

# **2013 12th International Conference on Environment and Electrical Engineering**

**(EEEIC 2013)**

**Wroclaw, Poland  
5-8 May 2013**

**IEEE Catalog Number: CFP1351I-POD  
ISBN: 978-1-4673-3060-2**

## Table of Contents

Induction Cooker Design with Quasi Resonant Topology using Jitter Drive Method.....	1
<i>Mehmet Emin Tulu and Deniz Yildirim</i>	
Software Tool to Detect Hot Spots on Electrical Insulators .....	7
<i>Ricardo Diaz and John Candelo</i>	
Photovoltaic reactive power limits .....	13
<i>Ricardo Albarracín and Mónica Alonso</i>	
Electric and hydrodynamic fields distribution in an electrofilter for dielectric liquids .....	19
<i>Narcis Ostahie, Tudor Sajin and Mihai Puiu-Berizințu</i>	
Comparison Study Between two Dynamic Breaking Resistor Techniques in Protecting the Doubly Fed Induction Generator .....	25
<i>Hadi El-Helw and Ahmed Khaled</i>	
Automatic Calibration System for Electrical Sourcing and Measuring Instruments .....	30
<i>Ali El-Rifaie and Hala Abdelmageed</i>	
Hysteresis Current-Control Strategy for Single-Phase Half-Bridge Shunt Active Power Filters .....	35
<i>Hasan Komurcugil</i>	
Fault Location in Combined Overhead Line and Underground Cable Distribution Networks Using Fault Transient Based Mother Wavelets .....	41
<i>Behnam Feizifar, Mahmoud Reza Haghifam, Soodabeh Soleymani and Amirsam Jamilazari</i>	
On-Line HEV Energy Management Using Fuzzy Logic.....	46
<i>Yacine Gaoua, Stephane Caux, Pierre Lopez and Josep Domingo</i>	
Maximum Power Point Tracking for Irregular Irradiance of a Photovoltaic Array .....	52
<i>Hadi Elhelw, Muhamad Hassanien and Hamdy Ashour</i>	
Power Quality Data Evaluation in Distribution Networks Based on Data Mining Techniques .....	58
<i>Tongyou Gu, P. Kadurek, J.F.G. Cobben and A.W. Endhoven</i>	
Enhancing stability of a weakly connected AC power system by supplementary control of embedded HVDC lines .....	64
<i>Lukasz Nogal</i>	
The Wireless Transmission Design of a Novel Electronic Current Transformer.....	72
<i>Yan-Ru Chen, Kun-Long Chen, Yuan-Pin Tsai and Nanming Chen</i>	
Energy Efficiency and Environmental Impact of Small Markets in Barranquilla-Colombia .	77
<i>John Candelo, Jose Soto, Christian Bernal and Giuliano Rodríguez</i>	
Simulating the Power System Dynamics and Energy Consumption in a Hydrogen Bus ....	82
<i>Jan Kyncl, Adithya Hariram, Pavel Matyska and Richard Najman</i>	

