# 2012 International Conference on Advanced Mechatronic Systems

# (ICAMechS 2012)

## Tokyo, Japan
## 18 – 21 September 2012

IEEE

**IEEE Catalog Number:** CFP1218R-PRT
**ISBN:** 978-1-4673-1962-1

# 2012 International Conference on Advanced Mechatronic Systems

September 18-21, 2012

Tokyo, Japan

IEEE

## CONTENTS

**Robust control techniques (WedA01)**

*ELM-based parallel compensation control for perturbed plants with hysteresis using robust right coprime factorization*

Changan Jiang, Mingcong Deng 1

*Method of robust nonlinear observer design*

Alexey N. Zhirabok, Alexey Ye. Shumsky, Alexey Yu. Suvorov 6

*Operator-based robust nonlinear control for an Ionic-Polymer Metal Composite with hysteretic properties compensation*

Tomohito Hanawa, Aihui Wang, Mingcong Deng, Changan Jiang 12

*Development of mechatronic system of pulsation flow for mechanics evaluation of arterial vessel*

Rahil Vali, Atsushi Sakuma, Keiichi Tanabe, Kenta Kawagoe, Takaya Shimpo, Kaoru Iwamoto, Takashi Saito 516

*Control system design for nonlinear plants based on Generalized H.S.Black formula using robust right coprime factorization*

Kazuki Umemoto, Fumitoshi Matsuno, Mingcong Deng 24

*Design of quantized dynamic output feedback for decentralized $H_\infty$ control systems*

Guisheng Zhai, Ning Chen, Weihua Gui 30

**Power system Ⅰ (WedA02)**

*Prioritization decision for renewable energy development using analytic hierarchy process and geographic information system*

Meita Rumbayan, Ken Nagasaka 36

*A framework for supply-side management of $CO_2$ emissions in a power industry*

H. Takamori, E. Go, K. Nagasaka 42

*A research on effectiveness of integrated renewable energy based on regional IOM*

Zulati Litifu, Jie Li, Yutaka Tonooka 48

*A research on planning and installing scattered power into a local power system*

Zulati Litifu, Ken Nagasaka 54

*Measuring business effectiveness of information technology investment by using empirical artificial neural networks*

*and expert system*

Mahmud Mavaahebi, Ken Nagasaka 60

*A new simulation phasor model of 18 MW offshore local area grid of wind farm using doubly-fed induction generator driven by a wind turbine*

Xiaolei Wang, Feng Wu, Yuanyuan Wang 66

## Intelligent mechatronic systems (WedA03)

*Global localization of a mobile robot with a laser range scanner in the outdoor environment*

Masahiro Tanaka, Keisuke Kochi 69

*Development of slide type inspection robot using flexible pneumatic cylinder*

Lin Wang, Tetsuya Akagi, Shujiro Dohta, Takahiro Kawasaki 75

*Development of flexible spherical actuator using flexible pneumatic cylinder*

Changjiang Liu, Shujiro Dohta, Tetsuya Akagi, Ayaka Ando 81

*3D quasi-passive walking of bipedal robot with flat feet quasi - passive walker driven by antagonistic pneumatic artificial muscle*

Hiroyuki Watanabe, Shinsaku Fujimoto, Katsuya Kawamoto 87

*Development of hybrid FES walking assistive system - feasibility study*

N. Kurokawa, N. Yamamoto, Y. Tagawa, T. Yamamoto, H. Kuno 93

*Development and control of a novel type diaphragm pump using a DSP*

Valeri Kroumov, Yoshiro Kobayashi 98

## Recent advances in advanced control systems Ⅰ (WedA04)

*Two-degree-of-freedom multirate control system with integral compensation for improvement in steady-state intersample response*

Shuhei Kimura, Takao Sato, Akira Yanou, Shiro Masuda, Nozomu Araki, Yasuo Konishi 104

*An artificial finger robot motion control based on finger joint angle estimation from EMG signals for a robot prosthetic hand system*

Nozomu Araki, Kenji Inaya, Yasuo Konishi, Kunihiko Mabuchi 109

*Iterative methods for the $H_2$ and the mixed $H_2/H_\infty$ control problems using a feasible direction*

Yasushi Kami, Eitaku Nobuyama 112

*Development of reclining wheelchair with transfer assistance functions*

Yuki Iwano 117

*Optimal filtering for linear continuous-time markovian jump systems with non-Gaussian noises by MPT approach*

Gou Nakura 122

*An approach to noncausal hybrid estimation for linear discrete-time systems with non-Gaussian noises*

Gou Nakura 128

## Mechatronics for renewable energy (WedM01)

*Development of a power generation device for multi-mode vibration in automobiles*

