

2013 ISSNIP Biosignals and Biorobotics Conference: Biosignals and Robotics for Better and Safer Living

(BRC 2013)

**Rio de Janeiro, Brazil
18 – 20 February 2013**

**IEEE Catalog Number: CFP1374K-PRT
ISBN: 978-1-4673-3024-4**

Paper ID	Title	Page No.	Page Count
1569661869	Classification of Executed Upper Limb Movements by Means of EEG	1	6
1569662047	Hand Gesture Recognition for the Control of an Exoskeleton	7	5
1569663263	Motor and Bioelectric Evaluation of Human Movements through Inertial and Myoelectric Sensors	12	5
1569664275	Dry electromyography sensor with tri-axial accelerometer wireless for movement assessments	17	5
1569670719	Gallstone Segmentation and Extraction From Ultrasound Images Using Level Set Model	22	6
1569673293	A Novel Multi-Resolution SVM (MR-SVM) Algorithm to Detect ECG Signal Anomaly in WE-CARE Project	28	6
1569675447	Analysis and Design of an Embedded System to aid the navigation of the Visually Impaired	34	6
1569675483	Rehabilitation Robotics and Serious Games: An Initial Architecture for Simultaneous Players	40	6
1569676753	Evaluation of Sensorimotor Rhythms to Control a Wheelchair	46	4
1569677105	An Embedded System for an EEG Based BCI	50	5
1569677279	Multi-Modal Interface for Communication Operated by Eye Blinks, Eye Movements, Head Movements, Blowing/Sucking and Brain Waves	55	6
1569678457	Cancellation of Ventricular Activity in Unipolar Endocardial Recordings During Atrial Fibrillation	61	6
1569678463	Upper limb exoskeleton control based on Sliding Mode Control and Feedback Linearization	67	6
1569679341	An ERD/ERS analysis of the relation between human arm and robot manipulator movements	73	7
1569679391	Class Specific Dynamic Feature selection technique - Towards human movement based biometrics application	80	4
1569679439	Investigation and Analysis of Low Frequency of Electromyogram during Isometric Contraction	84	4
1569680081	Dynamic Signatures Representation Using the Minimum Jerk Principle	88	6
1569680385	Analysis of Polynomial Behavior of the C3 Cervical Concavity to Bone Age Estimation Using Artificial Neural Networks	94	6
1569680467	Optimization of an Electromyography-Based Activity Recognition System	100	6
1569680495	Design of a Simulator for Eye and Hand Tracking Tasks under Horizontal Whole Body Vibration	106	5
1569680499	ICA feature extraction for spike sorting of single-channel records	111	5
1569680999	EEG Signal Classification in Usability Experiments	116	5
1569681143	The Use of Cross Correlation Function in Onset Detection of Electromyographic Signals	121	5
1569681291	Comparison of quadriceps and hamstrings activation ratio between healthy and anterior cruciate ligament reconstructed subjects	126	5
1569681319	Analyzing the Human Body Joints Range of Movement: The Use of Bendsensors	131	6
1569681363	Does Fractal Properties of Retinal Vasculature Vary with Cardiac Cycle ?	137	4
1569681389	Proposal of a Computational Interface of Biofeedback for Rehabilitation of Victims of Stroke	141	6
1569681813	Development of Microcontroller Based Ambulatory Instrument to Detect Drowsiness	147	4
1569682007	Music versus motor imagery for BCI systems A study using fMRI and EEG: preliminary results	151	6
1569682083	Using Color Histogram as the Trait of Retina Biometric	157	4
1569682253	Myoelectric control of a virtual hand based on third-order cumulants	161	5
1569682271	Dealing with Childhood Obesity: Passive versus Active Activity Monitoring Approaches for Engaging Individuals in Exercise	166	5
1569682419	A study of the Naïve Bayes classifier for analyzing imaginary movement EEG signals using the Periodogram as spectral estimator	171	4
1569682591	Estimation of Lower Limbs Angular Positions using Kalman Filter and Genetic Algorithm	175	6
1569682757	Virtual electric wheelchair simulator controlled by electromyographic signals	181	5
1569682783	Independent Component Analysis to Remove ECG interference from Single Channel Electromyographic Signal	186	5
1569682829	Assistive Technologies That Are Meant to Integrate Brain and Computer: Accepted or Rejected by Society?	191	4
1569682991	Towards sEMG Classification Based on Bayesian and k-NN to Control a Prosthetic Hand	195	6
1569683167	Cognitive task discrimination using approximate entropy (ApEn) on EEG signals	201	4
1569683225	Electromyographic analysis of transient postural responses to anterior-posterior platform translations	205	4
1569684245	Real-Time Control of Finger and Wrist Movements in a Virtual Hand Using Traditional Features of sEMG and Bayesian Classifier	209	5
1569686447	Lomb-Scargle periodogram applied to heart rate variability study	214	4
1569686695	Evaluation of the Movement Imagination training using the Principal Component Analysis and Magnitude-Squared Coherence as extractors of features	218	5
1569689277	Antagonistic Mono- and Bi-Articular Pneumatic Muscle Actuator Control for Gait Training System using Contraction Model	223	6
1569689701	A Friendly Mobile Entertainment Robot for Disabled Children	229	6
1569689967	Mathematical Verification of Summary Formula in Retinal Vessel Diameter Measurement	235	4

