

2012 13th International Carpathian Control Conference (ICCC 2012)

**High Tatras, Slovakia
28 – 31 May 2012**

**IEEE Catalog Number: CFP1242L-PRT
ISBN: 978-1-4577-1867-0**

Plenary Keynotes

Fractional Calculus in Bioengineering: A Tool to Model Complex Dynamics

Richard L. Magin

Optimal Process Control

Miroslav Fikar and Karol Kostur

Advanced Control Engineering Methods in Modern Technological Applications

Štefan Kozák

Technical Papers

Controlling and Modeling of an Automated Guided Vehicle

Daniel Antal and Tamás Szabó

Distributed Stabilisation of Spatially Invariant Systems Via Positive Polynomial Approach: MIMO Systems Case

Petr Augusta

MPC Based Robust Stabilization of Uncertain Plants

Monika Bakošová and Juraj Oravec

Modelling and Control of a Hexa-copter

Radek Baránek and František Šolc

Sliding Mode Congestion Control For a Single Virtual Circuit in Connection-Oriented Networks With Lossy Links

Andrzej Bartoszewicz and Piotr Leśniewski

Application of the RFID Technology in The Field of Gun Management For the Police of the Czech Republic

Filip Benes, Vladimír Kebo and Jiri Svub

Approach to Gasoline Engine Faults Diagnosis Based on Crankshaft Instantaneous Angular Acceleration

Le Khac Binh and Jiri Tuma

Exact and Numerical Solutions of Sequential Fractional Differential Equations of Order in (1,2)

Marek Blasik and Malgorzata Klimek

Aspects of Formation Control for Swarm Robots

Laszlo Blazovics, Balázs Ilsinszki, Kristóf Csorba, Bertalan Forstner and Charaf Hassan

On Dynamics and Control for a System of Conservation Laws - The Case of the Overhead Crane

Eugen Bobasu, Daniela Danciu, Dan Popescu and Vladimir Rasvan

Nonlinear System Identification by GPA-ES

Tomas Brandejsky

Towards Autonomously Traversing Complex Obstacles with Mobile Robots with Adjustable Chassis

Michael Brunner, Bernd Brüggemann and Dirk Schulz

Application of Neural Modelling in Hybrid Control Model of Fluidized Bed Boiler Fired with Coal and Biomass

Michał Budnik, Wojciech Stanek and Henryk Rusinowski

Partial Empirical Models for Thermo-Economical Control Systems of Power Units

Michał Budnik and Wojciech Stanek

On The Equivalence Between Nonlinear- and Fractional Bilinear- Control Systems

Francesco Carravetta

Laboratory Gantry Robot - Design and Control

Josef Cernohorsky and David Lindr

Pollutant Emissions Empirical Modelling of Energy Systems for External Cost Determination

Lucyna Czarnowska, Michał Budnik and Wojciech Stanek

On the Absolute Stability for Recurrent Neural Networks with Time Delays

Daniela Danciu, Vladimir Rasvan and Dan Popescu

Neurodynamic Systems and Lyapunov Exponents

Ivan Daňo

Advanced Servo-drive Reference-model Control Application

Martin Diblík and Josef Černohorský

Methods for Evaluating and Improving Audiometric Examinations - ORL System Fowler

Viliam Dolinay, Lucie Pivnickova and Vladimir Vasek

Comparison of the Electronic Realization of the Fractional-Order System and its Model

Ľubomír Dorčák, Ján Terpák, Ivo Petráš, Juraj Valsa and Emmanuel Gonzalez

Multi-Criteria Optimization in Control of Switched System

Paweł Drąg and Dominik Żelazny

Modelling and Simulation of Thermal Field of SMA Actuator

Peter Drahoš and Vladimír Kutiš

Robust Control Algorithms in Vector Oriented Control of Induction Motor

Tomáš Duda and Antonín Víteček

Discreet Control of Annealing Process with Utilization of Indirect Measurement

Milan Durdán, Ján Kačur and Marek Laciak

Measurement of Piezoelectric Ceramic Parameters - A Characterization of the Elastic, Dielectric and Piezoelectric Properties of NCE51 PZT

