2013 International Conference on Process Control

(PC 2013)

Strbske Pleso, Slovakia
18 – 21 June 2013

IEEE

IEEE Catalog Number: CFP13PCB-POD
ISBN: 978-1-4799-0926-1

TABLE OF CONTENTS

Windup Prevention in Systems with Input and Output Constraints 1
P. Hippe

Comparison of Two Methods for Computing Flat Outputs 7
A. Kaldmae, U. Kotta

Nonlinear System H∞ Fuzzy Control within Takagi-Sugeno Framework 13
A. Filasova, V. Hladky, D. Krokavec

PID Controller Design for Nonlinear Oscillative Plants Using Piecewise Linear Neural Network 19
P. Dolezel, P. Rozsival, M. Mariska, L. Havlicek

Airship Aerodynamics – Modeling Principle of the Aerodynamic Forces by PEM Method 25
F. Jelenciak, M. Gerke, I. Masar

Steam Turbine and Steam Reheating Simulation Model 31
L. Hubka, P. Skolnik

The Concept of Mean Anisotropy of Signals with Nonzero Mean 37
A. Kurdyukov, A. Kustov, M. Tchaikovsky, M. Karny

Time Delays Identification by Means of a Hybrid Interpolated Ant Colony Optimization and Nelder-Mead Algorithm 42
J. Paplinski

Equalization of Intervehicular Distances in Platoons on a Circular Track 47
I. Herman, D. Martinec, Z. Hurak, M. Sebek

PID Control of FOPDT Plants with Dominant Dead Time – the Frequency Domain Approach 53
J. Cvejn

Anisotropy-Based Bounded Real Lemma for Linear Discrete-Time Descriptor Systems 57
O. Andrianova, A. Belov

Control of Continuous Steel Billet Induction Heater as Distributed Parameter System 63
J. Camber, J. Kapusta, G. Hulko

On Pole Placement LMI Constraints in Control Design for Linear Discrete-Time Systems 69
D. Krokavec, A. Filasova

Mechatronic System of Levitation System 75
G. Martin, K. Stefan

Robust Frequency Identification of Oscillatory Electromechanical Systems 79
M. Goubej, A. Krejci, M. Schlegel

T1DM Subject as a Time-delay System: Modeling and Adaptive Control 85
T. Ludwig, I. Ottinger, M. Tarnik, E. Miklovicova

Fault Diagnosis in Analog Electrical Circuits: Data-Driven Method 90
A. Zhirabok, A. Baranov

Pointwise Observation of the State Given by the Parabolic System with the Neumann Boundary Condition 96
A. Kowalewski

A Symbolic Software Package for Nonlinear Control Systems 101
U. Kotta, M. Tonso, J. Belikov, A. Kaldmae, V. Kaparin, A. Shumsky, A. Zhirabok

Computation of Flat Outputs for Discrete-Time Nonlinear Systems with Mathematica 107
K. Halurina, A. Kaldmae, U. Kotta, M. Tonso

Running Discrete Fourier Transform and its Applications in Control Loop Performance Assessment 113
M. Schlegel, R. Skarda, M. Cech

Online Path Planning for Autonomous Airship in Restricted Environments 119
N. Al-Rashedi, M. Gerke

Towards a Dominant-Polytope Complexity Reduction in Explicit MPC 124
J. Stevek, M. Kvasnica, M. Fikar

Simplified Robust Control of an Anthropomorphic Leg 130
J. Kardos

Hybrid Adaptive Control of Isothermal Reactor 136
J. Vojtesek, P. Dostal

Robust Output Feedback Controllers for MIMO Systems, BMI and LMI Approach 142
D. Vozak, V. Vesely

Robust PI Controller Design for Coupled-Tank Process: LMI Approach 147
I. Holic, D. Rosinova

