

2011 IEEE 13th International Symposium on High-Assurance Systems Engineering

(HASE 2011)

**Boca Raton, Florida, USA
10 – 12 November 2011**

**IEEE Catalog Number: CFP11072-PRT
ISBN: 978-1-4673-0107-7**

2011 IEEE 13th International Symposium on High-Assurance Systems Engineering

HASE 2011

Table of Contents

Preface.....	.xi
Organizing Committee.....	.xii
Program Committee.....	.xiii
Steering Committee.....	.xiv
Sponsors.....	.xv
Keynotes.....	.xvi
Panel.....	.xix

Session A: Software Testing and Validation

A Testing Service for Lifelong Validation of Dynamic SOA	1
<i>Andrea Ceccarelli, Marco Vieira, and Andrea Bondavalli</i>	
Supporting Iterative Development of Robust Operation Contracts in UML Requirements Models	9
<i>Wuliang Sun, Robert B. France, and Indrakshi Ray</i>	
Improve the Effectiveness of Test Case Generation on EFSM via Automatic Path Feasibility Analysis	17
<i>Rui Yang, Zhenyu Chen, Baowen Xu, W. Eric Wong, and Jie Zhang</i>	
Model Driven Validation of System Architectures	25
<i>André Pflüger, Wolfgang Golubski, and Stefan Queins</i>	
Regression Testing of Component-Based Software: A Systematic Practise Based on State Testing	29
<i>Chuanqi Tao, Bixin Li, and Jerry Gao</i>	

Session B: Modeling Checking and Verification I

A Unifying Approach to Validating Specification-Oriented XML Constraints	33
<i>Yongxin Zhao, Zheng Wang, Hao Xiao, Jing Ping, Geguang Pu, Jifeng He, and Huibiao Zhu</i>	
An Event-B Interpretation for SPARDL Model	41
<i>Jianwen Li, Zheng Wang, Yongxin Zhao, Geguang Pu, Yanxia Qi, and Bin Gu</i>	
A Behavioral Analysis Approach for Efficient Partial Order Reduction	49
<i>Yingying Zhang, Emmanuel Rodriguez, Hao Zheng, and Chris Myers</i>	
Animating the Approach of Deriving Operational Semantics from Algebraic Semantics for Web Services	57
<i>Qian Wang and Huibiao Zhu</i>	

Session C: Applications and Technologies

Combining Goal Models, Expert Elicitation, and Probabilistic Simulation for Qualification of New Technology	63
<i>Mehrdad Sabetzadeh, Davide Falessi, Lionel Briand, Stefano Di Alesio, Dag McGeorge, Vidar Åhjem, and Jonas Borg</i>	
On High-Assurance Scientific Workflows	73
<i>Mladen A. Vouk and Pierre A. Mouallem</i>	
Integrating Legacy Applications for High Availability: A Case Study	83
<i>A. Kalso, F. Khendek, A. Mishra, and M. Toeroe</i>	
Personal Health Record System and Integration Techniques with Various Electronic Medical Record Systems	91
<i>Vishesh Ved, Vivek Tyagi, Ankur Agarwal, and A.S. Pandya</i>	

Session D: High Assurance Distributed Systems

The OASIS Kernel: A Framework for High Dependability Real-Time Systems	95
<i>Stephane Louise, Matthieu Lemerre, Christophe Aussaguès, and Vincent David</i>	
Conflict Detection and Lifecycle Management for Access Control in Publish/Subscribe Systems	104
<i>Patrick Hein, Debmalya Biswas, Leonardo A. Martucci, and Max Mühlhäuser</i>	
Discriminatively Fortified Computing with Reconfigurable Digital Fabric	112
<i>Mingjie Lin, Yu Bai, and John Wawrzynek</i>	
Enumerating Software Failures to Build Dependable Distributed Applications	120
<i>Ingrid Buckley and Eduardo B. Fernandez</i>	
Leader-Determined Membership Protocol	124
<i>Wenbing Zhao, P.M. Melliar-Smith, and L.E. Moser</i>	

Session E: Model Checking and Verification II

Reducing State Explosion with Context Modeling for Model-Checking	130
<i>Philippe Dhaussy, Jean-Charles Roger, and Frédéric Boniol</i>	
Guidelines for Formal Domain Modeling in Event-B	138
<i>Atif Mashkoo and Jean-Pierre Jacquot</i>	
Patterns for Representing FMEA in Formal Specification of Control Systems	146
<i>Ilya Lopatkin, Alexei Iliasov, Alexander Romanovsky, Yuliya Prokhorova, and Elena Troubitsyna</i>	
Monarch: A High-Assurance Java-to-Java (J2j) Source-Code Migrator	152
<i>Victor L. Winter, Jonathan Guerrero, Carl Reinke, and James T. Perry</i>	

Session F: High Assurance Networked Systems and Services

A Calculus for Mobile Ad Hoc Networks from a Group Probabilistic Perspective	157
<i>Si Liu, Yongxin Zhao, Huibiao Zhu, and Qin Li</i>	
A Real Time Window-Based Local Call Admission Control Algorithm for IP Networks	163
<i>Sami S. Alwakeel and Shaker S. AlGhanmi</i>	
Anytime Available Single IP Address Cluster	168
<i>Hajime Fujita and Yutaka Ishikawa</i>	

