INTERNATIONAL SOCIETY FOR COMPUTERS AND THEIR APPLICATIONS

12th International Conference on Computers and Their Applications

March 13-15, 1997
Holiday Inn, Tempe, Arizona USA

TECHNICAL PAPER INDEX

Session 1A: Computers in Science/Engr Education I

1. *Electronic Design Automation and Computer Engineering Education*
Richard J. Auletta (University of Colorado) and Cherrice A. Traver (Union College) 1
2. *Industrial Digital Design Changes' Impact on Courses, Labs and Projects*
Rosida Coowar (University of Central Florida) 6
3. *Applications of Macromodels in Communication Systems and Circuits Courses*
Andrew Rusek (Oakland University) 10
4. *The Impact of Technology upon Educating the Physically Disabled*
Peter D. Beery and John J. Uhran, Jr. (University of Notre Dame) 14

Session 1B: Computer Networks I

1. *The Problem of Finding the Minimal Hybrid Cost Core on Weighted Bipartite Networks*
Shin-Jer Yang (Soochow University) 18
2. *Design Issues in Network Simulation Models*
S. S. Al-Khayatt (Sheffield Hallam University) and J. E. Cooling (Loughborough University) 24
3. *COPS: A Class-Oriented Policing and Scheduling Scheme for High Speed Networks*
Michael S. Boykin and Taieb F. Znati (University of Pittsburgh) 28

Session 2A: Computers in Science/Engr Education II

1. *Fuzzy Logic Tutorial*
Oscar Montero-Hernandez, Ruben Alejos-Palomares, David Baez-Lopez, Jorge Huesca-Kishi (Universidad de Las Americas-Puebla) 34
2. *Educational Resources on the Internet*
A. K. Goel (Michigan Technological University) 38
3. *Neural Data Engineering*
Carl G. Looney (University of Nevada, Reno) 42

Session 2B: Computer Networks II

1. <i>Software Tools for Modelling Communication Networks</i> <i>S. S. Al-Khayatt (Sheffield Hallam University)</i>	46
2. <i>Simulation Modelling of Fault-Tolerant Hypercube, Superhypercube, and Torus Networks</i> <i>Hamid Abachi and Al-Junaid Walker (Monash University)</i>	50
3. <i>A New Wrap-Around Type ATM Switch for B-ISDN Networks</i> <i>Ogun Tigli and Ghulam M. Chaudhry (University of Missouri-Columbia)</i>	54

Session 3A: Computer Applications in Comp Sci Edu I

1. <i>A Parallel DSP System Using the ADSP-2181 Processors</i> <i>Mohamed El-Sharkawy, Brad Langhorst, Waleed Eshrawy and Newton Guillen (Purdue University at Indianapolis)</i>	58
2. <i>A Communications Protocol for a Distributed Vehicle Control System</i> <i>William T. Neumann and Marvin C. Woodfill (Arizona State University)</i>	62
3. <i>DYNATEST, a Dynamic System for Testing Software</i> <i>David C. Pheanis, John A. Jackson (Arizona State University)</i>	66
4. <i>Designing an Instructionally-Oriented Keypad/LED-Display System</i> <i>Marvin C. Woodfill and William T. Neumann (Arizona State University)</i>	70

Session 3B: Image Processing & Display Technology I

1. <i>A Hybrid Block Matching and Optical Flow Equation-Based Motion Estimation Algorithm for Digital Video Sequences</i> <i>Richard R. Schultz (University of North Dakota)</i>	74
2. <i>An Index Splitting Algorithm for Increasing Automatic Parallelization, with Applications to Computer Graphics and Digital Image Processing</i> <i>E. A. Yfantis (University of Nevada, Las Vegas)</i>	78
3. <i>A Hypervideo System Generator</i> <i>Yung-Chen Hung (Soochow University)</i>	82
4. <i>Blocking Artifacts in MPEG-1 Video Coded Images</i> <i>Morshed U. Chowdhury, Shan Suthaharan, Syed M. Rahman and Robert J. Bignall (Monash University)</i>	88

