

2011 IEEE Workshop on Automatic Speech Recognition and Understanding

(ASRU 2011)

**Waikoloa, Hawaii, USA
11 – 15 December 2011**

**IEEE Catalog Number: CFP11SRW-PRT
ISBN: 978-1-4673-0365-1**

TABLE OF CONTENTS

MO1-P: ACOUSTIC MODELING

MO1-P.1: A CONVERGENCE ANALYSIS OF LOG-LINEAR TRAINING AND ITS APPLICATION TO SPEECH RECOGNITION1

Simon Wiesler, Ralf Schlüter, Hermann N, RWTH Aachen University, Germany

MO1-P.2: DISCRIMINATIVE SPLITTING OF GAUSSIAN/LOG-LINEAR MIXTURE HMMS FOR SPEECH RECOGNITION7

Muhammad Ali Tahir, Ralf Schlüter, Hermann N, RWTH Aachen University, Germany

MO1-P.3: FRAME-LEVEL ANYBOOST FOR LVCSR WITH THE MMI CRITERION.....12

Ryuki Tachibana, Takashi Fukuda, IBM Japan, Japan; Upendra Chaudhari, Bhuvana Ramabhadran, IBM, United States; Puming Zh, Nuance Communications Inc., United States

MO1-P.4: EXTENDING NOISE ROBUST STRUCTURED SUPPORT VECTOR MACHINES TO LARGER VOCABULARY TASKS18

Shi-Xiong Zhang, Mark John Francis Gal, University of Cambridge, United Kingdom

MO1-P.5: FEATURE ENGINEERING IN CONTEXT-DEPENDENT DEEP NEURAL NETWORKS FOR CONVERSATIONAL SPEECH TRANSCRIPTION24

Frank Seide, Gang Li, Xie Chen, Microsoft Research Asia, China; Dong , Microsoft Research, United States

MO1-P.6: MAKING DEEP BELIEF NETWORKS EFFECTIVE FOR LARGE VOCABULARY CONTINUOUS SPEECH RECOGNITION30

Tara Sainath, Brian Kingsbury, Bhuvana Ramabhadran, IBM T.J. Watson Research Center, United States; Petr Fousek, Petr Novak, IBM Research, Prague, Czech Republic; Abdel-rahman Moham, University of Toronto, Canada

MO1-P.7: A NOVEL BOTTLENECK-BLSTM FRONT-END FOR FEATURE-LEVEL CONTEXT MODELING IN CONVERSATIONAL SPEECH RECOGNITION36

Martin Wöllmer, Björn Schuller, Gerhard Rigo, Technische Universität München, Germany

MO1-P.8: CONVOLUTIVE BOTTLENECK NETWORK FEATURES FOR LVCSR.....42

Karel Veselý, Martin Karafiát, František Gré, Brno University of Technology, Czech Republic

MO1-P.9: SPEAKER ADAPTATION BASED ON SPEAKER-DEPENDENT EIGENPHONE ESTIMATION48

Wen-Lin Zhang, Zhengzhou Information Science and Technology Institute, China; Wei-Qiang Zhang, Tsinghua University, China; Bi-Cheng , Zhengzhou Information Science and Technology Institute, China

MO1-P.10: SPARSE MAXIMUM A POSTERIORI ADAPTATION.....53

Peder Olsen, Jing Huang, Vaibhava Goel, Steven Renn, IBM T.J. Watson Research Center, United States

MO1-P.11: A CONVEX HULL APPROACH TO SPARSE REPRESENTATIONS FOR EXEMPLAR-BASED SPEECH RECOGNITION59

Tara Sainath, David Nahamoo, Dimitri Kanevsky, Bhuvana Ramabhadran, IBM T.J. Watson Research Center, United States; Parikshit Sh, MIT, United States

