

2011 IEEE Electrical Power and Energy Conference

(EPEC 2011)

**Winnipeg, Manitoba, Canada
3-5 October 2011**

IEEE Catalog Number: CFP11EPE-PRT
ISBN: 978-1-4577-0405-5

Program

Tuesday, October 4

B: Micro Grids

Demand Response Implementation for Remote Communities

M. Wrinch, T. EL-Fouly and S. Wong
pp. 1-5

Impact of Islanding and Resynchronization on Distribution Systems

D. S. Grewal, K. Duggal and V. Sood
pp. 6-10

Proton Exchange Membrane Fuel Cell (PEMFC) Modeling in PSCAD/EMTDC

L. Luckose, N. Urlaub, N. Wiedebach, H. Hess and B. Johnson
pp. 11-16

No-Storage Wind-Diesel System: Mechanical Modeling Based on Power Flow Models

H. Ibrahim, J. Lefebvre, J. F. Methot and J. S. Deschênes
pp. 17-22

Numerical Modeling Wind-Diesel Hybrid System: Overview of the Requirements, Models and Software Tools

H. Ibrahim, J. Lefebvre, J. F. Methot and J. S. Deschênes
pp. 23-28

D: Optimization Methods I

Optimal Design of Gas Turbine-Solid Oxide Fuel Cell Hybrid Plant

P. Hoseinpoori, H. Najafi and B. Najafi
pp. 29-34

Applying Neural Network and Genetic Algorithm for Optimal Placement of Ultra-Capacitors in Metro Systems

S. Jalali Kashani and E. Farjah
pp. 35-40

Multi-Objective Optimization of Ocean Thermal Energy Conversion Power Plant via Genetic Algorithm

A. Najafi, S. Rezaee and F. Torabi
pp. 41-46

Design of Eigenvalues Sensitivity-Based Passive Filter Using Genetic Algorithm

E. Babaei and M. Hassannia
pp. 47-51

C: Solar Technology

Operation Strategies of Energy Storages with Forecast Methods in Low-Voltage Grids with a High Degree of Decentralized Generation

M. Lödl, R. Witzmann and M. Metzger
pp. 52-56

The Down-to-Earth Future of Si Substrate Multi-junction Concentrator Photovoltaics

S. D'Souza, J. Haysom, H. Anis and K. Hinzer
pp. 57-61

Sensitivity Analysis of a Hybrid Photovoltaic Thermal Solar Collector

H. Najafi and B. Najafi
pp. 62-67

Improving Passive Solar Collector for Fiber Optic Lighting

P. Couture, H. Nabbus, A. Al-Azzawi and M. Havelock
pp. 68-73

Optimal Sizing and Location of a PV System on Three-Phase Unbalanced Radial Distribution Feeder Avoiding Reverse Power Flow

A. Al-Sabounchi, J. Gow, M. Akaidi and H. Al-Thani
pp. 74-79

A: VSC dc transmission

A Preliminary Look at the Feasibility of VSC HVdc in Manitoba

D. Jacobson, P. Wang, M. Mohaddes, M. Rashwan and R. Ostash
pp. 80-85

Reactive Power Loading of Components within a Modular Multi-Level HVDC VSC Converter

C. Barker and N. Kirby
pp. 86-90

Research on the Fault Characteristics of HVDC Based on Modular Multilevel Converter

X. Chen, C. Zhao and C. Cao
pp. 91-96

Loss Calculation Method of Modular Multilevel HVDC Converters

L. Yang, C. Zhao and X. Yang
pp. 97-101

E: FACTS

A Multivariable Adaptive Nonlinear Controller for a Five-level Diode Clamped StatCom

F. Okou, R. Beguenane, D. Nganga-Kouya and D. Dupuis

pp. 102-108

System Interaction Studies in Real-Time for the Birchtree SVC

M. de Oliveira and D. Jacobson

pp. 109-115

F: Distribution System Controls

Distribution Feeder Voltage Support and Power Factor control by Distributed Multiple Inverters

L. Perera, G. Ledwich and A. Ghosh

pp. 116-121

Influence analysis of DG penetration levels and grid-connected positions on traditional current protection

S. Tao, J. Guo, X. Xiao and G. Li

pp. 122-127

Three-phase Cross-phase Voltage Sag Compensator to Compensate Balanced/Unbalanced Voltage Sags and Phase Outages in Distribution Systems

E. Babaei and M. Farhadi Kangarlu

pp. 128-133

G: Protection Systems

Phase Angle Comparison and Differential Rate of Change Methods used for Differential Protection of Busbars and Transformers

K. Narendra, D. Fedirchuk, N. Zhang, R. Midence, N. Perera and V. Sood

pp. 134-139

Application of a Protection Scheme to Mitigate the Impact of Load Rejection in a 500 kV Transmission System

