

2011 IEEE Seventh International Conference on e-Science Workshops

(eScienceW 2011)

**Stockholm, Sweden
5-8 December 2011**

**IEEE Catalog Number: CFP1152R-PRT
ISBN: 978-1-4673-0026-1**

2011 Seventh IEEE International Conference on e-Science Workshops

eScienceW 2011

Table of Contents

Preface	viii
Workshop Committee Lists	ix

Seventh IEEE International Conference on e-Science Workshops

Computing for Citizen Science Workshop

Going Beyond Citizen Data Collection with Mapster: A Mobile+Cloud Real-Time Citizen Science Experiment	1
Yong Liu, Pratch Piyawongwisal, Sahil Handa, Liang Yu, Yan Xu, and Arjmand Samuel	
Reputation-aware Filtering Services for Citizen Science Data	7
Charles Brooking and Jane Hunter	
Mechanisms for Data Quality and Validation in Citizen Science	14
Andrea Wiggins, Greg Newman, Robert D. Stevenson, and Kevin Crowston	
Emergent Filters: Automated Data Verification in a Large-Scale Citizen Science Project	20
Steve Kelling, Jun Yu, Jeff Gerbracht, and Weng-Keen Wong	
Gaming for (Citizen) Science: Exploring Motivation and Data Quality in the Context of Crowdsourced Science through the Design and Evaluation of a Social-Computational System	28
Nathan R. Prestopnik and Kevin Crowston	
National Geographic FieldScope: A Collaboratory Geospatial Platform for Citizen Science	34
Eric Russell, Anna Switzer, and Daniel Edelson	
A Flexible Database-Centric Platform for Citizen Science Data Capture	39
Claire Ellul, Louise Francis, and Mordechai (Muki) Haklay	

Workshop on Measuring the Impact of e-Science Research

Unseen Science: Representation of the BRICs in Global Science	45
Caroline S. Wagner	
Towards Automatic Discovery of co-authorship Networks in the Brazilian Academic Areas	53
Jesús P. Mena-Chalco and Roberto M. Cesar Junior	
Watershed Reanalysis: Towards a National Strategy for Model-Data Integration	61
Christopher Duffy, Lorne Leonard, Gopal Bhatt, Xuan Yu, and Lee Giles	

Workshop on Distributed Multiscale Computing

Parallel Scale-Transfer in Multiscale MD-FE Coupling Using Remote Memory Access	66
Dorian Krause and Rolf Krause	
Application of Heterogeneous Computing to CAFE Simulations of Production Processes	74
Rauch Lukasz, Bzowski Krzysztof, and Rodzaj Artur	
Comparison of Cloud and Local HPC Approach for MUSCLE-based Multiscale Simulations	81
Katarzyna Rycerz, Marcin Nowak, Pawel Pierzchala, Eryk Ciepiela, Daniel Hareźlak, and Marian Bubak	
Towards Distributed Multiscale Simulation of Biological Processes	89
Jörg Bernsdorf, Guntram Berti, Bastien Chopard, Jan Hegewald, Manfred Krafczyk, Dinan Wang, Eric Lorenz, and Alfons Hoekstra	
A Principled Approach to Distributed Multiscale Computing, from Formalization to Execution	97
Joris Borgdorff, Eric Lorenz, Alfons G. Hoekstra, Jean-Luc Falcone, and Bastien Chopard	
Modelling Distributed Multiscale Simulation Performance: An Application to Nanocomposites	105
Derek Groen, James Suter, and Peter Coveney	
Performance Monitoring and Analysis System for MUSCLE-based Applications in PL-Grid	112
Włodzimierz Funika, Michał Janczykowski, Maciej Dudek, Arkadiusz Kuboszek, Konrad Jopek, and Maciej Grzegorzczak	
Taxonomy of Multiscale Computing Communities	120
Derek Groen, Stefan J. Zasada, and Peter V. Coveney	

Workshop on Interoperability in Scientific Computing

Requirements Engineering for Scientific Computing: A Model-Based Approach	128
Yang Li, Matteo Harutunian, Nitesh Narayan, Bernd Bruegge, and Gerrit Buse	
Achieving Semantic Interoperability between Physiology Models and Clinical Data	135
B. de Bono, S.J. Sammut, and P. Grenon	
A Profile of Today's SBML-Compatible Software	143
Michael Hucka, Frank T. Bergmann, Sarah M. Keating, and Lucian P. Smith	

Computing Advances in Life Sciences Workshop

A Prototype System for Advance Reservations in a Biomedical Grid Computing Visualization Infrastructure	151
Benjamin Löhnhardt, Mathias Kaspar, Romanus Grütz, Fred Viezens, and Frank Dickmann	
Data Decomposition in Biomedical e-Science Applications	158
Yassene Mohammed, Shayan Shahand, Vladimir Korkhov, Angela C.M. Luyf, Barbera D.C. van Schaik, Matthan W.A. Caan, Antoine H.C. van Kampen, Magnus Palmblad, and Silvia D. Olabarriaga	
Accelerating 3D Protein Modeling Using Cloud Computing: Using Rosetta as a Service on the IBM SmartCloud	166
Peter Kunszt, Lars Malmström, Nicola Fantini, Wibke Sudholt, Marcel Lautenschlager, Roland Reifler, and Stefan Ruckstuhl	
Assessment of Resource Quality for Service Level Agreements in Life Science Grids	170
Tibor Kálmán	
Effective Computational Method for Evaluation of Dynamic Electrostatic Effects of Explicit Solvent and Membrane Molecules from Molecular Dynamics Simulations	178
Yasushige Yonezawa	

Workshop on D3Science

A Type System for High Performance Communication and Computation	183
Greg Eisenhauer, Matthew Wolf, Hasan Abbasi, Scott Klasky, and Karsten Schwan	
Skel: Generative Software for Producing Skeletal I/O Applications	191
Jeremy Logan, Scott Klasky, Jay Lofstead, Hasan Abbasi, Stéphane Ethier, Ray Grout, Seung-Hoe Ku, Qing Liu, Xiaosong Ma, Manish Parashar, Norbert Podhorszki, Karsten Schwan, and Matthew Wolf	
Programming Abstraction for Resource Aware Stream Processing for Scientific Workflows	199
Chathura Herath and Beth Plale	

Author Index	207
