2012 IEEE International Conference on RFID

(RFID 2012)

Orlando, Florida, USA
3-5 April 2012

IEEE Catalog Number: CFP12RFI-PRT
ISBN: 978-1-4673-0329-3

1A: Antennas and Propagation

Multi-Antenna Techniques for Enabling Passive RFID Tags and Sensors at Microwave Frequencies

Matthew S Trotter (Georgia Institute of Technology, USA); Christopher Valenta (Georgia Institute of Technology, USA); Gregory Koo (Georgia Institute of Technology, USA); Blake Marshall (Georgia Institute of Technology, USA); Gregory Durgin (Georgia Tech, USA)

pp. 1-7

Evaluation of Parasitic Capacitance Introduced during Tag Assembly Process

Jingtian Xi (Hong Kong R&D Center for Logistics and Supply Chain Management, Hong Kong); Terry Ye (Hong Kong R/D Center for Logistics and Supply Chain Management, Hong Kong)

pp. 8-15

Effects of Periodic Reinforced-Concrete Structures on Power Transmission

Shan Jiang (Florida International University, USA); Stavros Georgakopoulos (Florida International University, USA); Hao Jin (Florida International University, USA)

pp. 16-23

1B: Security and Privacy

Two-Level Path Authentication in EPCglobal Network

Hongbing Wang (Shanghai Jiao Tong University, P.R. China); Yingjiu Li (Singapore Management University, Singapore); Zongyang Zhang (Shanghai Jiao Tong University, P.R. China); Zhenfu Cao (Shanghai Jiao Tong University, P.R. China)

pp. 24-31

Enabling Standardized Cryptography on Ultra-Constrained 4-bit Microcontrollers

Tino Kaufmann (Gemalto, Singapore); Axel Poschmann (Nanyang Technological University & Divison of Mathematical Sciences, Singapore)

pp. 32-39

Identifying Passive UHF RFID Tags Using Signal Features at Different Tari Durations

Baha' Alsaify (University of Arkansas, USA); Dale R Thompson (University of Arkansas, USA); Jia Di (University of Arkansas, USA)

pp. 40-46

2A: Circuits, Devices and Interrogators I

Optimized CMOS RF-DC converters for remote wireless powering of RFID applications

Stefano Scorcioni (University of Modena and Reggio Emilia, Italy); Luca Larcher (University of Modena and Reggio Emilia, Italy); Alessandro Bertacchini (University of Modena and Reggio Emilia, Italy)

pp. 47-53

An Active MOS Diode with Vth-Cancellation for RFID Rectifiers

Hans Rabén (Luleå University of Technology, Sweden); Johan Borg (Luleå University of Technology, Sweden); Jonny Johansson (Lulea University of Technology, Sweden)

pp. 54-57

An Error Free Passive UHF RFID System using a New Form of Wireless Signal Distribution

Sithamparanathan Sabesan (University of Cambridge, United Kingdom); Michael J Crisp (University of Cambridge, United Kingdom); Richard Penty (Cambridge University, United Kingdom); Ian White (University of Cambridge, United Kingdom)

pp. 58-65

A Multistandard HF/ UHF-RFID-Tag With Integrated Sensor Interface and Localization Capability

Thomas Ussmueller (Friedrich Alexander University of Erlangen-Nuremberg, Germany); Daniel Brenk (Friedrich Alexander University of Erlangen-Nuremburg, Germany); Jochen Essel (University of Erlangen-Nuremberg, Germany); Juergen Heidrich (University of Erlangen-Nuremberg, Germany); Georg Fischer (University Erlangen-Nuremberg & Eesy-id, Germany); Robert Weigel (University of Erlangen-Nuremberg, Germany)

pp. 66-73

2B: Communication Protocols

Channel Estimation in Tag Collision Scenarios

Jelena Kaitovic (Vienna University of Technology, Austria); Michal Šimko (Vienna University of Technology, Austria); Robert Langwieser (Vienna University of Technology, Austria); Markus Rupp (Vienna University of Technology, Austria)

pp. 74-80

Modulation Silencing: Novel RFID Anti-Collision Resolution for Passive Tags

Abdallah Alma'aitah (Queen's University, Canada); Hossam S. Hassanein (Queen's University, Canada); Mohamed Ibnkahla (Queen's University, Canada)

pp. 81-88

Linearized Combinatorial Model for Optimal Frame Selection in Gen2 RFID System
Petar Šolić (University of Split & FESB, Croatia); Joško Radić (University of Split, Croatia); Nikola Rožić (University of Split, Croatia)
pp. 89-94

