

2012 IEEE International Frequency Control Symposium Proceedings

(FCS 2012)

**Baltimore, Maryland, USA
21 – 24 May 2012**

**IEEE Catalog Number: CFP12FRE-PRT
ISBN: 978-1-4577-1821-2**

Table of Contents

Welcome from the General Chair.....	xxx
Welcome from the Technical Program Chair.....	xxxi
In Memoriam.....	xxxii
Organizing Committee	xxxiii
2012 IFCS Conference Committee	xxxv
Special Thanks.....	xxxviii
List of Exhibitors	xxxix
2012 IFCS Awards.....	xliii
Student Paper Competition	xliv
Future Conferences.....	xlvi
Tutorials.....	xlvii
Tutorial Schedule.....	xlvii
Plenary Session Schedule.....	lv
Plenary Session Invited Talk	lvi
Panel Discussion	lvii

Tuesday, May 22, 2012 10:20 a.m. – 12:20 p.m.

Session: Ramsey Memorial Session and Ramsey Techniques
Room: Baltimore A
Session Chair: Robert Tjoelker, JPL and Mike Garvey, Symmetricom

An Ensemble of Atomic Fountains	1
<i>Steven Peil, US Naval Observatory</i>	
<i>Scott Crane, US Naval Observatory</i>	
<i>James Hanssen, US Naval Observatory</i>	
<i>Thomas Swanson, US Naval Observatory</i>	
<i>Christopher Ekstrom, US Naval Observatory</i>	

Tuesday, May 22, 2012 10:20 a.m. – 12:20 p.m.

Session: Phase Noise
Room: Baltimore B
Session Chair: Pat Green, Northrop Grumman

Time Jitter and Phase Noise – Now and in the Future?	5
<i>Michael Underhill, Underhill Research Ltd</i>	
Generation of Pure Phase and Amplitude Modulated Signals	13
<i>Eugene Ivanov, The University of Western Australia</i>	

PM-Am Correlation Measurements and Analysis 16
David Howe, NIST
Archita Hati, NIST
Craig Nelson, NIST
Danielle Lirette, NIST

A Sub-Sampling Digital PM/AM Noise Measurement System 21
Craig Nelson, NIST
Dave Howe, NIST

Phase Noise Measurement at 670 GHz 25
Jason Desalvo, NIST
Archita Hati, NIST
Craig Nelson, NIST
Dave Howe, NIST

Tuesday, May 22, 2012 **10:20 a.m. – 12:20 p.m.**

Session: Wireless Sensors & Sensor Systems

Room: Maryland A

Session Chairs: Leo Reindl, University of Freiburg & Don Malocha, University of Central Florida

SAW and CMOS RFID Transponder-Based Wireless Systems and Their Applications 29
Amelie Hagelauer, University of Erlangen-Nuremberg
Thomas Ussmueller, University of Erlangen-Nuremberg
Robert Weigel, University of Erlangen-Nuremberg

A Coupled-Mode Filter Structure for Wireless Transceiver-Sensors Using Reactive Loads 35
Thierry Laroche, FEMTO-ST
Gilles Martin, FEMTO-ST
William Daniau, FEMTO-ST
Sylvain Ballandras, FEMTO-ST
Jean-Michel Friedt, SENSEOR
Jean-François Leguen, SENSEOR

Passive, Wireless SAW OFC Strain Sensor 41
James Humphries, University of Central Florida
Donald Malocha, University of Central Florida
**Student Paper Competition Paper*

16-Sensor Passive Wireless SAW Humidity Sensor System 47
Jacqueline Hines, Applied Sensor Research & Development Corporation
Leland Solie, Applied Sensor Research & Development Corporation
Cote Glenn, Applied Sensor Research & Development Corporation
Jerry Corey, Applied Sensor Research & Development Corporation
Dana Tucker, Applied Sensor Research & Development Corporation
Andrew Hines, Applied Sensor Research & Development Corporation
E. U. Borguet, Temple University

Coherent Correlator Receiver for SAW Multi-Sensor Parameter Extraction 51
Donald Malocha, UCF
Mark Gallagher, UCF

Tuesday, May 22, 2012 1:20 p.m. – 3:20 p.m.

Session: Optical Lattice Clocks I
Room: Baltimore A
Session Chair: Pierre Dube, National Research Council Canada

**Prospects for Frequency Comparison of Sr and Hg Based Optical Lattice Clocks
Toward 10^{-18} Uncertainties56**
Hidetoshi Katori, The University of Tokyo, ERATO & Advanced Science Institute
M. Takamoto, ERATO & Advanced Science Institute
T. Takano, The University of Tokyo, ERATO & Advanced Science Institute
I. Ushijima, The University of Tokyo, ERATO & Advanced Science Institute
T. Ohkubo, The University of Tokyo, ERATO & Advanced Science Institute
K. Yamanaka, The University of Tokyo, ERATO & Advanced Science Institute
N. Ohmae, The University of Tokyo, ERATO & Advanced Science Institute
Y. Aso, ERATO & The University of Tokyo
A. Shoda, The University of Tokyo
T. Ushiba, The University of Tokyo
P. Thoumany, ERATO & Advanced Science Institute
M. Das, ERATO & Advanced Science Institute
B. T. R. Christensen, The University of Tokyo, ERATO & Advanced Science Institute
T. Akatsuka, ERATO & Advanced Science Institute

Comparison of Two Strontium Optical Lattice Clocks in Agreement at the 10^{-16} Level62
Rodolphe Le Targat, LNE-SYRTE
Luca Lorini, INRIM
Mikhail Gurov, LNE-SYRTE
Michal Zawada, Nicolaus Copernicus University
Rafal Gartman, Nicolaus Copernicus University
Bartolmiej Nagorny, Nicolaus Copernicus University
Pierre Lemonde, LNE-SYRTE
Jérôme Lodewyck, LNE-SYRTE

Tuesday, May 22, 2012 1:20 p.m. – 3:20 p.m.

Session: Tuning, Trimming, and Compensation of MEMS Resonators
Room: Baltimore B
Session Chair: Jan Kuypers, Sand 9

Compensation, Tuning, and Trimming of MEMS Resonators66
Farrokh Ayazi, Georgia Institute of Technology
Roozbeh Tabrizian, Georgia Institute of Technology
Logan Sorenson, Georgia Institute of Technology

**Production Issues in Using Silicon Dioxide Films for Temperature Compensated
Bulk and Surface Acoustic Wave Devices73**
Sergey Mishin, AMS
Michael Gutkin, AMS

Temperature Compensated Resonance Modes of Degenerately N-Doped Silicon MEMS Resonators77
Antti Jaakkola, VTT
Mika Prunnila, VTT
Tuomas Pensala, VTT

Impact of Doping and Microstructure on Quality Factor of CVD Diamond Micromechanical Resonators ..82

*Hadi Najjar, UC Davis
Mei-Lin Chan, UC Davis
Jin Xie, UC Berkeley
Liwei Lin, UC Berkeley
David Horsley, UC Davis*

Tuesday, May 22, 2012 1:20 p.m. – 3:20 p.m.

Session: Time & Frequency Transfer and GNSS

Room: Maryland A

Session Chair: James Hanssen, USNO

GNSS Signals - An Overview.....87

Christopher Hegarty, The MITRE Corporation

Precision and Accuracy of USNO GPS Carrier Phase Time Transfer: 2012 Update94

*Christine Hackman, United States Naval Observatory
Demetrios Matsakis, United States Naval Observatory*

A Controlling Method in UWB Indoor Positioning System Based on Time Division100

*Yan Bai, National Time Service Center, The Chinese Academy of Sciences
Xiao-Chun Lu, National Time Service Center, The Chinese Academy of Sciences
Jin Wang, National Time Service Center, The Chinese Academy of Sciences
Student Paper Competition Paper

Tuesday, May 22, 2012 3:40 p.m. – 5:40 p.m.

