

# **2011 11th Mediterranean Microwave Symposium**

## **(MMS 2011)**

**Yasmine Hammamet, Tunisia  
8 – 10 September 2011**

**IEEE Catalog Number:** CFP1146H-PRT  
**ISBN:** 978-1-4577-1814-4

## Table of contents

Rafal Przesmycki, Leszek Nowosielski, Marian Wnuk and Marek Bugaj .....	1
Analysis of conducted and radiated emission from IT devices in the frequency band 0,15MHz – 6000MHz	
Rafal Przesmycki, Leszek Nowosielski, Marian Wnuk and Marek Bugaj .....	5
The laptop casing shielding effectiveness measurement	
Rafal Przesmycki, Leszek Nowosielski, Marian Wnuk and Marek Bugaj .....	9
Small chambers shielding effectiveness measurement	
Mohamed Yahia, Junwu Tao and Mohamed Naceur Abdelkrim .....	13
Rectangular Waveguide Filter Design Using Hybrid Finite Element Method and a Modified Multimodal Variational Formulation	
Arindam Deb, Bhaskar Gupta and Jibendu Sekhar Roy.....	17
Performance Comparison of Differential Evolution, Genetic Algorithm and Particle Swarm Optimization in Impedance Matching of Aperture Coupled Microstrip Antennas	
Arkaprovo Das, Sayantan Dhar and Bhaskar Gupta .....	21
Lumped Circuit Model Analysis of Meander Line Antennas	
Amrita Chakraborty, Avra Kundu and Bhaskar Gupta.....	25
Compact K-Band Distributed RF MEMS Phase Shifter Based on High-Speed Switched Capacitors	
Yuwei Zhou, Bruno Froppier and Tchanguiz Razban .....	29
Study of a Matching Circuit Effect on a Microwave Rectifier	
S. K. Hashemi .....	34
Dual-Band Bandpass Filters Based on Multilayer Ring Resonators	
Salem Akkar, Ferid Harrabi and Ali Gharsallah.....	38
DIRECTIONS OF ARRIVAL ESTIMATION OF CORRELATED SOURCES IN PRESENCE OF MUTUAL COUPLING	
Ahmed Benomar, Noureddine Boukli Hacène, Hicham Megnafi and Patrick Vaudon .....	42
Cylindrical dielectric antenna for dual band application	
Ahmed Benomar, Noureddine Boukli Hacène, Hicham Megnafi and Patrick Vaudon .....	47
Effect of permittivity on characteristics of embedded cylindrical dielectrics antennas	
Mondher Labidi, Jamel Bel Hadj Tahar and Fethi Choubani .....	52
New design of antenna array using Left Handed Meta-Material “LHM” based on circular Split Ring Resonator “SRR”	
Jean Marie Floch.....	57
Wide Band Printed Dipole Design	

Guillaume Lerideau, Jean-Marie Floc'H, Anne-Claude Tarot, Renaud Loison, Samuel Pied, Sophia Thizon and Ahmad Khoder El Sayed Ahmad .....	61
High gain printed dipole array with reflectors and directors	
Ahmad Elsayed Ahmad, Marc Thevenot, Moustapha Salah Toubet, Jean-Marie Floc'H and Guillaume Lerideau.....	64
DESIGN OF A PLANAR MULTIFUNCTIONS ANTENNA	
Mohamed Aymen El Cafsi, Ridha Ghayoula, Hichem Trabelsi and Ali Gharsallah .....	67
Phased Uniform Linear Antenna Array Synthesis using Genetic Algorithm	
Amal Ghanmi, Odile Picon, Joe Wiart, Yenny Pinto, Emmauelle Conil and Abdelhamid Hadjem .....	73
Uncertainty propagation in the SAR induced in the head using polynomial chaos decomposition	
Mahdi Rajabi, Nader Komjani and Vahid Nayyeri .....	77
Novel Technique for Improvement of Transmission Line Matrix Method Algorithm Frequency Response	
Fatiha El Hatmi, Marjorie Grezeskowiak, Thierry Alves, Stéphane Protat and Odile Picon .....	81
Magnetic Loop Antenna for Wireless Capsule Endoscopy Inside the Human Body Operating at 315 MHz: Near Field Behavior	
Hicham Megnafi, Noureddine Boukli-Hacene, Ahmed Benomar, Henri Baudrand and Nathalie Raveu .....	88
An Efficient Analysis of Microstrip Trisection Filters Using an Iterative Method Combined by approach Multi-Scale	
Hicham Megnafi, Noureddine Boukli-Hacene, Ahmed Benomar, Henri Baudrand and Nathalie Raveu .....	93
Analysis of Microstrip Cascaded Quadruplet Filters by a Multi-Scale Wave Concept Iterative Procedure (M.WCIP)	
Nadhem Nemri, Amor Smida, Ridha Ghayoula, Hichem Trabelsi and Ali Gharsallah .....	97
Phase-Only Array Beam Control using a Taguchi Optimization Method	
Imen Ben Trad, Hatem Rmili, Jean-Marie Floch and Habib Zangar.....	101
Design of Planar Mono-Band rejected UWB CPW-Fed Antennas for Wireless Communications	
Malek Ben Hammouda, Messaoud Ahmed-Ouameur and Frederic Domingue .....	106
MEMS Based Tunable Microwave Amplifier Design for Reconfigurable PCS1900 Mobile Application	
Rabia Yahia and Tayeb A. Denidni.....	110
Compact CPW-Fed Antenna with Ultra-Wideband and Dual Polarization	
Fathi Nasri, Zhebin Wang, Shengjie Gao and Chan-Wang Park .....	113
Analysis and Design of Dual Band-Notched Interdigital Hairpin UWB Bandpass Filter	
Saouli Abdelali and Karim Mansour .....	117
Application of the finite elements method in optical medical imaging	
Nabil Dakhli, Fethi Choubani and Mohamed Hayouni .....	122
Dual Band Low-Profile Zeroth-Order Metamaterial Antenna	