Jiří Fialka and Petr Beneš

Optimal Process Control

Miroslav Fikar and Karol Kostúr

Forming a Modification Involute Line of Teeth of a Cone Worm Gear Drive with Conical Worm on CNC Milling Machine

Piotr Frąckowiak

Modular Integrated Guidance, Navigation, and Control

Bernard Friedland

RFID Technology for Special Food Moulds

Petra Fuchsíková, Pavel Staša and Vladimír Kebo

Experimental Studies of the Operating Parameters of the Hybrid Cooling System for the Simulation of the Cooling Process in the Chamber

Wiesław Gazda

Multicopter Potentialities

Jan Gebauer, Petr Koci and Pavel Šofer

Model of Most Lake and its Connection with Monitoring

Jan Gottfried, Lukáš Otte, Vladislav Vančura, Lucie Kružíková and Zdeněk Šeliga

Fault Tolerant Estimation of Autonomous Underwater Vehicle Dynamics Via Robust UKF
Chingiz Hajiyev, Ersin Soken, Melih Ata and Mustafa Dinc

Reliability Analysis of the Human Operator
Marie Havlikova and Sona Sediva

The Analysis of the Bearingless Electric Motor with Surface-Mounted Permanent Magnets
Maciej Henzel and Krzysztof Falkowski

Selected Thermochemical Properties of Substances and Their Graphic Web Presentation
Pavel Horovčák, Ján Terpák and Beáta Stehlíková

Hybridized GA-optimization of Neural Dynamic Model for Nonlinear Process
Alexander Hošovský, Kamil Židek and Cyril Oswald

Parallel Pattern Mining - Application of GSP Algorithm for Graphics Processing Units
Krzysztof Hryniów

The Practical Possibilities of Steam Temperature Dynamic Models Application
Lukáš Hubka and Osvald Modrlák

Autonomous Test Structures for Synchronous Sequential Circuits
Miłosław Chodacki and Dariusz Badura

Automatic Tuning of Input Shaping Filter for Two-Mass Flexible System
Arnold Jáger and Miloš Schlegel

Home Coordinator for Smart Grids. Basic Theory and Approaches
Václav Kaczmarczyk, Petr Fiedler, Radek Štohl and Zdeněk Bradáč

System for Indirect Measurement of the Heat Flows in The Annealing Process
Ján Kačur, Milan Durdán and Marek Laciak

Remote Monitoring of the Temperatures for Indirect Measurement System
Ján Kačur, Marek Laciak and Milan Durdán

Analysis and Control of Heat Distribution Supply Chain Using Three-Dimensional Virtual Scene
Libor Kavka

Mining Processes Control and Virtual Reality
Vladimir Kebo and Pavel Staša

Coal Industry Technologies Simulation with Virtual Reality Utilization
Martin Kijonka and Oldrich Kodym

On a Regular Fractional Sturm-Liouville Problem with Derivatives of Order in $(0,1)$
Malgorzata Klimek and Om P. Agrawal

Stabilizing Control for Switched Linear SISO systems
Pavol Kocsis, Daniel Gontkovič and Vladimír Serbák

Creation of Virtual Reality Space Based on Internet of Things
Oldřich Kodym

Using Constrained Cubic Spline Instead of Natural Cubic Spline to Eliminate Overshoot and Undershoot in Hilbert Huang Transform
Josef Kokeš and Nguyen Ba Nghien

Implement of Fuzzy Logic System Using Table Lookup Scheme by Java Language to Predict Time Series Data
Josef Kokes and Nghien Nguyen Ba

Genetic Algorithm Used for Initial Evaluation of Specification of Multi-Robot System
Vitālijs Komašilovs and Egils Stalidzāns

Online Determination Of Temperature Model Parameters of a Selective Catalytic Reduction System

Christoph Korbelt and Henryk Zygmunt

Designing a Perimetric Integrity Evaluation System for a Natural Gas City Gate Station

Wojciech Kostowski, Damian Kasprzak, Barbara Mendecka, Krzysztof Górny, Janusz Rajnhold, Aleksandra Linkowska, Janusz Skorek and Andrzej Kozik

Comparison of Characteristics of Excavation Process and Characteristics of Acoustic Signal in TBM Excavation