Poster Session: Microwave Standards I

Room: Baltimore Foyer

Session Chair: John Kitching, NIST

Progress Towards a Microwave Frequency Standard Based on the Laser Cooled ¹¹³Cd⁺ Ions105

*Jianwei Zhang, Tsinghua University
Zhengbo Wang, Tsinghua University
Shiguang Wang, Tsinghua University
Kai Miao, Tsinghua University
Bo Wang, Tsinghua University
Lijun Wang, Tsinghua University*

Microwave Power Related Frequency Shifts of ²⁵Mg108

*Fang Fang, NIM
Weiliang Chen, NIM
Nianfeng Liu, NIM
Kun Liu, NIM
Rui Suo, NIM
Tianchu Li, NIM*

Progress Towards a Dual-Isotope Trapped Mercury Ion Atomic Clock: Further Studies of Background Gas Pressure Shifts111

*L. Yi, Jet Propulsion Laboratory, California Institute of Technology
Shervin Taghavi-Larigani, Jet Propulsion Laboratory, California Institute of Technology
Eric Burt, Jet Propulsion Laboratory, California Institute of Technology
Robert Tjoelker, Jet Propulsion Laboratory, California Institute of Technology*

Norman F. Ramsey: Genealogy of Dissertation Mentors and Students 116
Leo Mallette, Aerospace Corporation

Tuesday, May 22, 2012 3:40 p.m. – 5:40 p.m.

Poster Session: Student Poster Competition (Group 3 & 6)

Room: Baltimore Foyer

Session Chair: John Kitching, NIST

Micro-Fabricated Alkali Vapor Cells Sealed at Low Temperatures with Thin-Film Metallic Bonding 122

Rahel Straessle, EPFL

Matthieu Pellaton, UniNE

Yves Pétremand, EPFL

Christoph Affolderbach, UniNE

Danick Briand, EPFL

Gaetano Mileti, UniNE

Nico de Rooij, EPFL

**Student Paper Competition Paper*

Tuesday, May 22, 2012 3:40 p.m. – 5:40 p.m.

Poster Session: Materials, Resonators, & Filters I

Room: Baltimore Foyer

Session Chair: Yoonkee Kim, US Army CERDEC

Precision Test Fixture for Measuring Equivalent Circuit Parameters of GHz Surface-Mounted Quarts Crystal Units 126

Manabu Wada, NDK

Yasuaki Watanabe, Tokyo Metropolitan University

Yukinori Sakuta, Nihon University

Masashi Hattori, Epson

Osamu Takahashi, Showa Shinku

Observation of Surface Acoustic Waves Using Synchrotron Radiation X-Ray Topography 129

Bernard Capelle, IMPMC Université Pierre et Marie Curie et CNRS

Yves Epelboin, IMPMC Université Pierre et Marie Curie et CNRS

Alain Soyer, IMPMC Université Pierre et Marie Curie et CNRS

Jacques Detaint, IMPMC Université Pierre et Marie Curie et CNRS

A Novel Thickness-Shear Mode Resonator Using a LiNbO₃ Plate with an Inversion Layer 135

Tingfeng Ma, Ningbo University

Ji Wang, Ningbo University

Jianke Du, Ningbo University

Lili Yuan, Ningbo University

Zhitian Zhang, Research Institute of Tsinghua University in Shenzhen

Chao Zhang, Research Institute of Tsinghua University in Shenzhen

Thermal Transient Characteristics of Zinc Oxide Solidly Mounted Resonators 138

Stephen Mihalko, Georgia Institute of Technology

Warsame Heban, Georgia Institute of Technology

Adam Wathen, MITRE Corp

William Hunt, Georgia Institute of Technology

New Method of multy-Mode Oscillations Control in Crystal Resonators 141

A.N. Lepetaev, Omsk State Technical University, Russia

A.V. Kosykh, Omsk State Technical University, Russia

A Single LC Tank Self-Compensated CMOS Oscillator with Frequency Stability of ± 100ppm from -40°C to 85°C	145
<i>Nabil Sinoussi, Si-Ware Systems</i>	
<i>Ahmed Hamed, Si-Ware Systems</i>	
<i>Mohamed Essam, Si-Ware Systems</i>	
<i>Ahmed El-Kholy, Si-Ware Systems</i>	
<i>Amr Hassanein, Si-Ware Systems</i>	
<i>Mohamed Saeed, Si-Ware Systems</i>	
<i>Ahmed Helmy, Si-Ware Systems</i>	
<i>Ayman Ahmed, Si-Ware Systems</i>	

A 2.6 GHz, 25 fs jitter, Differential Chip Scale Oscillator that is <1 mm² in area and 0.25mm Tall.....	150
<i>Fan Zhang, University of Washington</i>	
<i>Stephen Gilbert, Avago Technologies</i>	
<i>Frank Bi, Avago Technologies</i>	
<i>Steve Ortiz, Avago Technologies</i>	
<i>Brian Otis, University of Washington</i>	
<i>Richard Ruby, Avago Technologies</i>	

Tuesday, May 22, 2012 3:40 p.m. – 5:40 p.m.

Poster Session: Sensors & Transducers I
Room: Baltimore Foyer
Session Chair: Ashwin Seshia, University of Cambridge

Wireless Langasite Resonator as a Force Sensor	154
<i>Haifeng Zhang, University of North Texas</i>	
<i>Benjamin Montz, University of Alaska</i>	
<i>Tinghui Fan, University of North Texas</i>	
<i>John Kosinski, Monmouth University</i>	

Strain Sensing System Using Edge-Reflection Type AOTF	160
<i>Michio Kadota, Murata.Mfg. Co. Ltd.</i>	
<i>Hideaki Kobayashi, Murata.Mfg. Co. Ltd.</i>	
<i>Kiyokazu Yamada, Murata.Mfg. Co. Ltd.</i>	

Theory Modeling of Love Wave Device Loaded with Viscous Liquid	164
<i>Mengyang Wang, College Of Automation Engineering, Nanjing University of Aeronautics and Astronautics</i>	
<i>Zhijun Chen, College Of Automation Engineering, Nanjing University of Aeronautics and Astronautics</i>	
<i>Qianliang Xia, College Of Automation Engineering, Nanjing University of Aeronautics and Astronautics</i>	
<i>Peng Ruan, College Of Automation Engineering, Nanjing University of Aeronautics and Astronautics</i>	

High-Frequency LiNbO₃ Focused Transducer Using a Mechanical Dimpling Technique	169
<i>Jin Chen, Tsinghua University</i>	
<i>J. Wang, Ningbo University</i>	
<i>Jiyan Dai, The Hong Kong Polytechnic University</i>	
<i>Zhitian Zhang, Research Institute of Tsinghua University in Shenzhen</i>	
<i>Chao Zhang, Research Institute of Tsinghua University in Shenzhen</i>	
<i>G. P. Feng, Research Institute of Tsinghua University in Shenzhen</i>	

Techniques for Optimal DSSS Code Selection for SAW Multi-Sensor Systems	173
<i>Andrew Hines, Applied Sensor Research & Development Corporation</i>	
<i>Dana Tucker, Applied Sensor Research & Development Corporation</i>	
<i>Jacqueline Hines, Applied Sensor Research & Development Corporation</i>	
<i>Joel Castro, University of Maine</i>	
<i>Ali Abedi, University of Maine</i>	

Tuesday, May 22, 2012

3:40 p.m. – 5:40 p.m.

