Healthcare Information Networks: Discovery and Evaluation	190
---	-----

Jonathan Lutes, Meeyoung Park, Bo Luo, and Xue-wen Chen

Linking Recorded Data with Emotive and Adaptive Computing in an eHealth Environment	198
<i>Leslie Ball, David Bradley, Andrea Szymkowiak, and Simon Brownsell</i>	
Towards Aging-in-Place: Automatic Assessment of Product Usability for Older Adults with Dementia	205
<i>Babak Taati, Jasper Snoek, and Alex Mihailidis</i>	

Poster Papers: Healthcare Informatics

Developing a Systems and Informatics Based Approach to Lifestyle Monitoring within eHealth: Part II - Analysis & Interpretation	213
<i>Simon Brownsell, David Bradley, Fabien Cardinaux, and Mark Hawley</i>	
A Case-Based Retrieval System Using Natural Language Processing and Population-Based Visualization	221
<i>William Hsu, Ricky K. Taira, Fernando Viñuela, and Alex A.T. Bui</i>	
Data Mining Session-Based Patient Reported Outcomes (PROs) in a Mental Health Setting: Toward Data-Driven Clinical Decision Support and Personalized Treatment	229
<i>Casey Bennett, Thomas Doub, April Bragg, Jason Luellen, Christina Van Regenmorter, Jennifer Lockman, and Randall Reiserer</i>	
Dependency Parsing for Extracting Family History	237
<i>Neal Lewis, Daniel Gruhl, and Hui Yang</i>	
Decision Support for Early Intervention through Gas Exchange Ventilation - Perfusion Analysis	243
<i>Burton Clark, Justin Clark, and Michael Criddle</i>	
Mining Electronic Medical Records to Explore the Linkage between Healthcare Resource Utilization and Disease Severity in Diabetic Patients	250
<i>Noah Lee, Andrew F. Laine, Jianying Hu, Fei Wang, Jimeng Sun, and Shahram Ebadollahi</i>	
Grid-Based Interactive Diabetes System	258
<i>Fawaz Al Hazemi, Chan Hyun Youn, and Khalid A. Al-Rubeaan</i>	
Developing a Systems and Informatics Based Approach to Lifestyle Monitoring within eHealth: Part I - Technology and Data Management	264
<i>Simon Brownsell, David Bradley, Fabien Cardinaux, and Mark Hawley</i>	

Poster Papers: Biomedical Imaging

Objective Functional Capacity Assessment Using Inertial Sensor	272
<i>D. Stirling, F. Naghdy, G. Naghdy, M. Field, R. Arunglabi, and D. Kilpatrick</i>	

A Parallel Deconvolution Algorithm in Perfusion Imaging	278
<i>Fan Zhu, David Rodriguez Gonzalez, Trevor Carpenter, Malcolm Atkinson, and Joanna Wardlaw</i>	
Detection of Gait Abnormalities in Sprague-Dawley Rats after 6-hydroxydopamine Injection and the Experiment Efficient Design	284
<i>Wenlong Tang, Yu-Ping Wang, Uri Tasch, Nagaraj Neerchal, and Paul Yarowsky</i>	
Robust Segmentation and Tracking of Generic Shapes of Neuro-stem Cells	291
<i>Ishwar Kulkarni, Uddipan Mukherjee, Chris Sontag, Brian Cummings, and M. Gopi</i>	
3D Alignment and Change Detection from Uncalibrated Eye Images	299
<i>Sujit Kuthirummal, Mayank Bansal, Harpreet Sawhney, Jayan Eledath, Denise J. Pearson, and Richard A. Stone</i>	
Human Embryonic Stem Cell Detection by Spatial Information and Mixture of Gaussians	307
<i>Benjamin Xueqi Guan, Bir Bhanu, Ninad Thakoor, Prudence Talbot, and Sabrina Lin</i>	
Learning-Based Vessel Segmentation in Mammographic Images	315
<i>Erkang Cheng, Shawn McLaughlin, Vasileios Megalooikonomou, Predrag R. Bakic, Andrew D.A. Maidment, and Haibin Ling</i>	
Feature Selection Guided by Perception in Medical CBIR Systems	323
<i>Pedro H. Bugatti, Marcela X. Ribeiro, Agma J.M. Traina, and Caetano Traina Jr.</i>	
Principal Curved Based Retinal Vessel Segmentation towards Diagnosis of Retinal Diseases	331
<i>S. You, E. Bas, D. Erdogmus, and J. Kalpathy-Cramer</i>	
Organ Labeling Using Anatomical Model-Driven Global Optimization	338
<i>Xiaofeng Liu, Qi Song, Paulo Mendonca, Xiaodong Tao, and Rahul Bhotika</i>	
On the Feasibility of Predicting Radiological Observations from Computational Imaging Features of Liver Lesions in CT Scans	346
<i>Francisco Gimenez, Jiajing Xu, Yi Liu, Tiffany Ting Liu, Christopher F. Beaulieu, Daniel L. Rubin, and Sandy Napel</i>	
Poster Papers: Systems Biology	
A Querying Method with Feedback Mechanism for Protein Interaction Network	351
<i>Jiang Xie, Shihua Zhang, Tiegiao Wen, Guangtai Ding, Shu Yu, Zhili Gu, and Wu Zhang</i>	
Autism: A Systems Biology Disease	359
<i>Mary Randolph-Gips</i>	
Author Index	367