Session 4A: Computer Applications in Comp Sci Edu II

1. <i>Ridge Tracing and Bifurcation Correction of Latent Fingerprint for Forensic Application</i> <i>Suzali Mohamed Suyut, Mohamed El-Sharkawy, Kris Dines (Purdue University)</i>	92
2. <i>Legal Aspects of Software Development with Reuse</i> <i>Natsu L. Carr (United State Strategic Airforce) and Mansour Zand (University of Nebraska at Omaha)</i>	96
3. <i>Using Networks of Workstations for Database Query Operations</i> <i>Sivarama P. Dandamudi (Carleton University)</i>	100
4. <i>Parallelization of 3-D Range Image Segmentation on a SIMD Multiprocessor</i> <i>Vipin Chaudhary and Sumit Roy (Wayne State University) and Bikash Sabata (SRI International)</i>	106

Session 4B: Image Processing & Display Technology II

1. <i>Image Ranking Using Shifted Difference</i> Syed M. Rahman (Monash University) and Nazmul Haque (Royal Melbourne Institute Technology)	110
2. <i>A General Recognizer for Handwritten Latin and Chinese Words</i> Jacqueline Castaing (Universite Paris Nord)	114
3. <i>A Method of Image Restoration Using Modified Lagrange's Interpolation</i> Shan Suthaharan (Monash University)	118

Session 5A: Real Time Systems I

1. <i>Microcontrolled Real Time Process Simulation</i> D. Kaur and M. E. Shields (The University of Toledo)	122
2. <i>An Optimal Scheduling Algorithm for Distributed Heterogeneous Real-Time Systems</i> M. Rooholamini and S. H. Hosseini (University of Wisconsin - Milwaukee)	126
3. <i>On Input-Output Linearization of Mobile Robots with Nonholonomic Constraints</i> Songjae Lee and Gordon K. Lee (North Carolina State University)	130
4. <i>A Real-time System for High Transaction Loads and Moderate Deadlines</i> Don Carr, Les Miller and Terry Smay (Iowa State University)	134

Session 5B: Multimedia Applications

1. <i>An Integration Platform for Multimedia Presentation</i> Timothy Shih, Louis R. Chao, Chi-Ming Chung, H. C. Ken, Y. H. Wang, Wei-Chuan Lin (TamKang University)	140
2. <i>Multimedia Campus Navigation System</i> Jacqueline Tsang Wong and Matthew Law (Hong Kong Polytechnic University)	144
3. <i>An Interactive Multimedia System for Teaching an Object Oriented Programming Language</i> Moustafa Abdel Aziem Moustafa (Military Technical College, Cairo)	148
4. <i>Structured Multimedia Presentation Designs</i> Timothy K. Shih, Chin-Hwa Kuo, Ying-Hong Wang, Yu-Shen Jeng and Yule-Chyun Lin (Tamkang University)	152

Session 6A: Real Time Systems II

1. <i>MicroMAPS: A Microcontroller-based Sensor for Measuring Carbon Monoxide in the Atmosphere</i> William Morrow (Resonance Ltd.), Gerald Walberg and Gordon K. Lee (North Carolina State University)	156
2. <i>A View of Trends in Vetric Architecture</i> Jorg Lalk (Reumech OMC)	160
3. <i>Simulating Energy Policies via Computable General Equilibrium Models</i> Shu-Heng Chen (National Chengchi University), Shan Feng and Tong Li (Huazhong University of Science and Technology)	165
4. <i>An Experimental Study of Distributed System Behavior</i> Shivakant Mishra (University of Wyoming)	171

Session 6B: Pattern Classification and Signal Processing

1. **Multi-Size Arabic Character Recognition with Learning Ability**
Jasir Alherbish and Reda A. Ammar (University of Connecticut) 175
2. **Towards the Application of Systemic Functional Linguistics in Writing Tools**
Sandra Maria Aluisio and Rex E. Gantenbein (University of Wyoming) 181
3. **Temporal Interrelationships Using Time Based Models for Multimedia Systems**
Morshed U. Chowdhury, Syed M. Rahman and Robert J. Bignall (Monash University) 186
4. **Improved Error Correction and Compression Techniques Applied to Coloured Two Dimensional Bar-Code**
Mohy Mahmoud, Ahmed El-Komy, Bassam A/Sattar, Mohamed El-Mahdy, Omar Hamed and Walid El-Attar (The American University in Cairo) and Reda A. Ammar (The University of Connecticut) 190