MO1-P.12: SOME PROPERTIES OF BAYESIAN SENSING HIDDEN MARKOV MODELS	65
<i>George Saon, IBM T.J. Watson Research Center, United States; Jen-Tzung Chi, National Cheng Kung University, Taiwan</i>	
MO1-P.13: DON'T MULTIPLY LIGHTLY: QUANTIFYING PROBLEMS WITH THE ACOUSTIC MODEL ASSUMPTIONS IN SPEECH RECOGNITION	71
<i>Daniel Gillick, International Computer Science Institute, United States; Larry Gillick, EnglishCentral, Inc., United States; Steven Wegma, International Computer Science Institute, United States</i>	
MO1-P.14: A FACTORED CONDITIONAL RANDOM FIELD MODEL FOR ARTICULATORY FEATURE FORCED TRANSCRIPTION	77
<i>Rohit Prabhavalkar, Eric Fosler-Lussier, The Ohio State University, United States; Karen Lives, The Toyota Technological Institute at Chicago, United States</i>	
MO1-P.15: N-BEST RESCORING BY ADABOOST PHONEME CLASSIFIERS FOR ISOLATED WORD RECOGNITION	83
<i>Hiroshi Fujimura, Masanobu Nakamura, Yusuke Shinohara, Takashi Masu, Toshiba corporation, Japan</i>	
MO1-P.16: MULTI-LEVEL CONTEXT-DEPENDENT ACOUSTIC MODELING FOR AUTOMATIC SPEECH RECOGNITION	89
<i>Hung-An Chang, James Gla, Massachusetts Institute of Technology, United States</i>	
MO1-P.17: LEVERAGING LARGE AMOUNTS OF LOOSELY TRANSCRIBED CORPORATE VIDEOS FOR ACOUSTIC MODEL TRAINING	95
<i>Matthias Paulik, Panchi Panchapages, Cisco Systems, United States</i>	
MO2-P: ASR ROBUSTNESS	
MO2-P.1: AN HIERARCHICAL EXEMPLAR-BASED SPARSE MODEL OF SPEECH, WITH AN APPLICATION TO ASR	101
<i>Jort Gemmeke, Hugo Van Ham, Katholieke Universiteit Leuven, Belgium</i>	
MO2-P.2: A TRAJECTORY-BASED PARALLEL MODEL COMBINATION WITH A UNIFIED STATIC AND DYNAMIC PARAMETER COMPENSATION FOR NOISY SPEECH RECOGNITION	107
<i>Khe Chai Sim, Minh-Thang Luo, National University of Singapore, Singapore</i>	
MO2-P.3: IMPROVING REVERBERANT VTS FOR HANDS-FREE ROBUST SPEECH RECOGNITION	113
<i>Yongqiang Wang, Cambridge University, United Kingdom; Mark John Francis Gal, University of Cambridge, United Kingdom</i>	
MO2-P.4: DERIVATIVE KERNELS FOR NOISE ROBUST ASR	119
<i>Anton Ragni, Mark John Francis Gal, University of Cambridge, United Kingdom</i>	
MO2-P.5: A VARIATIONAL PERSPECTIVE ON NOISE-ROBUST SPEECH RECOGNITION	125
<i>Rogier C. Van Dalen, Mark John Francis Gal, University of Cambridge, United Kingdom</i>	

