

2012 2nd International Conference Methods and Systems of Navigation and Motion Control

(MSNMC 2012)

**Kiev, Ukraine
9 – 12 October 2012**

IEEE Catalog Number: CFP1250T-PRT
ISBN: 978-1-4673-2551-6

Table of Contents

PLENARY SESSION.....	7
Perspectives of Integrated Inertial-Satellite Systems Development of Civil Aviation Aircraft <i>V. M. Sineglazov, F. M. Zaharin</i>	9
Nonlinear Analysis and Tracking Control of Advanced Airframe Aircraft <i>Avnish P. S. Chauhan, Sergey E. Lyshevski</i>	13
Gyro-free Accelerometer-based SINS: Algorithms and Structures <i>V. Larin, A. Tunik</i>	18
Session A. METHODS, ALGORITHMS AND MEANS OF NAVIGATION AND MOTION CONTROL SYSTEMS COMPUTER-AIDED DESIGN.....	27
Computer-integrated Navigation Complex of Unmanned Aerial Vehicles <i>V. M. Sineglazov, M. K. Filiashkin, F. M. Zaharin</i>	29
Photopolarimetric Method of Estimating the Accuracy Characteristics of Onboard Vertical Meters in Flight Tests <i>M. M. Asanov, V. A. Rogozhin, A. V. Skrypets, V. D. Tronko</i>	34
Method of Complex Processing of Navigation Information for Vehicle <i>L. V. Aniskevych, F. M. Zaharin</i>	37
Kalman Filter Stationarity Analysis in the Problem of INS Errors Estimation <i>I. Rataichuk, V. Kortunov</i>	41
Theoretical Framework to Construct Optimal Flight Safety Diagnostic Procedures <i>Y. Opanasiuk</i>	45
Simulator as a Teaching System <i>S. P. Borsuk</i>	49
Aircraft's Trajectory in the Compressed Time Scale Prediction as the Flight Control On-board Systems Intellectualization <i>O. Melnykov, N. Apenko, O. Gaydamaka</i>	53
Visual SLAM Algorithm Using Correlation Extremal Principle <i>M. Mukhina</i>	56
Combined Complementary Filter For Inertial Navigation System <i>M. Filiashkin, M. Novik</i>	59
Method for Predicting a Failure Risk of the UAV Navigation Systems <i>O. Chumachenko, V. Gorbatuk</i>	63
Minimization of the Mean Access Time to the Hierarchical Memory System <i>A. Yurchenko, M. Tupitsyn, I. Stepaneneko</i>	66
Intelligent Capacitance Sensor with Linearization of Transfer Characteristic <i>I. Sergeev</i>	69
The Substantiating Number of Recommendations for Creation a Simulator for UAV Operator Training <i>M. Tupitsyn, A. Yurchenko</i>	72

Evaluation of Aerodynamic Coefficients of Longitudinal Short-Time Movement of Aircraft <i>A. N. Sylvestrov</i>	76
Software of Aviation Structures' Bench Tests <i>V. M. Sineglazov, V. P. Podolsky</i>	79
Modern Computer-Aided Design Systems of Navigation and Traffic Control <i>V. M. Sineglazov, A. V. Osadchy</i>	82
Structure of a Program and Technical Complex of the Automated Control System Navigation and Motion Control <i>V. M. Sineglazov, N. Belii</i>	85
Use of Kalman Filter in Orientation Systems <i>S. I. Askerov</i>	87
The Choice of the Solution Filtration Approaches in Task of Orientation <i>S. I. Askerov</i>	90
Synthesis of Truncated Filters in Task of Orientation <i>S. I. Askerov</i>	94
Session B. METHODS AND ALGORITHMS OF ADAPTIVE, ROBUST AND OPTIMAL MOTION CONTROL SYSTEMS SYNTHESIS.....	99
Robust Optimization of the Inertially Stabilized Platforms <i>O. A. Sushchenko, A. A. Tunik</i>	101
Least Squares Criterion Using to Improve the TRIAD Algorithm <i>L. M. Ryzhkov, D. I. Stepurenko</i>	106
Optimization of Decision-Making Process of Air Traffic Controller in Extra Situations at the Airport <i>D. O. Shevchuk, M. A. Vasilyev, M. P. Kravchuk, V. G. Vovk</i>	109
Reconfigurable Flight Control System Design for Aircraft when Unexpected Problem Occurs During Flight <i>V. M. Kazak, D. O. Shevchuk, Y. N. Bezkorovainij, E. M. Tachinina</i>	112
Modeling Temperature Errors in Coriolis Vibratory Gyroscopes <i>V. Apostolyuk, V. Chikovani</i>	116
Whole Angle Approximations of Aerodynamic Coefficients <i>Z. V. Didyk, V. A. Apostolyuk</i>	119
State Space Identification of Flight Dynamics Models <i>A. M. Klipa</i>	122
Optoelectronic Method of Measuring Phases Difference <i>A. V. Skrypets, V. D. Tronko, A. P. Slobodyan</i>	126
Application of Sheynin's Plural Calculations Method at the Initial Stages of Complex Technical Object Design <i>A. V. Abramova, D. I. Konotop</i>	129
MEMS Technology Microthrusters and Nanoenergetic Material for Mictopropulsion Systems <i>Karen S. Martirosyan, Sergey E. Lyshevski</i>	133
Nanotechnology Enabled Self-Sustained Power Systems and High-Power-Density Electronics for Autonomous Flight Vehicles <i>Trevor C. Smith, Sergey E. Lyshevski</i>	137

Application of Exceptional Non-Normalized Quaternions, Five-Dimensional Rotation Vectors and Their Algebras in Problems of Inertial Orientation <i>A. P. Panov, V. V. Tsysarzh</i>	143
Non-Classical Conjugate Vectors and Polar Differential Equations of Rotation in Orientation Problem <i>A. P. Panov, V. V. Tsysarzh</i>	147
Evaluation of delays encountered in control of UAV <i>R. Tkachov, V. Sineglazov</i>	149
Analysis of System Control Unmanned Aerial Vehicle <i>O. Ablesimov, K. Sarapina</i>	153
Automatic control system of low-altitude flight UAV <i>A. P. Kozlov</i>	156
Flying of the UAV by the solar energy <i>K. Sydorenko, V. Budko</i>	159
Ethernet based Aircraft Control <i>V. M. Konyushko</i>	161
Author Index	165
