TABLE OF CONTENTS

Page no.

Introduction by *Prof. Dr. J.D. van Manen*, Managing Director of the Maritime Research Institute Netherlands (MARIN). 1

EVALUATION AND PREVIEW OF SIMULATOR USE

Training and testing of pilots and VTS-operators on simulators in the Netherlands. 5

J. Hussum, C. de Froe, H.A. Dijkhuizen and J.H.M. Luchters, Directorate-General of Shipping and Maritime Affairs (DGSM), Rijswijk, The Netherlands.

J. Perdok and Th. Elzinga, Maritime Research Institute Netherlands (MARIN), Wageningen.

The United States Maritime Administration's ship simulation research program - the first decade. 15

Dr. Zelvin Levine, Maritime Administration, Office of Advanced Ship Operations, Washington, U.S.A.

Joseph J. Puglisi and H.O. Travis, Computer Aided Research Facility Operations (CAORF), National Maritime Research Center, King's Point, U.S.A.

Application of real-time ship manoeuvring simulator in the past ten years. 25

Yoshio Ohtagaki and Minoru Tanaka, Ishikawajima-Harima Heavy Industries Co. Ltd., Tokyo, Japan.

The role of NMI in simulation. 39

John Reynolds and Dr. Ian W. Dand, NMI, Feltham, United Kingdom.

NAUTICAL ASPECTS OF SIMULATOR TRAINING

Bridge simulator training system differences: third mate - pilot. 53

Dr. Thomas J. Hammell, Ship Analytics Inc., North Stonington, U.S.A.

Dr. John S. Gardenier, U.S. Coast Guard, Washington, U.S.A.

The combined training of vessel traffic services operators and shipmasters/pilots using a ship-handling simulator. 69

Capt. A.J. Rawson, School of Maritime Studies, South Glamorgan Institute of Higher Education, Cardiff, Wales, United Kingdom.

Equivalency of simulator exercises in meeting IMO training standards for real-world experience. 77

Cdr. Robert J. Meurn, U.S. Merchant Marine Academy, Kings Point, New York, U.S.A.

The 'full-mission' marine simulator as a teaching aid (an approach to a training philosophy).	87
<i>Capt. Prof. Claus Sander and Capt. Prof. Jens Froese, Hamburg Polytechnic, School of Maritime Studies, Ship Operation and Simulation Facility (SUSAN), Hamburg, Federal Republic of Germany.</i>	
The design, implementation and evaluation of simulatorbased bridge watchkeeping training for cadets.	95
<i>Capt. R.C. Beadon, College of Nautical Studies, Warsash, Southampton, United Kingdom.</i>	
 <i>HUMAN FACTOR ASPECTS AND SIMULATOR TRAINING</i>	
Evaluation of simulator-based training in visual navigation for junior Royal Navy officers and its transfer to sea.	109
<i>Lt. Cdr. W.E. Hurst, HMS Mercury, Petersfield, Hants, United Kingdom.</i>	
<i>Peter E. Reeve, Department of Applied Psychology, UWIST, Cardiff, United Kingdom.</i>	
Enhancing transfer to sea for a simulator-based research project.	121
<i>Myriam W. Smith, Ph.D., Ship Analytics Inc., North Stonington, U.S.A.</i>	
<i>Karl R. Schroeder, United States Coast Guard, Washington, U.S.A.</i>	
Use of simulators for radar and navigation training vs use of training vessels for the same purpose.	131
<i>Prof. Capt. C. Marcus, Bremen Polytechnic, Department of Nautical Studies, Bremen, Federal Republic of Germany.</i>	
<i>Prof. Dr. Capt. M. Jurdzinski, Wyzsza Szkoła Morska, Gdynia, Poland.</i>	
Human error and casualties - the exploration of cognitive and perceptual processes in the design of navigational judgement and decision-making training programmes.	141
<i>M. Barnett, Bsc. Master Mariner, Department of Maritime Studies, UWIST, Cardiff, United Kingdom.</i>	
<i>Peter E. Reeve, Department of Applied Psychology, UWIST, Cardiff, United Kingdom.</i>	
The interaction of rate of movement presentation with ship's controllability.	151
<i>H. Schuffel, Institute for Perception (TNO-IZF), Soesterberg, The Netherlands.</i>	

TRAINING FOR MACHINERY PLANTS CONTROL

- Development of a multi-configuration machinery space simulator and experiments in interfacing with a ship handling simulator.** 163
R.R. Spencer, Marine Engineers Beneficial Association, A.M.O., Florida, U.S.A.
E.A. Jones, Haven Automation Ltd., Swansea, United Kingdom.
R.C. Cook, Ship Analytics Inc., North Stonington, U.S.A.
- The use and development of a prototype marine diesel engine simulator.** 175
A.J. Weddle, Australian Maritime College, Launceston, Australia.
- The application of diesel machinery space simulator in teaching.** 185
Wu Heng and *Yu You-zong*, Dalian Marine College, Dalian, The People's Republic of China.
- Results of development and experimental operation of the new Marine Research and Training Center.** 195
A. Yakushenkov, D.Sc., Navigation Department, Merchant Marine Central Research Institute, Leningrad, U.S.S.R.

POSTER SESSION

THE DESIGN OF SIMULATORS AND MINI SIMULATORS

- The MINISIM, a mini-manoeuving simulator for on board use.** 201
Prof. J.A. Spaans, Consultant for Intersite Systems, Haarlem, The Netherlands.
- Versatile colour graphic systems for part and full task training in machinery control and cargo handling.** 203
G.A. Attrill, Rediffusion Simulation Ltd., Crawley, United Kingdom.
- The engine room training simulator.** 205
Odd R. Bjønness, A/S Kongsberg Vapenfabrikk Norcontrol, Horten, Norway.
- The liquid cargo handling simulator.** 207
Prof. Capt. H. Kaps, Bremen Polytechnic, Nautical Department, Bremen, Federal Republic of Germany.
- Ship's Control Centre - training simulation.** 209
C. van der Toorn, Van Rietschoten & Houwens, Rotterdam, The Netherlands.
- Modular Concept for ship handling simulator.** 211
Dr. Ing. Arne Baggerud, Seagull A/S, Horten, Norway.