MO2-P.6: ROBUST SPEECH RECOGNITION USING ARTICULATORY GESTURES IN A DYNAMIC BAYESIAN NETWORK FRAMEWORK	131
<i>Vikramjit Mitra, SRI International, United States; Hosung Name, Haskins Laboratories, United States; Carol Espy-Wils, University of Maryland at College Park, United States</i>	
MO2-P.7: MATCHED-CONDITION ROBUST DYNAMIC NOISE ADAPTATION	137
<i>Steven Rennie, Pierre Dognin, Petr Fous, IBM Research, United States</i>	
MO2-P.8: FACTOR ANALYSIS BASED SESSION VARIABILITY COMPENSATION FOR AUTOMATIC SPEECH RECOGNITION	141
<i>Mickael Rouvier, Mohamed Bouallegue, Driss Matrouf, Georges Linar, LIA, University of Avignon, France</i>	
MO2-P.9: FACTORED ADAPTATION FOR SEPARABLE COMPENSATION OF SPEAKER AND ENVIRONMENTAL VARIABILITY	146
<i>Michael Seltzer, Alex Ace, Microsoft Research, United States</i>	
MO2-P.10: IVECTOR-BASED DISCRIMINATIVE ADAPTATION FOR AUTOMATIC SPEECH RECOGNITION	152
<i>Martin Karafiát, Brno University of Technology, Czech Republic; Lukas Burget, SRI International, United States; Pavel Matejka, Ondrej Glembek, Jan Cernoc, Brno University of Technology, Czech Republic</i>	
MO2-P.11: SPEAKER ADAPTATION WITH AN EXPONENTIAL TRANSFORM	158
<i>Daniel Povey, Geoffrey Zweig, Alex Ace, Microsoft, United States</i>	
MO2-P.12: EVOLUTIONARY DISCRIMINATIVE SPEAKER ADAPTATION	164
<i>Sid-Ahmed Seloua, Moncton University, Canada</i>	
MO2-P.13: ROBUST SEED MODEL TRAINING FOR SPEAKER ADAPTATION USING PSEUDO-SPEAKER FEATURES GENERATED BY INVERSE CMLLR TRANSFORMATION	169
<i>Arata Itoh, Sunao Hara, Norihide Kitaoka, Kazuya Take, Nagoya University, Japan</i>	
MO2-P.14: BIDIRECTIONAL OM-LSA SPEECH ESTIMATOR FOR NOISE ROBUST SPEECH RECOGNITION	173
<i>Yasunari Obuchi, Ryu Takeda, Masahito Toga, Hitachi Ltd., Japan</i>	
MO2-P.15: MAXIMUM KURTOSIS BEAMFORMING WITH A SUBSPACE FILTER FOR DISTANT SPEECH RECOGNITION	179
<i>Kenichi Kumatani, Disney Research, Pittsburgh, United States; John McDonough, Bhiksha R, Carnegie Mellon University, United States</i>	
MO2-P.16: GAIN ESTIMATION APPROACHES IN CATALOG-BASED SINGLE-CHANNEL SPEECH-MUSIC SEPARATION	185
<i>Cemil Demir, TÜBITAK-BILGEM, Turkey; Ali Taylan Cemgil, Murat Saraçlı, Bogaziçi University, Turkey</i>	
MO2-P.17: DESIGNING TEXT CORPUS USING PHONE-ERROR DISTRIBUTION FOR ACOUSTIC MODELING	191
<i>Hiroko Murakami, Koichi Shinoda, Sadaoki Fur, Tokyo Institute of Technology, Japan</i>	

TU1-P: LANGUAGE MODELING AND ASR SYSTEMS

TU1-P.1: STRATEGIES FOR TRAINING LARGE SCALE NEURAL NETWORK196 LANGUAGE MODELS

Tomas Mikolov, Brno University of Technology, Czech Republic; Anoop Deoras, Johns Hopkins University, United States; Daniel Povey, Microsoft Research, United States; Lukas Burget, Jan Cernoc, Brno University of Technology, Czech Republic

TU1-P.2: DISCRIMINATIVE RERANKING OF ASR HYPOTHESES WITH202 MORPHOLEXICAL AND N-BEST-LIST FEATURES

Hasim Sak, Murat Saraçlar, Tunga Güng, Bogaziçi University, Turkey

TU1-P.3: MINIMUM BAYES RISK DISCRIMINATIVE LANGUAGE MODELS FOR208 ARABIC SPEECH RECOGNITION

Hong-Kwang Kuo, Ebru Arisoy, Lidia Mangu, George Sa, IBM T.J. Watson Research Center, United States

TU1-P.4: EFFICIENT DISCRIMINATIVE TRAINING OF LONG-SPAN LANGUAGE214 MODELS

Ariya Rastrow, Mark Dredze, Sanjeev Khudanp, Johns Hopkins University, United States

