2012 IEEE 3rd International Conference on Cognitive Infocommunications

(CogInfoCom 2012)

Kosice, Slovakia
2-5 December 2012

IEEE Catalog Number: CFP1226R-PRT
ISBN: 978-1-4673-5187-4

Table of Contents

On the perception of visual durational speech features: a comparison between native and nonnative speakers 11
Anna Esposito

Integration of CogInfoCom with semantic intelligent space 17
I. M. Fülöp, G. Magyar

A taxonomy of CogInfoCom trigger types in practical use cases 21
Á. Csapó, P. Baranyi, P. Várlaki

Bionics and CogInfoCom 27
V. Réti, Á. Csapó

Stabilization and synchronization of dynamicons through CogInfoCom channels 33
P. Baranyi, P. Galambos, Á. Csapó, P. Várlaki

Towards radical atoms – form-giving to transformable materials 37
D. Lakatos, H. Ishii

Non-verbal cognitive skills and autistic conditions: an analysis and training tool 41
H. Tanaka, S. Sakti, G. Neubig, T. Toda, N. Campbell, S. Nakamura

Cognitive infocommunications preferences of active senior citizens 47
B. Vági, T. Fegyó, Cs. Zainkó, G. Németh, A. Kolesinski

Laughter and topic changes: temporal distribution and informaiton flow 53
F. Bonin, C. Vogel, N. Campbell

Broadcast news transcription in Central-East European languages 59
B. Tarján, T. Mozsolics, A. Balog, D. Halmos, T. Fegyó, P. Mihajlik

Characteristic and spectral features used in automatic prediction of vowel duration in spontaneous speech 65
A. Beke, M. Gósy

Calculating Semantic Uncertainty 71
G. Wirsching

Prosodic forms and pragmatic meanings: the case of the discourse marker ‘no’ in Slovak 77
S. Benus

Acoustic, semantic and personality dimensions in the speech of traditional puppeteers 83
M. Rusko, J. Hamar, S. Benus

BCI and Virtual Collaboration 89
Á. Lóska

Establishment of the database storing and evaluating anthropometric data 95
M. Taliga, H. Kertész

Effect of therapeutic riding on the coordination of movements of blind children 99
H. Steiner

Effect of therapeutic riding on Center of Gravity (COG) parameters of blind children 103
H. Steiner, Z. Kertész

Effect of therapeutic riding on joint angles parameters of visually impaired children 109
H. Steiner, Z. Kertész

Saliency map estimation by constructing graphs of possible eye- tracking paths 137
Sz. Szalai, T. Szirányi, Z. Vidnyánszky

About the fixation points in stereo images 143
L. Czúni, J. P. Kiss

On order-independent sequential thinning 149
P. Kardos, K. Palágyi

Improving human-computer interaction by gaze tracking 155
Zs. Jankó, L. Hajder

Avoiding boredom and anxiety: a study for rehabilitation application 163
C. Redaelli, S. Mottura, M. Sacco

978-1-4673-5187-4/12 $31.00 © 2012 IEEE

Fuzzy Model based Differential IEC for Human-System Interaction in the VirCA Environment 169
Z. Krizsán, Sz. Kovács

Pattern Distillation Methods in Grammar Induction 175
L. Kovács, Zs. Tóth

Robot Controlling in Natural Language 181
L. Kovács, P. Barabás, M. Vircikova

Understanding cognitive aspects in measuring flexibility of a supply chain 187
W. D. Solvang, B. Solvang

A multi-objective decision support system (DSS) for simulation and optimization of municipal solid waste (MSW) management system..... 193
H. Yu, W. D. Solvang, S. Yuan

Decisions support for production control: Insights from industry 201
E. Arica, T. Nehzati, J. O. Strandhagen, H. H. Hvolby

A concept for collaborative supply chain order planning 207
E. Alfnes

Computational method for corrective mechanism of cognitive decision-making biases 211
P. Földesi, J. Botzheim

The human spatiotemporal comfort zone and its technology-based enhancement 219
D. Dori