Poster Session: Timekeeping, Time & Frequency Transfer, GNSS Applications I

Room: Baltimore Foyer

Session Chair: Demetrios Matsakis, USNO

Common View Time Transfer by a Geo Navigation Satellite177

Haibo Yuan, National Time Service Center, Chinese Academy of Sciences

Wei Guang, Graduate School of the Chinese Academy of Sciences

A New Timing Method Based on Common-View181

Longxia Xu, National Time Service Center, the Chinese Academy of Sciences

Xiaohui Li, National Time Service Center, the Chinese Academy of Sciences

Yanrong Xue, National Time Service Center, the Chinese Academy of Sciences

Measurement and Calculation on System Error Caused by SATRE Modem185

Li Wei, National Time Service Center

Xu Yongliang, National Time Service Center

Yuan Haibo, National Time Service Center

GPS Carrier Phase Time Transfer Using a Modified Solution Model188

Kun Liang, National Institute of Metrology (NIM), China

Li Tianchu, National Institute of Metrology (NIM), China

Weibo Wang, National Institute of Metrology (NIM), China

Dayu Ning, National Institute of Metrology (NIM), China

Aimin Zhang, National Institute of Metrology (NIM), China

Fang Fang, National Institute of Metrology (NIM), China

Tianyi Wang, Chinese Academy of Sciences

The Research on Positioning Using BPL Station192

Xu Yongliang, National Time Service Center

Li Wei, National Time Service Center

Yuan Haibo, National Time Service Center

**A Method of Time Transfer Between Satellite and Ground Combining Compass Data
and TWSTFT Observation in the Mode of Transmitting and Receiving with the Same Station196**

Langming Ma, NTSC, CAS

Xuhai Yang, NTSC, CAS

Zhigang Li, NTSC, CAS

Method of Common-View Time Transfer with Transfer Mode Based on Geostationary Satellite200

Xuhai Yang, NTSC, CAS

Zhenyuan Hu, NTSC, CAS

Ji Guo, NTSC, CAS

Xiaohui Li, NTSC, CAS

Zhigang Li, NTSC, CAS

Yuan Haibo, NTSC, CAS

Tuesday, May 22, 2012 3:40 p.m. – 5:40 p.m.

Poster Session: Oscillators, Synthesizers, Noise, & Circuit Techniques I

Room: Baltimore Foyer

Session Chair: Rabi Wang, JPL

Phase Noise Calculation Technique Using Time Varying Model204

Saber Izadpanah Tous, Sadjad University

Afshin Khosravi, Sadjad University

Ali Hosseini, Sadjad University

Ehsan Kargaran, Sadjad University

Somayeh Hasanpour, Sadjad University

Hooman Nabovati, Sadjad University

Utmost OCXO Solutions Based on the IHR Technology208

Igor Abramzon, Magic Xtal Ltd.

Vadim Tapkov, Magic Xtal Ltd.

Alexey Kornilov, Magic Xtal Ltd.

An Efficient ROM-Less Direct Digital Synthesizer Based on Bhaskara I's Sine Approximation Formula .215

Majid Nekounam, Shahid Beheshti University

Mohammad Eshghi, Shahid Beheshti University

Start-Up Robustness Against Resonator-Qs Defects in a 2-GHz FBAR VCO221

Kim Östman, Aalto University School of Electrical Engineering

Mikko Valkama, Tampere University of Technology

**Student Paper Competition Paper*

The Influence of Oscillator Behavior on Accumulated Phase Error During Dynamic Environmental Conditions225

Mike Wacker, Vectron International, Inc.

Peter Matthews, Vectron International, Inc.

Dual-Transistor Oscillator Circuit for BAW and SAW Resonator Excitation in Wide Motion Resistance Range231

Anatoly Kosykh, Omsk State Technical University

Alexander Lepetaev, Omsk State Technical University

Sergey Zavjalov, Omsk State Technical University

Phase Noise Comparison for 60MHz and 120MHz OCXOs with Different Multiplication Configurations ..235

Brahmananda Reddy, Centum Rakon India Pvt Ltd

Swarna Sontineni, Ceatum Rakon India Pvt Ltd

Priskala Sathiyaseelan, Centum Rakon India Pvt Ltd

Mariappa Chandrashekar, Centum Rakon India Pvt Ltd

Chippalkatti Vinod, Centum Rakon India Pvt Ltd

High Frequency OCXO for Space Application239

Brahmananda Reddy, Centum Rakon India Pvt Ltd

Swarna Sontineni, Ceatum Rakon India Pvt Ltd

Priskala Sathiyaseelan, Centum Rakon India Pvt Ltd

Mariappa Chandrashekar, Centum Rakon India Pvt Ltd

Chippalkatti Vinod, Centum Rakon India Pvt Ltd

Dhruva Pm, Indian Space Research Organisation

Singh Dk, Indian Space Research Organisation

Aging Drift Compensation	244
<i>Mingying Zhao, Xidian University</i>	
<i>Wei Zhou, Xidian University</i>	
<i>Weiwei Zhang, Xidian University</i>	
<i>Mingming Dou, Xidian University</i>	

Wednesday, May 23, 2012 8:00 a.m. – 10:00 a.m.

Session: Trapped Ion Clocks

Room: Baltimore A

Session Chairs: Patrick Gill, National Physical Laboratory & Eric Burt, JPL

Minimizing Time-Dilation in Ion Traps - Towards an Optical Clock with Coulomb Crystals	248
<i>Tanja Mehlstäubler, PTB</i>	
<i>Karsten Pyka, PTB</i>	
<i>Jonas Keller, PTB</i>	
<i>Norbert Herschbach, PTB</i>	
<i>David Meier, PTB</i>	
<i>Kristijan Kuhlmann, PTB</i>	
<i>Stepan Ignatovich, ILP</i>	
<i>Maksim Okhapkin, PTB</i>	

Systematic Shift Evaluation of the NRC 88Sr+ Single-Ion Optical Frequency Standard to a Few Parts in 10⁻¹⁷	250
<i>Pierre Dubé, National Research Council</i>	
<i>Alan Madej, National Research Council</i>	
<i>Zichao Zhou, University of Washington</i>	
<i>John Bernard, National Research Council</i>	

Wednesday, May 23, 2012 8:00 a.m. – 10:00 a.m.

Session: MEMS

Room: Baltimore B

Session Chair: Clark Nguyen, University of California, Berkeley

Introducing High Performance CrystalFree™ pMEMS Oscillators	256
<i>Harmeet Bhugra, IDT Inc.</i>	
<i>Wanling Pan, IDT Inc.</i>	
<i>Dino Lei, IDT Inc.</i>	
<i>Seungbae Lee, IDT Inc.</i>	

Modelling Non-Linearities in a MEMS Square Wave Oscillator	260
<i>Deepak Agrawal, University of Cambridge</i>	
<i>Jim Woodhouse, University of Cambridge</i>	
<i>Ashwin Seshia, University of Cambridge</i>	

Low Jitter and Temperature Stable MEMS Oscillators	266
<i>Haechang Lee, SiTime Inc.</i>	
<i>Aaron Partridge, SiTime Inc.</i>	
<i>Fari Assaderaghi, SiTime Inc.</i>	

Vibration-Insensitive 61-MHz Micromechanical Disk Reference Oscillator	271
<i>Thura Lin Naing, University of California at Berkeley</i>	
<i>Tristan Rocheleau, University of California at Berkeley</i>	
<i>Zeying Ren, University of California at Berkeley</i>	
<i>Elad Alon, University of California at Berkeley</i>	
<i>Clark Nguyen, University of California at Berkeley</i>	

A Real-Time 32.768-Khz Clock Oscillator Using a 0.0154-mm² Micromechanical Resonator Frequency-Setting Element	277
<i>Henry Barrow, University of California, Berkeley</i>	
<i>Thura Lin Naing, University of California, Berkeley</i>	
<i>Robert Schneider, University of California, Berkeley</i>	
<i>Tristan Rocheleau, University of California, Berkeley</i>	
<i>Victor Yeh, University of California, Berkeley</i>	
<i>Zeying Ren, University of California, Berkeley</i>	
<i>Clark Nguyen, University of California, Berkeley</i>	
<i>*Student Paper Competition Paper</i>	

Wednesday, May 23, 2012 8:00 a.m. – 10:00 a.m.