The Control Performance Evaluation of the Selected On-line Robust MPC Approaches 152
J. Oravec, M. Bakosova
Evolutionary Algorithms and Reinforcement Learning in Experiments with Slot Cars 159
D. Martinec, M. Bundzel
The Implementation of Microprocessor Device for Drilling Process Monitoring Based on Artificial Neural Network 163
K. Yury, K. Anton, B. Pavol
Neuro-Fuzzy Control of Exothermic Chemical Reactor 168
J. Kmefova, A. Vasickaninova, J. Dvoran
Computation of Anisotropic Norm for Descriptor Systems Using Convex Optimization 173
A. Belov, O. Andrianova
Coloured Petri Net Based PLC Program Validation with a Fast Simulation Method 179
T. Schne, T. Holczinger
Application of INS to Mechatronic Systems Control and Regulation Using Virtual Dynamic Models 185
G. Vladimir, B. Pavol
Extruder Barrel Temperature Field Control Using the Lumped Input and Distributed Output Approach 190
S. Lipar, P. Noga, G. Hulko
Control of Billet Temperature Field by the Secondary Cooling in Continuous Casting of Steel 196
K. Ondrejkovic, P. Noga, L. Tkac, G. Hulko, P. Bucek
Nonlinear Adaptive LQ Control of a Tubular Chemical Reactor 202
P. Dostal, V. Bobal, J. Vojtesek
Methods for Controller Tuning for Unstable Systems 208
A. Vasickaninova, M. Bakosova, M. Karsaiova, J. Kmefova
Artificial Neural Network Promotion: How to Introduce Artificial Neural Networks to Students 214
P. Dolesel, M. Mariska, I. Taufer, L. Havlicek
Identification and Self-tuning Predictive Control of Heat Exchanger 219
V. Bobal, M. Kubalcik, P. Dostal
Nonlinear Air-Fuel Ratio Predictive Control of Spark Ignited Engines 225
S. Wojnar, M. Honek, B. Rohal-Ilkiv
Model of Mechatronic System's Undercarriage Created on the Basis of its Dynamics 231
L. Mikova, F. Trebuna, M. Curilla
Adaptive Control Design for Vehicle Suspension 235
M. Zuscikova, M. Loksik, V. Huertas, C. Belavy
Control System Design of Robotic Manipulator for Testing of Shifting System 241
M. Goubej, J. Mertl, P. Balda
On Identification of Nonlinear Dynamic Systems Using Three-Block Cascade Models 247
J. Voros
Cogeneration Units Simulation Models Library 252
P. Skolnik, L. Hubka, O. Modrlak, T. Nahlovsky
On-line Identification Using Hybrid Method of Regularized Exponential Forgetting 257
J. Vachalek
Continuously Switched Linearized Models of the Nonlinear Once-Through Boiler Model 263
J. Opalka, T. Nahlovsky
Algebraic Tools in Autotuning Principles: Relay-Based Autotuners 268
J. Korbel, R. Prokop, P. Dostalek
Virtual Model of an Electro-Hydraulic System 274
K. Alena, K. Michal, S. Tomas
FEM Based Modelling and PID Controllers Design for a Class of Distributed Parameter Systems 280
C. Belavy, M. Vlcek, F. Vitalos, S. Lelo, D. Sismisova
IMC Based Robust Controller Design for Distributed Parameter Systems 286
C. Belavy, F. Vitalos, M. Vlcek, S. Lelo, M. Michalecko
Design of Gain Scheduled Control in Frequency Domain 292
V. Vesely, J. Osusky, P. Guzmicky
Design and Verification of Novel Adaptive Controller in Speed Servo Drive 298
I. Belai, M. Zalman
Self-Tuning Fuzzy PID Controller 304
J. Paulusova, L. Orlicky, M. Dubravska
Fuzzy Logic Control of Mechatronic Systems 309
J. Ciganek, F. Noge
Remote Control and Monitoring in the Simulink: SimWebLink.NET 314
M. Sysel, M. Vaclavsky

