

EMC Europe 2011 York

**York, United Kingdom
26 – 30 September 2011**

IEEE Catalog Number: CFP1106F-PRT
ISBN: 978-1-4577-1709-3

TABLE OF CONTENTS

SESSION : A1 : INTENTIONAL EMI AND SEVERE EM THREATS

HPM Detection System for Mobile and Stationary Use	1
<i>Christian Adami, Christian Braun, Peter Clemens, Michael Suhrke, H. U. Schmidt, Achim Taenzer</i>	
Application and Propagation of Transient Pulses on Power Supply Networks	7
<i>Johannes H. Hagmann, Stefan Dickmann, Stefan Potthast</i>	
Response of a Switched Dynamical System to Intentional EMI	13
<i>Robert L. Gardner</i>	
High Power Microwave Effects on Computer Networks	18
<i>Libor Palisek, Lubos Suchy</i>	

SESSION : A3-1 : INSTRUMENTATION AND MEASUREMENT TECHNIQUES 1

A Novel Multichannel Amplitude Probability Distribution for a Time-Domain EMI Measurement System According to CISPR 16-1-1	22
<i>Hassan Hani Slim, Christian Hoffmann, Stephan Braun, Peter Russer</i>	
Improving EMC Measurement Uncertainty with Digital EMI Receivers & Optical Fiber Technology from 10Hz up to 6GHz	26
<i>Michele Zingarelli, Roberto Grego</i>	
The Excitation of Dipole Antennas via a Bulk Current Injection Probe	31
<i>James McLean, Robert Sutton</i>	
Passive Integrator for ILDAS Project	37
<i>V. Stelmashuk, A. P. J. Van Deursen</i>	

SESSION : A3-2 : INSTRUMENTATION AND MEASUREMENT TECHNIQUES 2

A Novel Real-Time Ambient Noise Cancellation System for EMI Measurements in Time-Domain	41
<i>Arnd Frech, Steffen Limmer, Peter Russer</i>	
Shielding Performance of an Expanded Copper Foil Over a Wide Frequency Range	46
<i>M. Bozzetti, L. Pisu, M. S. Sarto, S. Greco</i>	
Measurement of Complex Permittivity of Composite Materials Using Waveguide Method	52
<i>O. V. Tereshchenko, F. J. K. Buesink, Frank Leferink</i>	
Measuring Electromagnetic Interference in Time-Domain in CISPR Band E and Beyond	57
<i>Christian Hoffmann, Peter Russer</i>	

SESSION : A3-3 : INSTRUMENTATION AND MEASUREMENT TECHNIQUES 3

A Low-Cost Comb Generator for the Characterization of Test Sites	61
<i>A. Bellato, Matteo Bertocco, L. Rossetto, Marco Stellini</i>	
A Proposal for EFT Uncertainty Evaluation Using Numerical Spectral Analysis	67
<i>Carlo Carobbi, Marco Stellini, Alessandro Zuccato, Paolo Tomasin, Michele Borsero</i>	
Effects of Effective Dielectric Constant of Printed Short Dipoles in Electric Field Probes	73
<i>Zlatko Zivkovic, Antonio Sarolic, Vesna Roje</i>	

SESSION : A4 : BIOLOGICAL EFFECTS

Specific Absorption Rate Distribution on a Human Head Model from Inductive Power Coils	79
<i>David C. Ng, Xiaoting Wang, Gordana K. Felic, Shun Bai, Clive S. Boyd, Mark Halpern, Efstratios Skafidas</i>	
Development of a Layered Broadband Model of Biological Materials for Aerospace Applications	84
<i>Gregory C. R. Melia, Martin P. Robinson, Ian D. Flintoft</i>	
RF Exposure Compliance Assessment for Radio Base Station with Built-In Antenna	90
<i>Junji Higashiyama, Yoshiaki Tarusawa</i>	

Current Response of the Human Body Excited by an Electromagnetic Wave	94
<i>Sabrina Mezoued, A. Malek Laissaoui, Bachir Nekhoul, Kamal Kerroum</i>	

