2012 29th National Radio Science Conference

(NRSC 2012)

Cairo, Egypt
10-12 April 2012

IEEE Catalog Number: CFP12427-PRT
ISBN: 978-1-4673-1884-6

Table of Contents

Department of Electronics and Electrical Communications Engineering i
Welcome to the NRSC 2012 at Cairo University ix
Conference Scope xi
A Concise Report on the Activities of the NRSC xii
2012 29th National Radio Science Conference Committees xv
2012 29th National Radio Science Conference Board of Referees xvi
Honored Egyptian Pioneers xix
NRSC2012 Technical Program xxii

Invited Paper

Conductive carbon fiber composite materials for antenna and microwave applications 1

Commission B

B1. Nanotechnology in RF and Microwave Applications: Review Article 9
B2. Approximate Electromagnetic Cloaking of Spherical Bodies 19
B3. Compact and Broadband Left handed CPW Power Divider/Combiner for C/X bands 29
B4. Analysis and Design of Single Section and Three-Section Ultra-Wideband Quadrature Hybrid Couplers 37
B5. Ultra Wideband Patch Antenna and Power Amplifier Transmitter Front End 45
B6. Delivering Maximum Power From Microwave Transistors 53
B7. Impedance Bandwidth Improvement of Compact Low Permittivity RDRA Using Parasitic Conducting Metallic Strip 57
B8. CPW fed Hybrid Planar Monopole/Dielectric Resonator Antenna for W-Band Applications 63
B9. Dielectric Resonator Antenna Array for Direction Finding Systems 71
B10. Multilayer Dielectric Resonator Antenna Transmitarray for Near-Field and Far-Field Fixed RFID Reader 81
B11. Rectangular Dielectric Resonator Transmitarrays 89
B12. Dual Polarized Dual Feed Aperture-Coupled DRA Reflectarray 97
B13. CPW-Fed Square-Spiral Slot Antenna Design for Wideband Applications 103
B14. Active millimeter-Wave Imaging System for Hidden Weapons Detection 111
B15. Tri-band Slotted Bow-Tie Antenna Design for RFID Reader using Hybrid CFO-NM Algorithm 119
B16. Effect of Mutual Coupling on the Performance of Four Elements

Microstrip Antenna Array Fed by a Butler Matrix 127
B17. Planar Inverted-F Antenna Performance For Smart Handsets Including The Interaction With A Human Hand-Head 141

Commission C

C1. Performance Enhancement of MC-DS-CDMA System in Presence of Modulated Narrowband Interference 149
C2. The Performance Evaluation of a Decode-and-Forward based Receiver for Multi-Rate Cooperative Relaying Transmission bK!
C3. Teletraffic Performance Modeling of Cellular Communication with Heavy-Tailed Distributed Cellular Dwell Time 165
C4. Vertical Handoff in Heterogeneous Wireless Networks with Predictive SINR using GM(1,1) 175
C5. Time Difference of Arrival by The IEEE 802.11a,g Based on a Practical Estimation 185
C6. Probability of Error of TDMA Relay Protocols over Weibull and Weibull-Lognormal Channels 191
C7. A Multi-Level Information Hiding Integrating Wavelet-based Texture Analysis of Block Partition Difference Images 203
C8. An Efficient Approach for Image Cryptosystem based on Chaotic Confusion-Diffusion Mechanisms 211
C9. Chaotic Encryption of Images in the Fractional Fourier Transform Domain Using Different Modes of Operation 223
C10. Improved histogram-based reversible data hiding for digital Images 237
C11. An Efficient Fractional Fourier Transform Approach for Digital Image Watermarking 245
C12. Image Compression Using Exponential B-SPLINE Functions 255
C13. Region Based Image Registration Approach Using an Artificial Immune System 263
C14. Estimation of optimal set of Parameters for pan-sharpening Satellite Images Based on Nonsubsampled Contourlet 271
C15. Registration Of Multi-Focus Images Using Hough Transform 279
C16. An Efficient Iris Localization Algorithm 285
C17. Automatic Detection and Classification of Weld Defects in Radiographic Images Using Wavelet Transform and Support Vector Machines bK!
C18. Modified CamShift algorithm for Adaptive Window tracking 301
C19. Breast Cancer Mass Detection in Mammograms using Modified K-means Clustering bK!
C20. Evolutionary Algorithm in the Classification of Calcification in Mammograms bK!
C21. Single Image Motion Deblurring using Genetic Algorithms 325
C22. Enhanced Fusion for Infrared and Visible Images 335

