

2012 Second International Workshop on Earth Observation and Remote Sensing Applications

(EORSA 2012)

**Shanghai, China
8 – 11 June 2012**

**IEEE Catalog Number: CFP1239E-PRT
ISBN: 978-1-4673-1947-8**

Table of Contents

Discrete scatter model for microwave radiometer response to rice field <i>Wang Fang</i>	1
Characterizing and comparing urban expansion process in central and southern China: intensity and impacts on environment <i>Lijun Zuo, Zengxiang Zhang, Fang Liu, Jinyong Xu and Qingke Wen</i>	5
Advanced earth observation methodologies for the study of the thermal environment of cities <i>Iphigenia Keramitsoglou</i>	11
Classification of CBERS-02B high resolution image using morphological features for urban areas <i>Linlin Lu, Qingting Li, Linhai Jing, Martino Pesaresi and Huadong Guo</i>	16
Monitoring of global urbanization - time series analyses for mega cities based on optical and SAR data <i>Thomas Esch, Hannes Taubenböck, Andreas Felbier, Michael Wiesner, Wieke Heldens and Stefan Dech</i>	21
Compare different levels of fusion between optical and SAR data for impervious surfaces estimation <i>Zhang Hongsheng, Zhang Yuanzhi and Lin Hui</i>	26
Evaluation of Harmonic ANalysis of Time Series (HANTS): impact of gaps on time series reconstruction <i>Jie Zhou, Li Jia, Guangcheng Hu and Massimo Menenti</i>	31
Analysis on spatial distribution of urban heat island with downscaled FY-3a VIRR land surface temperature <i>Guangzhen Cao, Peng Hou, Zhaojun Zheng and Jinlong Fan</i>	36
The retrieval of land surface albedo in rugged terrain <i>Bo Gao, Li Jia and Massimo Menenti</i>	41
Oil slope index: an algorithm for crude oil spill detection with imaging spectroscopy <i>Qingting Li, Linlin Lu, Bing Zhang and Qingxi Tong</i>	46
Testing temporal mixture analysis for quantifying land cover on sub--pixel level <i>Fan Yang, Bunkei Matsushita and Takehiko Fukushima</i>	50
Length surveying of the Ming Great Wall based on image interpretation and stereo mapping <i>Zhao Yousong, Gong Huili and Wu Hao</i>	55

Drought induced decrease of net primary productivity in China's terrestrial ecosystems caused by severe droughts in 2009 <i>Yibo Liu, Weimin Ju, Gaolong Zhu and Yanlian Zhou</i>	59
Research on land use/land cover change and soil organic carbon pool in the coal mining area of Xuzhou <i>Kun Tan, Peijun Du and Junpeng Zhang</i>	
Estimating net primary productivity of vegetation using remote sensing data in Xuzhou <i>Kun Tan, Erzhu Li and Peijun Du</i>	69
Unsupervised estimation of the number of endmembers in hyperspectral data <i>Zhang Ming</i>	73
Information extraction method on coastal wetland using TM data: A case study in Dongying, Shandong, China <i>Kun Shang, Xiaohong Zhang, Dong Zhao and Xukai Zhang</i>	77
Methane in China – nine years from Atmospheric Infrared Sounder observations <i>Ying Zhang, Liangfu Chen, Jinhua Tao, Lin Su, Mingmin Zou and Meng Fan</i>	82
Estimation of variations in urban ecosystem service values using remotely sensed data in Guangzhou city, China <i>Yongzhu Xiong, Fenglei Fan and Changbai Zhu</i>	86
Elevation accuracy assessment of a DSM and DTM generated for an urban area from the ALTM 2025 airborne laser scanning sensor <i>Fernando Leonardi, Claudia Almeida, Leila Fonseca, Livia Tomas, Paulo Albuquerque and Cleber Oliveira</i>	91
Investigating spatiotemporal dynamics of grassland changes by using multi-temporal Landsat images: a case study in central Xinlingol, China, 1985 - 2010 <i>Shuang Li, Yichun Xie, Yongfei Bai and Ye Jiang</i>	96
Landscape of urban heat island and urban thermal landscape: a comparative study <i>Xiaofeng Zhao and Huina Wang</i>	101
Bundle adjustment with vehicle-based panoramic imagery <i>Shunping Ji and Yun Shi</i>	106
Estimating sea ice thickness using MODIS data: a case study in the Bohai Sea, China <i>Hua Su and Yunpeng Wang</i>	111
Cross-calibration of HJ-1B/CCD1 image based on Aqua/MODIS data <i>Lili Li, Jingxue Yang and Yunpeng Wang</i>	116