W. Chandrasena and D. Jacobson

pp. 140-145

Simulation Environment of Distance Protection with ATP and Foreign Models

R. Fabián, F. Leão and J. Mantovani

pp. 146-151

Hardware Implementation of an Islanding Detection Approach based on Current and Voltage Transients

J. P. Pham, N. Denboer, N. Lidula, N. Perera and A. Rajapakse

pp. 152-157

Turn-to-Turn Fault Detection in Transformers Using Negative Sequence Currents

M. Babiy, R. Gokaraju and J. C. Garcia

pp. 158-163

H: Optimization Methods II

Application of PSO to optimize the Operation of Electric Water Heaters for Reserve Provision

P. Rosario, W. Morsi and L. Chang
pp. 164-169

Novel Constrained Search-Tactic for Optimal Dynamic Economic Dispatch using Modern Meta-Heuristic Optimization Algorithms

F. Abu-Mouti and M. El-Hawary
pp. 170-175

Multi-Objective Short-Term Hydro-Thermal Scheduling Using Bacterial Foraging Algorithm

I. Farhat and M. El-Hawary
pp. 176-181

Bacterial Foraging Algorithm for Optimum Economic-emission Dispatch

I. Farhat and M. El-Hawary
pp. 182-186

I: Advances in Study and Analysis Tools

A Decoupled Interface Method for Electromagnetic and Electromechanical Simulation

Yi Zhang, W. Wu, B. Zhang and A. Gole
pp. 187-191

Improved Continuation Power Flow Method for AC/DC Power System

C. Liu, A. Bose, M. Han and X. Chen
pp. 192-198

Simulation of Large-Scale Electrical Power Networks on Graphics Processing Units

J. Debnath, W. K. Fung, A. Gole and S. Filizadeh
pp. 199-204

Rapid Prototyping of Control Systems from Electromagnetic Transient Simulator Program

D. Williams, E. Nummijoki, A. Gole and E. Dirks
pp. 205-210

A Study of Temporary Overvoltage at HVDC Rectifier Stations

C. Zhou and P. Wang
pp. 211-215

Influence of the MIIF Index on Operation of Multi-infeed HVDC Systems

X. Chen, A. Gole, M. Han and C. Liu
pp. 216-221

J: Wide Area Measurement and Control

Techniques and Analysis

A Transformation Technique for Decoupling Power Networks

I. Rahimi Pordanjani, Y. Wang and W. Xu
pp. 222-227

A Real-Time Wide-Area Excitation Control to Enhance Transient and Oscillatory Stabilities

R. Hadidi and B. Jeyasurya
pp. 228-232

Comparison of Adaptive UFLS Schemes in Modern Power Systems

U. Rudez and R. Mihalic
pp. 233-238

Small Signal Stability Analysis of Tidal Current Turbine using DDPMSG with and Without Controller

H. Aly and M. El-Hawary
pp. 239-243

K: Power System Planning I

Matlab-based Voltage Stability Analysis Toolbox and its Validity Check

Y. Wei
pp. 244-248

Comparison of Voltage Stability Indexes Considering Dynamic Load

Xi Zhang and C. K. Wong
pp. 249-254

Attending Small Loads along a Half-Wavelength Transmission Line

M. Tavares and R. Borges
pp. 255-259

Analysis of the Energization Test of 2600-km Long AC-Link Composed of Similar Transmissions Lines

E. Gomes and M. Tavares
pp. 260-265

L: Application of Probabilistic Planning Methods

Role of Thermal Effects in Blackout Probabilistic Risk Assessment

P. Henneaux, P. E. Labeau and J. C. Maun
pp. 266-271

Impacts of Demand Side Management on Bulk System Reliability Evaluation Considering Load Forecast Uncertainty

D. Huang and R. Billinton
pp. 272-277

A Probabilistic Procedure for the Reliability Assessment of Substation Development Options

B. Bagen
pp. 278-283

Evaluation of Wind Power Commitment Risk in System Operation

S. Thapa, R. Karki and R. Billinton
pp. 284-289

Applications of Probability Model to Analyze the Effects of Electric Vehicle Chargers on Distribution Transformers

J. Sexauer, K. McBee and K. Bloch
pp. 290-295

Wednesday, October 5

M: Power Quality

A Study of Flicker Emission of a Mid-Scale Wind Turbine

V. Suppioni and A. Grilo
pp. 296-301

Hybrid Active Filter for Power Factor Correction and Harmonics Elimination in Industrial Networks

L. Herman and I. Papič
pp. 302-308

On the modeling of dynamic voltage restorer for voltage sag mitigation in stand alone power system

J. Plastino and W. Morsi
pp. 309-314

N: Smart Grid Concepts

Smart Grid Data Analytics for Decision Support

P. Ranganathan and K. Nygard
pp. 315-321

Modernizing a Distribution System

J. Hall, D. Blanchette, D. Shelvey, C. Senkow and J. Waddell
pp. 322-326

Power Consumption Management and Control for Peak Load Reduction in Smart Grids Using UPFC