C23. An Enhanced Fast Iterative Blind Deconvolution Algorithm for Noiseless and Noisy Images 345
C24. Automatic Modulation Recognition Using Cepestral Analysis and Neural Networks in Wireless Systems 353
C25. Digital Signal Classification by Compressed Cyclostationary Features 363
C26. Selective On-Fly Scrambling Algorithm (SOFSA) for CELP Coders for Secured Real-Time Voice Communications 371
C27. Investigation About Speech Conversion Using Different Techniques 379
C28. Studying R-Score of VoIP Streams over WIMAX Using Convolutional Product Code (CPC) vs Turbo Codes bk!
C29. Source-Channel Rate Allocation Scheme for Robust progressive Image Transmission Using LDPC 395
C30. Enhancement Of OFDM Modulation And Adaptive Array Beamforming Using Discrete Wavelet Transform 403
C31. Efficient Image Transmission Over the Single Carrier Frequency Division Multiple Access System Using Chaotic Interleaving 411
C32. Greedy Power Allocation Algorithm for Proportional Resource Allocation in Multi-User OFDM Systems 421
C33. Performance evaluation of chaotic interleaving with FFT and DWT OFDM with chaotic interleaving 429
C34. Enhanced Blind, Adaptive Channel Shortening for Multi-carrier Systems 437
C35. Wavelet-Based SC-FDMA System 447
C36. Design and Implementation CFAR Processor with Programmable Timer 461
C37. Updating Multicore Processor Simulator to Support Dynamic Design in Fetch Stage 471
C38. Appraisal of Different Particle Filter Resampling Schemes Effect in Robot Localization 477
C39. Efficient Control Logic Algorithm for Wind Turbine 485
C40. Improved Potential Field Controller for Obstacle Avoidance in Mobile Robots 495
C41. Multisensor Estimate Fusion Based on Bayesian Minimum Mean Square Error Criterion 503
C42. PAPR Reduction for LFDMA Using a Reduced Complexity PTS Scheme 515
C43. Combined Collaborative and Precoded MIMO for Uplink of the LTE-Advanced 523
C44. Secure Cooperative Blindly-Optimized Compressive Spectrum Sensing for Cognitive Radio 533
C45. Classification of OFDM Signals Using Higher Order Statistics and Clustering Techniques 541
C46. Robust Beamforming in Multi-Users Cognitive Radio System 551

Commission D

D1. Long holding and short acquisition times for CMOS Analog Memory bK!
D2. Simplified Analytical Iterations for Electron Wavefunction using Self-Consistent Solution of for nm MOS Gate Stacks 563
D3. Design and Simulation of Single-Electron 2-Bit Decoders Using Room Temperature Summing-Inverter Gates 571
D4. Monte Carlo Simulation of Single Electronics based on orthodox theory 581
D5. Wideband Tunable MEMS Phase Shifters for Radar Phased Array Antenna 593
D6. High Speed all optical Flip Flops by using the hardlimiters bK!
D7. Study on Polarization Evolution of Femtosecond Optical Pulse Propagating in Single-Mode Optical Fiber bK!
D8. Analysis Of Optical Fiber By Using SEIM With VM : Application To Optical Fiber Directional Coupler 619

Commission K

K1. High Performance Compressed Sensing MRI Image Reconstruction 627
K2. Automatic pectoral muscle boundary detection in mammograms Using Eigenvectors Segmentation 633
K3. Synthetic Transmit Aperture Medical Ultrasound Imaging 641
K4. Gene Network Construction and Pathways Analysis for High Throughput Microarrays 649
K5. Merging Genetic Algorithm with Different Classifiers for Cancer Classification using Microarrays 659
K6. Circular Binary Segmentation Modeling of Array CGH Data on Hepatocellular carcinoma 667
K7. SH-SAW sensor for detecting the air-bubbles in the blood flow bK!
K8. A Novel Sensor and a Proposed Setup for Remote Measurement of Mandibular Implant Stress 683
K9. Detection Of Sleep Apnea Events using Analysis Of Thoraco-Abdominal Excursion Signals and Adaptive Neuro-Fuzzy Inference System (ANFIS) 691
K10. Embedded Real Time Ultrasound System 699
K11. Modified Hybrid Median Filter for Image Denoising 705

Author Index 713