Hanen Idoudi, Nahla Hmili and Leila Azouz Saidane .....	126
Energy Efficient Cross-Layer Architecture for Wireless Sensor Networks	
Hani Wadie Badri, Said Ghnimi and Ali Gharsallah .....	130
Electromagnetic Propagation Environment Effects On The WiMAX Communication System	
Vahid Nayyeri, Mohammad Soleimani and Mojtaba Dehmollaian.....	134
Analytical and Numerical Calculation of Reflection from a Stratified Structure Backed by a PEMC	
Amor Smida and Ridha Ghayoula.....	138
Adaptive Radiation Pattern Optimization for Antenna Arrays by Phase using a Taguchi Optimization Method	
Khodja Abdelhamid, Touhami Rachida, Yagoub Mustapha C. E and Baudrand Henry .....	142
Full-Wave Modal Analysis of Asymmetric Coupled Lines Using the Quasi-Symmetric Approach	
Bousbia Leila and Mabrouk Mohamed .....	146
Optimization and Improvement Performances of Dual-Band Pass RF Filters	
Ramzi Darraji and Fadhel Ghannouchi .....	151
A Digital Doherty Transmitter Suitable for Wireless Infrastructure Efficiency Enhancement	
Naim Ben Ali and Mounir Kanzari .....	155
Omni-Directional High Reflectors Using One-Dimensional Deformed Quasi-periodic Cantor Band Gap Structure at Ultra High Frequency Band	
Ali Ouchar, Rabia Aksas and Abdelkader Sonne.....	159
Chromatic Dispersion of microstructured fiber using neural netwok	
Ali Mahdi, Kachouri Abdennaceur and Samet Mounir.....	161
New Methodology Of Conceiving Stacked Proximity Feed Antenna	
Naama Amdouni, Ons Ben Rhouma and Ammar Bouallègue .....	169
Alamouti Scheme's Generalization	
Rami Ben Amira, Dorra Ayadi and Mourad Loulou .....	173
Impacts of adaptive modulation on system level design for IEEE802.22 Cognitive Radio Receiver	
Mnaouer Kachout, Jamel Bel Hadj Tahar and Fethi Choubani.....	177
Theoretical Approach to Study Crosstalk Between Three Conductor Nonuniform Transmission Lines	
Lotfi Osman, Zied Harouni, Hamida Turki and Ali Gharsallah .....	182
Proximity Coupled Microstrip Patch Antenna Design with Reduced Out of Band Harmonics Device at 2.45 GHz	
Amor Hammami, Ridha Ghayoula and Ali Gharsallah.....	185
Uniform Circular Phased Arrays synthesis using SQP	
Maher Heni and Ridha Bouallegue.....	189
Performance Analysis of a Proactive Protocol for Mobile Ad hoc Networks with JiST-SWANS	

