Technical Papers

A Data Security Protection Mechanism Based on Transparent Biometric Authentication for Mobile Intelligent Terminals	1
<i>Donghong Sun, Wu Liu, Ping Ren, and Dongbin Sun</i>	
Authorship Attribution of IRC Messages Using Inverse Author Frequency	7
<i>Robert Layton, Stephen McCombie, and Paul Watters</i>	
Challenges to Automated Allegory Resolution in Open Source Intelligence	14
<i>Paul A. Watters</i>	
Characterising Network Traffic for Skype Forensics	19
<i>Ahmad Azab, Paul Watters, and Robert Layton</i>	
Identifying Cyber Predators through Forensic Authorship Analysis of Chat Logs	28
<i>Faith Amuchi, Ameer Al-Nemrat, Mamoun Alazab, and Robert Layton</i>	
Malicious Code Detection Using Penalized Splines on OPcode Frequency	38
<i>Mamoun Alazab, Mohammad Al Kadiri, Sitalakshmi Venkatraman, and Ameer Al-Nemrat</i>	
Malware Expert: Execution Tracking	48
<i>Sean Park</i>	
Mobile Intelligent Terminal Based Remote Monitoring and Management System	56
<i>Wu Liu, Ping Ren, Donghong Sun, and Haibin Xiong</i>	
Prudent Fraud Detection in Internet Banking	60
<i>Oarabile Omaru Maruatona, Peter Vamplew, and Richard Dazeley</i>	

Strategies for Neutralising Sexually Explicit Language	66
<i>George R. S. Weir and Ana-Maria Duta</i>	
Towards an Implementation of Information Flow Security Using Semantic Web Technologies	75
<i>Oana Ureche, Robert Layton, and Paul Watters</i>	
Author Index	81
