

2012 IEEE 15th International Conference on Harmonics and Quality of Power

(ICHQP 2012)

**Hong Kong, China
17 – 20 June 2012**

**IEEE Catalog Number: CFP12CHP-PRT
ISBN: 978-1-4673-1944-7**

Paper Number	Paper Title	Page Number
0025	A Calibration Test Prototype of Flickermeter for Wind Turbines	29
0035	A Compact Genetic Algorithm Structure Used for the Optimum Allocation of Power Quality Monitors Based on Electrical Circuit Topology	34
0143	A Discussion about Load Modeling by Using Voltage Disturbance	40
0017	A European Benchmarking of Voltage Quality Regulation	45
0014	A harmonic-based Approach for Open-neutral fault Detection in Low Voltage Systems	53
0109	A Low-Voltage Hybrid Switch for Laboratory Experiments	59
0015	A New Technique to Detect Faults in De-Energized Distribution Feeders	64
0151	A New Time-Varying Harmonic Decomposition Structure Based on Recursive Hanning Window	70
0149	A Novel Control Method for Power Factor Compensation on Harmonic Distorted Low Voltage Power Systems	76
0001	A Novel Harmonic Reduction Technique for Controlled Converter by Third Harmonic Current Injection	84
0105	A novel method to improve the measurement accuracy of mutual inductance transmission line parameters	93
0092	A Parallel Hybrid Active Power Filter for Resonance Damping in Industrial Networks	99
0086	A Small-Signal Harmonic Model of A Closed-loop Power Converter	106
0112	A Solution for Voltage Regulation at LV Networks: Portable Regulator and Software	112
0089	A Study on Optimum Capacity of Battery Energy Storage System for Wind Farm Operation with Wind Power Forecasted Data	118
0177	A System-Wide Power Quality Monitoring using Machine-to-Machine Wireless Broadband Technology	124

Paper Number	Paper Title	Page Number
0087	Advanced Smart House	130
0130	Advanced Time Domain Method for Remote Wind Farms with LFAC Transmission Systems: Power Transfer and Harmonics	136
0110	Allocation of power harmonic filters using genetic algorithm	143
0173	An Alternative Use of Power Quality Information - Load Signature Studies & Applications	150
0034	An analysis of overvoltages in large MV-cable installations	156
0084	An Empirical Research on Application of Electric Vehicles	161
0095	An ICA-based Method for Adaptive Decomposition of Multiple PQ Disturbances	168
0187	An Improved Design of Conducted EMI Suppressing in SMPS	174
0067	An Improved Interharmonic Grouping Scheme based on IEC 61000-4-7	178
0194	Analysing effective lighting devices impact on power quality and electric grid efficiency by means of FBD-power theory	182
0183	Analysis of the Power Quality on the Busbar that feeds the Equipments of Instrument at the Marechal Rondon Airport	190
0045	Analysis of Voltage Sag in an Industrial Distribution System of the Provincial Electricity Authority of Thailand	197
0136	Analysis on tracking performance of d-q transformation based method	203
0059	Analytical model for stability analysis in high power ac/dc converters applied to the ITER case	209
0031	Application of Grey Predictor Model for Forecasting Flicker Severity Associated with Electric Arc Furnace Load	216
0158	Application of LV Active Filter in Battery Energy Storage System	220
0064	Application of Multi-agent System for Preventing Power Interruption in a Large Power System	226
0094	Application of the Double Domain Simulation in Comparison of New Current Control Methods for PWM Controlled AC Electric Locomotives	232

Paper Number	Paper Title	Page Number
0185	Applications of Tuned Passive Harmonic Filters in a Busbar With Non-linear Loads	238
0167	Aspects of Full Load Compensation with Active Filtering from a Tests Stand	245
0154	Assessment of Induction Motor Performance under Voltage Unbalance Condition	256
0099	Assessment of Emission Limits for Disturbing Installations Connected to HV Distribution Networks in AT, CH, CZ and GE	262
0102	Case Study: Flicker Emission and 3P Power Oscillations on Fixed-Speed Wind Turbines	268
0061	Characteristics of Power Quality Disturbance Levels in Australia	274
0153	Characterization of Electronic Converters by Time-Varying Harmonic Phasors and Waveforms	281
0066	Classification for Voltage Sags Based on Similarity of Generalized S-Transform Modulus Matrixes	288
0077	Comparative Evaluation of DG and PV-DG Capacity Allocation in a Distribution System	293
0142	Comparative Evaluation of DSTATCOM Control Algorithms for Load Compensation	299
0160	Comparative tests of power quality analyzers - harmonic distortion	307
0007	Comparison of harmonic emissions at two nodes in a windpark	313
0075	Comparison of LED and CFL Lamps and Their Impact on Electric Power Network	320
0027	Comparison of Methodologies for Assessment of Harmonic Current Emission Limits for Large Installations Connected to LV Networks	328
0083	Comparison of Operational Cost in Smart Houses with Introduction of Heat Pump or Gas Engine	336
0072	Comparitive Study of the Influence of Harmonic Voltage Distortion on the Efficiency of Induction Machines versus Line Start Permanent Magnet Machines	342