SESSION : A6 : CABLES AND CONNECTORS

Design and Evaluation of a Generic EUT for the Determination of Conversion Factors According to CISPR 16-4-5	100
<i>David Hamann, Dirk Zamow, Fabian Gerschon, Heyno Garbe</i>	
Impedance Analysis of Automotive High Voltage Networks for EMC Measurements	106
<i>M. Reuter, Stefan Tenbohlen, Wolfgang Kohler, A. Ludwig</i>	
Numerical Simulation and Measurement of the Signal Integrity of a FlexRay System	112
<i>Ulf Carlberg, Jan Carlsson, Christer Karlsson, Jerker Fors</i>	

SESSION : A7-1 : ANECHOIC CHAMBERS, REVERBERATION CHAMBERS AND TEM CELLS 1

Absorbing Material Characterization in a Reverberation Chamber	117
<i>Emmanuel Amador, Mihai Ionut Andries, Christophe Lemoine, Philippe Besnier</i>	
Measurement of Boundary Fields in a Reverberation Chamber	123
<i>Archit Somani, Srinivas Gorla, Mathias Magdowski, Ralf Vick</i>	
Dynamic Electrical Behaviour of a Composite Material During a Short Circuit	128
<i>Alexandre Piche, David Andissac, Ivan Revel, Bruno Lepetit</i>	

SESSION : A7-2 : ANECHOIC CHAMBERS, REVERBERATION CHAMBERS AND TEM CELLS 2

Dual Vibrating Intrinsic Reverberation Chamber Used for Shielding Effectiveness Measurements	133
<i>Jacek Skrzypczyński</i>	
How a Physical Definition of Overmodedness Can Explain Local Statistical Non-Compliance	137
<i>Andrea Cozza, Florian Monsef</i>	
Experimental Investigation on Electronic Mode Stirring in Small Reverberation Chambers by Frequency Modulated Signals	143
<i>M. Maarleveld, H. Hirsch, M. Obholz, F. Jenau</i>	
An Experimental Investigation of the Use of Q-Factor to Determine the Shielding Effectiveness of Electrically Large Equipment Enclosures with Apertures	148
<i>Rob Armstrong, Andrew C. Marvin, John F. Dawson</i>	

SESSION : A7-3 : ANECHOIC CHAMBERS, REVERBERATION CHAMBERS AND TEM CELLS 3

Statistical Uncertainties Due to the Directivity of an EUT When Testing its Immunity in an Anechoic Chamber	153
<i>Karima El Fellous, Christophe Lemoine, Philippe Besnier, Alexandre Laisné</i>	
A Correlation Method to Extend the IEC 61000-4-20 for UWB Measurements	159
<i>Christian Kölling, Dirk Zamow, Heyno Garbe</i>	
Antenna Efficiency Determination in a Reverberation Chamber: From the Relative to the E-Field Method	164
<i>C. Tsigros, M. Piette, G. A. E. Vandenbosch, Dirk Van Troyen</i>	
Qualifying the Geometry of Mode Stirrers in Reverberation Chambers	170
<i>Wilfrid Quenum, Francois Issac, Bastiaan Michielsens</i>	

SESSION : A7-4 : ANECHOIC CHAMBERS, REVERBERATION CHAMBERS AND TEM CELLS 4

A Skeptic's View of Unstirred Components	174
<i>Andrea Cozza</i>	
Nonhomogeneous Poisson Process for Reverberant and Semi-Reverberant Environment Characterization	180
<i>Ramiro Serra, Frank Leferink, Flavio G. Canavero</i>	
Evaluation Technique for EMI Anechoic Chamber Over 1GHz by Plane-Wave Spectral Decomposition and Fish-Eye Lens Camera	186
<i>Michitaka Amezawa, Satoru Kurokawa, Ikuo Watanabe, Mikito Yamaguchi, Ryoichi Hasumi</i>	

GTEM Cell Setup and Method for Measuring Shielding Effectiveness of Resonant Enclosures	192
<i>Damir Senic, Antonio Sarolic, Vesna Roje</i>	