Thin-film Luminescent Solar Concentrators: Optimization and Photo-Stability Study of a Model Device based on a Perylene Fluorescent Dye .....	89
<i>Gianmarco Griffini, Marinella Levi and Stefano Turri</i>	
Reliability model to estimate power quality and reliability of supply .....	94
<i>Florin Munteanu, Ciprian Nemes, Monica Atudori and Loredana Galca</i>	
Power system stability screening for long-term planning of transmission network development .....	100
<i>Jan Machowski, Piotr Kacejko, Sylwester Robak, Piotr Miller and Marek Wancercz</i>	
New Approach of PV Cell Efficiency .....	106
<i>Horia Andrei, Gheorghe Nicolaescu, Stefan Radulescu and Paul Cristian Andrei</i>	
Partial discharge in Gas Insulated Substations (GIS): A Development and Engineering Perspective .....	112
<i>Vaibhav Aaradhi and Ketaki Gaidhani</i>	
Multi-objective Locating and Sizing Optimization of Distributed Generation.....	118
<i>Wei Dai</i>	
An Optimal PMU Placement Method Considering Bus Weight and Voltage Stability.....	124
<i>Xiaolin Gao</i>	
A New Evolutionary Framework for Electrical Vehicle Integration in Electric Energy Markets.....	130
<i>Leontina Pinto, Jacques Szczupak, Marcelo Fernandez and Robinson Semolini</i>	
Consideration of Multi-Phase Criterion in the Differential Protection Algorithm for High-Impedance Grounded Synchronous Generators .....	135
<i>Francisco R. Blázquez, Emilio Rebollo, Ricardo Granizo and Carlos A. Platero</i>	
Specification of meteorological data requirements for a wind power infeed model used in power system simulator .....	140
<i>Nico Brose</i>	
Comparison of different approaches to arc fault location on power transmission lines.....	145
<i>Mateusz Pustulka, Jan Iżykowski and Mirosław Lukowicz</i>	
Real Time Power Plant Simulation Platform for Training on Electrical Protections and Automatic Voltage Regulators.....	150
<i>Francisco R. Blázquez, Emilio Rebollo, Francisco Blázquez and Carlos A. Platero</i>	
Training sample dimensions impact on artificial neural network optimal structure.....	156
<i>Vadim Manusov, Ilya Makarov, Stepan Dmitriev and Stanislav Eroshenko</i>	
Analysis of the Dynamic Behaviour of a DFIG during Grid Disturbances using Active Crowbar Protection .....	160
<i>Hammam Soliman, Rania M. El-Sharkawy, Mostafa I. Marei and Khaled El-Bahrawy</i>	
Frequency domain model of the electrical arc and its verification.....	164
<i>Piotr Świszcz</i>	
An algorithm for assessment of the impact of renewable energy sources on the power flow of the electric power system .....	169
<i>Nikolay Nikolaev, Konstantin Gerasimov, Yulian Rangelov and Krum Gerasimov</i>	

Influence of wind turbine generators on the frequency of the electric power system during large disturbances.....	175
<i>Nikolay Nikolaev, Yulian Rangelov, Krum Gerasimov and Konstantin Gerasimov</i>	
Simulation of the Process of Arising and Limitation of Lightning Surges in Medium Voltage Power Grids .....	180
<i>Margreta Vasileva, Marinela Yordanova, Yulian Rangelov and Nikolay Nikolaev</i>	
Some Considerations About Maintenance Optimization of Wind Power Turbines.....	186
<i>Roxana Grigore, Gheorghe Hazi, Aneta Hazi and Sorin Vernica</i>	
Overview and Test Results of Modern Pilot Schemes for Coordination of Line Distance Protection Relays .....	191
<i>Emil Bartosiewicz, Ryszard Kowalik and Marcin Januszewski</i>	
Resonance phenomena in circuits with ultracapacitors .....	197
<i>Dominik Sierociuk, Grzegorz Sarwas and Maciej Twardy</i>	
Mid-term Generation Scheduling on the Basis of a Bi-Level Optimization Problem.....	203
<i>Igor Nechaev and Sergey Palamarchuk</i>	
Comparison of different control strategy of Conventional and Digital Controller for Active Power Line Conditioner (APLC) For Harmonic Compensation.....	209
<i>Saswat Kumar Ram and Bane Bandana Das</i>	
Testing Thermal Rating Methods for the Overhead High Voltage Line.....	215
<i>Svetlana Berjozkina, Antans Sauhats, Aldis Banga and Igors Jakusevics</i>	
Research of Electromagnetic Shielding within Buildings near Transmission Line based on FEM .....	221
<i>Weidong Liu, Wei Shi, Ming Lv and Gang Xu</i>	
Research on electromagnetic character of 500/220kV mixed-voltage quadruple-circuit transmission line.....	227
<i>Weidong Liu, Kun Liu, Mingjiu Pan and Gang Xu</i>	
Energy storage system in the medium-voltage network.....	232
<i>Marco Fleckenstein, Marc Eisenreich and Gerd Balzer</i>	
Optimize efficiency and torque in the single-phase induction motor by adjusting the design parameters.....	237
<i>Sobhan Sobhani, Hamid Yaghobi and Mehdi Samakoosh</i>	
Replace the centrifugal switch in single-phase induction motor with intelligent electronic device to improve performance and efficiency .....	242
<i>Sobhan Sobhani, Hamid Yaghobi and Mohsen Kariman Majd</i>	
Novel Multi-Stage Simulated Annealing for Optimal Placement of PMUs in Conjunction with Conventional Measurements.....	248
<i>Gopakumar Pathirikkat, M Jaya Bharata Reddy and Dushmantha Mohanta</i>	
Coexistence of Different Load Shedding Algorithms in Interconnected Power System.....	253
<i>Roman Petrichenko, Vladimir Chuvychin and Antan Saulus Sauhats</i>	