Paper Number	Paper Title	Page Number
0091	Component Modeling for High-Frequency Harmonic Analyses in the Scenario of Smart Grids	350
0111	Considerations on Harmonic Impedance Estimation in Low Voltage Networks	358
0155	Considerations on the Aggregation of Harmonics Produced by Large Wind Farms	364
0046	Construction and Application of Power Quality Online Monitoring and Management System in South Hebei Power Network	370
0005	Continuity of Supply and Voltage Quality in the Electricity Network of the Future	375
0048	Control of Single-phase UPQC in Synchronous d-q Reference Frame	378
0012	Control Strategies for Microgrid Power Quality Enhancement with Back-to-Back Converters Connected to a Distribution Network	384
0199	Current Practice and Future Challenges for Power Quality Monitoring - CIGRE WG C4.112 Perspective	390
0135	Design of Experiments for Sensitivity Analysis of Voltage Sags Variables	398
0124	Determining Frequency Dependent Equivalents through Evolutionary Algorithms	403
0132	Determining MPPT and Anti-Islanding Techniques in a Grid-Tie PV Inverter	409
0168	Diagnostic capabilities of voltage fluctuation indices - a case study	414
0081	The Analysis of Voltage and Current Unbalance by Application of Active and Reactive Power in the Fundamental Frequency Negative-Sequence Components	420
0080	Discussion on Instantaneous Reactive Power Theory and Currents' Physical Component Theory	427
0196	Dual synchronization incremental method for harmonic impedance measurement	433
0103	Economical Design Of Multiple-Arm Passive Harmonic Filters For An Industrial Firm – Case Study	438

Paper Number	Paper Title	Page Number
0039	Effectiveness of Use of the Energy Management System as a Mean for the Integration of Distributed Energy Sources in Low Voltage Network	445
0071	Emission from Four Types of LED Lamps at frequencies up to 150 kHz.	451
0041	Estimation of Harmonic Currents Injected by Nonlinear Loads for a Distorted Power Supply Scenario Using Artificial Neural Networks	457
0114	Evaluation of Assessment Methods used to Analyze Measured Voltage Magnitude Performance	463
0198	Evaluation of the Impacts of Electric Power Quality Costs in Industrial Production: Case Studies in Northeast Brazil	470
0171	Evolutionary strategies, a sensitivity-based approach for handling discrete variables in reactive power planning	476
0156	Experience in Online Power Quality Monitoring Through VPN	481
0115	Fault Zones Location on Distribution Systems Based on Clustering of Voltage Sags Patterns	486
0055	Feasibility Study of SVC Installation in a Substation Network for Voltage Fluctuation Mitigation	494
0131	Flexible Compensator for Systems with Non-Ideal Supply Voltage	499
0100	FPGA-based embedded system architecture for Power Quality measurements.	507
0096	Frequency-Domain Voltage Source Converter Model for Harmonic Analysis	512
0016	Fryze's Power Definition: Some Limitations	518
0157	Fuzzy Expert System Based Power Quality Meter Placement	523
0170	Grid connected and stand alone DC power system prototype	529
0150	Harmonic Analysis of Ferroresonance in Single-Phase Transformers	535
0162	Harmonic Analysis of the Secondary Distribution Network in Naval Systems	541

Paper Number	Paper Title	Page Number
0037	Harmonic Assessment of a Multi-Megawatt Wind Farm Incorporating a Robust and Computationally Efficient Metric to Quantify Harmonic Bursts	546
0069	Harmonic Emission before and after Changing to LED lamps ?Field Measurements for an urban area	552
0197	Harmonic Filters Planning of System for Specially Connected Transformers Using a PSO Method with Nonlinear Time-Varying Evolution	558
0023	Harmonic Impedance Measurement on Submarine Cable	564
0018	Harmonic Planning Levels in New Zealand Medium Voltage Networks	569
0032	Harmonic State-Space Modelling of an HVDC Converter	573
0024	Harmonic Summation and Assessment Based on Probability Distribution of Phase Angle	581
0013	Harmonics from a domestic customer with different lamp technologies	585
0159	High Power Quality level DC distribution system for woodworking plants	591
0129	Hybrid Simulation to Test Control Strategies in Active Power Filters using Generalized Power Tensor Theory	598
0038	Impact of Consorzio RFX facilities for thermonuclear fusion research on the Italian Extra High Voltage network	605
0026	Impact of Wind Generator Control Strategies on Flicker Emission in Distribution Networks	612
0174	Impact Study of Practical Harmonic Data Using Time Series Simulation	618
0098	Impacts of Distributed Generation on Voltage Sag Assessment in Thailand's Distribution Systems	624
0137	Implementation of the Neural Network for Tracing of Spot Welders	630
0186	Improvement of Available Load voltage for a constant speed WECS Coupled with Fuzzy-controlled DSTATCOM	637

