2012 IEEE Symposium on Computational Intelligence for Security and Defence Applications

(CISDA 2012)

Ottawa, Ontario, Canada
11 – 13 July 2012

IEEE CISDA 2012 Paper Index

BVS: Applications in Biometrics and Video Surveillance

Mitigating Replay Attacks Using Darwinian-Based Feature Extraction""3

Joseph Shelton, Joshua Adams, Aniesha Alford, Melissa Venable, Sabra Neal, Gerry Dozier and Kelvin Bryant

MCMC-based Human Tracking with Stereo Cameras Under Frequent Interaction and Occlusion"""":

Pak Ming Cheung and Kam-Tim Woo

Efficient Communication for Large-scale Robust Image Processing with Smart Camera Devices""""38

Rene Golembewski, Guenter Schaefer and Tobias Gerlach

Toward Optimizing Static Target Search Path Planning """46

Nassirou Lo, Jean Berger and Martin Noel

A Finger Posture Change Correction Method for Finger-vein Recognition """53

Beining Huang, Shilei Liu and Wenxin Li

TSA: Special Session: Biometric Technologies, Systems and Applications

A Comparison of Adaptive Matchers for Screening of Faces in Video Surveillance """5:

Miguel De-la-Torre, Paulo V. W. Radtke, Eric Granger, Robert Sabourin and Dmitry O. Gorodnichy

Biometrics Security and Experiments on Face Recognition Algorithms """68

Amal Dandashi and Walid Karam

Assessment of Privacy Enhancing Technologies for Biometrics""""76

David Bissessar, Dmitry Gorodnichy, Alex Stoianov and Michael Thieme

Combine the clustering algorithm and representation-based algorithm for concurrent classification of test samples """85

Xiaozhao Fang and Yong Xu

Identity Verification based on Haptic Handwritten Signature: Genetic Programming with Unbalanced Data """8:

Fawaz Alsulaiman, Julio J. Valdes and Abdulmotaleb El Saddik

AUS Special Session: Autonomy for Unmanned Systems, Computers and Sensor Networks

Cooperation through Mediation in Multi-Robot Pursuit Games""""97

Soheil Keshmiri and Shahram Payandeh

Managing Data Latency for Consensus over Dynamic Sensor-Networks """: 5

Stephane Blouin

Autonomous Tracking of Vehicle Rear Lights and Detection of Brakes and Turn Signals """"; 2

Akhan Almagambetov, Mauricio Casares and Senem Velipasalar

ENT: Special Session: Security Issues in Emerging Network Technologies

Tag-Server Mutual Authentication Scheme based on Gene Transfer and Genetic Mutation """"; 9

Raghav Sampangi and Srinivas Sampalli

Optimal Defense Synthesis for Jamming Attacks in Cognitive Radio Networks via Swarm Optimization""""327

Haopeng Zhang, Zhenyi Liu and Qing Hui

A Mobile Role-Based Access Control System using Identity-Based Encryption with Zero Knowledge Proof """335

Ambica Pawan Khandavilli, Musfiq Rahman and Srinivas Sampalli

SCTF: Sensor Cueing, Tasking and Fusion

CISM: Special Session: Computational Intelligence and Social Media

STP: Strategic and Tactical Planning

AMPR: Adaptive Methodologies for Pattern Recognition

MSDO: Modeling and Simulation of Defence Operations