Short-Term Hydrothermal Dispatch and Demand Management with Evolutionary Algorithms.....	259
<i>Thaís Araújo, Wadaed Uturbey and Leticia Nunes</i>	
Chance Constrained Optimal Power Flow with Non-Gaussian Distributed Uncertain Wind Power Generation.....	265
<i>Michael Klöppel, Aouss Gabash, Abebe Geletu and Pu Li</i>	
Multi-Battery Management Under Real-Time Pricing for Industrial Facility Applications .	271
<i>Guido Carpinelli, Shahab Khormali, Fabio Mottola and Daniela Proto</i>	
GIS University Course for Senior Electrical Engineering Students.....	277
<i>Mahmoud Hassan and Saed Abu Helwa</i>	
Applications of Type-2 Fuzzy Logic in Power Systems: A Literature Survey .....	282
<i>K. Ajay Varma, Dushmantha Mohanta and M Jaya Bharata Reddy</i>	
Effect of Switching on Standby Redundancy Operating Mode of Phasor Measurement Unit(PMU) .....	287
<i>Dushmantha Mohanta, Cherukuri Murthy, Maibam Shillakanta Singh and Diptendu Sinha Roy</i>	
The influence of vehicle hull on a radiated emission.....	292
<i>Vasilijs Zilajevs and Harald Schwarz</i>	
A Comparative Performance Analysis of Three Differential Current Measuring Principles Associated with Phase Shifting Transformer Protection .....	297
<i>Umar Khan and Tarlochan Sidhu</i>	
Loss Modeling of Magnetic Cores on the Basis of Low Frequency Data for Engineering Purposes.....	303
<i>Michael Freiburg and Frank Jenau</i>	
Time Domain Analysis of Partial Discharges at DC Voltage in Air and Insulation Oil.....	308
<i>Tobias Klueter, Jonathan Wulff and Frank Jenau</i>	
High voltage substation electromagnetic field component measured values analysis. Sibiu Sud Substation Case Study.....	313
<i>Vatau Doru, Frigura Iliasa Flaviu Mihai and Rancov Sorin</i>	
Dependability in Electrical Power Systems Exposed to Seismic Hazard.....	319
<i>Luigi Martirano and Luigi Parise</i>	
The relation between smart meters and electricity consumers .....	325
<i>Ioana Opris and Lusine Caracasian</i>	
Algorithm of Smart Control System Operation of Small Hydropower Plant .....	330
<i>Inga Umbrasko, Renata Varfolomejeva and Anatolijs Mahnitko</i>	
A Novel Straightforward Compromising Method for Dynamic Economic and Emission Dispatch Considering Valve-Point Effect.....	335
<i>Mahdi Pourakbari Kasmaei, Marcos Julio Rider Flores and Jose Roberto Sanches Mantovani</i>	