TU1-P.5: ADAPTING N-GRAM MAXIMUM ENTROPY LANGUAGE MODELS WITH220 CONDITIONAL ENTROPY REGULARIZATION

Ariya Rastrow, Mark Dredze, Sanjeev Khudanp, Johns Hopkins University, United States

TU1-P.6: RANDOMIZED MAXIMUM ENTROPY LANGUAGE MODELS226

Puyang Xu, Sanjeev Khudanpur, Johns Hopkins University, United States; Asela Gunawarda, Microsoft Research, United States

TU1-P.7: EFFICIENT REPRESENTATION AND FAST LOOK-UP OF MAXIMUM231 ENTROPY LANGUAGE MODELS

Jia Cui, Stanley Chen, Bowen Zh, IBM T.J. Watson Research Center, United States

TU1-P.8: PRUNING EXPONENTIAL LANGUAGE MODELS237

Stanley Chen, Abhinav Sethy, Bhuvana Ramabhadra, IBM, United States

TU1-P.9: SUBWORD-BASED AUTOMATIC LEXICON LEARNING FOR SPEECH243 RECOGNITION

Timo Mertens, Norwegian University of Science and Technology, Norway; Stephanie Sene, Massachusetts Institute of Technology, United States

TU1-P.10: AN INVESTIGATION OF HEURISTIC, MANUAL AND STATISTICAL249 PRONUNCIATION DERIVATION FOR PASHTO

Upendra Chaudhari, Xiaodong Cui, Bowen Zhou, Rong Zha, IBM, United States

TU1-P.11: SUBWORD-BASED MULTI-SPAN PRONUNCIATION ADAPTATION FOR254 RECOGNIZING ACCENTED SPEECH

Timo Mertens, Norwegian University of Science and Technology, Norway; Kit Thambiratnam, Frank Sei, Microsoft Research Asia, China

TU1-P.12: INVESTIGATING THE ROLE OF MACHINE TRANSLATED TEXT IN ASR260 DOMAIN ADAPTATION: UNSUPERVISED AND SEMI-SUPERVISED METHODS

Horia Cucu, University Politehnica of Bucharest, Romania; Laurent Besacier, University Joseph Fourier, France; Corneliu Burileanu, Andi Bu, University Politehnica of Bucharest, Romania