Karol Kostúr, Jozef Futó, Lucia Ivaničová and František Krepelka

Principles of Indirect Measurement Temperature

Karol Kostúr

The Comparing of Models for Indirect Measurement of Temperatures in Steel Coils

Karol Kostúr and Milan Durdán

Developing of Optimal Control System for UCG

Karol Kostúr and Ján Kačúr

Mathematical Model of Granular Material Thermal Treatment for Real Time Application

Imrich Košťial, Dušan Naščák, Jan Spisak, Jan Mikula

The Rotary Furnaces Model Based Predictive Control

Imrich Košťial, Ján Spišák, Dušan Dorčák

Process Approach to the Process Control

Imrich Košťial, Dušan Dorčák, Vratislav Šindler, Ján Spišák, Ján Gloček, Július Lišuch

Improving Viewpoint Invariance of Image Feature Extraction Methods Using Intensity and Range Images

Viktor Kovács and Gábor Tevesz

Determining the Orientation of a Body in Space Using the Kalman Filter

Janusz Kowal, Sławomir Blok and Andrzej Sioma

Surface Defects Detection Using a 3D Vision System

Janusz Kowal, Andrzej Sioma

Multibody Bionic Systems Modeling - The Puppet Master Approach

Janusz Kowal, Wojciech Lepiarz and Andrzej Sioma

Advanced Control Engineering Methods in Modern Technological Applications

Štefan Kozák

Takagi-Sugeno Model-based State Estimation for One Class of Nonlinear Systems with Unknown Disturbances

Dusan Krokavec, Anna Filasova and Vratislav Hladky

Software Support For Modelling of Heat Transfer by Convection

Ján Kukurugya and Ján Terpák

Interoperability in Diagnostic Systems

Michal Kupčík, Michal Šír and Petr Fiedler

Verification of the System For Indirect Temperatures Measurement in The Massive Batch

Marek Laciak, Ján Kačur and Milan Durdán

Analysis of a Model for Key Performance Indicators in an SME Assembly Line

Eduardo Laguna Juárez and Lenka Landryová

An Hoermander Theorem for Fractional Powers of Laplacian

Remi Leandre

Contactless Vibration Measurement Using Linear CCD Sensor (& *

József Lénárt

Hilbert Spaces as a Specific Instrument for Process Control (' \$

Igor Leššo, Patrik Flegner and Katarína Feriančíková

New Approaches in 2D Modeling of Objects and Points of Interest (' *

Lacezar Lincev, Marek Babiuch, Tomas Pytlík and Radim Farana

Parameters Measurement of Observed Object from Recording ((&

Lacezar Lincev, Marek Babiuch, Radim Farana and Petr Zajíc

Simulation Model of Piezoelectric Stack Actuator ((,

Jaroslav Los, Jaromír Zavadil and Jiří Tůma

Fractional Order Calculus for Modeling and Fractional PID Control of the Heating Process () &

Michał Macias and Dominik Sierociuk

Spectral Entropy in a Fractional Order Model of Anomalous Diffusion () ,

Richard L. Magin and Carson Ingo

Fractional Calculus in Bioengineering: A Tool to Model Complex Dynamics (* (

Richard L. Magin

Solar Energy as Alternative Power Supply for Communication System IEEE 802.15.4 Standard (+ \$

Miroslav Mahdal

Possibility of Robust Temperature Control of Superheated Steam of the Through-flow Boiler (+ (

Michal Menkina

Using of Computer Integrated System for Static Tests of Pipe Conveyor Belts (, \$

Peter Michalik and Jozef Zajac

Numerical Simulation of Afterburning and Cooling of the Combustible Process Gases Before Dust Removal (, *

Adam Milejski and Henryk Rusinowski

Unified Platform for the Delivery of Notifications to Smartphones Notification (- \$

Andrea Mojžišová and Marcel Mojžiš

Identification of Friction in Pneumatic Linear Drive (-)

Michal Moučka

Controllability of H-Difference Linear Control Systems with Two Fractional Orders () \$%

