2012 IEEE Conference on Computational Intelligence and Games

(CIG 2012)

Granada, Spain
11 – 14 September 2012

IEEE

IEEE Catalog Number: CFP12CIG-PRT
ISBN: 978-1-4673-1193-9

TABLE OF CONTENTS

Paper	Page
Pablo Villacorta, Luis Quesada and David Pelta. **Automatic Design of Deterministic Sequences of Decisions for a Repeated Imitation Game with Action-State Dependency**	1-8
Garry Greenwood and Phillipa Avery. **Update Rules, Reciprocity and Weak Selection in Evolutionary Spatial Games**	9-16
Daniel Ashlock and Elizabeth Knowles. **Deck-Based Prisoner's Dilemma**	17-24
Mark Wittkamp, Luigi Barone, Philip Hingston and Lyndon While. **Noise Tolerance for Real-time Evolutionary Learning of Cooperative Predator-Prey Strategies**	25-32
Daniel Ashlock, Wendy Ashlock, Spyridon Samothrakis, Simon Lucas and Colin Lee. **From Competition to Cooperation: Co-evolution In A Rewards Continuum**	33-40
Jacques Basaldúa and J. Marcos Moreno-Vega. **Win/Loss States: An efficient model of success rates for simulation-based functions**	41-46
Amit Benbassat and Sipper Moshe. **Evolving Both Search and Strategy for Reversi Players using Genetic Programming**	47-54
Laurentiu Ilici, Jiaojian Wang, Olana Missura and Thomas Gärtner. **Dynamic Difficulty for Checkers and Chinese Chess**	55-62
Athanasios Papadopoulos, Konstantinos Toumpas, Anthony Chrysopoulos and Pericles A. Mitkas. **Exploring Optimization Strategies in Board Game Abalone for Alpha-Beta Search**	63-70
Kokolo Ikeda, Daisuke Tomizawa, Simon Viennot and Yuu Tanaka. **Playing PuyoPuyo: Two Search Algorithms for Constructing Chain and Tactical Heuristics**	71-78
Thomas Philip Runarsson and Simon Lucas. **Imitating Play from Game Trajectories: Temporal Difference Learning versus Preference Learning**	79-82
Majed Alhajry, Faisal Alvi and Moataz Ahmed. **TD(Lambda) and Q-Learning Based Ludo Players**	83-90
Martin Wistuba, Lars Schaefers and Marco Platzner. **Comparison of Bayesian Move Prediction Systems for Computer Go**	91-99
Bulent Tastan, David Chang and Gita Sukthankar. **Learning to Intercept Opponents in First Person Shooter Games**	100-107
Matteo Botta, Vincenzo Gautieri, Daniele Loiacono and Pier Luca Lanzi. **Evolving the Optimal Racing Line in a High-End Racing Game**	108-115
Christos Athanasiadis, Damianos Galanopoulos and Anastasios Tefas. **Progressive Neural Network Training For The Open Racing Car Simulator**	116-123
Casey Rosenthal and Clare Bates Congdon. **Personality Profiles for Generating Believable Bot Behaviors**	124-131
Michelle McPartland and Marcus Gallagher. **Interactively training first person shooter bots**	132-138
Christian Bauckhage, Kristian Kersting, Rafet Sifa, Christian Thurau, Anders Drachen and Alessandro Canossa. **How Players Lose Interest in Playing a Game: An Empirical Study Based on Distributions of Total Playing Times**	139-146
Wei Gong, Ee-Peng Lim, Palakorn Achananuparp, Feida Zhu, David Lo and Freddy Chong Tat Chua. **In-Game Action List Segmentation and Labeling in Real-Time Strategy Games**	147-154
Marlos C. Machado, Gisele L. Pappa and Luiz Chaimowicz. **A Binary Classification Approach for Automatic Preference Modeling of Virtual Agents in Civilization IV**	155-162
Anders Drachen, Rafet Sifa, Christian Bauckhage and Christian Thurau. **Guns, Swords and Data: Classification of Player Behavior in Computer Games in the Wild**	163-170
Tróndur Justinussen, Peter Hald Rasmussen, Alessandro Canossa and Julian Togelius. **Resource Systems in Games: An Analytical Approach**	171-178
Michele Pirovano, Renato Mainetti, Gabriel Baud-Bovy, Pier Luca Lanzi and Nunzio Alberto Borghese. **Self-Adaptive Games for Rehabilitation at Home**	179-186

Sylvain Cussat-Blanc, Stephane Sanchez and Yves Duthen. **Controlling Cooperative and Conflicting Continuous Actions with a Gene Regulatory Network** 187-194

Luis Peña, Jose-Maria Peña, Simon Lucas and Sascha Ossowski. **Learning and evolving combat game controllers** 195-202

Timothy Davison and Jörg Denzinger. **The Huddle: Combining AI Techniques to Coordinate a Player's Game Characters** 203-210