TU1-P.13: FROM MODERN STANDARD ARABIC TO LEVANTINE ASR: LEVERAGING GALE FOR DIALECTS	266
<i>Hagen Soltau, Lidia Mangu, IBM, United States; Fadi Biad, Columbia University, United States</i>	
TU1-P.14: THE IBM 2011 GALE ARABIC SPEECH TRANSCRIPTION SYSTEM	272
<i>Lidia Mangu, Hong-Kwang Kuo, Stephen Chu, Brian Kingsbury, George Saon, Hagen Soltau, IBM, United States; Fadi Biad, Columbia University, United States</i>	
TU1-P.15: BAG OF N-GRAM DRIVEN DECODING FOR LVCSR SYSTEM HARNESSING	278
<i>Fethi Bougares, Yannick Estève, Paul Deléglise, LIUM, France; Georges Linar, LIA, University of Avignon, France</i>	
TU1-P.16: EFFICIENT DETERMINIZATION OF TAGGED WORD LATTICES USING CATEGORIAL AND LEXICOGRAPHIC SEMIRINGS	283
<i>Izhak Shafran, Richard Sproat, Mahsa Yarmohammadi, Brian Roa, Center for Spoken Language Understanding, United States</i>	
 WE1-P: TTS, DIALOG AND MLSP	
WE1-P.1: AUTOMATIC DETECTION OF UNNATURAL WORD-LEVEL SEGMENTS IN UNIT-SELECTION SPEECH SYNTHESIS	289
<i>William Yang Wang, Carnegie Mellon University, United States; Kallirroï Georgi, University of Southern California, United States</i>	
WE1-P.2: ACCENT LEVEL ADJUSTMENT IN BILINGUAL THAI-ENGLISH TEXT-TO-SPEECH SYNTHESIS	295
<i>Chai Wutiw WATCHAI, Ausdang Thangthai, Ananlada Chotimongkol, Chatchawarn Hansakunbuntheung, Nattanun Thatphithakk, National Electronics and Computer Technology Center (NECTEC), Thailand</i>	
WE1-P.3: SENTIMENT ANALYSIS OF TEXT-TO-SPEECH INPUT USING LATENT AFFECTIVE MAPPING	300
<i>Jerome Bellegar, Apple Inc., United States</i>	
WE1-P.4: TOWARDS CHOOSING BETTER PRIMES FOR SPOKEN DIALOG SYSTEMS	306
<i>José Lopes, INESC / Instituto Superior Técnico, Portugal; Maxine Eskenazi, Language Technology Institute, Carnegie Mellon University, United States; Isabel Tranco, INESC / Instituto Superior Técnico, Portugal</i>	
WE1-P.5: ON-LINE POLICY OPTIMISATION OF SPOKEN DIALOGUE SYSTEMS VIA LIVE INTERACTION WITH HUMAN SUBJECTS	312
<i>Milica Gasic, Filip Jurcicek, Blaise Thomson, Kai Yu, Steve You, Cambridge University Engineering Department, United Kingdom</i>	
WE1-P.6: WIZARD OF OZ EVALUATION OF LISTENING-ORIENTED DIALOGUE CONTROL USING POMDP	318
<i>Toyomi Meguro, Yasuhiro Minami, NTT Communication Science Laboratories, Japan; Ryuichiro Higashinaka, NTT Cyber Space Laboratories, Japan; Kohji Dohsa, NTT Communication Science Laboratories, Japan</i>	
WE1-P.7: A DIALOGUE SYSTEM FOR ACCESSING DRUG REVIEWS	324
<i>Jingjing Liu, Stephanie Sene, MIT CSAIL, United States</i>	