Seiji Hashimoto, Nobuyuki Nagai, Yoshimitsu Fujikura, Jyunpei Takahashi, Shunji Kumagai, Makoto Kasai, Kenji Suto, Hiroaki Okada 134

*Development of multi-axis vibration power generation device for automobiles*

Shunji Kumagai, Makoto Kasai, Kenji Suto, Hiroaki Okada, Seiji Hashimoto, Nobuyuki Nagai, Yoshimitsu Fujikura, Jyunpei Takahashi 139

*Construction of multi-axis vibration control system for vibration reproduction in vehicles*

Nobuyuki Nagai, Seiji Hashimoto, Yusuke Hiroki, Yoshimitsu Fujikura, Jyunpei Takahashi, Shunji Kumagai, Makoto Kasai, Kenji Suto, Hiroaki Okada 144

*Wireless power management of small scale distributed hydrogen harvesting system with full digital control*

Wei Jiang, Fangyan Yu, Yike Wu, Wen He, Yuepin Mo 149

*A study on dynamic characteristics of a permanent magnet hybrid magnetic bearing for a small-sized hydrodynamic generator*

Nobuyuki Kurita, Takeo Ishikawa, Keisuke Ooshio 154

## Information safety (WedM02)

*Study on digital image watermark algorithm based on chaos mapping and DWT*

Zhifeng Gu, Guanfeng Li, Zongxiao Yang 160

*Discussion about commercial painting's market value*

Xin Jiang 165

*Opening platform-based design for a framework of medium and small-sized enterprise supply chain management*

Qin Liu, Chunli Zhao, Changrui Han 170

*Development of a flexible customized compression garment design system*

M.N. Salleh, H.M. Lazim, S.N. Othman, A.F. Merican 175

*The exploration of performance management method suit for renewable energy generation construction project*

Yunna Wu, Heyun Dong 725

## Robotics and mechatronics (WedM03)

*Development of circular-rail double inverted pendulum control platform with robust control*

Haiquan Wang, Xingfeng Wang, Yuyu Yang, Wudai Liao 180

*On the operator and passivity based robust control for robot manipulator*

Shuhui Bi, Mingcong Deng, Lei Wang, Yongguo Zhao 185

*One circle trajectory planning method for palletizing robot*

Wenguang Li, Guangliang Liu, Shuhui Bi, Tie Chen, Chengye Liu 190

*Performance comparison of velocity estimators with MEMS-based inertial sensors*

Yasuhiro Kawakami, Tsuyoshi Nimiya, Haruo Suemitsu, Takami Matsuo 195

*Improvement of an apple sorting machine using PSNR criterion*

Hiwa Golpira, Hêmin Golpîra 729

## Nonlinear control systems (WedM04)

*Adaptive control for uncertain systems in the presence of actuator and sensor hysteresis represented by Prandtl-Ishlinskii model*

Ryo Oshima, Xinkai Chen 201

*Formation and obstacles avoidance of leader-follower networks with time-varying coupling delays*

Jing Yao, Xu Han, Weisheng Xu, Hua O. Wang 207

*The criteria of robust right coprime factorization of the nonlinear operator in the generalized sense*
Wudai Liao, Min Zheng, Yuyu Yang, Xingfeng Wang 213
*Robust adaptive control of a class of nonlinear system with an asymmetric shifted Prandtl-Ishlinskii hysteresis model*
Sining Liu, Zhi Li, Chun-Yi Su 217
*Robust fault tolerant thermal control system design of an aluminum plate with peltier device*
Mingcong Deng, Akira Yanou, Yoshiteru Tokuda, Aihui Wang 223

## Motion control (WedP01)

*Position control of a vacuum gate valve and its evaluation*
Yusuke Imai, Yukinori Nakamura, Shinji Wakui 229
*Verification of the damping effect of base plate jerk feedback scheme on the self-oscillation of a pneumatic positioning stage*
Mohebullah Wali, Yukinori Nakamura, Shinji Wakui 235
*Implementation of a dual disturbance observer for pneumatic stage*
Yoshiki Santo, Yukinori Nakamura, Shinji Wakui 241
*Flow disturbance rejection of pneumatic vibration isolators using compensation input*
Yukinori Nakamura, Ryo Fukuda, Shinji Wakui 247
*Termination test of feedback error learning for automation of learning and positioning*
Kazuki Morimoto, Yukinori Nakamura, Shinji Wakui 253