Maher Heni and Ridha Bouallegue.....	193
Adaptive Service Discovery and Proactive Routing Protocol for Mobile Ad Hoc Network	
Jungsik Park, Junho Choi, Young-Sik Kim and Jiyong Park.....	197
Ground Slot with Capacitor for High Isolation between MIMO antenna	
Bannour. Ahmed, Mohamed Lassaad Ammari, Yichuang Sun and Ridha Bouallegue .....	201
Algebraic Carrier Frequency Offset Estimator for ASTC-MIMO-OFDM Systems over Correlated	
Frequency Selective Channel	
Beldi Sabri, Bedira Rachida and Gharsallah Ali.....	207
Coupling between two radiating apertures on a perfectly conducting cylinder	
Mohamed Hayouni, Nabil Dakhli and Fethi Choubani .....	21
3D FDTD Analysis of A Compact UWB Planar Antenna	
Ali Doghri, Anthony Ghiotto, Tarek Djerafi and Ke Wu.....	215
Early Demonstration of a Passive Millimeter-Wave Imaging System Using Substrate Integrated	
Waveguide Technology	
Nedra Benletaief, Houria Rezig and Ammar Bouallegue .....	219
Reconciliation for Practical Quantum Key Distribution with BB84 protocol	
Zaier Aida and Bouallegue Ridha.....	223
LMMSE Channel Estimation for Block - pilot Insertion in OFDM Systems Under Time Varying	
Conditions	
Anis Ben Hajyoussef, Tahar Ezzedine and Ammar Bouallegue .....	229
Spatial Complexity Prediction for H.264 Rate	
Akram Boubakri and Jamel Bel Hadj Tahar .....	233
Steerable and compact antenna using a cavity-based metamaterial	
Iman Ben Issa and Mohamed Essaaidi .....	236
Simultaneous Gain and Bandwidth Enhancement of a Circularly Polarized Microstrip Patch Antenna	
Using a Coupled Square-shape Split Ring Resonators Metamaterial Superstrate	
Walid Boudhiafi, Tahar Ezzedine and Ridha Bouallegue .....	240
L'impact des protocoles MAC et les protocoles des routages hiérarchiques sur le réseau de capteur	
sans fils	
Nabil Chaabani, Tahar Ezzedine and Ammar Bouallègue .....	245
A new algorithm for wavelet video coding	
Houda Sboui, Ammar BOUALLEGUE and P. Solé.....	249
Cyclic codes and self-dual codes over $M_2(F_2)$ and $M_2(F_2[i])$	
Walid Boudhiafi, Malika Elmonser, Tahar Ezzedine and Ridha Bouallague .....	252
Un nouveau protocole de routage hiérarchique MLLEACH pour le réseau de capteur sans fils de	
grande taille	
Maha Cherif, Rafik Zayani and Ridha Bouallegue.....	257

NEURAL NETWORK COMPENSATOR BASED MMSE RECEIVER FOR HPA NONLINEARITY IN MIMO  
OFDM SYSTEMS

Raggad Hedi, Latrach Mohamed, Gharsallah Ali and Razban Tchanguiz .....	262
Wideband Circularly Polarized Conical Dielectric Resonator Antenna	
Mohamed Tellache and Henri Baudrand .....	265
EFFICIENT ITERATIVE METHOD FOR CHARACTERIZATION OF MICROWAVE PLANAR CIRCUITS	
Zarral Lamia, Ndagiijimana Fabien and Djahli Farid.....	273
Caracterization of The Materials Used As GSM And DCS Antenna In Free Space	
Zarral Lamia, Ndagiijimana Fabien and Djahli Farid.....	276
Simulation And Realization Of Printed Vivaldi-Type Antenna To Optimize A Bench Of characterization Of The Materials Used In GSM And DCS Antennas	
Zarral Lamia, Ndagiijimana Fabien and Djahli Farid.....	279
Materials Characterization Using A Structure Based On Microstrip Line	
Saber Dakhli, Kourosh Mahdjoubi and Jean-Marie Floc'H .....	282
Design of an FP/EBG Antenna with Metamaterial PRS	
Sonali Das, Avra Kundu, Santanu Maity, Sayantan Dhar, Bhaskar Gupta .....	286
Novel Compact CPW Filter for MICs Using Metamaterial Structures	
Karim bentaher, Tan-hôa vuong, Fethi choubani, Jacques david .....	290
Fractal dipole antenna based on tent transformations for passive UHF RFID applications	
M. Ould-Elhassen, M. Mabrouk, A. Ghazel, Ph. Benech .....	294
Theoretical and Experimental Characterization of Distributed Analog Phase Shifter	
Imen Sfar, Lotfi Osman, Ali Gharsallah, Marjorie Grzeskowiak, Odile Picon .....	299
Limitation of a Five-Port Reflectometer Using Planar Elliptic Couplers for UWB Applications	
Said Ghnimi, Adnen Rajhi, Ali Gharsallah .....	305
BER performance of GMSK Modulation Under Radio Mobile Propagation Environments	
Mehri Houda, Saadi Redjel .....	309
Performances Assessment of the Scheduling Mechanism for the Management of the Quality Service (QoS) in the IP Network	
M. Ould-Elhassen, M. Mabrouk, A. Ghazel, Ph. Benech .....	314
Comparative Measurements of Tapering input Effects on Tunable Distributed Phase Shifter Performances	
H. Talleb , D. Lautru, V. Fouad Hanna, M.F. Wong, J. Wiart .....	319
Study of a RFID antenna for a telemetric application	
J.C. Reyes-Guerrero, M. Bruno, Luis A. Mariscal, Abdellatif Medouri .....	320
Buoy-to-ship experimental measurements over sea at 5.8 GHz near urban environments