WE1-P.8: BUILDING A CONVERSATIONAL MODEL FROM TWO-TWEETS	330
<i>Ryuichiro Higashinaka, NTT Cyber Space Laboratories, Japan; Noriaki Kawamae, NTT Comware Corporation, Japan; Kugatsu Sadamitsu, NTT Cyber Space Laboratories, Japan; Yasuhiro Minami, Toyomi Meguro, Kohji Dohsaka, NTT Communication Science Laboratories, Japan; Hirohito Inaga, NTT Cyber Space Laboratories, Japan</i>	
WE1-P.9: UTTERANCE VERIFICATION USING GARBAGE WORDS FOR A HOSPITAL APPOINTMENT SYSTEM WITH SPEECH INTERFACE	336
<i>Mitsuru Takaoka, Hiromitsu Nishizaki, Yoshihiro Sekiguc, University of Yamanashi, Japan</i>	
WE1-P.10: BOOTSTRAPPING A SPOKEN LANGUAGE IDENTIFICATION SYSTEM USING UNSUPERVISED INTEGRATED SENSING AND PROCESSING DECISION TREES	342
<i>Shuai Huang, Damianos Karakos, Glen Coppersmith, Kenneth Church, Johns Hopkins University, United States; Sabato Marco Siniscalc, Kore University of Enna, Italy</i>	
WE1-P.11: FAST AND FLEXIBLE KULLBACK-LEIBLER DIVERGENCE BASED ACOUSTIC MODELING FOR NON-NATIVE SPEECH RECOGNITION	348
<i>David Imseng, Ramya Rasipuram, Mathew Magimai Do, IDIAP Research Institute, Switzerland</i>	
WE1-P.12: STRATEGIES FOR USING MLP BASED FEATURES WITH LIMITED TARGET-LANGUAGE TRAINING DATA	354
<i>Yanmin Qian, Ji Xu, Tsinghua University, China; Daniel Povey, Microsoft Research, United States; Jia L, Tsinghua University, China</i>	
WE1-P.13: STUDY OF PROBABILISTIC AND BOTTLE-NECK FEATURES IN MULTILINGUAL ENVIRONMENT	359
<i>František Grézl, Martin Karafiát, Milos Jan, Brno University of Technology, Czech Republic</i>	
WE1-P.14: REGULARIZED SUBSPACE GAUSSIAN MIXTURE MODELS FOR CROSS-LINGUAL SPEECH RECOGNITION	365
<i>Liang Lu, The University of Edinburgh, United Kingdom; Arnab Ghoshal, Saarland University, Germany; Steve Rena, The University of Edinburgh, United Kingdom</i>	
WE1-P.15: CROSS-LINGUAL PORTABILITY OF CHINESE AND ENGLISH NEURAL NETWORK FEATURES FOR FRENCH AND GERMAN LVCSR	371
<i>Christian Plahl, Ralf Schlüter, Hermann N, RWTH Aachen University, Germany</i>	
WE1-P.16: MULTI-SITE HETEROGENEOUS SYSTEM FUSIONS FOR THE ALBAYZIN 2010 LANGUAGE RECOGNITION EVALUATION	377
<i>Luis Javier Rodriguez-Fuentes, Mikel Penagarikano, Amparo Varona, Mireia Diez, German Bordel, University of the Basque Country, Spain; David Martinez, Jesus Villalba, Antonio Miguel, Alfonso Ortega, Eduardo Lleida, University of Zaragoza, Spain; Alberto Abad, Oscar Koller, Isabel Trancoso, INESC-ID Lisboa, Portugal; Paula Lopez-Otero, Laura Docio-Fernandez, Carmen Garcia-Mateo, University of Vigo, Spain; Rahim Saeidi, University of Eastern Finland, Finland; Mehdi Soufifar, Norwegian University of Science and Technology, Norway; Tomi Kinnunen, University of Eastern Finland, Finland; Torbjørn Svendsen, Norwegian University of Science and Technology, Norway; Pasi Frän, University of Eastern Finland, Finland</i>	

WE2-P: SPOKEN DOCUMENT RETRIEVAL AND SPOKEN LANGUAGE UNDERSTANDING

WE2-P.1: IMPROVED SPOKEN TERM DETECTION USING SUPPORT VECTOR MACHINES WITH ACOUSTIC AND CONTEXT FEATURES FROM PSEUDO-RELEVANCE FEEDBACK383

Tsung-wei Tu, Hung-yi Lee, Lin-shan L, National Taiwan University, Taiwan

WE2-P.2: QUERY MODELING FOR SPOKEN DOCUMENT RETRIEVAL389

Berlin Chen, Pei-Ning Chen, National Taiwan Normal University, Taiwan; Kuan-Yu Ch, Academia Sinica, Taiwan

WE2-P.3: TOPIC MODELING FOR SPOKEN DOCUMENTS USING ONLY PHONETIC INFORMATION395

Timothy Hazen, MIT Lincoln Laboratory, United States; Man-Hung Siu, Herbert Gish, Steve Lowe, Arthur Ch, Raytheon BBN Technologies, United States

WE2-P.4: EFFICIENT SPOKEN TERM DISCOVERY USING RANDOMIZED ALGORITHMS401

Aren Jansen, Benjamin Van Dur, Johns Hopkins University, United States

WE2-P.5: ESTIMATING DOCUMENT FREQUENCIES IN A SPEECH CORPUS407

Damianos Karakos, Mark Dredze, Kenneth Church, Aren Jansen, Sanjeev Khudanp, Johns Hopkins University, United States

WE2-P.6: ROBUST UNDERSTANDING OF SPOKEN CHINESE THROUGH CHARACTER-BASED TAGGING AND PRIOR KNOWLEDGE EXPLOITATION413

Weiqun Xu, Changchun Bao, Yali Li, Jielin Pan, Yonghong Y, Chinese Academy of Sciences, China

