

2012 IEEE International Workshop on Information Forensics and Security

(WIFS 2012)

**Costa Adeje – Tenerife, Spain
2 – 5 December 2012**

**IEEE Catalog Number: CFP12WIF-PRT
ISBN: 978-1-4673-2285-0**

WIFS'12

IEEE International Workshop on Information Forensics and Security
Tenerife, Spain, December 2-5, 2012

<i>Detecting Fingerprint Distortion from a Single Image</i>	1
Xuanbin Si, Jianjiang Feng, and Jie Zhou	
<i>Novel Fingerprint Aging Features Using Binary Pixel Sub-Tendencies:</i>	
<i>A Comparison of Contactless CLSM and CWL Sensors</i>	7
Ronny Merkel, Jana Dittmann, and Claus Vielhauer	
<i>Facial Landmark Configuration for Improved Detection</i>	13
Chengwei Huang, Boris Efraty, Uday Kurkure, Xi Zhao, Manos Papadakis, Shishir Shah, and Ioannis Kakadiaris	
<i>Two-stage Appearance-based Re-Identification of Humans in Low-Resolution Videos</i>	19
Jürgen Metzler	
<i>Biometric Template Protection using Turbo Codes and Modulation Constellations</i>	25
Emanuele Maiorana, Daniele Blasi, and Patrizio Campisi	
<i>Can a "Poor" Verification System be a "Good" Identification System? A Preliminary Study.....</i>	31
Brian DeCann and Arun Ross	

WIFS'12

IEEE International Workshop on Information Forensics and Security
Tenerife, Spain, December 2-5, 2012

<i>Machine Learning Attacks on 65nm Arbiter PUFs: Accurate Modeling poses strict Bounds on Usability.....</i>	37
Gabriel Hospodar, Roel Maes, and Ingrid Verbauwhede	
<i>Towards reproducible results in authentication based on physical non-cloneable functions:</i>	
<i>the forensic authentication microstructure optical set (FAMOS).....</i>	43
Sviatoslav Voloshynovskiy, Maurits Diephuis, Fokko Beekhof, Oleksiy Koval, and Bruno Keel	
<i>Improving the DGK comparison protocol.....</i>	49
Thijs Veugen	
<i>General Function Evaluation in a STPC Setting via Piecewise Linear Approximation.....</i>	55
Tommaso Pignata, Riccardo Lazeretti, and Mauro Barni	
<i>A Framework for Privacy Preserving Statistical Analysis on Distributed Databases.....</i>	61
Bing-Rong Lin, Ye Wang, and Shantanu Rane	
<i>Modeling and Analysis of Electric Network Frequency Signal for Timestamp Verification</i>	67
Ravi Garg, Avinash L. Varna, and Min Wu	
<i>Telephone Handset Identification by Feature Selection and Sparse Representations.....</i>	73
Yannis Panagakis and Constantine Kotropoulos	
<i>Privacy-Preserving Architecture for Forensic Image Recognition</i>	79
Andreas Peter, Thomas Hartmann, Sascha Müller, and Stefan Katzenbeisser	
<i>Sequence Detection of Overlapping Latent Fingerprints Using a Short-term Aging Feature.....</i>	85
Maik Schott, Ronny Merkel, and Jana Dittmann	

Network Forensics

WIFS'12

IEEE International Workshop on Information Forensics and Security
Tenerife, Spain, December 2-5, 2012

<i>Semantic based DNS Forensics</i>	91
Samuel Marchal, Jérôme François, Radu State, and Thomas Engel	
<i>Fingerprinting a flow of messages to an anonymous server</i>	97
Juan A. Elices and Fernando Pérez-González	
<i>Detecting anomalous network hosts by means of PCA</i>	103
Tomáš Pevný, Martin Rehák, and Martin Grill	
<i>Forensic Analysis of Wireless Networking Evidence of Android Smartphones</i>	109
Panagiotis Andriotis, George Oikonomou, and Theo Tryfonas	
<i>A Least Squares Approach to User Profiling in Pool Mix-based Anonymous Communication Systems</i>	115
Fernando Pérez-González and Carmela Troncoso	
<i>Mapping Evidence Graphs to Attack Graphs</i>	121
Changwei Liu, Anoop Singhal, and Duminda Wijesekera	

WIFS'12

IEEE International Workshop on Information Forensics and Security
Tenerife, Spain, December 2-5, 2012