Dorota Mozyrska and Ewa Pawluszewicz

Fast Model Order Selection of the Nonlinearity in Hammerstein Systems () \$+

Grzegorz Mzyk

A Novel Method for Measuring Inductance of an Electromagnetic Actuator () %%

Lajos Nagy, Tamás Szabó and Endre Jakab

Application Of IR Thermography for Evaluating the Integrity of a Natural Gas Delivery Station () %

Aleksander Nawrat, Janusz Skorek, Karol Jędrasiak, Krzysztof Daniec, Wojciech Kostowski, Roman Koterás, Adam Czornik, Barbara Mendecka, Dariusz Jarczyk and Damian Kasprzak

Brain - Computer Interface () &%

Agata Nawrocka and Andrzej Kot

Investigation of Dynamic Rigidity of Direct Driven Rotary Table () &

Jakub Olszewski

Fog Sensor System: Design and Measurement () &-

Luboš Ovseník, Ján Turán, Matúš Tatarko, Michal Turán and József Vásárhelyi

Control System of Small Model Railway - Four Ways of Tracking Control

Roman Pavlas and Jaromir Zavadil

Software Support of Managerial Decision Making Based on System Approach

Jindra Peterková, Petr Němčík, Vladislav Vančura and Jan Gottfried

Test Results for HF RFID Antenna System Tuning in Metal Environment

Adrian-Ioan Petrariu, Valentin Popa, Vasile-Gheorghita Gaitan, Ilie Finis

A New Discrete Approximation of the Fractional-Order Operator

Ivo Petráš

Fractional-Order Circuit Elements with Memory

Ivo Petráš and Yangquan Chen

Processing of the Balance Examination Results

Lucie Pivnickova, Viliam Dolinay and Vladimir Vasek

Generating KPI Sets Using Genetic Algorithms

David Plandor and Lenka Landryová

Bi-Axial Exciter of Mechanical Vibrations

Janusz Pluta and Paweł Orkisz

The Application of a Piezoelectric Stack for Control of Small Flow Intensity Hydraulic Fluid

Janusz Pluta and Marek Sibiłak

Fitting of Experimental Data Using Mittag-Leffler Function

Igor Podlubný, Ivo Petráš and Tomáš Škovránek

Experimental Design and Evaluation in a Distributed Environment Using a Genetic Algorithm with Static Allocation

Cosmin Poteras and Mihai Mocanu

Different Kinds of Boundary Condition for Time-Fractional Heat Conduction Equation

Yuriy Povstenko

An Impact of Chosen Construction Parameter and Operating Conditions on The Quality of Wind Turbine Energy Generation

Krzysztof Pytel, Kazimierz Jaracz and Stanisław Gumuła

Distributed Control Systems Using Web Service

Lukáš Ríchtr, Radim Farana, Patrik Janečka, Miloslav Spurný

Vibrotermography and its Use for Detecting Cracks

Miroslav Rimár, Martin Valko and Janka Mihalčová

Mathematical Model of the CFB Boiler Co-Fired With Coal and Biomass

Henryk Rusinowski, Marcin Szega and Adam Milejski

Strategies Providing the Quality of Machine in Designing, Production and Exploitation

Andrzej Samek

Power Amplifier Supporting MR Fluid-Based Actuators

Bogdan Sapiński, Maciej Rosół and Łukasz Jastrzębski

Ultracapacitor Modeling and Control with Discrete Fractional Order Artificial Neural Network

Grzegorz Sarwas, Dominik Sierociuk and Andrzej Dzieliński

Fiber Optic Sensors for Liquid Level Measurement

Sona Sediva and Marie Havlikova

Complex Contactless Flash Thermal Analyser of Low Conductive Materials

David Seidl, Pavel Košťál, Zora Jančíková, Ivan Ružiak, Jiří David, Richard Puchký and Ivan Kopal

New 3D HMI Tool for Robot Path Planning Based on Latest W3C Standards ' %
Ondřej Severa, Roman Pišl, Martin Čech, Martin Goubelj, Milan Štetina and Miloš Schlegel

Unmanned Multi-Robot CBRNE Reconnaissance with Mobile Manipulation – System Description and Technical Validation ' +
Frank E. Schneider, Jochen Welle, Dennis Wildermuth and Markus Ducke

System Properties of Fractional Variable Order Discrete State-Space System ('
Dominik Sierociuk