Session: Time & Frequency Transfer and UTC

Room: Maryland A

Session Chair: Judah Levine, NIST

Performance Comparison of Ensemble Kalman Filter Predictors Applied to UTC	283
<i>Akram Abdellatif, DLR (German Aerospace Center)</i>	
<i>Matthias Suess, DLR (German Aerospace Center)</i>	

Frequency Steering and the Control of UTC(K)	289
<i>Haibo Yuan, National Time Service Center, Chinese Academy of Sciences</i>	
<i>Wei Guang, Graduate School of Chinese Academy of Sciences</i>	

New Technologies for Time Transfer with Picoseconds Precision and Accuracy	293
<i>Ivan Prochazka, Czech Technical University in Prague</i>	
<i>Josef Blazej, Czech Technical University in Prague</i>	
<i>Jan Kodet, Czech Technical University in Prague</i>	

Distributing RF Signals in an Ethernet Network	300
<i>Pedro Moreira, UCL</i>	
<i>Pablo Alvarez, CERN</i>	
<i>Javier Serrano, CERN</i>	
<i>Izzat Darwazeh, UCL</i>	
<i>*Student Paper Competition Paper</i>	

Wednesday, May 23, 2012 1:20 p.m. – 3:20 p.m.

Session: Optical Lattice Clocks II

Room: Baltimore A

Session Chair: Kurt Gibble, Penn State

Probing Many-Body Spin Interactions with an Optical Lattice Clock306

Ana Maria Rey, JILA/NIST/ University of Colorado
Michael Martin, JILA/NIST/ University of Colorado
Matthew Swallows, JILA/NIST/ University of Colorado
Michael Bishof, JILA/NIST/ University of Colorado
Craig Benko, JILA/NIST/ University of Colorado
Sebastian Blatt, Harvard University
Javier Von Stecher, JILA/NIST/ University of Colorado
Alexey Gorshkov, IQI, California Institute of Technology
Jun Ye, JILA/NIST/ University of Colorado

Spin-Pair Interactions in a Trapped Atom Clock307

Wilfried Mainault, LNE-SYRTE
Christian Deutsch, LKB
Kurt Gibble, Penn State
Jakob Reichel, LKB
Peter Rosenbusch, LNE-SYRTE

Reaching the 10-15 Accuracy Range with a Hg Optical Lattice Clock310

John J. McFerran, SYRTE
Lin Yi, SYRTE
Sinda Mejri, SYRTE
R. Tyumenev, SYRTE
Z. Xu, SYRTE
Sylvain Di Manno, SYRTE
Wei Zhang, SYRTE
Jocelyne Guéna, SYRTE
Yann Le Coq, SYRTE
Sébastien Bize, SYRTE

Blackbody Effects in the Yb Optical Lattice Clock311

Andrew Ludlow, NIST
Jeff Sherman, NIST
Nathan Lemke, NIST, Univ. of Colorado
Kyle Beloy, NIST
Nathan Hinkley, NIST, Univ. of Colorado
Marco Pizzocaro, Politecnico di Torino, NIST
Richard Fox, NIST
Chris Oates, NIST

Wednesday, May 23, 2012 1:20 p.m. – 3:20 p.m.

Session: Temperature Compensation

Room: Baltimore B

Session Chair: Jeremy Everard, University of York

Sequenced Mode TCXO314

Marvin Frerking, Innovative Technology Products, Inc.

Temperature Compensation of Crystal Oscillators Using an Artificial Neural Network320

John Esterline, Greenway Industries

**Ultra High Frequency Temperature Compensated Oscillators Based on Ovenized
AIN Contour-Mode MEMS Resonators**327
Augusto Tazzoli, Carnegie Mellon University
Matteo Rinaldi, Northeastern University
Gianluca Piazza, Carnegie Mellon University

Temperature Compensation of a Tuning-Fork Quartz Crystal Oscillator via Post-Processing332
Peter Marchetto, Cornell University
Adam Strickhart, Cornell University
Raymond Mack, Cornell University
Harold Cheyne, Cornell University

A New Generation DSP-OCXO Using Crystal Temperature Sensor336
Yasuto Ishii, NIHON DEMPA KOGYO CO., LTD.
Kaoru Kobayashi, NIHON DEMPA KOGYO CO., LTD.
Tsukasa Kobata, NIHON DEMPA KOGYO CO., LTD.
Manabu Ito, NIHON DEMPA KOGYO CO., LTD.
Shigenori Watanabe, NIHON DEMPA KOGYO CO., LTD.
Shinichi Sato, NIHON DEMPA KOGYO CO., LTD.
Kazuo Akaike, NIHON DEMPA KOGYO CO., LTD.

Wednesday, May 23, 2012 **1:20 p.m. – 3:20 p.m.**

Session: MEMS for Frequency Control

Room: Maryland A

Session Chair: Gianluca Piazza, Carnegie Mellon University

Wafer-Level Chip Scale MEMS Oscillator for Wireless Applications340
Jan Kuypers, Sand 9
Guiti Zolfagharkhani, Sand 9
Alexei Gaidarzhy, Sand 9
Florian Thalmayr, Sand 9
Andrew Sparks, Sand 9
David Chen, Sand 9
Reimund Rebel, Sand 9
Bruce Newman, Sand 9
Mehrdad Asmani, Sand 9
Dean Baldillo, Sand 9
Juergen Schoepf, Sand 9

Performances of Suspended Silicon Nanowire Resonators for Time Reference Applications345
Alexandra Koumela, CEA, Leti
Denis Mercier, CEA, Leti
Carine Marcoux, CEA, Leti
Stephen Purcell, Université Lyon I - CNRS
Laurent Duraffourg, CEA, Leti

Impact of Mode Localization on the Motional Resistance of Coupled MEMS Resonators349
Andreja Erbes, University of Cambridge
Pradyumna Thiruvengatanathan, University of Cambridge
Ashwin A. Seshia, University of Cambridge

High Frequency AIN MEMS Resonators with Integrated Nano Hot Plate for Temperature Controlled Operation	355
<i>Matteo Rinaldi, Northeastern University</i>	
<i>Yu Hi, Northeastern University</i>	
<i>Chiara Zuniga, University of Pennsylvania</i>	
<i>Augusto Tazzoli, University of Pennsylvania</i>	
<i>Gianluca Piazza, Carnegie Mellon University</i>	

Zero Temperature Coefficient of Frequency in Extensional-Mode Highly Doped Silicon Micro-Resonators	360
<i>Mohsen Shahmohammadi, Oklahoma State University</i>	
<i>Brandon Harrington, Oklahoma State University</i>	
<i>Reza Abdolvand, Oklahoma State University</i>	
<i>*Student Paper Competition Paper</i>	

Wednesday, May 23, 2012 3:40 p.m. – 5:40 p.m.