SESSION : A8-1 : EMC IN TRANSPORT SYSTEMS 1

EMC Modeling of Avionic Equipment at Low Frequency [10kHz--400MHz]	198
<i>A. Guena, K. Diomande, J.-L. Braut, M. Ridel, J.-P. Parmantier, J.-L. Vagneur, B. Chatellier</i>	
Channel Characterization of Power Line Communications Over In-Vehicle Wire Harness	204
<i>Concettina Buccella, Valerio De Santis, Mauro Feliziani</i>	
EMI Radiated Characterization of an Hybrid Bus	208
<i>Marc Pous, Andreu Aienza, Ferran Silva</i>	
Measurement of Electromagnetic Interference in the Station Rail Circuits.....	214
<i>Tatyana N. Serdyuk</i>	

SESSION : A8-2 : EMC IN TRANSPORT SYSTEMS 2

Conducted Emission Modelling of Autotransformer Rectifier Units Used in Aircraft.....	218
<i>Qian Zhou, Angela Nothofer, Christos Christopoulos</i>	
Measurement of Conducted Interferences in Automotive High-Voltage Power Networks	224
<i>Jens Hohloch, Stefan Tenbohlen, Wolfgang Köhler, Martin Aidam, Thomas Krauß</i>	
Comparison of Techniques for Prediction and Measurement of Antenna to Antenna Coupling on an Aircraft	228
<i>David A. Weston</i>	
Analysis of Radiated Emissions from FlexRay Automotive Bus Systems	234
<i>Jin Jia, Stephan Frei</i>	

SESSION : A9-1 : EMC IN WIRE AND WIRELESS SYSTEMS 1

Measurement of Longitudinal Conversion Loss (LCL) in Semianechoic Chambers from 150kHz to 300MHz	240
<i>John F. Hernandez Pascagaza, Delia Heras Martin</i>	
Industrial Indoor Environment Characterization -- Propagation Models.....	245
<i>Javier Ferrer Coll, Jose Dolz Martin De Ojeda, Peter F. Stenumgaard, Silvia Marzal Romeu, Jose Chilo</i>	
Accuracy of Gaussian Approximation Applied to Impulsive Interference in OFDM Reception.....	250
<i>Yasushi Matsumoto, Kaoru Gotoh</i>	
Search for Quasi-Optimal Current Return Paths in a Composite Environment	254
<i>Anca-Lucia Goleanu, Michel Dunand, Arthur Freycon, Pierre Glize, Jean Michel Guichon, Jean-Luc Schanen</i>	

SESSION : A9-2 : EMC IN WIRE AND WIRELESS SYSTEMS 2

Interference to Cable Television Due to Mobile Usage in the Digital Dividend --- Analysis	260
<i>Jan Robijns, Roel Schiphorst</i>	
Simulated NEXT and FEXT in Twisted Wire Pair Bundles	266
<i>A. Shoory, M. Rubinstein, A. Rubinstein, F. Rachidi</i>	
Electromagnetic Field Coupling to Multiple Buried Thin Wires --- Antenna Model versus Transmission Line Approach	272
<i>Dragan Poljak, Silvestar Sesnic, Khalil El Khamlichi Drissi, Kamal Kerroum</i>	
Coding Technique for Out-of-Band Power Emission Reduction for Multicarrier Systems	278
<i>Igor Gepko</i>	

SESSION : A10-1 : EMC AT PCB AND IC LEVEL 1

Time-Domain Modelling of Active Electrically Fine Features in TLM.....	284
<i>I. Scott, V. Kumar, S. Greedy, D. W. P. Thomas, Christos Christopoulos, P. Sewell</i>	
Modeling and Characterization of Parasitic Radiated Emission from a Flash Memory	288
<i>D. Capriglione, A. G. Chiariello, A. Maffucci, M. Bencivinni, F. Camarda, A. Girardi, G. Fusillo, R. Izzì, I. Martines</i>	

Ring Oscillator Switching Noise Under NBTI Wearout	294
<i>R. Fernández-García, I. Gil, J. M. Ruiz, M. Morata</i>	
Optimization Methods for Equivalent Source Identification and Electromagnetic Model Creation Based on Near-Field Measurements	298
<i>D. Rinas, S. Niedzwiedz, Jin Jia, Stephan Frei</i>	