Magnetically Coupled Wireless Communication for Buried Environmental Sensor . . . . .	341
<i>Colm Mc Caffrey, Janne Häkli, Mervi Hirvonen, Ismo Huhtinen, Kaj Nummila and Timo Lehikoinen</i>	
Electromagnetic Transient Programs and the Photovoltaic Input . . . . .	346
<i>Andreas Theocharis and Eleftheria Pyrgioti</i>	
LVRT capability of wind farms . . . . .	352
<i>Hortensia Amaris, Carlos Alvarez-Ortega, Lorena G.Gonzalez and Monica Alonso</i>	
Optimal Placement and Tuning of TCSC for Damping Oscillations . . . . .	358
<i>Maryam Mohiti, Mahtab Khalilifar, Ahmad Salehi and Rahim Zeinali</i>	
A case study of a commercial/residential microgrid integrating cogeneration and electrical local users . . . . .	363
<i>Luigi Martirano, Alessandro Di Giorgio, Francesco Liberati and Serena Fornari</i>	
Technologies for Smart Grids: a brief review . . . . .	369
<i>Luigi Martirano, Maria Carmen Falvo, Danilo Sbordone and Enrico Bocci</i>	
Wind and Solar Energy Assessment of Northern Cyprus . . . . .	376
<i>Mehmet Yenen and Murat Fahrioglu</i>	
Analysis of the Electricity Demand Patterns of a Building in a University Campus . . . . .	382
<i>Ioannis Panapakidis, Theofilos Papadopoulos, Georgios Christoforidis and Grigoris Papagiannis</i>	
Frequency analysis of micro wind turbine vibrations using the MUSIC method . . . . .	388
<i>Daria Wotzka, Tomasz Boczar and Radosław Pierzga</i>	
Analysis of low-frequency acoustic signals emitted by low-power vertical axis wind turbine VAWT . . . . .	394
<i>Radosław Pierzga and Tomasz Boczar</i>	
Analysis of infrasound noise emitted by high-power wind turbine with synchronous generator . . . . .	400
<i>Tomasz Malec and Tomasz Boczar</i>	
A Risk-Considered Stochastic Home Load Management under Real-Time Electricity Prices . . . . .	406
<i>Seyed Mohammad Sadat Kiaee, Seyed Hossein Hosseinian and Mehrdad Abedi</i>	
Analysis of infrasound noise emitted by high power wind turbine with asynchronous generator for selected resonant and median frequencies . . . . .	412
<i>Tomasz Malec and Tomasz Boczar</i>	
New proposal for the assessment of the impact of EVs, smart charging and V2G on the grid . . . . .	417
<i>Fabrizio Fattori, Norma Anglani and Giuseppe Muliere</i>	
A Study of the Change in Assessing the Stability of the Interconnected System when Connecting a Link (Line) between its Two Subsystems . . . . .	423
<i>Georgi Georgiev, Sergey Kovalenko and Inga Zicmane</i>	
Consumer protection in energy field . . . . .	428
<i>Mihaela Stet</i>	

Power Balancing in Five Level Inverters .....	434
<i>Vivek Sharma, Mukesh Kumar, Krishna Gupta and Mukesh Kirar</i>	
GA strategies for optimal planning of daily energy consumptions and user satisfaction in buildings .....	440
<i>Federica Mangiatordi, Emiliano Pallotti, Paolo Del Vecchio and Matteo Fasano</i>	
Phase Analysis of Currents and Voltages in the On-Line Electric Bus (OLEB) system ....	445
<i>Yongsu Kim, Seungyong Shin, Guho Jung, Chunghee Lee, Seokhwan Lee, Jaegue Shin, Boyune Song and Sanghoon Chung</i>	
Study of salient poles synchronous generator by finite elements analysis .....	450
<i>Olivian Chiver, Liviu Neamt, Mircea Horgos and Zoltan Erdei</i>	
A Circuit Model for the Analysis of Single Phase Universal Motors using Constant Arc Voltage Drop .....	455
<i>Matthias Willig, Calum Cossar and Isidro Corral</i>	
Optimal Tuning of Power System Stabilizers in a Multi-Machine System Using Firefly Algorithm .....	461
<i>Amir Ameli, Mohammadreza Maddipour Farokhei Fard, Amir Ahmadifar, Amin Safari and Heidar Ali Shayanfar</i>	
Cost Effective Allocation and Sizing of Active Power Filters using Genetic Algorithms ....	467
<i>Dariusz Grabowski and Marcin Maciazek</i>	
The optimal expansion planning: the benefits of the renewable option .....	473
<i>Leontina Pinto and Luís Nogueira</i>	
Early Warning and Prevention of Potential Wide-Area Voltage Instability Problem .....	479
<i>Hui Hwang Goh, Qing Shi Chua, Boon Ching Kok, Kai Chen Goh, Sian Wei Lee and Kenneth Tze Kin Teo</i>	
Wireless charging system for On-Line Electric Bus(OLEB) with series-connected road-embedded segment .....	485
<i>Guho Jung, Boyune Song, Seungyong Shin, Seokhwan Lee, Jaegue Shin, Yongsu Kim, Chunghi Lee and Sanghun Jung</i>	
Power Quality Improvement in Y/ Electric Traction System Using a Railway Power Conditioner .....	489
<i>Alireza Ghassesemi, Iman Maghsoud, Siamak Farshad and Seyed Saeed Fazel</i>	
Control of a Transformer-less cascaded H-bridge based STATCOM using low-frequency selective harmonic elimination technique .....	495
<i>Yousef Neyshabouri, Hossein Iman-Eini and Shahrokh Farhangi</i>	
A Modified Control Strategy for Cascaded H-Bridge Rectifiers based on the Low Frequency SHE-PWM .....	501
<i>Amir Hossein Moeini, Alinaghi Marzoughi, Hossein Iman-Eini and Shahrokh Farhangi</i>	
Predictive Direct Torque Control of DFIG under Unbalanced and Distorted Stator Voltage Conditions .....	507
<i>Mohammad Ebrahim Zarei and Behzad Asaei</i>	