Advanced virtual reality visualisation systems based on a meta-model dedicated to historical knowledge 225
B. Hervy, F. Laroche, J.-L. Kerouanton, A. Bernard

Cooperative tabletop working for humans and humanoid robots: early investigations into artifact indication 231
H. Z. H. Mamode, P. Bremner, T. Pipe, B. Carse

Artificial companion and acceptability a problem of design? 237
S. Pesty, D. Duhaut

Embedding the faetures of the users' physical environments to improve the feeling of presence in collaborative virtual environments 243
T.Duval, H.Nguyen, C.Fleury, A.Chauffaut, G.Dumont, V.Gouranton

Designing and evaluating a workstation: from the digital mock-up to the realization 249
C. Pontonnier, G. Dumont, A. Samani, P. Madeleine, M. Badawi

Global collaboration and transactional distance - development of a TD assessment instrument for the VISIONAIR Project 255
N. Wengrowicz, Y. J. Dori, D. Dori

Qualitative comparison of 2D and 3D perception for information sharing dedicated to manufactured product design 261
F. Noël, Anh Nguyen Nguyen Ba, S. Sadeghi

VirCA NET and CogInfoCom: novel challenges in future internet based augmented/virtual collaboration 267
C. Weidig, Á. Csapó, J. Aurich, B. Hamann

VirCA NET: A case study for collaboration in shared virtual space 273
P. Galambos, C. Weidig, P. Baranyi, J. C. Aurich, B. Hamann

Probabilistic bi-directional root-pattern relationships as cognitive model for semantic processing of arabic..... 279
B. Haddad

An ensemble-based collaborative framework to support customized user needs 285
A. Hajdú, J. Tóth, Z. Pistar, B. Domokos, Zs. Török

Cognitive aspects of a web-based geovisualization application..... 291
M. Zichar

Surrounding robots: a localized solution for the intruder problem 297
L. Blazovics, T. Lukovszki, B. Forstner

Towards biofeedback-controlled self-rewarding learning with mobile devices 303
L. Szegletes, B. Forstner

Resource requirement estimation of mobil supported websites 309
G. Kocsis, P. Ekler

Development and customization of individualized mobile healthcare applications 321
A. Minutolo, M. Esposito, G. De Pietro

Towards easier human-robot interaction to help inexperienced operators in SMEs 333
S. Pieskä, J. Kaarela, O. Saukko

Operational concepts in UAV formation monitoring of industrial emissions 339
R. Kristiansen, E. Oland, D. Narayanachar

Situation aware robots and transporters..... 345
J. Jämsä, S. Pieskä, M. Luimula, I. Siio, M. Komatsuzaki

RFID Communication in Container Ports 351
H. Hakam, W. D. Solvang

Pragmatics in the Usability discipline 359
A. S. Szőllősy, G. Vitályos

New trends in industrial robot controller user interfaces..... 365
A. Aryania, T. Thomessen, G. Sziebig

Thinking about the present and future of the complex speech recognition 371
K. Vicsi

Automatic prosodic and syntactic analysis from speech in Cognitive Infocommunication 377
Gy. Szaszák, A. Beke

A Cognitively-Inspired Method for Meaning Representation in Dialogue Systems 383
M. Gnjatović, V. Delić

Emotion recognition from spontaneous Slavic speech..... 389
H. Atassi, Z. Smékal, A. Esposito

Multimodal human detection and fuzzy decisional engine for interactive behaviors of a mobile robot..... 395
C. Granata, P. Bidaud

Examples of multimodal user interfaces for socially assistive robots in ambient assisted living environments..... 401
P. Mayer, C. Beck, P. Panek

Home deployment of a doubt removal telecare service for cognitively impaired elderly people: a field deployment 407
P.Rumeau, N.Vigouroux, B. Boudet, G. Lepicard, G. Fazekas, F. Nourhachemi, M. Savoldelli

“Kompaï, go docking please!”–large scale field test of a social robot in users’ homes 413
A.Tóth, G.Fazekas, T.Pilissy, K.Zsiga, D.Kovács, T. Nagy