Paper ID	Title	Page No.	Page Count
1569689989	The powered gait training system using feedback from own walking information	239	5
1569690041	Removal Of EOG From EEG By Adaptive Filtering Without Using Artifact Reference	244	4
1569690113	Omnidirectional Mobile Robots Navigation: A Joint Approach Combining Reinforcement Learning and Knowledge-based Systems	248	6
1569690261	Perception of BCI Assistive Technology by Post-Ischemic Stroke Patients	254	5
1569690341	Evaluation of ERD/ERS Caused by Unpleasant Sounds to be Applied in BCIs	259	5
1569690577	Effective Seizure Detection through the Fusion of Single-Feature Enhanced-k-NN Classifiers of EEG Signals	264	6
1569690587	Real-Time 3D Pointing Gesture with Kinect for Object-based Navigation by the Visually Impaired	270	6
1569690613	Cerebellar-inspired bi-hemispheric neural network for adaptive control of an unstable robot	276	4
1569690663	Use of Computer Vision for Localization of a Robotic Wheelchair in an Intelligent Space	280	6
1569690733	Modeling of dynamic platelet aggregation in response to shear rate micro-gradients in a microfluidics device	286	5
1569690749	Model-based Design of Novel Human-Computer Interfaces	291	7
1569690827	Positive and Negative motor signs of Head motion in Cerebral Palsy. An analysis based on a wearable inertial human computer interface	298	5
1569690847	A virtual electromyographic biofeedback environment for motor rehabilitation therapies	303	4
1569690879	Imaging and video technology for affordable health	307	6
1569690883	On the Use of Cepstral Coefficients, Multilayer Perceptron Networks and Gaussian Mixture Models for Vocal Fold Edema Diagnosis	313	6
1569690915	Multiple Pathways Network Description of Motor Neurons in Locusts: An Information Sensitivity Analysis	319	6
1569690961	Design of a EMG wireless surface 6	325	6
1569691015	High-Frequency Oscillations (HFOs) in Electroencephalography: Review and Case Study	331	5
1569691019	Age related changes in the complexity of Surface EMG in biceps: A Model based study	336	4
1569691061	Reducing the Limb Position Effect in Pattern Recognition Based Myoelectric Control using a High Density Electrode Array	340	5
1569693749	Low cost EEG Signal Acquisition System	345	3
1569694429	Medical Imaging and Processing for Affordable Health Care	348	6
1569695009	Retinal Vascular Feature Analysis Using Color Fundus Imaging	354	9
1569695401	Novel VAMPIRE algorithms for quantitative analysis of the retinal vasculature	363	4
1569698235	Applying mobile phone technology for making health and rehabilitation monitoring more affordable	367	5