## Measurement and sensors (WedP02)

*Proportional band considering starting time for temperature controller*
Yusuke Hirama, Hiroto Hamane, Kazuyoshi Miyazaki 259
*The determination on DC capacitor parameter in active power filter*
Fuzhuan Wu, Sheng Peng, Binbin Wang 265
*Utilizing Azadi controller to stabilize the speed of a DC motor*
Sassan Azadi, Mosa Nouri 269
*Minimum time trajectory optimization of a tail-sitter aerial vehicle using nonlinear programming*
Afshin Banazadeh, Nima Assadian, Fariborz Saghafi 275
*Development and design of $CO_2$ concentration measurement device based on MSP430*
Yongping Dan, Qun Jiang, Dongyun Wang, Shengjun Wen, Huiqin Liu 281

## Biomechatronics (WedP03)

*Passive walking-assistance device operated by regenerating the potential energy of the upper body*
Yasuyuki Yamada, Toshio Morita 286
*Aging effect on pedal errors of driving under different visual conditions*
Masayuki Yoshitake, Jiajia Yang, Jinglong Wu 292
*Measurement of motion quantity from human movement and detection of the sign language word*
Miwa Takai 298
*SVR based estimation modeling and robust nonlinear control for a miniature pneumatic curling rubber actuator*
Toshihiro Kawashima, Aihui Wang, Shuichi Wakimoto, Mingcong Deng 304
*Sequence splicing techniques and their applications for information encryption*
Junling Sun 310

## Novel control techniques (WedP04)

*Model-free controller tuning based on frequency response data*

Zi-Jiang Yang 314

*An adaptive disturbance observer design on motion control systems*

Akira Shimada, Danai Phaoharuhansa 320

*Swing-up and stabilizing control of an inverted pendulum by two step control method*

Kotaro Mihara, Junichi Yokoyama, Haruo Suemitsu, Takami Matsuo 323

*Reachability and controllability of mix-valued control networks*

Zhiqiang Li, Huimi Xiao, Jinli Song 329

*Design of intelligent control system of eight-way wireless remote control crane based on RF technology*

Pingjun Wei, Xiaojing Li, Zhoufeng Liu, Jiangbo Zhu 335

## Power system Ⅱ (ThuA01)

*Photovoltaic integration in a micro-wind turbine system*

Marven E. Jabian, Noel R. Estoperez 339

*Web enabled smart microgrid model with renewable energy resources in bangladesh power system*

Md. Atikur Rahman Sarker, Ken Nagasaka 345

*A research on operation planning of multi smart micro grid*

Ken Nagasaka, K. Ando, YB. Xu, H. Takamori, J. Wang, A. Mitsuta, O. Saito, E. Go 351

*Allocation of greenhouse gas emission allowance for Japanese electric utility industry under kyoto protocol by grandfathering/benchmarking rule approach*

Jeff Huang, Ken Nagasaka 357

*Potential evaluation and long-run installation scheduling of offshore wind power of entire Japan*

Asifujiang Abudureyimu, Yoshiki Hayashi, Ken Nagasaka 362

*Real-time VAR control using ANN with Web-based power monitoring*

Carl John O. Salaan, Mark Joseph M. Victoria, Noel R. Estoperez 368

## Theories and methods of nonlinear analysis (ThuA02)

*Robust finite time functional observers in uncertain systems*

Guosheng Wang, Wanli Yang, Qiang Lv 374

*Rescue strategy of multimode transportationfor equipment material supply problem*

Tiening Wang, Liya Jin, Ronghui Wang 379

*Oscillation criteria of solutions for a class of impulsive delay parabolic equations about boundary value problems*

Wanli Yang, Junhong Liu, Suwen Zheng 383

*Variable smoothing parameter of the double exponential smoothing forecasting model and its application*

Feiyan Chen, Qian Li, Junhong Liu, Jiuyong Zhang 386

*Evaluation on fighting efficiency of self-propelled artillery based on projection pursuit method*

Jiaxing Du, Yucai Dong, Ping Chen, Ling Zhang 389

*The monitor of abrasion and monitor to armored carrier's Gearbox based on the model of projection pursuit*

Shixin Zhang, Yile Liu, Yucai Dong, Gehua Fan 393

## Recent advances in advanced control systems Ⅱ (ThuA03)

*Development of a trimmer-type mowing robot*

Yuki Iwano, Atsunari Kobayashi 397

*Application of adaptive control using GPGPU to Hammerstein model*

Daiki Kurahashi, Takao Sato, Nozomu Araki, Yasuo Konishi 402

*Anti-windup compensator for nonlinear model predictive control*

Takumi Kayahara, Tomohiro Henmi 406

*Tuning method for control parameters of adaptive nonlinear model predictive controller*

Tomohiro Henmi 412

*Solving optimal power flow problems subject to distributed generator failures via particle swarm intelligence*