Ontology and Diagnostics in Automation Technology (-
Michal Šir, Zdenek Bradac and Michal Kupcik

Mobile Development Tools and Cross-Platform Solutions) '
Pavel Smutný

The Application of a Non-Uniform Magnetic Field to Semi-Active Vibration Control of a Beam With Magnetorheological Fluid) +
Jacek Snamina

Advanced Monitoring System for Granular Material Thermal Treatment * %
Ján Spišák, Ján Mikula, Dušan Naščák, Miroslav Zelko

Control of Plants With a Time Delay * +
Miloslav Spurný, Miroslav Mahdal, Lukáš Ríchtr and Petr Staníček

Interval Observer Estimation and Predictive Control for a Biotechnological System + &
Elena Bunciu Stanciu, Emil Petre and Andreea Maria Neacă

Modelling Potential Action for Building Protection Against Flow of Methane from the Underground Using the Fluent Software ++
Pavel Staša, Vladimír Kebo, Petra Fuchsíková and Lukáš Kubáč

Real Time Predictive Control for Hybrid Plant , (
Florin Stîngă and Dan Popescu

Developing a General Purpose Data Collector Framework For Robots - \$
József Sütő, Ákos Máté, János Végh, István Oniga

Mathematical Model of The Steam-Water Cycle for CHP Unit with Bleed-Condensing Turbine - (
Grzegorz Szapajko, Henryk Rusinowski and Adam Milejski

Empirical Energy Characteristic of a Fluidized-Bed Boiler Based on Measurements From a Distributed Control System - -
Marcin Szega, Henryk Rusinowski and Adam Milejski

Data Fitting Using Solutions of Differential Equations: Fractional-Order Model Versus Integer-Order Model + \$ '
Tomáš Škovránek, Igor Podlubný, Ivo Petráš and Dagmar Bednárová

Drilling Of Circuit Boards Using CNC Controlled by Programable Logic Controller + % %
Pavel Šofer, Jaromír Škuta and Jan Gebauer

Innovative Design and Control of Robotic Manipulator for Chemically Aggressive Environments + %)
Martin Švejda and Martin Goubelj

Simulation Model for Analisis of Thermal Processes in Thermo-Insulating Food Packaging + & %
Ján Terpák, Ján Kukurugya and Martin Pitoňák

Realtime Application Core for Multiaxial Dynamic Testing + & +
Petr Tomčík and Jiří Kulhánek

Modal Analysis of Car Frame by Mems Accelerometr Digital Network + ' %
Petr Tomčík, Martin Juránek and Jiří Kulhánek

Testing Equipment for the Research of Traction Battery Cells ()

Petr Tomčík, Radim Čech, Jiří Kulhánek and Jaromír Škuta

Sound Source Localization (\$

Jiri Tuma, Patrik Janecka, Milan Vala and Lukas Richter

Simulation of Active Vibration Control of the Cantilever Beam ((

Jiří Tůma and Jolana Škutová

Atmosphere Quality Monitoring System with Optical Powering 748

Ján Turán, Ľuboš Ovseník, Michal Turán and József Vásárhelyi

Developing Sensors and Real-Time Controlling Software for a Robot 752

Máté Varga, István Pógár, Péter Varga, Ákos Máté and János Végh

Use of Multiple Dominant Pole Method for Controller Tuning 757

Miluse Viteckova and Antonin Vitecek

Controller Tuning for FOPTD Plants 763

Miluse Viteckova and Antonin Vitecek

Use Encoder Speed Sensors for the Calculation of Torque Moment 768

Jiří Voldán

Architecture of Automatized Control System for Honey Bee Indoor Wintering Process 772

Monitoring And Control

Aleksejs Zacepins and Egils Stalidzans

Traffic Signs Detection Using Blob Analysis and Pattern Recognition 776

Jaromir Zavadil, Vitor Manuel Ferreira Santos and Jiri Tuma

Mathematical Model of Gasification and Combustion of Biomass 780

Monika Žecová, Ján Terpák and Ľubomír Dorčák

Real-Time Safety Circuit Based on Combined MEMS Sensor Data for Rehabilitation Device 786

Kamil Židek, Vladislav Maxim and Alexander Hošovský
