

2012 8th EURO-NGI Conference on Next Generation Internet

(NGI 2012)

**Karlskrona, Sweden
25 – 27 June 2012**

IEEE Catalog Number: CFP12596-PRT
ISBN: 978-1-4673-1632-3

Contents

Combined Contention and TDMA-Based Communication in Wireless Sensor Networks	1
Outage Probability, Average Transmission Time, and Quality of Experience for Cognitive Radio Networks over General Fading Channels.....	9
Cognitive Radio Networks with Elastic Traffic	17
Optimal intercell coordination for multiple user classes with elastic traffic.....	25
Flow-level modeling and analysis of dynamic TDD in LTE	33
Cognitive Radio Spectrum Decision Based on Channel Usage Prediction	41
Beacon-Enabled Cognitive Access for Dynamic Spectrum Access	49
Pricing and Regulating Quality of Experience.....	57
Content Dependency of the Traffic Control in the Darwin Streaming Server.....	65
A Wireless Sensor and Actuator Network for Improving the Electrical Power Grid Dependability.....	71
Real-time Multimedia Monitoring in Large-Scale Wireless Multimedia Sensor Networks: Research Challenges.....	79
Fast but economical: A simulative comparison of structured peer-to-peer systems.....	87
Simulated Annealing Algorithm for Virtual Network Reconfiguration	95
Reliable Multicast on a WDM Optical Packet Ring	103
Impact on retail prices of non-neutral wholesale prices for content providers	111
A game theory-based analysis of search engine non-neutral behavior	119
A rating-based network selection game in heterogeneous systems	125
An HTTP Web Traffic Model Based on the Top One Million Visited Web Pages.....	133
User Impatience and Network Performance	141
Doubtless in Seattle: Exploring the Internet Delay Space	149