Poster Session: Microwave Standards II
Room: Baltimore Foyer
Session Chair: John Kitching, NIST

The Pulsed Optically Pumped Rb Frequency Standards in National Time Service Center	364
<i>Zhijing Du, National Time Service Center</i>	
<i>Shougang Zhang, National Time Service Center</i>	
<i>Jie Liu, National Time Service Center</i>	
<i>Xiaofeng Li, National Time Service Center</i>	
<i>Dandan Liu, National Time Service Center</i>	
<i>Wenxiang Xue, National Time Service Center</i>	

Electrodeless-Discharge-Vapor-Lamp-Based Optical Atomic Filter	368
<i>Qinqing Sun, Peking University</i>	
<i>Yelong Hong, Peking University</i>	
<i>Xiaobo Xue, Peking University</i>	
<i>Zhiming Tao, Peking University</i>	
<i>Wei Zhuang, Peking University</i>	
<i>Zhiwen Liu, Pennsylvania State University</i>	
<i>Jingbiao Chen, Peking University</i>	

A High Accurate Rb Atomic Clock with the Compensated Techniques	372
<i>Yuanhong Cao, Spaceon Co, Ltd.</i>	
<i>Lin Yang, Spaceon Co, Ltd.</i>	
<i>Miao Liu, Spaceon Co, Ltd.</i>	
<i>Ning Wang, Spaceon Co, Ltd.</i>	
<i>Runchang Du, Spaceon Co, Ltd.</i>	
<i>Chunhua Li, Spaceon Co, Ltd.</i>	

Photodetection Noise Reduction of a 10 GHz Fiber-Laser-Based Photonic Microwave Generator	374
<i>Haifeng Jiang, NIST</i>	
<i>Jennifer Taylor, NIST</i>	
<i>Yang Fu, University of Virginia</i>	
<i>Zhi Li, University of Virginia</i>	
<i>Franklyn Quinlan, NIST</i>	
<i>Tara Fortier, NIST</i>	
<i>Joe Campbell, University of Virginia</i>	
<i>Scott Diddams, NIST</i>	

The Design of Mono Frequency Modulator for Passive Hydrogen Maser Control377
Wang Yong, Southeast University
Jianqing Li, Southeast University
Shi Qiu, Southeast University

**Testing for Periodic Changes in Fundamental Constants Due to Gravity and Boost
Using Long Term Comparison of the SYRTE Cs Fountains and H-Masers381**
Michael Tobar, The University of Western Australia
P. L. Stanwix, The University of Western Australia
M. Abgrall, LNE-SYRTE
S. Bize, LNE-SYRTE
A. Clairon, LNE-SYRTE
J. Guena, LNE-SYRTE
Ph. Laurent, LNE-SYRTE
P. Rosenbusch, LNE-SYRTE
D. Rovera, LNE-SYRTE
G. Santarelli, LNE-SYRTE
P. Wolf, LNE-SYRTE

Wednesday, May 23, 2012 3:40 p.m. – 5:40 p.m.

Poster Session: Optical Standards I
Room: Baltimore Foyer
Session Chair: John Kitching, NIST

Cesium Active Optical Clock in Four-Level Laser Configuration385
Yanfei Wang, Peking University
Xiaobo Xue, Peking University
Tonggang Zhang, Peking University
Dongying Wang, Peking University
Qinqing Sun, Peking University
Wei Zhuang, Peking University
Jingbiao Chen, Peking University
Yelong Hong, Peking University

Long-Term Measurement of Ultra-Low Expansion Fabry-Perot Cavity in Stabilized Temperature389
Radek Smid, Institute of Scientific Instruments of the ASCR, v.v.i.
Martin Cizek, Institute of Scientific Instruments of the ASCR, v.v.i.
Zdenek Buchta, Institute of Scientific Instruments of the ASCR, v.v.i.
Josef Lazar, Institute of Scientific Instruments of the ASCR, v.v.i.
Ondrej Cip, Institute of Scientific Instruments of the ASCR, v.v.i.

**Development of Terahertz, Mid- and Far-Infrared Frequency Standard Toward
Ultra-Broadband Optical Frequency Measurement System393**
Shigeo Nagano, National Institute of Information and Communications Technology
Motohiro Kumagai, National Institute of Information and Communications Technology
Hiroyuki Ito, National Institute of Information and Communications Technology
Masatoshi Kajita, National Institute of Information and Communications Technology
Yuko Hanado, National Institute of Information and Communications Technology

A High Stability Optical Frequency Standard Based on a Ca Atomic Beam399
Rich Fox, NIST
Jeff Sherman, NIST
William Douglas, University of Denver
Judith Olson, University of Colorado
Andrew Ludlow, NIST
Chris Oates, NIST

Wednesday, May 23, 2012 3:40 p.m. – 5:40 p.m.

Poster Session: Materials, Resonators, & Filters II

Room: Baltimore Foyer

Session Chair: Yoonkee Kim, US Army CERDEC

Tunable Filter Using Ultra Wide Band Elastic Resonator402

Michio Kadota, Murata Mfg. Co. Ltd.

Takashi Ogami, Murata Mfg. Co. Ltd.

Tetsuya Kimura, Murata Mfg. Co. Ltd.

**Deposition of Smooth and Highly (111) Textured Al Bottom Electrodes for
AIN-Based Electroacoustic Devices406**

Valeriy Felmetzger, OEM Group Inc.

Mikhail Mikhov, OEM Group Inc.

**Suppression of Spurious Modes via Dummy Electrodes and 2% Frequency Shift
via Cavity Size Selection for 1 GHz AIN MEMS Contour-Mode Resonators410**

Serkan Yazici, University of Pennsylvania

Marco Giovannini, University of Pennsylvania

Nai-Kuei Kuo, University of Pennsylvania

Ginaluca Piazza, University of Pennsylvania and Carnegie Mellon University

**Optical Actuation and Detection of MEMS Resonator: Behavioral Modeling and
Phase Noise Simulations415**

Guillaume Papin, ONERA

Raphaël Levy, ONERA

Alain Bosseboeuf, IEF

Filippo Fabbri, IEF

Fabien Parrain, IEF

M. Malak, ESIEE

Tarik Bourouina, ESIEE

Gaëlle Lissorgues, ESIEE

Patrick Poulichet, ESIEE

Quartz Crystal Resonator Noise and Fluctuation-Dissipation Theorem Considerations420

Santunu Ghosh, FEMTO-ST, Besançon

Michel Devel, FEMTO-ST, Besançon

Roger Bourquin, FEMTO-ST, Besançon

Joel Imbaud, FEMTO-ST, Besançon

Gilles Cibiel, CNES, Toulouse

Fabrice Sthal, FEMTO-ST, Besançon

**Input-Output Insulation in Thermal-Piezoresistive Resonant Microstructures
Using Embedded Oxide Beams425**

Arash Hajjam, University of Denver

Amir Rahafrooz, University of Denver

Siavash Pourkamali, University of Denver

High-Frequency Thin-Film Piezoelectric Transformers429

Hediyeh Fatemi, Oklahoma State University

Reza Abdolvand, Oklahoma State University

Monolithic implementation of AlN-on-silicon bandpass filters with a high-Q notch within the passband	433
<i>Vikram Thakar, University of Michigan</i>	
<i>Wanling Pan, Integrated Device Technology Inc</i>	
<i>Farrokh Ayazi, Georgia Institute of Technology</i>	
<i>Mina Rais-Zadeh, University of Michigan</i>	

Thermally-Actuated and Piezoresistively-Sensed CMOS-MEMS Resonator Array Using Differential-Mode Operation	438
<i>Cheng-Chi Chen, National Tsing Hua University</i>	
<i>Ming-Huang Li, National Tsing Hua University</i>	
<i>Wen-Chien Chen, National Tsing Hua University</i>	
<i>Huan-Tse Yu, National Tsing Hua University</i>	
<i>Sheng-Shian Li, National Tsing Hua University</i>	

Bulk Acoustic Wave Propagation Characteristics in Degenerately N-Doped Silicon	442
<i>Tuomas Pensala, VTT</i>	
<i>Mika Prunnila, VTT</i>	
<i>Antti Jaakkola, VTT</i>	

Wednesday, May 23, 2012 3:40 p.m. – 5:40 p.m.