Discriminating stocking rates in a typical grassland using in-situ spectral reflectance data <i>Zongyao Sha, Daniel Brown, William Welsh and Yichun Xie</i>	120
Estimating of atmospheric parameters on land using AMSR-E, Part I: Inferring precipitable water vapor <i>Yongqian Wang, Jiancheng Shi, Zhihong Liu, Yingjie Peng and Wenjuan Liu</i>	125
Estimating of atmospheric parameters on land using AMSR-E, Part II: Inferring cloud liquid water <i>Yongqian Wang, Jiancheng Shi, Zhihong Liu, Yingjie Peng and Wenjuan Liu</i>	130
The monitoring of ecological reclamation evolution and landscape ecology remodeling technology in mining subsidence area <i>Li Xingli, Li Shuzhi and Gao Junhai</i>	135
Application of land surface temperature inversion based on emissivity mixture analysis at sub-pixel scale in geothermal exploration <i>Tianyu Li and Guonian Lv</i>	139
Mapping and interpreting of subsidence in West Tianjin with high spatiotemporal X-band persistent scatterer SAR interferometry <i>Yu Bing, Liu Guoxiang, Zhang Rui, Nie Yunju, Jia Hongguo and Li Tao</i>	144
Effect of modulation transfer function on high spatial resolution remote sensing image segmentation quality <i>Jiehai Cheng, Yanchen Bo, Yuxin Zhu and Xiaole Ji</i>	149
Automated detection of coastline using Landsat TM based on water index and edge detection methods <i>Xukai Zhang, Xia Zhang and Qiongqiong Lan</i>	153
The method of assessing shape similarity of object-based classification result of remote sensing imagery <i>Xiaole Ji, Yanchen Bo and Jiehai Cheng</i>	157
Multi-platform persistent scatterer SAR interferometry time series analyzing <i>Zhang Rui, Liu Guoxiang, Yu Bing, Li Tao and Jia Hongguo</i>	161
Burned area extraction based on time-series Modis 250m NDVI in subtropical forests of Yunnan province <i>Jie Wang, Zengxiang Zhang and Qingke Wen</i>	166
Spatial measurement of regular building based on single image <i>Mingming Sui, Meizhen Wang and Yan Zhen</i>	171
The assessment of air quality in remote sensing data nearby coal-fired power plants <i>Weiling Wu</i>	176

Object-based classification using LIDAR-derived metrics and Quickbird imagery <i>An Wang and Shuhe Zhao</i>	181
Fusing high-resolution SAR and optical imagery based on texture analysis <i>Yunxiao Luo, Shuhe Zhao, Hongkui Zhou, An Wang, Kexun He and Lei Tan</i>	186
Object-oriented land cover classification using multi-temporal HJ-1 CCD imagery: a case study in central Shandong Province, China <i>Hongkui Zhou, Shuhe Zhao, Yunxiao Luo, Lei Tan, An Wang and Kexun He</i>	191
Operational wildfire monitoring and disaster management support using state-of-the-art EO and information technologies <i>Charalampos Kontoes, Iphigenia Keramitsoglou, Ioannis Papoutsis, Dimitrios Michail, Themos Herekakis, Pantelis Xofis, Manolis Koubarakis, Kostis Kyzirakos, Manos Karpathiotakis, Charalampos Nikolaou, Mike Sioutis, Giorgos Garbis, Stavros Vassos, Stefan Manegold, Martin Kersten, Holger Pirk and Milena Ivanova</i>	196
Comparison of general methods of fractal texture extraction for high resolution remotely sensed imagery <i>Haijun Luan, Qingjiu Tian and Xiaoqin Wang</i>	201
Accuracy analysis of MAMS data using direct georeferencing <i>Kuifeng Luan, Xiaohua Tong and Yanhua Ma</i>	206
Preliminary study on carbon fluxes from land change in a subtropical watershed of China <i>Shen Ye, Huang Jinliang and Hu Hongyou</i>	210
Spatial and seasonal variations of chlorophyll-a and associated oceanographic events in Sabah coastal water in relation to Asian monsoon <i>Alaa A. Abbas, Shattri B. Mansor, Biswajeet Bradhan and C.K. Tan</i>	215
Spatial and Temporal Distribution of Snow Cover in Bayanbulak Grassland <i>Yun Li, Xuezhi Feng, Shuhe Zhao and Kexun He</i>	220
Study on high voltage power line reflection in multi SAR sensors and dual polarization <i>Liu Yan, Hou Ailing, Li Tao, Li Xingkai and Wu Wenhao</i>	225
Estimation of planted forest Leaf area index from TM imagery using the algorithm based on geometric-optical model <i>Chen Hanyue and Niu Zheng</i>	230
Landslide monitoring by PS-InSAR in Yangtze River <i>Ma Nengwu, Chen Weiyian, Zheng Min, He Ping, Li Tao, Cheng Shilai and Yuan Youxin</i>	235