SESSION : A10-2 : EMC AT PCB AND IC LEVEL 2

Differential Passive Circuit Modelling with Pentapole Impedance Matrices --- Application to an Integrated Audio Switching Amplifier for Portable Devices	304
<i>Roberto Mrad, Florent Morel, Gael Pillonnet, Christian Vollaire, Denis Labrousse</i>	
VHDL-AMS Relevance for Predicting Integrated Circuits Emissivity and Immunity	310
<i>Jean-Baptiste Gros, Genevieve Duchamp, Jean-Luc Levant</i>	
A Calibration Method for Planar Inductors in EMC Filters: Analysis and Experimental Validation	316
<i>Matteo Bertocco, Federico Tramarin, Alessandro Sona, Tristano Dal Canton</i>	
A New Binary Input Receiver Highly Immune to EMI	322
<i>Calogero Bona, Franco Fiori</i>	

SESSION : A11-1 : EMC AND SIGNAL INTEGRITY 1

Signal Integrity Verification of Complex High-Speed Interconnects via Waveform Relaxation	328
<i>S. Grivet-Talocia, V. Loggia</i>	
High Speed Signal Transmission Compatibility with Noise Suppression by Common Mode Chokes	334
<i>Seiichi Saito, Tsuyoshi Kobayashi, Shuichi Nitta</i>	
Impact of Technology Scaling on Electrical Characteristics of Through-Silicon via Correlated with Equivalent Circuits	339
<i>Hui Min Lee, En-Xiao Liu, Er-Ping Li, Jörg Fuhrmann</i>	

SESSION : A11-2 : EMC AND SIGNAL INTEGRITY 2

Skin and Proximity Effects Modeling in Micro-Wires Based on Carbon Nanotube Bundles	345
<i>G. Antonini, Antonio Orlandi, M. D'Amore</i>	
A Computation of the High-Frequency Per-Unit-Length Resistance Matrix of a Multiconductor Interconnection	351
<i>Frédéric Broyd�, Evelyne Clavelier</i>	
Investigation of Reduced Models of Capacitive Loaded Interconnects for the High-Speed SI Applications	357
<i>B. Ravelo, T. Eudes, A. K. Jastrzebski</i>	
Stochastic Evaluation of Parameters Variability on a Terminated Signal Bus	362
<i>Paolo Manfredi, Igor S. Stievano, Flavio G. Canavero</i>	

SESSION : A12-1 : IMMUNITY AND SUSCEPTIBILITY 1

Investigation on the Susceptibility of Hall-Effect Current Sensors to EMI	368
<i>Orazio Aiello, Paolo Croveti, Franco Fiori</i>	
Going from Analog to Digital --- Radiated Emissions Performance of a Nuclear Plant Control System from 10kHz to 6GHz	373
<i>Philip F. Keebler, Stephen Berger</i>	
Uncertainty of Immunity Tests	380
<i>Bruno Audone, R. Colombo</i>	
SENT Data Transmission with Low EMC Emissions	386
<i>Pavel Horsky, Petr Kamenicky, Pavel Baros</i>	

SESSION : A12-2 : IMMUNITY AND SUSCEPTIBILITY 2

Reverberation Chamber Immunity Testing : A Novel Methodology to Avoid Accidental DUT Damage	391
<i>Tobias Aurand, John F. Dawson, Martin P. Robinson, Andrew C. Marvin</i>	

Repeatability and Reproducibility of Radiated Immunity Tests	394
<i>Bruno Audone, Ilario Marziali</i>	
Expanding the Frequency Range for DPI Testing of IC's Above 1GHz: An Alternative Proposal	400
<i>Johan Catrysse, Davy Pissoort, Filip Vanhee</i>	
Experimental Analysis of Radio Receiver Susceptibility to Out-of-Band Interference by Means of Double-Frequency Test System	405
<i>Vladimir Mordachev, Eugene Sinkevich</i>	

SESSION : A13-1 : LIGHTNING 1

Analysis of Lightning Impact on Bundle	412
<i>R. Casagrande, S. Dubois, B. Badonnel</i>	
A Simplified Model for the Quantification of Electromagnetic Field Radiated by Grounding Grid	418
<i>Basma Harrat, Bachir Nekhoul, Kamal Kerroum</i>	
Modeling of Direct Lightning Impact on a Towers Cascade Using FDTD Method	424
<i>L. Boufenneche, Bachir Nekhoul, Kamal Kerroum</i>	

