

2012 Ninth International Conference on Networked Sensing (INSS 2012)

**Antwerp, Belgium
11 – 14 June 2012**

**IEEE Catalog Number: CFP1246C-PRT
ISBN: 978-1-4673-1784-9**

Table of Contents

Technical Papers

Event Detection and Security

On Diversifying Source Selection in Social Sensing *****

Md Yusuf S Uddin, Md Tanvir Al Amin, Hieu Le, Tarek Abdelzaher, Boleslaw Szymanski and Tommy Nguyen

Trainspotting: Combining Fast Features to Enable Detection on Resource-constrained Sensing Devices *****

Eugen Berlin and Kristof Van Laerhoven

A Security Architecture and Modular Intrusion Detection System for WSNs *****

Nils Aschenbruck, Jan Bauer, Jakob Bieling, Alexander Bothe and Matthias Schwamborn

Collaborative Detection of Traffic Anomalies using First Order Markov Chains *****

Denise Dudek

Human Sensing

Detection of Small-Waving Hand by Distributed Camera System *****

Kenji Terabayashi, Hidetsugu Asanoy, Takeshi Nagayasuz, Tatsuya Orimoy, Mutsumi Ohtay, Takaaki Oiwa and Kazunori Umeda

Gait-based Person Authentication by Wearable Cameras *****

Kohei Shiraga, Ngo Trung, Ikuhisa Mitsugami, Yasuhiro Mukaigawa and Yasushi Yagi

A Compressed Sensing Method for Human Activity Sensing using Mobile Phone Accelerometers *****

Daito Akimura, Yoshihiro Kawahara and Tohru Asami

Application and Development Tools

Holistic Online Energy Assessment: Feasibility and Practical Application *****

Christian Renner, Florian Meier, Volker Turau

A Platform-as-a-Service for in-situ Development of Wireless Sensor Network Applications *****

Yong Ding, Dawud Gordon, Martin Neumann, Till Riedel, Takashi Miyaki, Michael Beigl, Wenzhu Zhang and Lin Zhang

An Annotation Tool of Layered Activity for Continuous Improvement of Activity Recognition *****

Kiyohiko Yoshisaku and Ren Ohmura

Activity Recognition

Towards Urban Phenomenon Sensing by Automatic Tagging of Tweets ****

Muhammad Asif Khan, Masayuki Iwai and Kaoru Sezaki

A Design of Software Adaptive to Estimated User's Mental State Using Pulse Wave Analysis ****

Shun Arai, Kazuhisa Ohira, Niwat Thepvilojanapong, Nobuji Tetsutani, Yoshito Tobe, Mayumi Oyama-Higa and Yoshikatsu Ohta

Wireless Wearable Vibration Sensor for Touch-based Life Log System **

Yasutoshi Makino, Akiko Kamigori and Takashi Maeno

Breakout 404: A Smart Space Implementation for Lighting Services in the Office Domain ****

Serge Offermans, Aravind Gopalakrishna, Harm van Essen and Tanir Özçelebi

Novel Platforms

868 MHz: A Noiseless Environment, But No Free Lunch for Protocol Design ****

Matthias Woehrle, Martin Bor and Koen Langendoen

WoR-MAC: Combining Wake-on-Radio with Quality-of-Service for Intelligent Environments ****

Dawud Gordon, Matthias Berning, Rayan El Masri, Johannes Blanckenstein, Jirka Klaue and Michael Beigl

A Wireless and Batteryless Sensor Node Powered via 2-D Waveguide Sheet ****

Akihito Noda and Hiroyuki Shinoda

Resilient Architecture for Sensor Networks ****

Ichiro Satoh

Practical Technologies

Low-Power IPv6 for the Internet of Things ****

Adam Dunkels, Joakim Eriksson, Niclas Finne, Fredrik Osterlind, Nicolas Tsiftes, Mathilde Durvy and Julien Abeillé

Use of Retroreflector and Multi-zeros Optical Beam for Remote Monitoring of Lateral Deformation ****

Toru Kurihara, Yuichiro Yada, Shigeru Ando, Yulan Qi, Emiko Sano and Hajime Nakajima

Narrow Sheet Design with Shielding Metal Walls of Two-dimensional Communication ****

