

# **2013 Sixth Latin-American Symposium on Dependable Computing**

**(LADC 2013)**

**Rio de Janeiro, Brazil  
1 – 5 April 2013**

**IEEE Catalog Number: CFP13LAD-PRT  
ISBN: 978-1-4673-5746-3**

# 2013 6th Latin-American Symposium on Dependable Computing

## LADC 2013

### Table of Contents

Message from the General Chair.....	vii
Message from the Programme Chairs.....	ix
Organising Committee.....	xi
Programme Committee.....	xiii
Steering Committee.....	xvã
Extra Reviewers.....	xviã
Keynotes.....	xviiã

---

#### **TS1: Dependability of Software**

Robustness Evaluation of Controllers in Self-Adaptive Software Systems .....	1
<i>Javier Cámara, Rogério de Lemos, Nuno Laranjeiro, Rafael Ventura, and Marco Vieira</i>	
Reliability Analysis of Software Architecture Evolution .....	11
<i>João M. Franco, Raul Barbosa, and Mário Zenha-Rela</i>	
A Model-Driven Approach for Runtime Reliability Analysis .....	21
<i>Dominik Sojer, Frank Reichenbach, Stein-Erik Ellevseth, Christian Buckl, and Alois Knoll</i>	
Multi-hypothesis GPS and Electronic Fence Data Fusion for Safety-Critical Positioning in Railway Worksites .....	31
<i>Joao Figueiras, Jesper Grønbaek, Hans-Peter Schwefel, and Andrea Bondavalli</i>	
Accelerating Online Model Checking .....	40
<i>Mona Qanadilo, Sufyan Samara, and Yuhong Zhao</i>	

## **TS2: Dependable and Secure Computing**

Diagnosis of Content Pollution in P2P Live Streaming Networks .....	48
<i>Roverli P. Ziwich, Emanuel A. Schmidt, Elias P. Duarte, and Ingrid Jansch-Pôrto</i>	
A Static Analysis of Dynamic Fault Trees with Priority-AND Gates .....	58
<i>Jianwen Xiang, Fumio Machida, Kumiko Tadano, Kazuo Yanoo, Wei Sun, and Yoshiharu Maeno</i>	
Battling Bad Bits with Checksums in the Loris Page Cache .....	68
<i>David C. van Moolenbroek, Raja Appuswamy, and Andrew S. Tanenbaum</i>	
An Automated Approach to Generate Web Applications Attack Scenarios .....	78
<i>Eric Alata, Mohamed Kaâniche, Vincent Nicomette, and Rim Akrouf</i>	

## **Practical Experience Reports**

The Time Dimension in Predicting Failures: A Case Study .....	86
<i>Ivano Irrera, Carlos Pereira, and Marco Vieira</i>	
Assessing the Impact of Virtualization on the Generation of Failure Prediction Data .....	92
<i>Ivano Irrera, Joao Duraes, Henrique Madeira, and Marco Vieira</i>	
Defining a Representative and Low Cost Fault Model Set for Intermittent Faults in Microprocessor Buses .....	98
<i>Joaquín Gracia-Morán, Daniel Gil-Tomás, Luis-J. Saiz-Adalid, J.-Carlos Baraza-Calvo, and Pedro-J. Gil-Vicente</i>	

## **TS3: Dependability of Networks**

Data Center Fault-Tolerant Routing and Forwarding: An Approach Based on Encoded Paths .....	104
<i>Ramon Marques Ramos, Magnos Martinello, and Christian Esteve Rothenberg</i>	
Automatically Tolerating Arbitrary Faults in Non-malicious Settings .....	114
<i>Diogo Behrens, Stefan Weigert, and Christof Fetzer</i>	
Slicing as a Distributed Systems Primitive .....	124
<i>Francisco Maia, Miguel Matos, Rui Oliveira, and Etienne Rivière</i>	
<b>Author Index</b> .....	134