Qi Kang, MengChu Zhou, Chi Xu 418

*Maximally permissive control of flexible manufacturing systems with fewest disjunctive constraints*

Yufeng Chen, MengChu Zhou, Xiaoou Li 424

## Process modeling, optimization and system design (ThuA04)

*Stochastic stability of genetic regulatory networks with multiple time-varying delays*

Yan Wang, Hong Wang, Linkun Wang 430

*The transformer's electromagnetic optimized calculation based on genetic algorithm*

Hongwei Jiang, Huiliang Zhou 436

*Application of genetic algorithm on IC substrate drilling path optimization*

C. Y. Tsai, C. H. Liu, Y. C. Wang 441

*Research on acoustic positioning system in the process of AUV recovery*

Shiguo Ma, Guangliang Liu, Dong Yang, Yali Wang 447

*Model output following control for an aluminum plate cooling process with a peltier device*

Shengjun Wen, Guotao Zhang, Yongping Dan, Dongyun Wang, Mingcong Deng 452

*MWGR: a new method for real-time detection of cord fabric defects*

Wuyi Zhang, Jichao Zhang, Yuanshao Hou, Shiyong Geng 458

## Industrial system safety (ThuM01)

*Semi-classical limits of the riesz means of N-body schrodinger operators*

Xiaoyao Jia, Feiyan Guo 462

*Numerical study of viscoelastic flow between eccentrically rotating cylinders*

Chunlei Ruan, Wei Li 468

*Research on decoupling control for electro-hydraulic load simulator*

Geqiang Li, Hongyan Yang, Shuicong Li, Yun Zhao 473

*Research and application on the frequency automatic tracking of ultrasonic power based on DSP*

Guanqiang Dong, Lei Song, Zongxiao Yang 478

*Applications of G'/G expansion method to traveling wave solutions for Klein-Gordon- Schrödinger equations*

Wei Li, Cunlei Ruan, Xinrui Wang 482

*Computational fluid dynamic analysis for three-hastate vertical axis wind wheel*

Hanghang Yang, Zongxiao Yang, Lei Song, Lixiang Hao, Mengyang Li 487

## Advanced intelligent control methods in robotics and mechatronics Ⅱ (ThuM02)

*Synthesis of lifting mechanisms for hand pallets trucks*

Iulian Tabără, Victor Moise, Ileana Dugăeşescu 492

*The navigation mobile robot systems using bayesian approach through the virtual projection method*

Luige Vladareanu, Gabriela Tont, Victor Vladareanu, Florentin Smarandache, Lucian Capitanu 498

*The optimizing space trajectory by using the inverse kinematics, direct dynamics and intelligent damper controlling with proper neural network*

Adrian Olaru 504

*Control of multi-legged robot using reinforcement learning with body image - realization of generalization capability by utilizing properties of the body*

Kazuya Nishigai, Hiroki Nakatsuka, Kazuyuki Ito 510

*Nonlinear cooling control for a peltier actuated aluminum plate thermal system by considering radiation heat transfer*

Kazuki Takahashi, Shengjun Wen, Masahiro Sanada, Mingcong Deng 18

## Advanced control systems design - theory and applications (ThuM03)

*Adaptive design method of multirate PD controller*

Takao Sato, Nozomu Araki, Yasuo Konishi 520

*Adaptive tracking control scheme for wheeled mobile robots without measurement of longitudinal velocity*

Panfeng Shu, Yuki Ishibashi, Hiroshi Shibata, Masahiro Oya 525

*Robust high gain adaptive control of mechanical systems with uncertain nonholonomic constraints*

Ryuji Michino, Yoshihiko Sakamoto, Ikuro Mizumoto 531

*Self-repairing control using a nonlinear unstable filter*

Masanori Takahashi 537

*Design and application of a direct GMV-based PID controller*

Shin Wakitani, Shintaro Hanata, Toru Yamamoto 541

*A position control of 2 DOF flexible link robot arms based on computed torque method*

Masataka Sawada, Keietsu Itamiya 547

## Industrial application (ThuM04)

*Dynamic model identification and control of small turbojet engines using frequency response analysis*

A. Banazadeh, H. Abdollahi Gol, H. Ramazani 553

*Linear multi-variable control technique for smart power management of wind turbines*

S. A. Emami, A. Banazadeh 559

*The micro-grid islanding detection based on the principle of impedance voltage divider*