WE2-P.7: EMPLOYING WEB SEARCH QUERY CLICK LOGS FOR MULTI-DOMAIN SPOKEN LANGUAGE UNDERSTANDING419

Dilek Hakkani-Tur, Gokhan Tur, Larry Heck, Asli Celikyilmaz, Ashley Fidler, Dustin Hillard, Rukmini Iyer, Sarangarajan Parthasarath, Microsoft, United States

WE2-P.8: EXPLOITING DISTANCE BASED SIMILARITY IN TOPIC MODELS FOR USER INTENT DETECTION425

Asli Celikyilmaz, Dilek Hakkani-Tur, Gokhan Tur, Ashley Fidler, Dustin Hilla, Microsoft Speech Labs, United States

WE2-P.9: APPLYING MULTICLASS BANDIT ALGORITHMS TO CALL-TYPE CLASSIFICATION431

Liva Ralaivola, Benoit Favre, Aix Marseille Universite, France; Pierre Gotab, Universite d'Avignon, France; Frederic Bechet, Aix Marseille Universite, France; Geraldine Damna, France Telecom, France

WE2-P.10: LATENT SEMANTIC ANALYSIS FOR QUESTION CLASSIFICATION WITH NEURAL NETWORKS437

Babak Loni, Seyedeh Halleh Khoshnevis, Pascal Wigge, Delft University of Technology, Netherlands

WE2-P.11: ANALYZING CONVERSATIONS USING RICH PHRASE PATTERNS.....443

Bin Zhang, Alex Marin, Brian Hutchinson, Mari Ostendo, University of Washington, United States

WE2-P.12: SUPERVISED AND UNSUPERVISED FEATURE SELECTION FOR INFERRING SOCIAL NATURE OF TELEPHONE CONVERSATIONS FROM THEIR CONTENT	449
<i>Anthony Stark, Izhak Shafran, Jeffrey Ka, Oregon Health and Science University, United States</i>	
WE2-P.13: SOCIO-SITUATIONAL SETTING CLASSIFICATION BASED ON LANGUAGE USE	455
<i>Yangyang Shi, Pascal Wiggers, Catholijn M Jonk, Delft University of Technology, Netherlands</i>	
WE2-P.14: EVALUATING PROSODIC FEATURES FOR AUTOMATED SCORING OF NON-NATIVE READ SPEECH	461
<i>Klaus Zechner, Xiaoming Xi, Lei Ch, Educational Testing Service, United States</i>	
WE2-P.15: DECISION OF RESPONSE TIMING FOR INCREMENTAL SPEECH RECOGNITION WITH REINFORCEMENT LEARNING	467
<i>Di Lu, The University of Tokyo, Japan; Takuya Nishimoto, Olarbee Japan, Japan; Nobuaki Minemat, The University of Tokyo, Japan</i>	
 TH1-P: NEW APPLICATIONS IN SPEECH PROCESSING	
TH1-P.1: APPLYING FEATURE BAGGING FOR MORE ACCURATE AND ROBUST AUTOMATED SPEAKING ASSESSMENT	473
<i>Lei Ch, Educational Testing Service, United States</i>	
TH1-P.2: DETECTION OF PERSONS WITH PARKINSON’S DISEASE BY ACOUSTIC, VOCAL, AND PROSODIC ANALYSIS	478
<i>Tobias Bocklet, Elmar Noeth, Georg Stemmer, University Erlangen-Nuremberg, Germany; Hana Ruzickova, Charles University in Prague, Czech Republic; Jan Ru, Czech Technical University in Prague, Czech Republic</i>	
TH1-P.3: ALIGNMENT OF SPOKEN NARRATIVES FOR AUTOMATED NEUROPSYCHOLOGICAL ASSESSMENT	484
<i>Emily T. Prud’hommeaux, Brian Roa, Oregon Health and Science University, United States</i>	
TH1-P.4: AUTOMATIC DETECTION OF “G-DROPPING” IN AMERICAN ENGLISH USING FORCED ALIGNMENT	490
<i>Jiahong Yuan, Mark Liberm, University of Pennsylvania, United States</i>	
TH1-P.5: BLIND NOISE SUPPRESSION FOR NON-AUDIBLE MURMUR RECOGNITION WITH STEREO SIGNAL PROCESSING	494
<i>Shunta Ishii, Tomoki Toda, Hiroshi Saruwatari, Sakriani Sakti, Satoshi Nakamu, Nara Institute of Science and Technology, Japan</i>	
TH1-P.6: DETECTION-BASED ACCENTED SPEECH RECOGNITION USING ARTICULATORY FEATURES	500
<i>Chao Zhang, Yi Liu, Tsinghua University, China; Chin-Hui L, Georgia Institute of Technology, United States</i>	
TH1-P.7: MINIMUM DETECTION ERROR TRAINING OF SUBWORD DETECTORS	506
<i>Alfonso Martinez del Hoyo Canterla, Magne Hallstein Johns, Norwegian University of Science and Technology, Norway</i>	