Poster Presentations

Autonomous Online Expansion Technology for ZigBee Wireless Sensor Networks	174
<i>Md. Emdadul Haque, Fan Wei, Takehiro Gouda, Xiaodong Lu, and Kinji Mori</i>	
A Security Modelling Framework for Systems of Embedded Components	176
<i>Antonio Maña and Jose Fran. Ruiz</i>	
On the Relationship between Preprocessor-Based Software Variability and Software Defects	178
<i>Kunming Nie and Li Zhang</i>	
Towards a Security Domain Model for Embedded Systems	180
<i>Simin Nadjm-Tehrani and Maria Vasilevskaya</i>	
A Task-Based Code Review Process and Tool to Comply with the DO-278/ED-109 Standard for Air Traffic Management Software Development: An Industrial Case Study	182
<i>Mario Bernhart, Stefan Reiterer, Kilian Matt, Andreas Mauczka, and Thomas Grechenig</i>	

Self-Healing Data Exchange Process under Evolving Schemas: A New Mapping Adaptation Approach Based on Self-Optimization	188
<i>H. Assoudi and H. Lounis</i>	
Comparison and Analysis of Cryptographic Algorithms Aiming Performance Improvement in Secure Web Services	191
<i>Douglas Rodrigues, Daniel F. Pigatto, Júlio C. Estrella, and Kalinka R. L. J. C. Branco</i>	

Session G: Safety-Critical Systems

Using SysML for Modeling of Safety-Critical Software-Hardware Interfaces: Guidelines and Industry Experience	193
<i>Mehrdad Sabetzadeh, Shiva Nejati, Lionel Briand, and Anne-Heidi Evensen Mills</i>	
An Early Design Stage UML-Based Safety Analysis Approach for High Assurance Software Systems	202
<i>Chetan Mutha and Carol Smidts</i>	
Worst Case Temporal Consistency in Integrated Modular Avionics Systems	212
<i>Michaël Lauer, Jérôme Ermont, Frédéric Boniol, and Claire Pagetti</i>	
High-Assurance Reconfigurable Multicore Processor Based Systems	220
<i>Manasi Peshave, Farokh B. Bastani, and I-Ling Yen</i>	

Session H: High Assurance Ocean Systems

Ensemble Coordination for Discrete Event Control	227
<i>John C. Sloan and Taghi M. Khoshgoftaar</i>	
Using Feature Selection to Determine Optimal Depth for Wavelet Packet Decomposition of Vibration Signals for Ocean System Reliability	236
<i>Randall Wald, Taghi M. Khoshgoftaar, and John C. Sloan</i>	
A Dynamometer for an Ocean Turbine Prototype: Reliability through Automated Monitoring	244
<i>Janell Duhaney, Taghi M. Khoshgoftaar, John C. Sloan, Bassem Alhalabi, and Pierre P. Beaujean</i>	
Smart Vibration Monitoring System for an Ocean Turbine	252
<i>Mustapha Mjit, Pierre-Philippe J. Beaujean, and David J. Vendittis</i>	

Session I: Performance, Reliability and Availability Analysis

An Availability Model of a Virtual TMR System with Applications in Cloud/Cluster Computing	261
<i>Ricardo Paharsingh and Olivia Das</i>	
Efficient System Reliability with Correlated Component Failures	269
<i>Lance Fiondella, Sanguthevar Rajasekaran, and Swapna S. Gokhale</i>	

Benchmarking Embedded Software Development Project Performance	277
<i>Michael F. Siok and Jeff Tian</i>	

Modeling Recovery Strategies in Service-Oriented Architecture Using a Markov Decision Process	285
<i>Donggeun Lee, Heonshik Shin, and Eunjeong Park</i>	

Session J: Monitoring

Multi-layer Monitoring for Cloud Computing	291
<i>Javier González, Antonio Muñoz, and Antonio Maña</i>	

Using Automated Control Charts for the Runtime Evaluation of QoS Attributes	299
<i>Ayman Amin, Alan Colman, and Lars Grunske</i>	

VMDetector: A VMM-based Platform to Detect Hidden Process by Multi-view Comparison	307
<i>Ying Wang, Chunming Hu, and Bo Li</i>	

Validation of Object Recognition Framework on Android Mobile Platform	313
<i>Vivek Tyagi, A.S. Pandya, Ankur Agarwal, and Bassem Alhalabi</i>	

Session K: Bugs and Fault Localization

On the Effectiveness of the Tarantula Fault Localization Technique for Different Fault Classes	317
<i>Aritra Bandyopadhyay and Sudipto Ghosh</i>	

GUI Software Fault Localization Using N-gram Analysis	325
<i>Zhongxing Yu, Hai Hu, Chenggang Bai, Kai-Yuan Cai, and W. Eric Wong</i>	

Software-Based Instrumentation for Localization of Faults Caused by Electrostatic Discharge	333
<i>Pratik Maheshwari, Byong-Su Seol, Jong-Sung Lee, Jae-Deok Lim, Sahra Sedigh, and David Pommerenke</i>	

Bug Signature Minimization and Fusion	340
<i>David Lo, Hong Cheng, and Xiaoyin Wang</i>	

So Much to Learn from One Accident Crash of 737 on 25 February 2009	348
<i>Herbert Hecht</i>	

Session L: Security and Privacy

Effects of User Habituation in Keystroke Dynamics on Password Security Policy	352
<i>Zahid Syed, Sean Banerjee, Qi Cheng, and Bojan Cukic</i>	

Formal Analysis of the DNS Bandwidth Amplification Attack and Its Countermeasures Using Probabilistic Model Checking	360
<i>Tushar Deshpande, Panagiotis Katsaros, Stylianos Basagiannis, and Scott A. Smolka</i>	
Transforming Privacy Policies to Auditing Specifications	368
<i>Debmalya Biswas and Valtteri Niemi</i>	
Verification of Interoperability Security Policies by Model Checking	376
<i>Mazen El Maarabani, Ana Cavalli, Iksoon Hwang, and Fatiha Zaidi</i>	
Author Index	382