Poster Session: Sensors & Transducers II
Room: Baltimore Foyer
Session Chair: Ashwin Seshia, University of Cambridge

Theoretical & Experimental Analysis of High Q SAW Resonator Transient Response in a Wireless Sensor Interrogation Application	446
<i>Pratyush Varshney, IIT DELHI</i>	
<i>Sylvain Ballandras, FEMTO -ST</i>	
<i>Brishbhan Panwar, IIT DELHI</i>	
<i>P. Rathore, IIT DELHI</i>	
<i>Jean-Michel Friedt, SENSEOR</i>	
<i>Thibault Retornaz, SENSEOR</i>	
<i>Bruno Francois, FEMTO-ST</i>	
<i>Gilles Martin, FEMTO ST</i>	

A thickness-shear MEMS resonator employing electromechanical transduction through a coplanar waveguide.....	452
<i>Ward Johnson, National Institute of Standards and Technology</i>	
<i>Jong-Yoon Ha, National Institute of Standards and Technology</i>	
<i>Albert Davydov, National Institute of Standards and Technology</i>	
<i>Thomas Wallis, National Institute of Standards and Technology</i>	
<i>Pavel Kabos, National Institute of Standards and Technology</i>	
<i>Eduard Rocas, National Institute of Standards and Technology</i>	
<i>L. A. Liew, National Institute of Standards and Technology</i>	
<i>Carlos Collado, National Institute of Standards and Technology</i>	
<i>A. Plankis, Colorado State University</i>	
<i>Paul Heyliger, Colorado State University</i>	

Enhancement of SAW Multi-Sensor Systems Using a Combination of Time and Frequency Diversity Techniques	458
<i>Dana Tucker, Applied Sensor Research & Development</i>	
<i>Lee Solie, Applied Sensor Research & Development</i>	
<i>Jacqueline Hines, Applied Sensor Research & Development</i>	

Energy Leakage and Attenuation Analysis of APM with Liquid Loading462

*Zhijun Chen, Nanjing University of Aeronautics and Astronautics
Peng Ruan, Nanjing University of Aeronautics and Astronautics
Xin Huang, Nanjing University of Aeronautics and Astronautics
Dafeng Fu, Nanjing University of Aeronautics and Astronautics
Mengyang Wang, Nanjing University of Aeronautics and Astronautics*

Wednesday, May 23, 2012 3:40 p.m. – 5:40 p.m.

Poster Session: Timekeeping, Time & Frequency Transfer, GNSS Applications II

Room: Baltimore Foyer

Session Chair: Demetrios Matsakis, USNO

A New Method for Satellite Motion Correction in TWSTFT468

*Wenjun Wu, National Time Service Center (NTSC)
Zhigang Li, National Time Service Center (NTSC)
Xuhai Yang, National Time Service Center (NTSC)
Ren Xiaoqian, National Time Service Center, Chinese Academy of Sciences
Liang Chen, National Time Service Center (NTSC)
Hui Lei, National Time Service Center (NTSC)
Chugang Feng, Shanghai Astronomical Observatory*

Study on the Method of Measuring and Estimating the Time & Frequency System of Satellite Navigation Systems472

*Xiaoqian Ren, National Time Service Center, Chinese Academy of Sciences
Haitao Wu, National Time Service Center, Chinese Academy of Sciences
Yu Hua, National Time Service Center, Chinese Academy of Sciences
Weijin Qin, National Time Service Center, Chinese Academy of Sciences
Haibo Yuan, National Time Service Center, Chinese Academy of Sciences*

Research on Position Differential Method of Dual-Satellites TDOA and FDOA in Passive Location System476

*Yanrong Xue, National Time Service Center, the Chinese Academy of Sciences
Xiaohui Li, National Time Service Center, the Chinese Academy of Sciences
Longxia Xu, National Time Service Center, the Chinese Academy of Sciences
Ye Ren, National Time Service Center, the Chinese Academy of Sciences*

The Effect of Satellite Movement on Two-Way Time Synchronization Performance481

*Li Wei, National Time Service Center
Xu Yongliang, National Time Service Center
Yuan Haibo, National Time Service Center*

High-Precision Frequency Measurement and Link Based on Phase Group Synchronization484

*Wei Zhou, Xidian University
Baoqiang Du, Zhengzhou University of Light Industry
Zhiqi Li, Xidian University
Shaofeng Dong, Xidian University
Qiaoyan Fan, Xidian University
Yue Shen, Xidian University*

Some Concepts of the Real-Time MTIE Assessment for Multi-Channel Time Error Measurement.....488

*Andrzej Dobrogowski, Poznan University of Technology
Michal Kaszania, Poznan University of Technology*

A Study of Ionospheric Delay Corrections for Next-Generation Two-Way Satellite Time and Frequency Transfer	494
<i>Fang-Dar Chu, Chunghwa Telecom Co., Ltd.</i>	
<i>Wen-Hung Tseng, Chunghwa Telecom Co., Ltd.</i>	
<i>Yi-Jiun Huang, Chunghwa Telecom Co., Ltd.</i>	
<i>Huang-Tien Lin, Chunghwa Telecom Co., Ltd.</i>	
<i>Chia-Shu Liao, Chunghwa Telecom Co., Ltd.</i>	
<i>Wei-Chih Hsu, National Kaohsiung First University of Science and Technology</i>	
<i>Pei-Yih Ting, National Taiwan Ocean University</i>	
Wednesday, May 23, 2012	3:40 p.m. – 5:40 p.m.
Poster Session: Oscillators, Synthesizers, Noise, & Circuit Techniques II	
Room: Baltimore Foyer	
Session Chair: Rabi Wang, JPL	
New Ultra Compact High Q Printed Resonators for Integrated Circuit Oscillators and Compact Filters	499
<i>Min Xu, University of York</i>	
<i>Jeremy Everard, University of York</i>	
Nonlinear Behavior of an UHF Quartz Resonator in an Oscillating System	503
<i>Harris Moyer, HRL Laboratories, LLC</i>	
<i>Robert Nagele, HRL Laboratories, LLC</i>	
<i>Randall Kubena, HRL Laboratories, LLC</i>	
<i>Richard Joyce, HRL Laboratories, LLC</i>	
<i>Deborah Kirby, HRL Laboratories, LLC</i>	
<i>Y. K. Yong, Rutgers University</i>	
<i>Peter Brewer, HRL Laboratories, LLC</i>	
<i>David Chang, HRL Laboratories, LLC</i>	
A Model-Based Analysis of Phase Jitter in RF Oscillators	508
<i>Mohammad Reza Khanzadi, Chalmers University of Technology</i>	
<i>Ashkan Panahi, Chalmers University of Technology</i>	
<i>Dan Kuylenstierna, Chalmers University of Technology</i>	
<i>Thomas Eriksson, Chalmers University of Technology</i>	
Testing Phase Noise of Ultra Low Phase Noise OCXO – Challenges and Solutions	512
<i>Roman Boroditsky, NEL FC</i>	
<i>Jorge Gomez, NEL FC</i>	
Techniques Minimize the Phase Noise in Crystal Oscillators	517
<i>Ajay Poddar, Synergy Microwave Corp. & Technical University of Munich</i>	
<i>Ulrich Rohde, Synergy Microwave Corp. & Technical University of Munich</i>	
Common-Arm Counter Propagating Phase Bridge for Vibration Sensitivity Measurement.....	524
<i>D. Lirette, NIST</i>	
<i>Corey Barnes, NIST</i>	
<i>Jason Desalvo, NIST</i>	
<i>Craig Nelson, NIST</i>	
<i>Dave Howe, NIST</i>	
<i>Archita Hati, NIST</i>	

In Situ Measurements of USO Performance in Space Using the Twin Grail Spacecraft.....528

Daphna Enzer, JPL
Rabi Wang, JPL
Kamal Oudrhiri, JPL
William Klipstein, JPL

Jitter Characterization of Fully-Micromechanical Thermal-Piezoresistive Oscillators533

Amir Rahafrouz, University of Denver
Siavash Pourkamali, University of Denver

Thursday, May 24, 2012 8:00 a.m. – 10:00 a.m.