Yanbin Li, Yanqing Guo, Yang Yuan, Ruisheng Li 565

*The implementation of dynamic voltage restorer (DVR) based on DSP*

Suping Pei, Fuzhuan Wu, Tingting Hou 571

*Influence of shot peening on rolling fatigue life of case-hardened steel*

Lei Wang, Guangliang Liu, Shuhui Bi 576

*Medical drop speed monitoring system design based on an eccentric wheel*

Huanlin He, Yuguo Chen 581

## Vibration control (ThuP01)

*Control of five-axes active magnetic bearing systems using parameter adjustment of mode matrices*
Shinya Okubo, Yukinori Nakamura, Shinji Wakui 585

*Development and evaluation of a simulator for pneumatic anti-vibration apparatuses with six degrees-of-freedom using mode control*
Yuka Kaneko, Yukinori Nakamura, Shinji Wakui, Byung Sub Kim, Chang Kyu Song 591

*Development of next generation apparatus for measurement of curve degree in idiopathic scoliosis*
Hiroyuki Takanashi, Sumito Musaka, Hideyuki Boyashiki, Yuki Ide, Michio Hongo, Akiko Misawa, Yoichi Shimada, Tetsushi Mimuro 597

*Root locus analysis of absolute displacement sensors and bandwidth expansion with hybrid detector system*
Takashi Kai, Yukinori Nakamura, Shinji Wakui 603

*Control of a pneumatic isolation table by flow meter: improvement of repeatability in various switching points of the feedforward compensator*
Habiburahman Shirani, Yukinori Nakamura, Shinji Wakui 609

*A consideration of shape of sensor holder for portable braille reading sensor*
Hiroyuki Takanashi, Ryosuke Mimura, Hiroshi Sugiyama, Tetsushi Mimuro 615

## Application of advanced system (ThuP02)

*Online hybrid intelligent tracking control for uncertain nonlinear dynamical systems*
Yihsing Chien, Weiyen Wang, Ihsum Li, Kuangyow Lian, Kuangyang Kou, Tsutian Lee 621

*Adaptive fuzzy sliding mode control of linear induction motors with unknown end effect consideration*
Chini Huang, Koucheng Hsu, Hsinhan Chiang, Kuangyang Kou, Tsutian Lee 626

*Mobile wavelet support vector machine tool systems with C#*
Jintsong Jeng, Chenchia Chuang, Pinglun Liao, Jenglang Wu 632

*Accompanist detection and following for wheelchair robots with fuzzy controller*
Bingfei Wu, Chenglung Jen, Taiyu Tsou, Wunfang Li, Pinyi Tseng 638

*Adaptive TSK-type self-evolving neural control for unknown nonlinear systems*
Yuhsiung Lin, Chunfei Hsu 644

*Reinforcement learning algorithm application and multi-body system design by using MapleSim and modelica*
Onder Tutsoy, Martin Brown, Hong Wang 650

## Advanced intelligent control methods in robotics and mechatronics Ⅰ (ThuP03)

*Weighted multiple model adaptive LQG and PI control for a hydro turbine plant*
Chalang Hamarasheed, Sallehuddin Mohamed Haris, Zulkifli Mohd Nopiah 656

*Complex software for command and control of the anthropomorphic gripper for robots*
Ionel Staretu, Alexandru Itu 662

*An upper limb rehabilitation robot based on 3-RRC parallel mechanism*
Hongbo Wang, Ning Du, Huina Hou, Jiangshun Zhao, Hongnian Yu 668

*Neutrosophic masses & indeterminate models. applications to information fusion*
Florentin Smarandache 674

*New approach to estimate friction caused by biped robot walking based on electrostatic induction*
K. Kurita 680

*Adaptive control method for a walking support machine considering center-of-gravity shifts and load changes*
Y. N. Wang, S. Y. Wang, R. P. Tan, Y. L. Jiang, K. Ishida, M. G. Fujie 684

## Process control (ThuP04)

*Research on hydraulic power plant monitor and control system based on NC2000*
Junming Xiao, Yihua Yu, Liping Liu, Pengcheng Liu, Yinghu Du, Liangbao Jia 690
*Control of multi-dimensional micro-positioning stages*
Yonghong Tan, Yangqiu Xie, Ruili Dong, Hong He 695
*Reconfigurable fault-tolerant control of a vehicle with a steer-by-wire system*
Nobutaka Wada, Kosuke Fujii, Masami Saeki 701
*Rapid vibration attenuation and height level compensation control for a pneumatic isolation table with quantized input*
Masakazu Koike, Yuichi Chida 707
*Design and experiment of a generating system using Bi-Te based on thermoelectric conversion element*
Atsushi Ichikawa, Mingcong Deng 713
*Modeling and operator based nonlinear tracking control using DCS device of a spiral heat exchange process*
Junya Okazaki, Shengjun Wen, Mingcong Deng 719