Learning how to teach from „videolectures”: automatic prediction of lecture ratings based on teacher’s nonverbal behavior 415
P.Salvagnini, H. Salamin, M. Cristani, A. Vinciarelli, V. Murino

Key interpersonal communication skills for wheelchairs 421
V. Mast, D. C. Vale

Design and development of the Slovak multimodal dialogue system with the BML Realizer Elckerlyc..... 427
S. Ondas, J. Juhar

Annotating and analyzing emotions in a corpus of first encounters 433
C. Navarretta

Car driver skills assessment based on driving postures recognition 439
M.-I. Toma, L. Rothkrantz, Cs. Antonya

A system designed to control and monitor a flexible manufacturing system 447
A. D. Codescu, F. Sisak

Prediction emotion student module based on CVS-emotional agent for ATS platform 453
H. Moga, Cs. Antonya

On Industrial Robots and Cognitive Infocommunication..... 459
Bjørn Solvang

Methods and Trends in Development of Human-System Interaction Capabilities 465
László Kovács, University of Miskolc, Hungary

Intensity dependent interaction in audiovisual integration 469
Á. Török, K. K. Asbóth, F. Honbolygó, V. Csépe

Ventriloquism aftereffect in a virtual audio-visual environment 475
F. Honbolygó, L. Veller, V. Csépe

Modeling auditory stream segregation by predictive processes 479
I. Winkler, T. M. Bőhm, R. W. Mill, A. Bendixen, S. L. Denham

Enhancing intra-cognitive communication in product design with color-coded CAD models 487
A. Bertoni, Å. Ericson

Enhancing intra-cognitive communication between engineering designers and operators: A case study in the laser welding industry 493
C.Johansson, J.Frostevarg,A.Kaplan, M.Bertoni, K.Chirumalla

Changes in present product design - opportunities for industrial oriented research 499
H. Nergård, Å. Ericson

Discussing the role of the physical model in intra-cognitive communication 505
A. Håkansson, H. Nergård

Examination of the sensitivity of acoustic-phonetic parameters of speech to depression 511
K. Vicsi, D. Sztahó, G. Kiss

Epistemic signals and emoticons affect Kudos 517
C. Vogel, L. M. Sanchez

Topic change detection based on prosodic cues in unimodal setting 527
G. Esfandiari, I. Szekrényes

The role of discourse markers in the generation and interpretation of discourse structure and coherence 531
Á. Abuczki

Annotation of spoken syntax in relation to prosody and multimodal pragmatics 537
H. Kis, I. Szekrényes, A. Borbély, L. Hunyadi

Mulitmodality and spontaneity in human-computer interactions analogies of ontogeny 543
B. Alexa

A unifying framework for non-linear registration of 3D objects 547
Zs. Sánta, Z. Kató

High-quality structured-light scanning of 3D objects using turntable 553
Cs. Kazó, L. Hajder

4D Studio for Future Internet: improving foreground-background segmentation 559
C. Blajovici, D. Chetverikov, Zs. Jankó

Experimental results of evolving Takagi-Sugeno fuzzy models for a nonlinear benchmark 567
R-E. Precup, H-I. Filip, M-B. Radac, C. Pozna, C-A. Dragos, S. Preitl

A general formulation of abduction algorithms ..... N/A
C. Pozna, R-E. Precup

Cognitive Control Initiative 579
J. K. Tar, I. J. Rudas, K. Kósi, Á. Csapó, P. Baranyi

Fuzzy search space for correction of cognitive biases in constructing mathematical models 585
Zs. Dányádi, P. Földesi, L. T. Kóczy

Characterization techniques for user's preference and navigation 591
R. Mátrai, Zs. Kosztyán

Human-information interaction in 3d immersive virtual environments 597
A. Komlódi, K. Hercegfi, E. Józsa, M. Köles

Is the heart period variability-based usability measurement of mental effort robust enough against arm movements? 601
M. Köles, K. Hercegfi

