

**2012 19th Biennial  
University/Government/Industry,  
Micro/Nano Symposium  
(UGIM 2012)**

**Berkeley, California, USA  
9 – 10 July 2012**

IEEE Catalog Number: CFP12UGI-PRT  
ISBN: 978-1-4577-1751-2

## Table of Contents

<b>CLEAN: From Limbo to LIMS .....</b>	<b>1</b>
<i>Vincenzo Di Bernardo and Eric Martin</i>	
<b>Modified Adaptive Control of a 10,000 Square Foot Cleanroom Using Particle Counters to Maintain Design Specifications and Reduce Energy Consumption .....</b>	<b>4</b>
<i>Thomas A. Tribble, Craig Rochester and Michael Beauvais</i>	
<b>A Lean and Sustainable User Access System for a University Microfabrication Laboratory.....</b>	<b>6</b>
<i>Austin Roth and John Lee</i>	
<b>Implementing a Software Based User Access System in a Core Analytical Lab: Benefits and Challenges.....</b>	<b>7</b>
<i>Brian Van Devener</i>	
<b>Badger Lab Management Software.....</b>	<b>8</b>
<i>William Murray and Michael Bell</i>	
<b>Mercury Lab Management Software .....</b>	<b>9</b>
<i>Todd Merport and Olek Proskurowski</i>	
<b>Nanofabrication Lab Security Project.....</b>	<b>11</b>
<i>Helen Anderson, David Bunzow, Abbie Gregg, John Hughes, Justin Kita and Richard Morrison</i>	
<b>Fab Security.....</b>	<b>12</b>
<i>Pramod C. Karulkar</i>	
<b>Micro and Nano R&amp;D Fab Safety, Inert Gas Reduction: A Lean Six-Sigma Approach.....</b>	<b>13</b>
<i>R. J. Olson Jr., R. Frank, J. Benyeda, J. Labrie and P. A. McConnelee</i>	
<b>The Development of a Formal Emergency Response Team for a Populous University Clean Room in a Dense Urban Setting.....</b>	<b>14</b>
<i>John Sweeney</i>	
<b>Safety Considerations in Building Ultra-High Vacuum Plasma Enhanced Chemical Vapor Deposition System for Low Temperature Group IV Epitaxy.....</b>	<b>15</b>
<i>Hameed Naseem, Shui-Qing Yu, Samir El-Ghazaly, Zafar Waqar, Ben Conley, Aboozar Mosleh, Bryant Hankton, Asanka Munasinghe, Husam Abu-Safe and Shannen Adcock</i>	
<b>Facilities Planning for Safety &amp; Emergency Response: Bridging the Gap between Design Features and Safety Planning .....</b>	<b>16</b>
<i>Jack Paul</i>	
<b>An Overview of Daily Operations at the VINSE Core Laboratories .....</b>	<b>17</b>
<i>Anthony B. Hmelo</i>	
<b>Web-Based Content Management System for Equipment Information.....</b>	<b>18</b>
<i>Ryan Taylor</i>	
<b>Process Definition Spreadsheet for Run Card Creation .....</b>	<b>19</b>
<i>Brian Baker</i>	

<b>A Practical Comparison of Mask Making Pattern Generation Systems .....</b>	<b>20</b>
<i>Kevin Hensley</i>	
<b>A Phosphine Sub Atmospheric Delivery System (SADS) Applied to Low Pressure Chemical Vapor Deposition (LPCVD) of In-Situ Doped Polysilicon.....</b>	<b>21</b>
<i>Jerry Bowser, William Young, Lei Chen and Vincent Luciani</i>	
<b>Key Considerations for Selection of Diffusion Furnaces.....</b>	<b>22</b>
<i>Tony Olsen</i>	
<b>FY11 Financial and Operational Survey of Major University Nanofabrication Facilities .....</b>	<b>23</b>
<i>Dennis Grimard and Lisa Jones</i>	
<b>Efforts to Increase Utilization &amp; Reduce the Subsidy for a Mid-Size Cleanroom Facility .....</b>	<b>24</b>
<i>Julia Aebersold, Kevin Walsh and Shamus McNamara</i>	
<b>How Do You Pay for It? Financing Situation at McGill Nanotools Microfab .....</b>	<b>26</b>
<i>Matthieu Nannini</i>	
<b>Opening the Doors: Converting a University Laboratory into an Open-Access Facility.....</b>	<b>27</b>
<i>Linda D. Macks</i>	
<b>Re-Evaluation of Proposed Microfabrication Process Cost Calculator.....</b>	<b>28</b>
<i>J. Provine and Gary Yama</i>	
<b>Evaluating Laboratory Staff Performance .....</b>	<b>30</b>
<i>John R. Weaver</i>	
<b>Financial Analysis of a Successful Multi-User Academic Laboratory.....</b>	<b>34</b>
<i>Katalin Voros</i>	
<b>Berkeley Micro/NanoLab Affiliate Members Program: A Critical Component of Laboratory Growth and Stability.....</b>	<b>35</b>
<i>A. William Flounders and Katalin Voros</i>	
<b>On the Co-Evolution of Microelectronic Engineering Laboratories and Education at RIT .....</b>	<b>36</b>
<i>Robert Pearson</i>	
<b>Coordinating Lab Resources for a Project-Based MEMS Course .....</b>	<b>38</b>
<i>Ivan Puchades and Lynn Fuller</i>	
<b>Hands-On Training in the Design and Fabrication of N-Type Solar Cells.....</b>	<b>40</b>
<i>S. Shumate, M. Young, B. Newton, E. Porter, S.-Q. Yu and H. Naseem</i>	
<b>A Happy Workplace - Are We There Yet?.....</b>	<b>41</b>
<i>Dwayne Kirk</i>	
<b>UGIM and the Institute of Environmental Sciences and Technology: Possible Synergies.....</b>	<b>43</b>
<i>John R. Weaver</i>	