<i>Reverse Engineering of Double JPEG Compression in the Presence of Image Resizing</i>	127
Tiziano Bianchi and Alessandro Piva	
<i>Content Authentication and Identification under Informed Attacks</i>	133
Fokko Beekhof, Sviatoslav Voloshynovskiy, and Farzad Farhadzadeh	
<i>Forensic Analysis of Ordered Data Structures On The Example of JPEG Files</i>	139
Thomas Gloe	
<i>Preventing unauthorized copying of displayed information by utilizing differences in spectral sensitivity between humans and imaging devices</i>	145
Takayuki Yamada, Seiichi Gohshi, and Isao Echizen	
<i>Detection of video double encoding with GOP size estimation</i>	151
David Vázquez-Padín, Marco Fontani, Tiziano Bianchi, Pedro Comesaña, Alessandro Piva, and Mauro Barni	
<i>IPTV streaming source classification</i>	157
Miguel Masciopinto and Pedro Comesaña	

WIFS'12

IEEE International Workshop on Information Forensics and Security
Tenerife, Spain, December 2-5, 2012

<i>Effect of Cover Quantization on Steganographic Fisher Information</i>	163
Jessica Fridrich	
<i>An Efficient JPEG Steganographic Scheme Using Uniform Embedding</i>	169
Linjie Guo, Jiangqun Ni, and Yun Qing Shi	
<i>Active content fingerprinting: a marriage of digital watermarking and content fingerprinting</i>	175
Sviatoslav Voloshynovskiy, Farzad Farhadzadeh, Oleksiy Koval, and Taras Holotyak	
<i>AC-3 Bit Stream Watermarking</i>	181
Xiao-Ming Chen, Michael Arnold, Peter Baum, and Gwenaël Doërr	
<i>Decoding Fingerprints Using the Markov Chain Monte Carlo Method</i>	187
Teddy Furon, Arnaud Guyader, and Frédéric Céro	
<i>Weighted Stego-Image Steganalysis for Naive Content-Adaptive Embedding</i>	193
Pascal Schoettle, Stefan Korff, and Rainer Boehme	

WIFS'12

IEEE International Workshop on Information Forensics and Security
Tenerife, Spain, December 2-5, 2012

Media Forensics and Security

<i>Optimum Forensic and Counter-forensic Strategies for Source Identification with Training Data.....</i>	199
Mauro Barni and Benedetta Tondi	
<i>ML Estimation of the Resampling Factor</i>	205
David Vázquez-Padín and Pedro Comesaña	
<i>Detection and information theoretic measures for quantifying the distinguishability between multimedia operator chains.....</i>	211
Pedro Comesaña	
<i>Watermarking Method with Exact Self-Propagating Restoration Capabilities</i>	217
Sergio Bravo-Solorio, Chang-Tsun Li, and Asoke Nandi	
<i>Capacity Control of Reversible Watermarking by Two-Thresholds Embedding</i>	223
Ion Caciula and Dinu Coltuc	
<i>How to Find Relevant Training Data: A Paired Bootstrapping Approach to Blind Steganalysis</i>	228
Pham Hai Dang Le and Matthias Otto Franz	
<i>Designing Steganographic Distortion Using Directional Filters.....</i>	234
Vojtěch Holub and Jessica Fridrich	
<i>Dynamic Traitor Tracing for Arbitrary Alphabets: Divide and Conquer</i>	240
Thijs Laarhoven, Jan-Jaap Oosterwijk, and Jeroen Doumen	
<i>Low Level Crowd Analysis Using Frame-Wise Normalized Feature For People Counting</i>	246
Hajer Fradi and Jean-Luc Dugelay	
<i>Identify computer generated characters by analysing facial expressions variation</i>	252
Duc-Tien Dang-Nguyen, Giulia Boato, and Francesco G.B. De Natale	

Secure Communications

WIFS'12

IEEE International Workshop on Information Forensics and Security
Tenerife, Spain, December 2-5, 2012

<i>Non-regenerative Two-Hop Wiretap Channels using Interference Neutralization</i>	258
Sabrina Gerbracht, Eduard Jorswieck, Gan Zheng, and Björn Ottersten	
<i>End-to-end secure connection in heterogeneous networks for critical scenarios</i>	264
Romeo Giuliano, Alessandro Neri, and Damiano Valletta	
<i>Comparison of Different Attack Classes in Arbitrarily Varying Wiretap Channels</i>	270
Holger Boche and Rafael Felix Wyrembelski	
<i>Optimality of Beamforming for Secrecy Capacity of MIMO Wiretap Channels</i>	276
Jiangyuan Li and Athina Petropulu	
<i>Destination Assisted Cooperative Jamming for Wireless Physical Layer Security</i>	282
Yupeng Liu and Athina Petropulu