TH1-P.8: SUBSPACE GAUSSIAN MIXTURE MODELS FOR VECTORIAL HMM-STATES REPRESENTATION	512
<i>Mohamed Bouallegue, Driss Matrouf, Mickael Rouvier, University of Avignon, France; Georges Linar, LIA, University of Avignon, France</i>	
TH1-P.9: A NOVEL NEURAL-BASED PRONUNCIATION MODELING METHOD FOR ROBUST SPEECH RECOGNITION	517
<i>Guangpu Huang, Meng Joo , Nanyang Technological University, Singapore</i>	
TH1-P.10: UNSUPERVISED LEARNING IN CROSS-CORPUS ACOUSTIC EMOTION RECOGNITION	523
<i>Zixing Zhang, Felix Weninger, Martin Wöllmer, Björn Schull, Technische Universität München, Germany</i>	
TH1-P.11: MODEL-BASED PARAMETRIC FEATURES FOR EMOTION RECOGNITION FROM SPEECH	529
<i>Sankaranarayanan Ananthkrishnan, Raytheon BBN Technologies, United States; Aravind Namandi Vembu, University of Southern California, United States; Rohit Pras, Raytheon BBN Technologies, United States</i>	
TH1-P.12: CROWD-SOURCING FOR DIFFICULT TRANSCRIPTION OF SPEECH	535
<i>Jason D. Williams, I. Dan Melamed, Tirso Alonso, Barbara Hollister, Jay Wilp, AT&T Labs, United States</i>	
TH1-P.13: DETECTION OF PRECISELY TRANSCRIBED PARTS FROM INEXACT TRANSCRIBED CORPUS	541
<i>Kengo Ohta, Masatoshi Tsuchiya, Seiichi Nakaga, Toyohashi University of Technology, Japan</i>	
TH1-P.14: MULTI-TAPER MFCC FEATURES FOR SPEAKER VERIFICATION USING I-VECTORS	547
<i>Md Jahangir Alam, INRS-EMT, University of Quebec, Canada; Tomi Kinnunen, University of Eastern Finland, Finland; Patrick Kenny, Pierre Ouellet, CRIM, Canada; Douglas O'Shaughnes, INRS-EMT, University of Quebec, Canada</i>	
TH1-P.15: FAST SPEAKER DIARIZATION USING A HIGH-LEVEL SCRIPTING LANGUAGE	553
<i>Ekaterina Gonina, University of California at Berkeley, United States; Gerald Friedland, International Computer Science Institute, United States; Henry Cook, Kurt Keutz, University of California at Berkeley, United States</i>	
TH1-P.16: LINEAR VERSUS MEL FREQUENCY CEPSTRAL COEFFICIENTS FOR SPEAKER RECOGNITION	559
<i>Xinhui Zhou, Daniel Garcia-Romero, Ramani Duraiswami, Carol Espy-Wilson, Shihab Sham, University of Maryland at College Park, United States</i>