Identification of missing objects with group coding of RF tags
Yuki Sato (Keio University, Japan); Yuki Igarashi (Keio University, Japan); Jin Mitsugi (Keio University, Japan); Osamu Nakamura (Keio University, Japan); Jun Murai (Keio University, Japan)
pp. 95-101

Poster: Poster and Demo Session

A Comparison of the Combining Methods For Phase-based Composite RFID Ranging
Chenming Zhou (Disney Research, Pittsburgh, USA); Joshua D Griffin (Disney Research Pittsburgh, USA)

An Implementation Method of the Supply Chain Management System for Architectural Construction Resources Using BIM and RFID Integration
Seung-Hoon Han (Chonnam National University, Korea); Ok-Kyun Im (Chonnam National University, Korea); Hyun-Sung Won (Chonnam National University, Korea); Kyoung Hee Kim (University of North Carolina Charlotte, USA)

A Compatible and Equitable Resolution Service for IoT Resource Management
Yang Liu (Computer Network Information Center, Chinese Academy of Sciences & Graduate University, Chinese Academy of Sciences, P.R. China); Ye Tian (China Network Information Center & China Internet Network Information Center, P.R. China); Shuo Shen (China Network Information Center, P.R. China); Wei Mao (CNNIC, P.R. China)

Low-Cost Ubiquitous Passive RFID Real Time Location Sensing System
Sithamparanathan Sabesan (University of Cambridge, United Kingdom); Michael J Crisp (University of Cambridge, United Kingdom); Richard Penty (Cambridge University, United Kingdom); Ian White (University of Cambridge, United Kingdom)

Assessment of Visibility Restriction Mechanisms for RFID Data Discovery Services (Poster)
Miguel L Pardal (IST - Technical University of Lisbon & MIT, Portugal); Mark Harrison (Cambridge University, United Kingdom); José Alves Marques (IST - Technical University of Lisbon, Portugal)

Alternative Analytical Approach for the Design of Compact, Narrow Band Magnetic Antennas with Improved Efficiency in RFID Systems
Riccardo Stefanelli (Politecnico di Torino - iXem Labs, Italy); Daniele Trinchero (Politecnico di Torino & iXem Labs, Italy)

Contactless Antenna for Wideband UHF RFID Tags
Dat Son Nguyen (Laboratory for Nanotechnology & Laboratoire de Conception et d'Intégration des Systèmes, Vietnam); Smail Tedjini (Grenoble-inp, France); Tien Thong Pham (University of Technology Ho Chi Minh City, Vietnam); Nhan Ai Tran (National University Ho Chi Minh City, Vietnam); Hong Phuong Phan (Ho Chi Minh City University of Technology & Laboratory of Nanotechnology, Ho Chi Minh City National University, Vietnam); Mau Chien Dang (Ho Chi Minh City National University, Vietnam); Tran Thuat Nguyen (Ho Chi Minh City National University, Vietnam); Eric Fribourg-Blanc (CEA-LETI, France)

RF Propagation Inside an Aircraft Cargo Hold
Magalie Laniel (University of South Florida Polytechnic, USA); Ismail Uysal (University of South Florida Polytechnic, USA); Jean-Pierre Emond (University Florida, USA)

Statistical Capability Analysis for Reading Passive RFID UHF Tags
Samuel Bloch Silva (Flextronics Institute of Technology, Brazil); Manoel Barbin (Flextronics Institute of Technology, Brazil); Robson Valmiro (Flextronics Institute of Technology, Brazil)