A Simple Method for Photovoltaic Energy Estimation.....	513
<i>Liviu Neamt and Olivian Chiver</i>	
Simulation of Secondary Arc on 400-kV Transmission System Consisting of Overhead Line Section and Power Cable Section.....	517
<i>Andrzej Mackow and Mustafa Kizilcay</i>	
Operation Study of Wind Permanent Magnet Synchronous Generator .....	522
<i>Nikolay Djagarov, Zhivko Grozdev, Milen Bonev and Julia Djagarova</i>	
The value of accuracy in wind energy forecasts.....	529
<i>Edward Mc Garrigle and Paul Leahy</i>	
Study of Excitation and Governor Power System Stabilizers Effect on the Stability Enhancement of a Single Machine Infinte-Bus Power System.....	534
<i>Adjeroud Faiza, Djahli Farid and Mayouf Abdelhalim</i>	
An Improved Technique to Determine the Wave Propagation Velocity of Medium Voltage Cables for PD Diagnostics .....	539
<i>Muhammad Shafiq, Lauri Kutt, Farhan Mahmood, Ghulam Amjad Hussain and Matti Lehtonen</i>	
Impulse characteristics of 24 kV overhead line pin insulators .....	545
<i>Paul Taklaja</i>	
A correlation between the flashover voltage and the electrical bulk conductivities AC and DC on silicone rubber insulators during thermal ageing .....	550
<i>Noureddine Mahdhi, Askri Bisma, Khaled Raouadi, Bechir Yangui and Radhouan Dakhli</i>	
A Review of the Harmonic and Unbalance Effects in Electrical Distribution Networks due to EV Charging.....	556
<i>Lauri Kütt, Eero Saarijärvi, Matti Lehtonen, Heigo Mölder and Jaan Niiitsoo</i>	
Waveform Distortion Assessment in Power Systems with a New Three-step Sliding-Window Method .....	562
<i>Guido Carpinelli, Luisa Alfieri, Antonio Bracale and Pierluigi Caramia</i>	
Application of the Prony Method for Compensation of Errors in Distance Relays .....	568
<i>L. A. Trujillo, A. Conde and Zbigniew Leonowicz</i>	
The GREAT Project: Integer Linear Programming-based Day-ahead Optimal Scheduling of a DC Microgrid .....	573
<i>Guido Carpinelli, Antonio Bracale and Pierluigi Caramia</i>	
Managing Future Offshore Wind Power Variability in a European Supergrid.....	579
<i>Joe Corbett, David Carroll, Heather Laurie, Brian Hurley and Aoife Foley</i>	
A Methodology to Analyse the Impact of Offshore Wind Forecasting Error on Electricity Markets.....	584
<i>Paraic Higgins and Aoife Foley</i>	
Review of Offshore Wind Power Development in the United Kingdom .....	589
<i>Paraic Higgins and Aoife Foley</i>
