

2012 17th International Conference on Computer Games (CGAMES 2012)

**Louisville, Kentucky, USA
30 July – 1 August 2012**

**IEEE Catalog Number: CFP1294P-PRT
ISBN: 978-1-4673-1120-5**

Contents

Programme Committee	7
International Programme Committee	8
Preface	9
Proceedings	10
Serious Games 1	11
Dyslexia diagnosis in Reading Stage though the use of games at school Nuria Aresti Bartolomé, Amaia Mendez Zorrilla, and Begoña García Zapirain	12
Serious games for expertise training rules in questions Nour El Mawas, Jean-Pierre Cahier, and Aurélien Bénel	18
Using a GA and Wisdom of Artificial Crowds to Solve Solitaire Battleship Puzzles Roman V Yampolskiy and Aaron C Port	25
Intelligent Serious Games System for Children with Learning Disabilities Ghada A. El Khayat, Tamer F. Mabrouk, and Adel S. Elmaghraby	30
Serious Games and Health Informatics: A Unified Framework Adel S. Elmaghraby, Amaia Méndez, Begoña Garcia Zapirain, Walaa M. Sheta, and Saleh A. El Shehaby	35
A Meta-model for Developing Simulation Games in Higher Education and Professional Development Training C Shaun Longstreet and Kendra Cooper	39
Games Simulation	47
Factors Affecting Students' Decision to Choose a Traditional or Role-Play Simulation Based Course Format Linda Musaitif, Barbara Cox, Deana Porterfield, Mike McGirr, Charmaine Phipps, and Ryan Saunders	46
Real-time Motion Editing for Reaching Tasks Using Multiple Internal Graphs Christos Mousas and Paul Newbury	51
Robot Design using the Unity Game Engine for Computer Games and Robotic Simulations William A Mattingly, Dar-jen Chang, Richard Paris, Neil Smith, John Blevins, and Ming Ouyang	56
Procedural Textures Using Tilings With Perlin Noise David Maung, Yinxuan Shi, and Roger Crawfis	60

Games Development	66
Enhancing the Performance of a Multiplayer Game by Using a Parallelizing Compiler Yasir I Al-Dosary, Keiji Kimura, Hironori Kasahara, and Seinosuke Narita	67
Software Design Patterns for Enabling Auto Dynamic Difficulty in Video Games Muhammad I Chowdhury and Michael J Katchabaw	76
Proposal of Game Design Document from Software Engineering Requirements Perspective Mario Gonzalez, Hugo A Mitre, Jose L Gonzalez, and Cuauhtemoc Lemus	81
Navigational techniques to improve usability and user experience in RPG Games Chris Carter, Qasim Mehdi, and Thomas P Hartley	86
A Gameplay Loops Formal Language Yannick S Francillette, Abdelkader Gouaich, Nadia Hocine, and Julien Pons	94
Games Simulation, Graphics, Visualisation and Work in Progress	102
A Visualization Framework for Simulating Fuel Consumption Through Serious Games Bryan B Sarlo, Alexander E Lambe Foster, and Mark P Wachowiak	103
Going Anywhere Anywhere – Creating a Low Cost Portable Immersive VE System Eric Bachmann, James Calusdian, Eric Hodgson, Xiaoping Yun, and Michael Zmuda	108
Diagnosis of Attention Deficit Disorder using “D2” and “Symbol Search” tests through a game-based tool Maite Frutos, M Begona García Zapirain, and Amaia Mendez	116
Innovative System for Cognitive Brain Enhancement and Language Disorders Treatment Using a Virtual Reality Environment Nuria Aresti Bartolomé, Begoña Garcia Zapirain, and Amaia Mendez Zorrilla	120
Emerging Games Platforms, Technologies and Applications and Computational Intelligence	125
Multi-scenario Gesture Recognition Using Kinect Yi Li	126
A Framework for Interactive Generation of Music for Games Kristopher W Reese, Roman Yampolskiy, and Adel Elmaghraby	131
Physics engine on reconfigurable processor - low power optimized solution empowering next-generation graphics on embedded platforms Manti Bose and Vasantha Kumar Rajagopala	138

Using Discrete Wavelet Transform and Eigenfaces for Recognizing Avatars Faces	143
Abdallah A Mohamed and Roman V Yampolskiy	
DRE-Bot: A Hierarchical First Person Shooter Bot Using Multiple Sarsa(λ) Reinforcement	148
Frank G Glavin and Michael G Madden	
A Handicap Point System for Pedometer Challenges	153
Brian S Carter	
Serious Games 2	157
Development of a Walking Game for the Elderly Using Controllers of Hand buttons and Foot Boards	158
Kyung Sik Kim, Seong Suk Oh, Jin Ho Ahn, and Sun Hyung Lee	
RumbleBlocks: Teaching Science Concepts to Young Children through a Unity Game	162
Michael G Christel, Scott M Stevens, Bryan S Maher, Sean Brice, and Matt Champer	
Studying Social Relations in MMOG Play: An Illustration of Using Ethnography to Frame “Big Data”	167
Shad Gross, David Hakken, and Nic True	
Reinforcing Array and Loop Concepts Through a Game-Like Module	175
Amos Baker, Jinghua Zhang, and Elvira R. Caldwell	
Generalizations and Optimal Solutions for Coin sorting Puzzles	180
Kemal Efe	
Serious Games 3	188
Accidental Emergence within an Agent Based Model	189
Ahmad Byagowi, Danyal Mohaddes, and Robert Donald McLeod	
The challenge of understanding tactics in a multiplayer online game: Analyzing BZFlag games of the Games United League	194
John C Paolillo	
Building a Bi-Directional Bridge Between Social Presence and Social Interaction in Multi-Players Online Games	202
Samah Mansour and Mostafa El-Said	
Towards Model-driven Game Engineering for Serious Educational Games: Tailored Use Cases for Game Requirements	208
Kendra M Cooper and Christopher S Longstreet	
Emotions for intelligent agents in crisis management	213
Michael Loizou, Thomas Hartley, Sarah Slater, Robert Newman and Lucia Pannese	

Games Development and Games Applications	220
Using Chaotic 3D Watermarking for Game Design Copy Right Protection Amira E. Youssef and Walaa Sheta	221
In-Game Adaptation of a Navigation Mesh Cell Path Thomas P Hartley and Qasim Mehdi	230
Mahindra EarthMaster: A Game Used in Training Heavy Construction Equipment Gaurave Rane and Sahirali Momin	237
Modeling Car Drivers as Believable Autonomous Agents for a Traffic Control Training Game Levon Ter-Isahakyan and Jerzy W Jaromczyk	242
Using Game Level Design as an Applied Method for Software Engineering Education Ahmed Emam and Mostafa Mostafa	248
Comparing Behavior Trees and Emotional Behavior Networks for NPCs Anja Johansson and Pierangelo Dell'Acqua	253
Author Index	261