Subthreshold RF Powered Digital Circuit Structures for 915MHz Near Field Power Harvesting
Peter Gadfort (North Carolina State University, USA); Paul Franzon (North Carolina Stata University, USA)

Analysis of High Permeability EM Isolators for NFC Antennas near Metallic Objects
Jaewon Kim (3M & Corporate Research Lab, USA); Jin-bae Kim (3M, Korea); Jung-ju Suh (3M, Korea)

Switched Loop Antenna for RFID Localization
Osama Alrabadi (AAU, Denmark); Gert Pedersen (Aalborg University, Denmark); Orla Petersen (Munin Spot Technology ApS, Denmark)

UHF-band RFID Reader using Tunable Near-field Antenna with Dead-zone free
Dong-hoon Park (University of Seoul, Korea); Hyun-Jun Dong (University of Seoul, Korea); Sang-Bo Min (Actenna Corp., Korea); Jong-Won Yu (KAIST, Korea); Moon-Que Lee (University of Seoul, Korea)

Modeling Worst-Case Backscatter from RFID Tags
Daniel G Kuester (NIST & University of Colorado at Boulder, USA); David Novotny (National Institute of Standards and Technology, USA); Jeffrey Guerrieri (National Institute of Standards and Technology, USA); Zoya Popović (University of Colorado at Boulder, USA)

A Simplified Reference Modulated Scatterer for UHF Tag Testing
David Novotny (National Institute of Standards and Technology, USA); Daniel G Kuester (NIST & University of Colorado at Boulder, USA); Jeffrey Guerrieri (National Institute of Standards and Technology, USA)

RFID-enabled Traceability of Farmed Fish
Mira Trebar (University of Ljubljana, Slovenia); Andrej Grah (University of Ljubljana, Slovenia); Miroslav Savić (University of Ljubljana, Slovenia); Rok Češnovar (Faculty of Computer and Information Science, Slovenia)

Hybrid Inertial Microwave Reflectometry
Muhammad Akbar (Georgia Institute of Technology, USA); Gregory Durgin (Georgia Tech, USA)

RF Obstructions and European RFID Systems
Ryan James (Georgia Institute of Technology, USA); Allison Mercer (Georgia Institute of Technology & GTRI, USA); Gisele Bennett (Georgia Tech, USA); David McGuinness (Georgia Tech Ireland, Ireland); Barry Smith (Research Colleague, Ireland); Joe Dowling (Georgia Tech Ireland, Ireland)

Hybrid Analog-Digital Backscatter on an RFID Platform
Vamsi Talla (University of Washington, USA); Michael P Buettner (University of Washington, USA); David Wetherall (University of Washington, USA); Joshua R. Smith (University of Washington, USA)

Advancements in RFID Technologies for Nuclear-Related Applications
Brian Craig (Argonne National Laboratory, USA); John Lee (Argonne National Laboratory, USA); John Anderson (Argonne National Laboratory, USA); Yung Liu (Argonne National Laboratory, USA); Han-Chung Tsai (Argonne National Laboratory, USA); Patrick De Lurgio (Argonne National Laboratory, USA); James M. Shuler (US & Manager, DOE Packaging Certification Program, USA); Christopher Kearney (Argonne National Laboratory, USA)

Rooter: A Sniffer Framework for Active RFID Tags
Johnathan V Cree (Pacific Northwest National Laboratory, USA); Ivan Amaya (PNNL, USA); Robert Stahl (Pacific Northwest National Laboratory, USA); Emiliano Santiago Rojas (Pacific Northwest National Laboratory, USA)

Performance Comparison of a Protocol for a Hybrid RFID/Sensor Network and a Cross-layer Protocol for a Wireless Sensor Network
William S. Hortos (Associates in Communications Engineering Research and Technology, USA)

Battery-free Electrochemical Gas Sensing in RF Energy-rich Environments
Aaron N Parks (University of Washington, USA)

Understanding The Compatibility of Matching Networks Used in RFID Tags
Naaser Ahmed Mohammed (University of Kansas, USA); Daniel Deavours (University of Kansas, USA)