Session: RF-Thru Optical
Room: Baltimore A
Session Chair: Dave Howe, NIST

Optoelectronic Oscillator Based on Fiber Ring Resonator: Overall System Optimization and Phase Noise Reduction537

Khaldoun Saleh, CNES / LAAS-CNRS
Pierre-Henri Merrer, LAAS-CNRS
Olivier Llopis, LAAS-CNRS
Gilles Cibié, CNES

Stimulated Rayleigh Scattering and Amplitude-to-Phase Conversion As a Source of Length-Dependent Phase Noise in OEOs543

Andrew Docherty, University of Maryland Baltimore County
Olukayode Okusaga, U.S. Army Research Laboratory
Curtis Menyuk, University of Maryland Baltimore County
Weimin Zhou, U.S. Army Research Laboratory

Influence of Fiber Delay Fluctuation on a Reference Injection-Locked Optoelectronic Oscillator.....548

Wen-Hung Tseng, Telecommunication Laboratories
Kai-Ming Feng, National Tsing Hua University

Compact, Widely Tunable, Half-Lambda YIG Oscillator552

Xufeng Zhang, Yale University
Xu Han, Yale University
Michael Balinskiy, Yale University
Hong X. Tang, Yale University
**Student Paper Competition Paper*

Tunable Photonic Microwave Oscillator Self-Locked by Polarization-Rotated Optical Feedback555

Thomas Simpson, L-3com
Jia Ming Liu, UCLA
Mohammad AIMulla, UCLA
Nicholas Usechak, AFRL
Vassilios Kovanis, AFRL

Fiber-Induced Degradation in RF-Over-Fiber Links.....560

Olukayode Okusaga, ARL
James Cahill, UMBC
Weimin Zhou, ARL
Andrew Docherty, UMBC
Curtis Menyuk, UMBC

Thursday, May 24, 2012

8:00 a.m. – 10:00 a.m.

Session: High-Q MEMS Resonators

Room: Baltimore B

Session Chair: Rick Puccio, Quartzdyne, Inc.

2.97-GHz CVD Diamond Ring Resonator with Q >40,000565

Thura Lin Naing, University of California at Berkeley
Turker Beyazoglu, University of California at Berkeley
Lingqi Wu, University of California at Berkeley
Mehmet Akgul, University of California at Berkeley
Zeying Ren, University of California at Berkeley
Tristan Rocheleau, University of California at Berkeley
Clark Nguyen, University of California at Berkeley

Observation of kT/F Frequency Noise in Ultrahigh Q Silicon Nitride Nanomechanical Resonators.....571

King Yan Fong, Yale University
Wolfram Pernice, Karlsruhe Institute of Technology
Hong Tang, Yale University
**Student Paper Competition Paper*

VHF CMOS-MEMS Oxide Resonators with Q > 10,000576

Wen-Chien Chen, National Tsing Hua University
Weileun Fang, National Tsing Hua University
Sheng-Shian Li, National Tsing Hua University

CMOS-MEMS Post Processing Compatible Square Plate Capacitively Transduced SiGe Resonator580

Syed Naveed Riaz Kazmi, University of Twente
Tom Aarnink, University of Twente
Cora Salm, University of Twente
Jurriaan Schmitz, University of Twente
**Student Paper Competition Paper*

Electrostatic Frequency Tuning and Q-Improvement of in-Plane Dual-Plate MEMS Resonators.....584

Arash Hajjam, University of Denver
Amir Rahafrooz, University of Denver
Siavash Pourkamali, University of Denver

Differential Measurement of Piezoresistive Transduction for Silicon-Based MEMS Resonators.....588

Cheng-Syun Li, Institute of NanoEngineering and MicroSystems
Ming-Huang Li, Institute of NanoEngineering and MicroSystems
Sheng-Shian Li, National Tsing Hua University

Thursday, May 24, 2012

8:00 a.m. – 10:00 a.m.

Session: Novel Resonant Sensors

Room: Maryland A

Session Chairs: Svenja Knappe, NIST & Philip X.L. Feng, Case Western Reserve University

Nuclear Magnetic Resonance Gyroscope.....592

Michael Larsen, Northrop Grumman
Michael Bulatowicz, Northrop Grumman

Vibrational Analysis of Stabilized Lasers for Cold Atom Clocks and Sensors	597
<i>Jeremy Hughes, National Institute of Standards and Technology</i>	
<i>Archita Hati, National Institute of Standards and Technology</i>	
<i>Craig Nelson, National Institute of Standards and Technology</i>	
<i>David Howe, National Institute of Standards and Technology</i>	
GHz Aluminum Nitride optomechanical Wheel Resonators	601
<i>Chi Xiong, Yale University</i>	
<i>Xiankai Sun, Yale University</i>	
<i>King Yan Fong, Yale University</i>	
<i>Hong Tang, Yale University</i>	
<i>*Student Paper Competition Paper</i>	
Optofluidic Coupled Micro-Ring Resonators for Biosensing	605
<i>Zhenyu Li, George Washington University</i>	
Thermogravimetric Analysis with a Heated Crystal Microbalance	609
<i>Ward Johnson, National Institute of Standards and Technology</i>	
<i>Elisabeth Mansfield, National Institute of Standards and Technology</i>	
Thursday, May 24, 2012	10:20 a.m. – 12:20 p.m.
Session: Signal Generation	
Room: Baltimore A	
Session Chair: Mike Driscoll, Northrop Grumman	
Low Phase Noise Signal Generation, Models and Theory, Oscillators and Their Key Elements, Fractional Regenerative Frequency Division, Teaching	614
<i>Jeremy Everard, University of York</i>	
Ultra-Low Noise Regenerative Frequency Divider	620
<i>Archita Hati, NIST</i>	
<i>Craig Nelson, NIST</i>	
<i>Corey Barnes, NIST</i>	
<i>Danielle Lirette, NIST</i>	
<i>Jason Desalvo, NIST</i>	
<i>Tara Fortier, NIST</i>	
<i>Franklyn Quinlan, NIST</i>	
<i>A. Ludlow, NIST</i>	
<i>T. Rosenband, NIST</i>	
<i>Scott Diddams, NIST</i>	
<i>David Howe, NIST</i>	
Slow-Wave Evanescent-Mode Coupled Resonator Oscillator	624
<i>Ajay Poddar, Synergy Microwave Corp. & Technical University of Munich</i>	
<i>Ulrich Rohde, Synergy Microwave Corp. & Technical University of Munich</i>	
State-of-the-art cryocooled sapphire oscillators	631
<i>John Hartnett, University of Western Australia</i>	
<i>Nitin Nand, University of Western Australia</i>	
<i>Chuan Lu, University of Science and Technology of China</i>	