Industrial Process in Laboratory Environment: Liquid Levels in Tanks 320
P. Skocik, P. Neumann
TFC Robust Control Design for Time Delay Systems – Analysis and Example 324
L. Pekar, J. Korbel, R. Prokop
Model Predictive Control of an Industrial Gasoline Hydrodesulphurization Unit 330
B. Haktanir, M. Aygun, D. Kuzu
Model Predictive Control of a Fluid Catalytic Cracking Unit 335
A. Boum, A. Latifi, J. Corriou
Predictive Model Reference Control Based on Discrete Laguerre Network with Integrator 341
J. Skultety, E. Miklovicova, R. Bars
Frequency Weighted Model Predictive Control of Wind Turbine 347
M. Klauco, N. Poulsen, M. Mirzaei, H. Niemann
On Exact Feedback Linearization of HVAC Systems 353
J. Belikov, U. Kotta, S. Srinivasan, A. Kaldmae, K. Halturina
Bayesian Model Mixing for Cold Rolling Mills: Test Results 359
P. Ettler, I. Puchr, K. Dedecius
Collaborative Data-Exchange Architecture for Crisis Management Using an UAV as a Mobile Sensor Platform 365
P. Bahnik, M. Gerke, I. Masar, F. Jelenciak, V. Beyer
Experimental Comparison of Signal Shapers with Lumped and Distributed Delays 371
V. Kucera, M. Hromcik, T. Vyhlidal
Synthesis of Simple Explicit MPC Optimizers by Function Approximation 377
J. Holaza, B. Takacs, M. Kvasnica
Real-time Implementation of an Adaptive Feedback and Feedforward Generalized Predictive Controller 383
M. Gulan, M. Salaj, B. Rohal-Ilkiv
Simplification of Explicit MPC Solutions via Inner and Outer Approximations 389
J. Oravec, S. Blazek, M. Kvasnica
On Offset Free Generalized Predictive Control: Offset Free Reference Tracking of Step and Ramp Reference Signals 395
K. Belda
Comparison of MPC Strategies for Building Control 401
J. Drgona, M. Kvasnica
Dynamic Simulation and Optimization of Wastewater Treatment Plants 407
D. Nguyen, M. Latifi, F. Lesage, M. Mullholland
Economically Optimal Diluant Addition for Batch Ultrafiltration/Diafiltration Processes 415
M. Jelemensky, R. Paulen, M. Fikar, Z. Kovacs
Optimization of Acrolein Production in a Fixed-Bed Reactor System 421
M. Lei, F. Lesage, M. Latifi, S. Tretjak
Optimal Feeding of Emulsion Polymerization Reactor for Styrene and Butyl Acrylate Copolymerization 427
R. Paulen, B. Benyahia, M. Latifi, M. Fikar
Optimized Control of Air-conditioning Process with Recycle 433
Z. Ogonowski
Frequency Domain Gain Scheduled Controller Design for SISO Systems 439
V. Vesely, A. Ilka, A. Kozakova
Robust Stabilization of Switched Two-tank System Model via State Feedback PI Controller 445
P. Valach, R. Krasnansky
Real-Time Implementation of Add-On Simple Adaptive Control Algorithm to Linear Stage 451
I. Rusnak, I. Nesher, Y. Dana
Gain-Scheduled Controller Design: Guaranteed Quality Approach 456
V. Vesely, A. Ilka
Mathematical Models of Equilibrium Moisture Content and Their Parameter Assessment 462
I. Oswaldova, T. Vyhlidal, P. Zitek
Robust PI Controller Design for a Continuous Stirred Tank Reactor with Multiple Steady-States 468
J. Zavacka, M. Bakosova, K. Matejickova
New Possibilities of Industrial Programming Software: Swing-up and Stabilization of Reaction Wheel Inverted Pendulum via Model Predictive Control Using PLC 474
P. Seman, M. Juhas, L. Tkac, M. Honek
Robust PI Controller Desing for a Time-Delay Process 480
K. Matejickova, M. Bakosova

Electronic Throttle Identification and Modeling 486
M. Honek, S. Wojnar, P. Seman, M. Juhas, B. Rohal-Ilkiv
Automation of Product Defect Detection in a Production System 492
P. Elena, B. Pavol, I. Miriam
Path Correction Algorithm for Spot Welding Robot in Body-In-White Applications 498
B. Pavol, K. Marek
Mobile Robot Control Using XCS 504
F. Toth, K. Rebrova, G. Zatko, P. Krasnansky, B. Rohal-Ilkiv
Basic Laboratory Experiments with an Educational Robotic Arm 510
P. Krasnansky, F. Toth, V. Huertas, B. Rohal-Ilkiv
Control Systems in Omni-directional Robotic Vehicle with Mecanum Wheels 516
F. Toth, P. Krasnansky, M. Gulan, B. Rohal-Ilkiv
Simplifying the Implementation of Remote Laboratories in Educational Environments Using Industrial Hardware 522
M. Kaluz, L. Cirka, M. Fikar
Advanced Input Shaping Filter 3D Virtual Laboratory 528
J. Reitinger, M. Cech, M. Goubej
MATLAB/Simulink Support for GUNT Control Units 534
D. Honc, F. Dusek
Virtual Model of Manipulator for Advanced Vessel Integrity Inspection Build on Latest W3C Standards 540
O. Severa, A. Jager, M. Stetina