3A: Localization I

Range Estimation for Passive RFID Systems That Use Power-Optimized Waveforms
Matthew S Trotter (Georgia Institute of Technology, USA); Gregory Durgin (Georgia Tech, USA)

pp. 102-109

A Novel Method for UHF RFID Tag Tracking Based on Acceleration Data
Andreas Parr (University of Erlangen-Nuremberg, Germany); Robert Miesen (University of Erlangen-Nuremberg, Germany); Fabian Kirsch (Clausthal University of Technology, Germany); Martin Vossiek (University of Erlangen-Nuremberg, Germany)
pp. 110-115

Optical Localization of Passive UHF RFID Tags with Integrated LEDs
Alanson Sample (University of Washington, USA); Craig Macomber (University of Washington, USA); Liang-Ting Jiang (University of Washington, USA); Joshua R. Smith (University of Washington, USA)
pp. 116-123

3B: Sensors

Polymer-Doped UHF RFID Tag for Wireless-Sensing of Humidity
Gaetano Marrocco (University of Rome Tor Vergata, Italy)
pp. 124-129

RFID-Grids for Deformation Sensing
Stefano Caizzone (Università of Roma Tor Vergata, Italy); Gaetano Marrocco (University of Rome Tor Vergata, Italy)
pp. 130-134

Near Field Modulated Backscatter For In Vivo Biotelemetry
Jordan Besnoff (Duke University, USA); Matthew Reynolds (Duke University & ThingMagic Inc, USA)
pp. 135-140

4A: Localization II / Applications and Software

A Real-time RFID Localization Experiment Using Propagation Models
Jason Brchan (University of Nebraska-Lincoln, USA); Lianlin Zhao (University of Nebraska-Lincoln, USA); Jiaqing Wu (University of Nebraska-Lincoln, USA); Robert Williams (University of Nebraska-Lincoln, USA); Lance C. Pérez (University of Nebraska, Lincoln, USA)
pp. 141-148

UHF RFID Shelf Solution with Cascaded Reader Antenna and Positioning Capability
Yong Yuan (Siemens, P.R. China); Dan Yu (Radio Access Technology and Solution, P.R. China)
pp. 149-156

An Adaptive Data Cleaning Scheme for Reducing False Negative reads in RFID Data Streams
Libe V Massawe (Central University of Technology, Free State, South Africa); Hermanus Vermaak (Central University of Technology, Free State, South Africa); Johnson Kinyua (USA & Virginia International University, USA)

pp. 157-164

Assessment of Visibility Restriction Mechanisms for RFID Data Discovery Services
Miguel L Pardal (IST - Technical University of Lisbon & MIT, Portugal); Mark Harrison (Cambridge University, United Kingdom); José Alves Marques (IST - Technical University of Lisbon, Portugal)
pp. 165-171

4B: Circuits, Devices and Interrogators II

A Fully Integrated Chip-ID Tag Used in Chip Information Identification
Yuhui He (Institute of Microelectronics, Tsinghua University & Tsinghua National Laboratory for Information Science and Technology（TNList）, P.R. China); Xijin Zhao (Tsinghua University & Tsinghua National Laboratory for Information Science and Technology, P.R. China); Chun Zhang (Tsinghua University, P.R. China); Zhihua Wang (Tsinghua University, P.R. China)
pp. 172-176

Passive Tag-to-Tag Communication
Pavel Nikitin (Intermec Technologies, USA); Shashi Ramamurthy (Intermec Technologies, USA); Rene Martinez (Intermec Technologies, USA); Kodukula Rao (Intermec Technologies, USA)
pp. 177-184

A 96 Mbit/sec, 15.5pJ/bit 16-QAM Modulator for UHF Backscatter Communication
Stewart Thomas (Duke University, USA); Matthew Reynolds (Duke University & ThingMagic Inc, USA)
pp. 185-190

A Compact Chipless RFID Tag Using Polarization Diversity for Encoding and Sensing
Arnaud Vena (GRENOBLE-INP/LCIS, France); Etienne Perret (Grenoble-inp, France); Smail Tedjini (Grenoble-inp, France)
pp. 191-197