SESSION : A13-2 : LIGHTNING 2

Lightning Protection Improved by Multiple Interconnects in Buildings	430
<i>G. Bargboer, A. P. J. Van Deursen</i>	
Infrastructure Lightning Physico-Probabilistic Model	434
<i>Emmanuelle Garcia, Sofiane Haddad, Richard Perraud, Francois Béreux, Toufic Abboud</i>	
Using Thin Metal Layers on Composite Structures for Shielding the Electromagnetic Pulse Caused by Nearby Lightning	440
<i>M. A. Blaj, F. J. K. Buesink, G. C. Damstra, Frank Leferink</i>	
Lightning Damage to Underground Cables	445
<i>Masanobu Toyonaga, Kazuo Murakawa, Makoto Hosoda</i>	

SESSION : A14-1 : ESD 1

Equivalent Circuit Modeling to Calculate Discharge Currents for Air Discharges of ESD-Guns	449
<i>Ikuko Mori, Osamu Fujiwara, Heyno Garbe</i>	
Switch Based Non-Linear Models for System Level 3-D ESD Simulation	453
<i>Jouko Turunen, Timo Tarvainen, Aki Hekkala, Sami Ihme, Tuomas Reinvujo, Pasi Tamminen</i>	
Behavioral-Modeling Methodology to Predict Electrostatic-Discharge Susceptibility Failures at System Level: An IBIS Improvement	457
<i>N. MonnerEAU, F. Caignet, N. Nolhier, D. Trémouilles, M. Bafleur</i>	
Analysis of Discrete Property of Electrostatic Discharge with Moving Electrode	464
<i>Fangming Ruan, Xiaolu Wang, Huaiyu Wang, Feng Zhou, Tomasz Dlugosz</i>	

SESSION : A14-2 : ESD 2

The Evaluation Method for ESD Immunity of Components in Terms of Soft Error	468
<i>Jaedeok Lim, Jongsung Lee, Byongsu Seol, Argha Nandy, David Pommerenke</i>	
Human-Metal Electrostatic Discharge in the IEC, ANSI and MIL Standards --- Frequency Considerations	472
<i>Janusz Baran, Jan Sroka</i>	
A Combined Impedance Measurement Method for ESD Generator Modeling	476
<i>Friedrich Zur Nieden, Stephan Frei, David Pommerenke</i>	

SESSION : A15-1 : EMC ANALYSIS MODELLING AND PREDICTION 1

On Estimating the Directivity of Electrically Large Cable Dominated Desktop Systems	482
<i>Dirk Zamow, David Hamann, Evgeni Genender, Heyno Garbe</i>	
Mode-Based Semi-Analytical Model to Characterize the Coupling from Large Machines to Test Wires	488
<i>Davy Pissoort, Filip Vanhee, Bart Boesman, Johan Catrysse</i>	

In Situ Performances of Common Mode Chokes	494
<i>Anne Roc'H, Frank Leferink</i>	
Prediction of Aircraft Transient Level (ATL) by Simulation and Comparison to Frequency-Domain Measurements Using the Minimum Phase Algorithm	500
<i>Stefan Seybold, Markus Rothenhausler</i>	

SESSION : A15-2 : EMC ANALYSIS MODELLING AND PREDICTION 2

Numerical Assessment of Propagation Channel Characteristics for Future Application of Power Line Communication in Aircraft	506
<i>S. Bertuol, I. Junqua, V. Degardin, P. Degauque, M. Lienard, Michel Dunand, J. Genoulaz</i>	
Spectral Analysis of Random Digital Signals	512
<i>Bruno Audone, G. Trosini, M. Paolinelli</i>	
Study and Modeling of Inter-Component Coupling to Optimize EMC Filter	518
<i>An Zhou, C. Joubert, M. Bensetti, F. De Daran</i>	
Numerical Estimation of the Electric Field Distributions Due to Mobile Radio in an Aircraft Cabin Based on Large Scale FDTD Analysis	523
<i>Takashi Hikage, Shinya Hiraiwa, Toshio Nojima, Shunichi Futatsumori, Akiko Kohmura, Naruto Yonemoto</i>	