M. Aghaebrahimi, M. Tourani and M. Amiri
pp. 327-333

An efficient appliance for low voltage DC house

M. Amin, Y. Arafat, S. Lundberg and S. Mangold

pp. 334-339

Low voltage DC distribution system compared with 230 V AC

M. Amin, Y. Arafat, S. Lundberg and S. Mangold

pp. 340-345

O: Power System Planning II

Harmonic Content and Estimation of Length Variation of Artificially Generated Electrical Arc in Out-Door Experiments

M. Tavares, J. Talaisys, C. Portela and A. Câmara

pp. 346-351

A Comparison of Overvoltage Control Methods during Three-Phase Reclosing varying the Length of Shunt Compensated Transmission Lines

P. Mestas and M. Tavares

pp. 352-356

Analysis of Damping Conservation in Subsynchronous Oscillation

L. Yang, X. Xiao, D. Zhang and B. Gao

pp. 357-361

P: Transmission Line Design and Modelling

Transient Analysis on Overhead Transmission Line Considering the Frequency Dependent Soil Representation

J. Gertrudes and M. Tavares

pp. 362-367

Effectiveness of VAR Sources for Power System Performance Enhancement

L. Weng and B. Jeyasurya

pp. 368-373

Mutual Coupling Modeling in Transmission Lines directly in the Phase Domain

E. Costa

pp. 374-379

An Expert System for Condition Assessment of ACSR Conductors

Md Bhuiyan, P. Musilek and J. Heckenbergerova

pp. 380-385

Q: Active Filters

Unfunctionality of The Instantaneous p-q Theory for The Control of Series Active Filters

A. Javadi and K. Al-Haddad

pp. 386-391

A New Control Method for Shunt Active Filters Based on Sinusoidal Signal Integrators

E. Babaei, M. Yavari and S. H. Hosseini
pp. 392-397

Experimental Evaluation of DC Bus Voltage Control in Shunt Active Power Filter with Split Capacitor using Real Time Hardware in the Loop Simulation

O. Solano, C. Viviescas, M. Mantilla, J. Petit and A. Acevedo
pp. 398-403

Generalized Single Phase Z-Source Matrix Converter

S. H. Hosseini, J. Nabati and A. Mirlo
pp. 404-408

R: Electric Vehicles

Impact of Plug in Electric Vehicles on Manitoba Hydro's Distribution System

J. Waddell, M. Rylander, A. Maitra and J. Taylor
pp. 409-414

Analyzing the Capacity of Low Voltage Grids for Electric Vehicles

G. Stoeckl, R. Witzmann and J. Eckstein
pp. 415-420

Cold-Weather Modifications of Plug-in Hybrid Electric Vehicles for Manitoba Operation

C. Gregor and R. Parsons
pp. 421-425

Close-Loop Control of an AC-DC Matrix Converter for Automotives

C. Zhang
pp. 426-431

S: Wind Plant Design

Fuzzy Supervised PI Controller for VSC HVDC System Connected to Induction Generator Based Wind Farm

A. Moharana, J. Samarabandu and R. Varma
pp. 432-437

New Microprocessor Based Relay to Monitor and Protect Power Systems Against Sub-Harmonics

K. Narendra, D. Fedirchuk, R. Midence, N. Zhang, A. Mulawarman, P. Mysore and V. Sood
pp. 438-443

Representation of Variable Speed Wind Turbine Generators for Short Circuit Analysis

E. Gursoy and R. Walling
pp. 444-449

A multiphase CFX based approach into ice accretion modeling on a cylinder

F. Martini, D. Ramdenee, H. Ibrahim and A. Ilinca
pp. 450-455

A Lagrangean Interactive Interface to Evaluate Ice Accretion Modeling on a Cylinder - A test case for icing modeling on wind turbine airfoils

F. Martini, D. Ramdenee, H. Ibrahim and A. Ilinca
pp. 456-461

Software Tool to Predict The Wind Energy Production Losses Due to Icing

M. Dimitrova and H. Ibrahim
pp. 462-467

T: Transformers, GIC, Fault Current Limiters

Transient Behavior of Static Fault Current Limiter in Distribution System

S. Najafi and V. Sood
pp. 468-473

Modeling of Matrix Fault Current Limiter and Its Verification

A. Mohseni, S. Mohajer Yami and A. Shayegani Akmal
pp. 474-478

Sensitivity Analysis and Stochastic Approach in Study of Transient Recovery Voltage with Presence of Superconducting FCL

A. Mohseni, S. Mohajer Yami and A. Shayegani Akmal
pp. 479-484

Modeling and Mitigation of Geomagnetically Induced Currents on a Realistic Power System Network

J. Berge, L. Marti and R. Varma
pp. 485-490

Laboratory Validation of the Relationship Between Geomagnetically Induced Current (GIC) and Transformer Absorbed Reactive Power

J. Berge, R. Varma and L. Marti
pp. 491-495