Koichiro Nakase, Naoki Kobayashi, Hiroshi Fukuda, Akira Miyata and Tsuneo Tsukagoshi

Combining Lively Sensed Bubbles into Sparkling Applications ****

Geert Vanderhulst, Johan Criel and Lieven Trappeniers

Migration from a Legacy Wireless Technology to ZigBee for a Home Automation Market Ready System ****

Federico X DomÃ-nguez, Abdellah Touhafi, Jelmer Tiete, Muzaffer Güler and Kris Steenhaut

Novel Hardware

Passive UHF RFID Tag Localization on 2D Waveguide Sheet Using Single Reader and Phased Array Coupler *****

Akihito Noda, Hiroyuki Shinoda

Proposal and Evaluation of Intra-body Sensing via Sheet Medium *****

Takashi Matsuda, Bing Zhang, Keren Li, Peter Davis, Kiyotaka Sasagawa and Jun Ohta

Terahertz Beam Steering Using Structured MEMS Surfaces for Networked Wireless Sensing *****

Yasuaki Monnai, Volker Viereck, Hartmut Hillmer, Kristian Altmann, Christian Jansen, Martin Koch and Hiroyuki Shinoda

Investigating the Use of Commodity Dust Sensors for the Embedded Measurement of Particulate Matter *****

Matthias Budde, Mathias Busse and Michael Beigl

Micro and Nano-scaled Sensors and Actuators for Aerospace Applications *****

Karin Schultz, Andreas Tatzel, Natalie Worapattrakul, Carsten Woigt, Andreas Jäkel, Volker Viereck and Hartmut Hillmer

Networked Sensing Systems in Robotics

Mobile Robot Path Planning using Human Prediction Model based on Massive Trajectories *****

Hiroshi Noguchi, Takaki Yamada, Taketoshi Mori and Tomomasa Sato

Real-Time Background Modeling Based on Classified Dynamic Objects for Human Robot Application *****

Alessandro Moro, Enzo Mumolo, Massimiliano Nolich, Kenji Terabayashi and Kazunori Umeda

30W Wireless Power Transmission to Networked Robots through 2D Waveguide *****

Takuya Okuyama, Akihito Noda and Hiroyuki Shinoda

A Dielectric Liquid Based Capacitive Tactile Sensor for Humanoid Robots *****

KaiWei Liao, Yu-Wen Huang, Max T. Hou, and J. Andrew Yeh

Innovations in Networking

μ s-Scale Time Synchronization for Energy-Constrained Mission-Critical DTSNs *****

Seng-Yong Lau, Ling-Jyh Chen, Yu-Te Huang, Po-Yen Lin, Yi-Hsuan Chiang, Jyh-How Huang, Kun-chan Lan, Hao-hua Chu and Polly Huang

HWL - A High Performance Wireless Sensor Research Network *****

Markus Scheidgen, Anatolij Zubow and Robert Sombrutzki

jNode: a Sensor Network Platform that Supports Distributed Inertial Kinematic Monitoring *****

Philipp M. Scholl, Kristof Van Laerhoven, Dawud Gordon, Markus Scholz and Matthias Berning

A3ME -Generic Middleware for Information Exchange in Heterogeneous Environments *****

Arthur Herzog and Alejandro Buchmann

Novel Protocol Design

Data Pre-Forwarding for Opportunistic Data Collection in Wireless Sensor Networks *****

Xiuchao Wu, Kenneth N. Brown and Cormac J. Sreenan

An Improved Channel Access Approach for Emergency Situations in IEEE 802.11 DCF *****

Behnam Banitalebi, Yong Ding, Hedda R. Schmidtke and Michael Beigl

Adaptive Media Access Control for Energy Harvesting - Wireless Sensor Networks *****

Xenofon Fafoutis and Nicola Dragoni

Poster Papers

Efficient Multiple Gateway System for WSN Management in BEMS *****

Xuan He, Yuanchen Ma and Mika Mizutani

RPL Modeling in J-Sim Platform *****

Panagiotis Karkazis, Panagiotis Trakadas, Theodore Zahariadis, Antonis Hatziefremidis and Helen Leligou

On Using Continuations in Wireless Sensor Networks ****

Teemu Leppänen, Pauli Närhi, Jani Ylioja, Jukka Riekkö, Yoshito Tobe and Timo Ojala