TESTING OF EQUIPMENT

- The application of microsimulators in port design and shiphandling training courses.** 215
J. Perdok and Th. Elzinga, Maritime Research Institute Netherlands (MARIN), Wageningen, The Netherlands.
- Aids for the design of harbour structures and training of ship captains and pilots.** 227
J. Graff, Port Revel Centre, Saint-Pierre-de-Bressieux, France.
P.F. Demenet, Sogreah Consulting Engineers, Echirolles, France.
- The use of simulation at CAORF in determining criteria for increased throughput of ship traffic in the Panama Canal.** 239
Joseph J. Puglisi, U.S. Maritime Administration (MARAD), Computer Aided Operations Research Facility (CAORF), New York, U.S.A.
Anita d'Amico, Computer Aided Operations Research Facility (CAORF), New York, U.S.A.
Guillermo van Hoorde Jr., Panama Canal Commission, Apo, Miami, U.S.A.
- A simulator study for LNG transport by gas carriers to Eemshaven, The Netherlands.** 249
Th. Elzinga, Maritime Research Institute Netherlands (MARIN), Wageningen, The Netherlands.
M.P. Bogaerts, Ministry of Transport and Public Works (Rijkswaterstaat), Transportation and Traffic Engineering Division, Dordrecht, The Netherlands.
- A comparison between simulator and in-situ manoeuvres of container ships calling at the Port of Zeebrugge.** 259
L.M.J. van Broekhoven and B. Malherbe, Harbor and Engineering Consultants N.V. (HAECON), Gent, Belgium.
P. Kerckaert, Ministry of Public Works, Coastal Department, Oostende, Belgium.
Th. Elzinga and J. Perdok, Maritime Research Institute Netherlands (MARIN), Wageningen, The Netherlands.

TRAINING FOR NEW EQUIPMENT

- A simulator-based training research program for tugboat operations.** 271
Capt. Herbert F. Taylor, Jr., Computer Aided Operations Research Facility (CAORF), Kings Point, New York, U.S.A.
James Sanborn and David C. Buchanan, Sonat Marine Inc., U.S.A.

Handling of selfpropelled semisubmersibles during transit - development of a simulator for training of platform managers and pilots. 279

Dr. Tor Einar Berg, Ship Manoeuvring Simulator, Trondheim, Norway.

Kjell Martinussen and *Cato Wille*, Norwegian Hydrodynamic Laboratories, Trondheim, Norway.

The use of one-to-one simulators for floating equipment during the construction period of the Eastern Scheldt Storm Surge Barrier. 291

H.S.T. Brockhoff and *Ch.J.A. Hakkaart*, Dosbouw, Burgh-Haamstede, The Netherlands.

J.K. Vrijling, Delta Division, Ministry of Transport and Public Works, The Hague, The Netherlands.

A validation study concerning the lifting vessel 'Ostrea'. 301

R. Sellmeijer, Maritime Research Institute Netherlands (MARIN), Wageningen, The Netherlands.

J.A. Burg, Delta Division, Ministry of Transport and Public Works, The Hague, The Netherlands.

T.G. Gijzel, Dosbouw, Burgh-Haamstede, The Netherlands.

CONCLUSION

A view from the bridge: where are we going to? 313

J.B. van den Brug, Deputy-Director, Institute for Mechanical Constructions (TNO-IWECO), Delft, The Netherlands.

WORKSHOP

MATHEMATICAL MODELLING OF SHIP'S MANOEUVRING BEHAVIOUR

Simulation of the impact of channel design on the manoeuvrability of push-tows. 321

Ronald K. Gress, U.S. Coast Guard, Washington, D.C., U.S.A.

Dr. Larry L. Daggett, Waterways Experiment Station, U.S. Army Corps of Engineers, Vicksburg, Mississippi, U.S.A.

A handy-type marine simulator for ship manoeuvrability evaluation. 331

Masayoshi Hirano, *Junshi Takashina* and *Shuko Moriya*, Mitsui Engineering and Shipbuilding Co., Ltd., Akishima Laboratory, Tokyo, Japan.

A generalized definitive manoeuvres approach to piloted controllability. 341

Jack Schryver, Ph.D., Computer Aided Operations Research Facility (CAORF), New York, U.S.A.

- Determination of hydrodynamic coefficients by force excitation on free sailing ship models.** 353
W.A. de Vries, Delft Hydraulics Laboratory, Delft, The Netherlands.
- A six degrees of freedom ship model for computer simulation.** 365
R. Matthews, Maritime Dynamics Limited, Llantrisant, Wales, United Kingdom.
- "Which Model"? A critical survey of Ship Simulator mathematical models.** 375
Dr. Ian R. McCallum, University of Wales and Maritime Dynamics, Ltd., (U.K.)
- On a new mathematical model of manoeuvring motions of ships** 389
Kunji Kose, Department of Naval Architecture and Ocean Engineering, Hiroshima University, Japan.
- A comparative look at the performance of simulator mathematical models and future consideration.** 399
John S. Case and *Joseph J. Puglisi*, Computer Aided Operations Research Facility (CAORF), New York, U.S.A.
J.B. van den Burg, Institute for Mechanical Constructions (TNO-IWECO), Delft, The Netherlands.