SESSION : A15-3 : EMC ANALYSIS MODELLING AND PREDICTION 3

Discrete Model for Inter-Antennas Isolation Calculations for Radio Base Station Collocation Case	527
<i>Jakub Juchniewicz, Wojciech Bandurski</i>	
Development of an Optical Near-Field Test Bench for EMC Application	531
<i>David Chevallier, David Baudry, Anne Louis</i>	
Numerical and Experimental Methods for the Investigation of EMI into Spacecraft Modules Caused by UWB Signals	537
<i>A. De Leo, Valter Mariani Primiani, P. Russo, G. Cerri</i>	
Electromagnetic Analysis of Metal Braids	543
<i>Harmen Schippers, Jaco Verpoorte, Ruben Otin</i>	

SESSION : A16-1 : COMPUTATIONAL ELECTROMAGNETIC FOR EMC STUDIES 1

Wave Chaotic Characterization of Complex Cavities: Distributed Ports and Coupling	549
<i>Thomas M. Antonsen Jr., Gabriele Gradoni, Steven Anlage, Edward Ott</i>	
Computational Method of Extraction of the 3D E-Field from the 2D H-Near-Field Using PWS Transform	555
<i>Y. Liu, B. Ravelo, A. K. Jastrzebski, J. Ben Hadj Slama</i>	
Integration of Non-Linear Behavioural Models Within the TLM --- Receiver Input and Supply Ports	561
<i>G. Kergonou, Christos Christopoulos, Flavio G. Canavero</i>	

SESSION : A16-2 : COMPUTATIONAL ELECTROMAGNETIC FOR EMC STUDIES 2

Numerical and Experimental Investigations on a Metallic Fuselage Model with Apertures	565
<i>Arne Schröder, Guido A. Rasek, Steffen E. Loos, Heinz-D. Bruns, Christian Schuster</i>	
Interaction of EM Fields to the Human Body Using MoM-FDTD-SGFDTD Hybrid Computational Method	571
<i>K. N. Ramli, R. A. Abd-Alhameed, Y. A. S. Dama, M. S. A. Al Khambashi, M. B. Child, P. S. Excell</i>	
Building Electromagnetic Macro Models for Small Structures on Aircraft --- Characterising and Modelling Joints, Seams, and Apertures	575
<i>R. Xia, John F. Dawson, Ian D. Flintoft, Andrew C. Marvin, S. J. Porter, I. Marschke</i>	
Study of the Electric Field Distribution Inside High Voltage Substations	581
<i>C. Munteanu, V. Topa, A. Racasan, I. T. Pop, E. Merdan</i>	

SESSION : A17-1 : EMC ASPECTS OF POWER SYSTEMS 1

Systematic Power Line EMI Filter Design for SMPS	586
<i>Vuttipon Tarateeraseth, Kye Yak See, Lin Biao Wang, Flavio G. Canavero</i>	

Large Number of Small Non-Linear Power Consumers Causing Power Quality Problems	592
<i>R. B. Timens, F. J. K. Buesink, V. Cuk, J. F. G. Cobben, W. L. Kling, Frank Leferink</i>	
Sources of Transient Electromagnetic Disturbance in Medium Voltage Switchgear	597
<i>Dennis Burger, Stefan Tenbohlen, Wolfgang Köhler, Werner Ebbinghaus</i>	
Switching Cell EMC Behavioral Modeling by Transfer Function	603
<i>Denis Labrousse, Bertrand Revol, Francois Costa</i>	

SESSION : A17-2 : EMC ASPECTS OF POWER SYSTEMS 2

Filter Design for the Reduction of Heat Sink Noise Currents in Power Electronics	607
<i>Jeyakaroshan Kulanayagam, Tobias Kut, Klaus F. Hoffmann, Stefan Dickmann</i>	
A New Control Method for Active Front Ends and the Influence on the Conducted Emissions	611
<i>E. Balzer, H. Borcherding, Heyno Garbe</i>	
Transient Electromagnetic Field Radiated by Buried Electrode	615
<i>M. Chouki, Bachir Nekhoul, Kamal Kerroum</i>	
Simulation Study of the LV Neutral Circuit for Identifying its Transfer Potential and Input Impedance	619
<i>Jozsef Ladanyi</i>	
EMI Analysis of a Generic Power Line Communication OFDM Data Link	625
<i>Matthias Schwarz, Frank Gronwald</i>	