Using UAV-based low-altitude aerial photogrammetry in application of mine area measurement <i>Xiangfeng Liu, Peng Chen, Xiaohua Tong, Shuang Liu, Shijie Liu, Zhonghua Hong, Lingyun Li, Kuifeng Luan</i>	240
Bundle adjustment of high resolution stereo camera on Mars Express without control points <i>Lingyun Li, Xiaohua Tong, Yanmin Jin and Shijie Liu</i>	243
Estimation of volume change of Lambert-Amery Ice Shelf drainage basin 2003-2009, from multimission satellite altimetry <i>Jun Liu and Tong Xiaohua</i>	246
Estimation of urban vegetation fraction from HJ-1B CCD data: methods and comparison <i>Feng Chen, Yin Ren, Xiaofeng Zhao</i>	249
Remote sensing and open source geographic information system integration <i>Tingwei Huang and Yuxiang Zhou</i>	254
Comparison of pixel-based and object-based classification for glacier change detection <i>Ibad Raza, Syed Saqib Ali Kazmi, Syed Saad Ali and Ejaz Hussain</i>	259
Water area segmentation of the Yangcheng Lake with SAR data based on improved 2D maximum entropy and genetic algorithm <i>Zhihui Li, Xiuwan Chen, Peng Luo, Yuan Tian</i>	263
Urban building collapse detection by exploiting invariant moment features from very high resolution imagery <i>Xueyan Wang, Haiqing Xu and Peijun Li</i>	268
Flood hazard assessment in Beijiang River using SAR imagery <i>Yuan Tian</i>	273
Estimation of fractional vegetation cover by unmixing HJ-1 small satellite hyperspectral data <i>Chunhua Liao, Huiyi Bao and Xianfeng Zhang</i>	278
Mapping urban landuse types in Los Angeles using multi-date MODIS vegetation image products <i>Yuanfan Zheng and Honglie Qiu</i>	282
A study on residential population estimation based on HJ-1 CCD image <i>Siqi Jia, Qi Li, Shuai Liu and Lei Xue</i>	287
Performance analysis and simulation of iridium navigation satellite based on STK <i>Shiyue Fan, Feizhou Zhang and Zhenghang Li</i>	291
Segmentation of very high resolution imagery based on multichannel watershed transformation and region merging <i>Cai Cai and Peijun Li</i>	296

Reflectance spectra characteristics research of enteromorpha prolifera in the whole life cycle <i>Li Zhou and Xia Lu</i>	301
Effects on measurement precision caused by degradation of the long-term field using reference standard board <i>Yuzhong Ma, Yini Duan and Wei Chen</i>	305
Integration of vector and raster-based coal mines surface and underground contrast map <i>Changxiong Wang, Shangjun Mao and Mei Li</i>	309
Estimation of fractional vegetation cover based on spatial continuity within heterogeneous Karst environments <i>Yuemin Yue, Kelin Wang, Bo Liu and Ru Li</i>	313
Estimation of solar induced chlorophyll fluorescence from EO-1 HYPERION <i>Hu Shunshi, Zhang Lifu and Tong Qingxi</i>	317
Locating suitable roofs for utilization of solar energy in downtown area using airborne LIDAR data and object-based method: a case study of the Lujiazui region, Shanghai <i>Yan Huang, Bailang Yu, Zhiming Hu, Jianping Wu and Bin Wu</i>	322
Voxel-based marked neighborhood searching method for identifying street trees using vehicle-borne laser scanning data <i>Bin Wu, Bailang Yu, Wenhui Yue, Jianping Wu and Yan Huang</i>	327
Coal seam modeling based on hexahedron grid and triangulation algorithm for real-time visualization <i>Xiaomin Du, Zhipeng Li and Suping Peng</i>	332
The evenness degree evaluation of parkland location in the main province garden cities of Shandong Province based on 1km grid model <i>Fei Xianyun, Zhang Zhiguo and Gao Xiangwei</i>	337