Paper Number	Paper Title	Page Number
0068	Induction Motors Subject to Regular Voltage Fluctuations: Stator and Rotor Current Analysis from a Heating Perspective	642
0010	Information Extraction from PQ Disturbances - An Emerging Direction of Power Quality Research	649
0085	Load Frequency Control by using Demand Response with H_{∞} in Isolated Power Systems	656
0125	Locating Power Quality Meters in Order to Perform Harmonic State Estimation	662
0062	Modeling and Simulation of an AC Microgrid for Harmonics Study	668
0030	Monitoring Issues and Analysis Techniques- Smart Grid Aspect of Power Quality	673
0138	New Concepts for Steady State Voltage Standards	678
0107	On the Effects of Interharmonic Distortion on Grid Connected Three-Phase PV Inverters	682
0108	Operation Experience with a New Fault Location System for MV Networks	689
0047	Operation of Distribution Feeders with Electric Vehicle Charging Loads	695
0053	Optimal Control of Battery for Grid-Connected Wind-Storage System	701
0033	Optimal Data Compression Techniques for Smart Grid and Power Quality Trend Data	707
0123	Performance Analysis of an Advanced Parallel Static Compensator	713
0122	Performance Analysis of an Advanced Series Static Compensator	720
0145	Performances Evaluation of a Class of Original Discrete Wavelet Transform Based Hybrid Algorithms	727
0052	Photovoltaic MPPT Algorithm Based on Hysteresis Comparison and Optimal Gradient	733

Paper Number	Paper Title	Page Number
0180	Planning Method of Charging Infrastructure Based on Energy Equivalent	739
0093	Portable Measurement System for the Frequency Response of Voltage Transformers	745
0029	Power Quality & Reliability Assessment of Distribution System Considering Voltage Interruptions and Sags	751
0056	Power Quality Event Source Directivity Detection Based on V-I Scatter Graph	758
0144	Power Quality Management for Advanced Building Facilities	763
0054	Practical Method to Determine the Harmonic Contribution of a Specific Harmonic Load	769
0009	Propagation Mechanisms Research of Harmonics Produced by Distributed Generations in Distribution Network	774
0148	Pst Indicator's Value Estimation with Two Independent Amplitude Modulating Signals	778
0193	Reactive Power Estimation based control of Self Supported Dynamic Voltage Restorer (DVR)	785
0169	Real Time Power System Harmonic Distortion Assessment Virtual Instrument	791
0139	Reduced Multiconductor Transmission Line Models for Power Quality Analysis in Railway Systems	796
0161	Relationship between the Flicker Criteria ΔV_{10} and Pst	803
0021	Requirements for a modern PQ and DFR monitoring system - PQ monitoring case study in Portugal	809
0049	Research of Method for Voltage Sag Source Location in Power System	816
0106	RMS Percent of Wavelet Transform for the Detection of Stochastic High Impedance Faults	823
0074	SAX-based Classification of Non-Stationary Power Quality Waveform	829

Paper Number	Paper Title	Page Number
0097	A New Simplified Model of Compact Fluorescent Lamps in the Scenario of Smart Grids	835
0063	Smart Distribution Network Device for Microgrid Applications	842
0166	Stability Enhancement in DC Distribution Systems with Constant Power Controlled Converters	848
0043	Study on Capacity of Wind Power Integrated into Power System Based on Static Voltage Stability	855
0113	Survey and Applications of Interruption Costs in Large Customers	860
0146	Synergy between Renewable Sources and Electric Vehicles for Energy Integration in Distribution Systems	865
0133	System-Wide Power Quality Monitoring at the Consolidated Edison Company of New York	870
0050	The Evaluation on Costs of Power Disturbance Events to End-users	876
0184	The Influence of the Non-linearity of Electric Loads on Capacitive Compensation	880
0076	Two-Degree-of-Freedom H_{∞} Control Design for Harmonic Current Control of Shunt Active Filters	887
0163	Type Detection of Voltage Sags through Voltage Unbalance Factor	892
0104	Type Testing of a Highly Accurate Illuminance Flickermeter	897
0040	Using Energy Storage for Energy Management and Load Compensation in LV Microgrids	904
0128	Visualizing Two- and Three-Dimensional Maps for Power Quality Loss Assessment	909
0020	Voltage Dip Immunity of Equipment and Installations - Messages to stakeholders	915
0058	Voltage fluctuations in networks with distributed power sources	920
0006	Voltage quality monitoring, dips classification and responsibility sharing	926

Paper Number	Paper Title	Page Number
0078	Voltage Sag Frequency Assessment Considering the Coordination of Protection System	932
0028	Voltage unbalance management in power systems based on IEC 61000-3-13:2008: implications on the use of 'KuE factor'	936
0165	Web-based Platform for Exchangin Harmonic Emission Measurements of Electronic Equipment	943
0044	Working energy-based economic incentives for the supply and loading qualities improvement in islanded micro-grids	949