SESSION : A18 : SHIELDING

Measurements and Equivalent Models for Obtaining the Shielding Effectiveness of an Equipment Enclosure Loaded with Printed Circuit Boards	629
<i>John Paul, Chris Smartt, Christos Christopoulos</i>	
A Denoising Method for Electromagnetic Disturbances on PLC Systems	634
<i>Farah Fayad, Daniel Bardouil, Frederic Gauthier, Ahmed Zeddani, Mohamed Tlich</i>	
Low Frequency Shielding Improvement by Multilayer Design	640
<i>O. Losito, V. Dimiccoli, D. Barletta</i>	
Matlab-Based Filter Design Program: From Lumped Elements to Microstriplines	644
<i>Mehmet Alper Uslu, Levent Sevgi</i>	

SESSION : A19 : SPECTRUM MANAGEMENT

Narrowband Transmission Quality in Presence of Modified IEEE 802.15.4a Impulse Radio Interference	648
<i>Jaroslav Sadowski</i>	
A Simple Method for Dynamic Frequency Allocation Considering the Total Interference Impact on the Bit Error Probability	654
<i>Peter F. Stenumgaard, Kia C. Wiklundh</i>	
Spectrum Sensing Capabilities in SEAMCAT	658
<i>Stella Lyubchenko, Jean-Philippe Kermaol, Marc Le Devendec</i>	
Features of the Digital Dividend Implementation in Conditions of Great Population Density Discontinuity and Limitation of the Frequency Resource	664
<i>Elena Volodina, Arseny Plossky</i>	

SESSION : A20 : NOVEL MATERIALS FOR EMC

Three Dimensional Full Wave Validation of the Maxwell Garnett to Debye Model Approach	670
<i>Daniilo Di Febo, Francesco De Paulis, Antonio Orlandi</i>	
Measurements and Simulations of Enclosure Damping Using Loaded Antenna Elements	676
<i>John Paul, Stephen Greedy, Hiroki Wakatsuchi, Christos Christopoulos</i>	
Investigation on the Use of Metamaterials to Lower the Operating Frequency of Reverberation Chamber	680
<i>Divitha Seetharamdoo, Isacco M. Coccato</i>	
A Bandwidth-Enhanced, Ultra-Thin, Wide-Angle Metamaterial Absorber for EMC Applications	686
<i>Theofano M. Kollatou, Alexandros I. Dimitriadis, Nikolaos V. Kantartzis, Christos S. Antonopoulos</i>	

SESSION : A21 : EMC APPLICATIONS

An Extended High Frequency Model of Permanent Magnet Synchronous Motors in Hybrid Vehicles	690
<i>Xiaofeng Pan, Ralf Ehrhard, Ralf Vick</i>	
Rationalisation of European EMC Defence Standards	695
<i>Frank Leferink</i>	
Optimized Dual Randomized PWM Technique for Reducing Conducted EMI in DC-AC Converters	701
<i>N. Boudjerda, A. Boudouda, M. Melit, Bachir Nekhoul, Khalil El Khamlichi Drissi, Kamal Kerroum</i>	