Trust and credibility on the web: the relationship of web experience levels and user judgments 605
E. Józsa, A. Komlódi, R. Ahmad, K. Hercegfi

Basic verification of body sway characteristics for personal vehicle drivers 611
S. Ajisaka, S. Nakamura, T. Kubota, H. Hashimoto

Three-layered architecture with variable task flow for teleoperator 615
K. Hoshino, Y. Kunii

Tactile sensation using vibrotactile glove interface 621
Y. Muramatsu, M. Niitsuma

Mobile multimodal human-robot interface for virtual collaboration 627
Y. E. Song, M. Niitsuma, T. Kubota, H. Hashimoto, H. I. Son

Interactive visualisation in 3D 633
S. Kopácsi

Reuse and recycling for sustainability (research on product life- cycle management using cognitive info-communications) 645
György Kovács

On modeling non-word events in large vocabulary continuous speech recognition 649
G. Sárosi, B. Tarján, A. Balog, T. Mozsolics, P. Mihajlik, T. Fegyó

Application of the NAO humanoid robot in the treatment of marrow-transplanted children 655
E. Csala, G. Németh, Cs. Zainkó

A novel codebook-based excitation model for use in speech synthesis 661
T. G. Csapó, G. Németh

Multimodal conversational interaction with a humanoid robot 667
Á. Csapó, E. Gilmartin, J. Grizou, J. Han, R. Meena, D. Anastasiou, K. Jokinen, G. Wilcock

Integration of gestures and speech in human-robot interaction 673
R. Meena, K. Jokinen, G. Wilcock

Investigating the use of non-verbal cues in human-robot interaction with a Nao robot 679
J. Han, N. Campbell, K. Jokinen, G. Wilcock

Implementation and assessment of the automatic question generation module 687
L. Bednarik

Automatic bank office service providing based on semantic content of the client needs 691
L. Dudás

Possibilities of a multi-functional human-computer interaction in everyday life 697
T. Gregus, G. Geda, P. Magyar, I. Fazekas

Human-robot interaction: importance, opportunities, and educational responsibility in this regard 701
P. Magyar, G. Geda, T. Gregus, I. Fazekas

Our experiences during the development of the voice control for a monorail 705
A. Trohák, Z. Biró, L. Méhes, J. Mária Pintér

A virtual reality platform to study rf propagation in body area networks 709
K. Sayrafian-Pour, J. Hagedorn, W-B. Yang, J. Terrill

Predicting the sentiment in sentences based on words: an exploratory study on ANEW and ANET 715
D. Gokcay, E. Isbilir, G. Yildirim

Influence of simulation and real implementation skills on the cognitive learning aspects 719
M. Bayani

Context model for ability-based automatic UI generation 727
M. Macik

Is Cognitive Science a science at all? 733
M. Suwara, Jan W. Płazowski

Repairing conceptual relations in ontologies by means of an interactive visual reasoning: cognitive and design principles 739
G. A. Aranda-Corral, J. Borrego-Díaz, A. M. Chávez-González

Detecting and processing objects using radio waves and opto-electrical methods 745
E. Zubán, K. Kovács, H. Lábadi

Potential application of autonom and semiautonom robots in the study of animal behavior 759
Á. Miklósi, L. Gerencsér

Cellphone evolution – applying evolution theory to an info-communication system 763
T. Faragó, Á. Miklósi

Mutual communication in navigation of visually impaired 769
J. Balata, Z. Míkovec, P. Slavík

Application of predictive coding in the evolution of artificial neural network 775
H. Mohabeer, K.M.S Soyjaudah

Cutaneous mechanoreceptor simulator..... 781
D. Madrigal, G. Torres, F. Ramos, L. Vega

Realization of 3D Models for Virtual Reality by Use of Advanced Scanning Methods 787
J. Novak-Marcincin, J. Torok, J. Barna, M. Janak , L. Novakova-Marcincinova and V. Fecova

Entrainment in spontaneous speech: the case of filled pauses in Supreme Court hearings 793
Štefan Beňuš, Rivka Levitan and Julia Hirschberg