<b>History of the University Government Industry Microelectronics Symposium.....</b>	<b>46</b>
<i>Lynn Fuller and Robert Pearson</i>	
<b>Re-Engineering the User-Hazard "Coalface" at the Melbourne Centre for Nanofabrication.....</b>	<b>48</b>
<i>Paul G. Spizzirri</i>	
<b>Micro and Nano Characterization Facility: Operations Methodology and Technical Management .....</b>	<b>50</b>
<i>Vijay Mishra, Srinivasan Raghavan, Navakanta Bhat and Rudra Pratap</i>	
<b>Cross-Contamination Control at MIT's Microsystems Technology Labs .....</b>	<b>51</b>
<i>Vicky Diadiuk</i>	
<b>Preparing an Aging Facility to Meet Expanding Lab Demands: Renovation of the Stanford Nanofabrication Facility.....</b>	<b>52</b>
<i>John D. Shott, John W. Bumgarner and Mary X. Tang</i>	
<b>The RIT Semiconductor &amp; Microsystems Fabrication Laboratory: Challenges in Supporting a Growing Research Agenda.....</b>	<b>54</b>
<i>Karl D. Hirschman and Scott P. Blondell</i>	
<b>The UofL MNTC and the KY NanoNET - Two Initiatives to Promote Nano-Science in the State of Kentucky .....</b>	<b>55</b>
<i>Kevin Walsh, Shamus Mcnamara, Julia Aebersold, Don Yeager, Curt Mckenna, Michael Martin, Wendy Metcalf, Ana Sanchez, Tommy Roussel, Clinton Vissers and Brad Westhoff</i>	
<b>Fab Pitfalls with "Green Energy" at University and Government Campuses.....</b>	<b>58</b>
<i>Alex McEachern</i>	
<b>Towards a Supermassive Research Center: Scaling Rules for Laboratory Operations .....</b>	<b>59</b>
<i>Eric Martin</i>	
<b>The Design and Building of the Draper Laboratory Microfabrication Center .....</b>	<b>61</b>
<i>Richard H. Morrison, David J. D. Carter and Livia M. Racz</i>	
<b>Sabanci University Nanotechnology Research and Application Center: An Experience in Building a Multi-Disciplinary Research Facility Overseas .....</b>	<b>62</b>
<i>Burak Birkan, Emre Heves, Bulent Köroglu, Ceyhun Findik, Hikmet Sarisu, Erol Düzungen and Volkan Özgür</i>	
<b>National Nanofabrication Centre at IISc Bangalore: A Chronicle of Design, Construction and Management of Cleanroom in Indian Context .....</b>	<b>64</b>
<i>T. U. M. S. Murthy, M. N. Vijayaraghavan, P. Savitha, Gopal Hegde, Srinivasan Raghavan, P. S. Anil Kumar, Rudra Pratap and Navakanta Bhat</i>	
<b>A National Facility- Challenges and Progress .....</b>	<b>65</b>
<i>Derek Hirons</i>	
<b>In Search of the Perfect "Core" Nano Facility: Trends in Research Cleanroom and Imaging Lab Design .....</b>	<b>66</b>
<i>Abbie Gregg</i>	
<b>Author Index .....</b>	<b>follows page 66</b>