Session 7A: Theory & Algorithms I

1. **A Evaluation Method Concerning the Complexity of Parts Processing Using the Algebraic Graph Theory**
Keiichi Watanuki and Hideyuki Ohtaki (Saitama University) 195
2. **Optimal Parallel Algorithm for Generating k-ary Trees**
Vincent Vajnovszki (Universite de Bourgogne) and Chris Phillips (University of Newcastle) 201
3. **A Low Overhead, LRU Block Replacement Scheme with Flooding Protection (LRU-FP)**
R. Pendse, U. Walterscheidt (Wichita State University) 205
4. **Formal Specification of Multimedia Database Modeling with Z Notations**
Timothy K. Shih, Nancy P. Lin, Huan-Chao Keh, Ying-Hong Wang, and Yule-Chyun Lin (Tamkang University) 210

Session 7B: Networks & Communications

1. **Optimization of the Matching Functions by Coefficient Relaxation Method for the Asymmetric Digital Subscriber Line (ADSL)**
Ajit Reddy and Syed V. Ahamed (City University of New York) 214
2. **NTalk - A Multi-Way Interactive Communication Tool**
Chong-wei Xu and Dan Van Valin (Georgia Southern University) 218
3. **Comparison of Traffic Policing Mechanisms in Asynchronous Transfer Mode (ATM) Networks**
I. Ghansah and A. Tangirala (California State University) 222

Session 8A: Theory & Algorithms II

1. **Parallel Programming Environment with Dynamic Resource Management Services: Design and Application to Molecular Dynamics Simulation**
Kentaro Shimizu, Asae Oishi, Hyo Ashihara (University of Electro-Communications), Mitsunori Ikeguchi and Shugo Nakamura (University of Tokyo) 226
2. **Relational Database: A New Algorithm for Handling Overflow in Division Operation**
H. Aljaber (Qatar University) and A. Bellaachia (Al-Alkhwayn University in Ifrane) 232

Session 8B: Performance Evaluation

1. **An Experimental Comparison Among Shared-Event-Queue-Based Optimistic, Conservative, and Time-Stepped Logic Simulators**
Sagar I. Sawant and Sushil K. Prasad (Georgia State University) 238
2. **A Hierarchical Parallel Database System for Transaction Processing**
Yifeng Xu and Sivarama P. Dandamudi (Carleton University) 242
3. **On Reducing the Hot Spot Effect in a Multistage Interconnection Network**
Po-Jen Chuang and Han-Yen Tu (Tamkang University) 248

Session 9A: Medical Applications

1. **Combination of Chaotic and Neural Network Modeling for Diagnosis of Heart Failure**
Maurice E. Cohen (University of California, San Francisco and California State University, Fresno), Donna L. Hudson (University of California, San Francisco), Prakash C. Deedwania, M.D. (University of California, San Francisco and Veterans Affairs Medical Center, Fresno) 254
2. **A Compartmental Model of Pulmonary Gas Exchange**
M. Sami Fadali and Cahit A. Evrensel (University of Nevada, Reno) 258
3. **A Hybrid Decision Support System Incorporating Nontextual Information and Internet Access**
Donna L. Hudson (University of California, San Francisco), Maurice E. Cohen (University of California, San Francisco and California State University, Fresno), Malcolm F. Anderson, M.D. and Prakash C. Deedwania, M.D. (University of California, San Francisco and Veterans Affairs Medical Center, Fresno) 262
4. **JAVA-Based Heterogeneous Database Interface**
Mohamed Y. El-Refai, Dar-Jen Chang, and Adel S. Elmaghraby (University of Louisville) 266

Session 10A: Software Engineering Applications

1. **Agent-Based Robotic Assembly Cell Implemented with Object-Based Technology**
Jagdeep S. Basran, Emil M. Petriu (University of Ottawa) and Dorina C. Petriu (Carleton University) 271
2. **Computational Methods for Knowledge Bases**
J. W. Guan and D. A. Bell (University of Ulster at Jordanstown) 276
3. **User Tailorability in Computer-Aided Geometric Modeling**
James R. Miller and Milind R. Raje (University of Kansas) 280
4. **The Realization of Single-Contact Networks by the Multiple Switching Function Specification and the Transmission Matrix**
Jan-Jo Chen (University of Illinois at Chicago and Chicago State University), Floyd B. Hanson (University of Illinois at Chicago), Chong-Yen Lee (Chinese Culture University), and Li-Ping Chen (Wilmington College) 284