Fine-Grained Time Synchronization for Mission-Critical DTSNs *****

Ling-Jyh Chen, Seng Yong Lau, Yu-Te Huang, Po-Yen Lin, Yi-Hsuan Chiang, Jyh-How Huang, Kun-chan Lan, Hao-hua Chu and Polly Huang

Contactless Power Sensor for Smart Power Strip Networked to Visualize Energy Conservation ****

Fumihiko Nakazawa, Hiromitsu Soneda, Osamu Tsuboi, Akinori Iwakawa, Masahiko Murakami, Masahiro Matsuda and Naoyuki Nagao

Exploring Analysis of Football Actions Considering Correlation of Joints in the Body *****

Keisuke Kato, Yutaka Namiki, Ryosuke Ozaki, Niwat Thepvilojanapong, Nobuji Tetsutani and Yoshikatsu Ohta

Building a Map Including Moving Objects for Mobile Robot Navigation in Living Environments *****

Syo Hiroi and Mihoko Niitsuma

Analysis of the Impact of Data Correlation on Adaptive Sampling in Wireless Sensor Networks *****

Alireza Masoum, Nirvana Meratnia and Paul Havinga

Performance Analysis of Router-formed Multi-hop Wi-Fi Network for Building Automation *****

Ning Zhang and Cheng Guo

An Improved Multi-Metric Hop-Cost Model for Wireless Ad-hoc and Sensor Networks *****

Behnam Banitalebi and Michael Beigl

QoS-Based Web Service Composition in an Environmental Assessment System ****

Cuong Nguyen, Niccolò De Caro, Kris Steenhaut and Abdellah Touhafi

An Extension of Regression-based Automatic Calibration Method for Sensor Networks ****

Tomoyuki Fujino and Satoshi Honda

Demo Papers

A Platform to Collect, Manage and Share Heterogeneous Sensor Data ****

Andrea Piras, Davide Carboni and Antonio Pintus

Augmented Service in the Factory of the Future *****

Matthias Berning, Till Riedel, Daniel Karl, Florian Schandinat, Michael Beigl and Nicolaie Fantana

A Demonstrator of the GINSENG-Approach to Performance and Closed Loop Control in WSNs ****

Felix Büsching, Wolf-Bastian Pöttner, Dieter Brökelmann, Georg von Zengen, Robert Hartung, Karsten Hinz and Lars Wolf

The TECO Envboard: a Mobile Sensor Platform for Accurate Urban Sensing - and More *****

Matthias Budde, Matthias Berning, Mathias Busse, Takashi Miyaki and Michael Beigl

Fast Indoor Radio-Map Building for RSSI-based Localization Systems ****

Philipp M. Scholl, Stefan Kohlbrecher, Vinay Sachidananda and Kristof Van Laerhoven

A Prototype of An In-situ Radio Sensing and Visualization Device *****

Antonios Karatzoglou, Markus Scholz, Till Riedel and Michael Beigl

LSN: An Architecture for Dynamic Sensor Mapping for Logical Sensor Networks ****

Naoya Namatame, Jin Nakazawa and Hideyuki Tokuda

EnHaNSS 2012 Workshop Papers

Printed Electrochemical Capacitors for Energy Scavenging Sensor Networks ****

Andrey Somov, Christine C. Ho, Roberto Passerone, James W. Evans, Paul K. Wright

Characterization of Lithium-Ion Capacitors for Low-Power Energy Neutral Wireless Sensor Networks ****

Danilo Porcarelli, Davide Brunelli, Luca Benini

Design of a Linearized Magnetic Spring for Body-Worn Inertial Energy Harvesters ****

Hui Huang, Geoff V. Merrett, Neil M. White

Analytical Comparison of MAC Schemes for Energy Harvesting - Wireless Sensor Networks ****

Xenofon Fafoutis, Nicola Dragoni

Supercapacitor Leakage in Energy-Harvesting Sensor Nodes: Fact or Fiction? ****

Geoff V. Merrett, Alex S. Weddell

State-of-Charge Assessment for Supercap-Powered Sensor Nodes: Keep it Simple Stupid! ****

Christian Renner, Volker Turau