SESSION : P1 : POSTER 1

Prediction of the Resonance Effect of the Common Mode Noise of SMPS	707
<i>Ahmed Hassan, Steffen Schulze, Moawia Al-Hamid, Ralf Vick</i>	
Modeling of Radiated Emission from Data Transmission Cables	712
<i>A. Guéna, P. Manton, J.-F. Gaeng, S. Lamesch</i>	
Computational Electromagnetics for EMC Problems of Integrated Circuits	717
<i>Boyuan Zhu, Junwei Lu, Mingcheng Zhu</i>	
Numerical Analysis of Folded Rhombic Antenna for EMI Measurements Using FI Method	722
<i>Shinobu Ishigami, Ifong Wu, Kaoru Gotoh</i>	
Ethernet 10GBASE-T Common Mode Filter Based on Metamaterial	728
<i>Arturo Pachon, Ferran Silva</i>	
A Common Mode Noise Filter for High Speed and Wide Band Differential Mode Signal Transmission	732
<i>Naoto Oka, Koichiro Misu, Satoshi Yoneda, Seiichi Saito, Shuichi Nitta</i>	
Response Surface Methodology for Modelling Lead Frame of IC Packages	737
<i>Tvrtko Mandic, Renaud Gillon, Bart Nauwelaers, Adrijan Baric</i>	
Edge Shaping to Reduce the Electromagnetic Emissions	742
<i>Bernd Deutschmann, Robert Illing, Bernhard Auer</i>	
A Model for the DM to CM Conversion for Unbalanced Devices at PCB Level	746
<i>Johan Catrysse, Davy Pissoort, Filip Vanhee</i>	
Finite-Difference Time-Domain Method Applied to Lightning Simulation and Aircraft Certification Process	750
<i>Guadalupe Gutiérrez Gutiérrez, Enrique Pascual Gil, David García Gómez, José Ignacio Plaza Gómez</i>	
Variation of Computed In-Vehicle SAR with Number and Location of Occupants at Commonly Used Communications Frequencies	756
<i>A. R. Ruddle, L. Low, J. M. Rigelsford, R. J. Langley</i>	
Optimization Method for Signal Integrity of Automotive LAN	762
<i>Hiroyuki Mori, Noboru Maeda, Shinji Fukui, Hideki Goto</i>	
Generalized Network Equations of the Non-Uniform Transmission Lines Solved Using Amplitude/Phase Representation	768
<i>Frank Meier</i>	

SESSION : P2 : POSTER 2

Characterization of the Absorbing Material Used in EMC Experiments	774
<i>Zainul Ihsan, Grzegorz Lubkowski, Christian Adami, Michael Suhrke</i>	
Study of Pulse Waveforms for Testing in Mode Stirred Reverberating Chamber	778
<i>Virginie Deniau, Mohammed Ayad, Jean Rioult, Lamine Koné, Benjamin Renoncourt</i>	
Contactless Electromagnetic Field Mapping System on Planar Circuits in EMC/EMI Investigations	784
<i>Y. Noda, H. Takamori, Y. Kamiji, C. P. Chen, T. Anada, D. W. P. Thomas, Christos Christopoulos</i>	
Advantages and Disadvantages of the Free-Space Arch Method Used for Investigation of Shielding Materials at Low Gigahertz Frequencies	790
<i>Nadezhda Dvurechenskaya, Ryszard J. Zielinski</i>	
Monitoring of the Electromagnetic Environment by Distributed Spectrum Monitoring System in Ukraine	796
<i>P. Slobodyanyuk, V. Blagodarnyy</i>	
Study on Error Suppression in Broadband Characterization of Complex EM-Parameters	801
<i>H. Takamori, C. P. Chen, Y. Kamiji, T. Anada, D. Xu, Christos Christopoulos</i>	
Enhancement of the International Spectrum Monitoring System Following Accession of the Russian Federation	805
<i>Olga Krutova, Arseny Plossky</i>	

Quantification of Low Frequency Magnetic Field in Living Environment	811
<i>Yukio Mizuno, Kenji Tanaka, Katsuhiko Naito</i>	
Intra-Body Channel Characterization of Medical Implant Devices	816
<i>Valerio De Santis, Mauro Feliziani</i>	
Testing of Technical Security Equipment for Stability to Intentional Electromagnetic Interference	820
<i>Michael Zhukovsky, Sergey Larionov, Ruslan Kirichek, Vladimir Chvanov</i>	
Generic Prediction Equation of Both the In-Band and Out-of-Band Resonant Frequencies of L-Band and S-Band Blade Antennae	824
<i>Lu Wang, Yee Hui Lee, Wee Jin Koh</i>	
Numerical Determination of Reverberation Chamber Field Uniformity by a 3-D Simulation	829
<i>Valter Mariani Primiani, Franco Moglie</i>	
Experimental Throughput Analysis and MIMO Indoor Propagation Prediction for 802.11n System	833
<i>Y. A. S. Dama, R. A. Abd-Alhameed, F. Salazar-Quintero, S. M. R. Jones, K. N. Ramli, M. S. A. Al Khambashi</i>	
Author Index