A 100 MHz MEMS SiBAR Phase Modulator for Quadrature Phase Shift Keying 659

Logan Sorenson, Georgia Institute of Technology
Farrokh Ayazi, Georgia Institute of Technology

Thursday, May 24, 2012 **10:20 a.m. – 12:20 p.m.**

Session: Fibers

Room: Maryland A

Session Chair: Sven-Christian Ebenhag, SP Technical Research Institute of Sweden

One-Way Two-Color Fiber Link for Frequency Transfer 663

James Hanssen, US Naval Observatory
Scott Crane, US Naval Observatory
Christopher Ekstrom, US Naval Observatory

Real-Time Phase Stabilization Utilizing Two Color One-Way Frequency Transfers 667

Sven-Christian Ebenhag, SP Technical Research Institute of Sweden
Per Olof Hedekvist, SP Technical Research Institute of Sweden

Fiber-Based Time and Frequency Dissemination Between THU and Nim 673

Bo Wang, Joint Institute for Measurement Science, Tsinghua University
Chao Gao, Joint Institute for Measurement Science, Tsinghua University
Weiliang Chen, National Institute of Metrology
Jing Miao, Joint Institute for Measurement Science, Tsinghua University
Yu Bai, Joint Institute for Measurement Science, Tsinghua University
Tianchu Li, National Institute of Metrology
Lijun Wang, Joint Institute for Measurement Science, Tsinghua University

Suppression of Stimulated Brillouin Scattering in High Power, Low Phase Noise Fiber Optic Links 677

James Cahill, University of Maryland
Olukayode Okusaga, U.S. Army Research Laboratory
Jeffrey White, U.S. Army Research Laboratory
**Student Paper Competition Paper*

Thursday, May 24, 2012 **1:40 p.m. – 3:40 p.m.**

Session: Compact Atomic Clocks

Room: Baltimore A

Session Chair: John Kitching, NIST

Double Resonance in Alkali Vapor Cells for High Performance and Miniature Atomic Clocks 681

Gaetano Miletì, Université de Neuchâtel
Christoph Affolderbach, Université de Neuchâtel
Thejesh Bandi, Université de Neuchâtel
Florian Gruet, Université de Neuchâtel
Renaud Matthey, Université de Neuchâtel
Danijela Miletic, Université de Neuchâtel
Matthieu Pellaton, Université de Neuchâtel
Camillo Stefanucci, École Polytechnique Fédérale de Lausanne
Maddalena Violetti, École Polytechnique Fédérale de Lausanne
Francesco Merli, École Polytechnique Fédérale de Lausanne
Jean-François Zürcher, École Polytechnique Fédérale de Lausanne
Anja K. Skrivervik, École Polytechnique Fédérale de Lausanne

**Measurement of Temperature Sensitivity of LGT Elastic Coefficients
Over [4K, 15K] Cryogenic Range 727**

Maxim Goryachev, University of Western Australia

Serge Galliou, FEMTO-ST

Roger Bourquin, FEMTO-ST

Bernard Dulmet, FEMTO-ST

Philippe Abbé, FEMTO-ST

Thursday, May 24, 2012

1:40 p.m. – 3:40 p.m.

Session: Micro- Electro- Mechanical Sensors & Systems

Room: Maryland A

Session Chair: Ashwin Seshia, University of Cambridge

Innovative Control Systems for MEMS Inertial Sensors 732

M. Kraft, University of Southampton

R. Wilcock, University of Southampton

B. Almutairi, University of Southampton

**A New Electrostatically-Excited Silicon Structure for CMUT and Te-Mode
Resonators and Sensing Applications 738**

Mihaela Ivan, FEMTO-ST

Bernard Dulmet, FEMTO-ST

Gilles Martin, FEMTO-ST

Philippe Abbe, FEMTO-ST

Laurent Robert, FEMTO-ST

Sylvain Ballandras, FEMTO-ST

Micro-Electro-Mechanical Resonant Tilt Sensor 744

Xudong Zou, University of Cambridge

Pradyumna Thiruvengatanathan, University of Cambridge

Ashwin Seshia, University of Cambridge

**Student Paper Competition Paper*

**A Pierce Oscillator for MEMS Resonant Accelerometers with a Novel Low-Power
Amplitude Limiting Technique 748**

Alessandro Tocchio, Dipartimento di Elettronica e Informazione, Politecnico di Milano

Alessandro Caspani, Dipartimento di Elettronica e Informazione, Politecnico di Milano

Giacomo Langfelder, Dipartimento di Elettronica e Informazione, Politecnico di Milano

A. Longoni, Dipartimento di Elettronica e Informazione, Politecnico di Milano

Ernesto Lasalandra, ST Microelectronics

Microleverage DETF Aluminum Nitride Resonating Accelerometer 754

Gabriele Vigevani, UC Berkeley Department of Mechanical Engineering

Fabian Goericke, UC Berkeley Department of Mechanical Engineering

Igor Izyumin, UC Berkeley Department of Electrical Engineering

Bernhard Boser, UC Berkeley Department of Electrical Engineering

Albert Pisano, UC Berkeley Department of Mechanical Engineering

Thursday, May 24, 2012

4:00 p.m. – 5:40 p.m.

Session: Microwave Photonics

Room: Baltimore A

Session Chair: Tanja Mehlstaubler, PTB

A hybrid 10 GHz photonic-microwave oscillator with sub-femtosecond absolute timing jitter.....758

Tara Fortier, NIST, Boulder
Craig Nelson, NIST, Boulder
Archita Hati, NIST, Boulder
Franklyn Quinlan, NIST, Boulder
Jennifer Taylor, NIST, Boulder
Haifeng Jiang, NIST, Boulder
Chin-Wen Chou, NIST, Boulder
Nathan Lemke, NIST, Boulder
Andrew Ludlow, NIST, Boulder
David Howe, NIST, Boulder
Chris Oates, NIST, Boulder
Scott Diddams, NIST, Boulder

Mechanical Control of a microresonator Optical Frequency Comb.....760

Scott B. Papp, NIST
Pascal Del'Haye, NIST
Scott Diddams, NIST

Super-Homogeneous Microwave-Photonic Gain and its Impact on Optoelectronic Oscillators763

William Loh, MIT Lincoln Laboratory
Sivasubramaniam Yegnanarayanan, MIT Lincoln Laboratory
Rajeev Ram, MIT Lincoln Laboratory
Paul Juodawlkis, MIT Lincoln Laboratory

Long-Term Stable Sub-Femtosecond Synchronization of Microwave Signals with Mode-Locked Er-Fiber Lasers768

Kwangyun Jung, KAIST
Jungwon Kim, KAIST

Thursday, May 24, 2012

4:00 p.m. – 5:40 p.m.

Session: Digital Methods

Room: Baltimore B

Session Chair: Enrico Rubiola, CNRS FEMTO-ST Institute

Phase Noise and amplitude noise in DDS772

Enrico Rubiola, CNRS FEMTO-ST Institute
Yannick Gruson, CNRS FEMTO-ST Institute
Claudio Calosso, INRIM

Optimal Dithering Sequences for Spurs Suppression in Pulse Direct Digital Synthesizers.....778

Kostas Galanopoulos, National Technical University
Paul Sotiriadis, National Technical University
**Student Paper Competition Paper*

Modulation Techniques for All-Digital Transmitters Based on Pulse Direct Digital Synthesizers782

Kostas Galanopoulos, National Technical University
Paul Sotiriadis, National Technical University