Munir Naveed, Diane Kitchin, Andrew Crampton, Lukas Chrpa and Peter Gregory. **A Monte-Carlo Path Planner for Dynamic and Partially Observable Environments** 211-218

Diego Perez, Philipp Rohlfshagen and Simon Lucas. **Monte Carlo Tree Search: Long-term versus Short-term Planning** 219-226

Hendrik Baier and Mark H.M. Winands. **Beam Monte-Carlo Tree Search** 227-233

Edward J. Powley, Daniel Whitehouse and Peter I. Cowling. **Monte Carlo Tree Search with macro-actions and heuristic route planning for the Physical Travelling Salesman Problem** 234-241

Pierre Perick, David L. St-Pierre, Francis Maes and Damien Ernst. **Comparison of Different Selection Strategies in Monte-Carlo Tree Search for the Game of Tron** 242-249

Matthias Brandstetter and Samad Ahmadi. **Reactive Control of Ms. Pac Man using Information Retrieval based on Genetic Programming** 250-256

Johan Svensson and Stefan J. Johansson. **Influence Field-based Controllers for Ms PacMan and the Ghosts** 257-264

Tom Pepels and Mark H.M. Winands. **Enhancements for Monte-Carlo Tree Search in Ms Pac-Man** 265-272

David J. Gagne and Clare Bates Congdon. **FRIGHT: A Flexible Rule-Based Intelligent Ghost Team for Ms. Pac-Man** 273-280

Greg Foderaro, Ashleigh Swingler and Silvia Ferrari. **A Model-based Cell Decomposition Approach to Online Pursuit-Evasion Path Planning and the Video Game Ms. Pac-Man** 281-287

Marie Gustafsson Friberger and Julian Togelius. **Generating Interesting Monopoly Boards from Open Data** 288-295

Cameron Browne and Simon Colton. **Computational Creativity in a Closed Game System** 296-303

Noor Shaker, Miguel Nicolau, Georgios N. Yannakakis, Julian Togelius and Michael O'neill. **Evolving Levels for Super Mario Bros Using Grammatical Evolution** 304-311

Cameron McGuinness. **Statistical Analyses of Representation Choice in Level Generation** 312-319

Annika Jordan, Dimitri Scheftelowitsch, Jan Lahni, Jannic Hartwecker, Matthias Kuchem, Mirko Walter-Huber, Nils Vortmeier, Tim Delbruegger, Uemit Gueler, Igor Vatolkin and Mike Preuss. **BeatTheBeat Music-Based Procedural Content Generation In a Mobile Game** 320-327

Isaac Dart and Mark J. Nelson. **Smart Terrain Causality Chains for Adventure-Game Puzzle Generation** 328-334

Manuel Kerssemakers, Jeppe Tuxen, Julian Togelius and Georgios N. Yannakakis. **A procedural procedural level generator generator** 335-341

Samuel Roberts and Simon Lucas. **Evolving Spaceship Designs for Optimal Control and the Emergence of Interesting Behaviour** 342-349

Miguel Frade, Francisco Fernandez De Vega and Carlos Cotta. **Aesthetic Terrain Programs Database for Creativity Assessment** 350-354

Anja Johansson and Pierangelo Dell'Acqua. **Emotional Behavior Trees** 355-362

Reid Swanson, Dustin Escoffery and Arnav Jhala. **Learning Visual Composition Preferences from an Annotated Corpus Generated through Gameplay** 363-370

Dario Maggiorini, Antonio Nigro, Laura Anna Ripamonti and Marco Trubian. **The Perfect Looting System: looking for a Phoenix?** 371-378

Wichit Sombat, Philipp Rohlfshagen and Simon Lucas. **Evaluating the Enjoyability of the Ghosts in Ms Pac-Man** 379-387

Johan Hagelbäck. **Potential-Field Based navigation in StarCraft** 388-393

Nasri Othman, James Decraene, Wentong Cai, Nan Hu, Malcolm Yoke Hean Low and Alexandre Gouaillard. **Simulation-based Optimization of StarCraft Tactical AI through Evolutionary Computation** 394-401

Stefan Wender and Ian Watson. **Applying Reinforcement Learning to Small Scale Combat in the Real-Time Strategy Game StarCraft:Broodwar** 402-408

Gabriel Synnaeve and Pierre Bessière. **Special Tactics: a Bayesian Approach to Tactical Decision-making** 409-416

Antonio J. Fernández-Ares, Pablo García-Sánchez, Antonio Mora and J.J. Merelo. **Adaptive bots for real-time strategy games via map characterization** 417-423

Quentin Gemine, Firas Safadi, Raphaël Fonteneau and Damien Ernst. **Imitative Learning for Real-Time Strategy Games** 424-429

Jason Traish and James Tulip. **Towards Adaptive Online RTS AI with NEAT** 430-437

Jay Young, Fran Smith, Christopher Atkinson, Ken Poyner and Tom Chothia. **SCAIL: An integrated Starcraft AI System** 438-445
