

2013 IEEE Symposium on Computational Intelligence in Production and Logistics Systems

(CIPLS 2013)

**Singapore
16 – 19 April 2013**

**IEEE Catalog Number: CFP1344N-POD
ISBN: 978-1-4673-5904-7**

TABLE OF CONTENTS

A Task Based Approach for A Real-World Commodity Routing Problem	1
<i>J. Chen, R. Bai, R. Qu, G. Kendall</i>	
Balancing Tour Durations in Routing a Vehicle Fleet	9
<i>T. Bektas</i>	
Time-differentiated Service Parts Distribution: Costs under Hierarchical and Non-hierarchical Setups	17
<i>M. Jat, L. Muyldermans</i>	
Stacking Under Uncertainty: We Know How To Predict, But How Should We Act?	25
<i>H. Hasselt, H. Poutre</i>	
Equivalent Machine Method For Approximate Evaluation Of Buffered Unreliable Production Lines	33
<i>Y. Ouazene, H. Chehade, A. Yalaoui, F. Yalaoui</i>	
An Agent-based Approach for Transportation Scheduling in Developing Countries	40
<i>E. Alsina, G. Cabri</i>	
Evolved Multi-Agent Systems And Thorough Evaluation Are Necessary For Scalable Logistics	48
<i>R. Lon, T. Holvoet</i>	
Agent-Based Dispatching in Groupage Traffic	54
<i>M. Gath, S. Edelkamp, O. Herzog</i>	
Optimization of Crew Scheduling with Uniform Work Distribution: A New Approach using Genetic Algorithm	61
<i>R. Sasikumar, H. Pai, T. Pradeepmon</i>	
Line-Based Optimization of LTL-shipments using a Multi-Step Genetic Algorithm	70
<i>C. Tummel, T. Pyttel, E. Hauck, S. Jeschke, P. Wolters</i>	
SDGP: A Developmental Approach for Traveling Salesman Problems	78
<i>J. Ouyang, T. Weise, A. Devert, R. Chiong</i>	
Discrete Paired-Bacteria Optimizer for Solving Traveling Salesman Problem	86
<i>M. Li, T. Ji, Q. Wu</i>	
Discrete PSO for the Uncapacitated Single Allocation Hub Location Problem	92
<i>A. Bailey, B. Ombuki-Berman, S. Asobiela</i>	
A Discrete Artificial Bee Colony Algorithm for the Team Orienteering Problem with Time Windows	99
<i>K. Karabulut, M. Tasgetiren</i>	
Solving the Biobjective Selective Pickup and Delivery Problem with Memetic Algorithm	107
<i>X. Liao, C. Ting</i>	
An Improved Genetic Algorithm with Local Search for Order Acceptance and Scheduling Problems	115
<i>C. Cheng, Z. Yang, L. Xing, Y. Tan</i>	
A Genetic Algorithm For The Balancing And Sequencing Problem In The Mixed-Model U-Line	123
<i>Y. Zhan, R. Zhang</i>	
Metaheuristic Algorithms for the Quadratic Assignment Problem	131
<i>M. Tasgetiren, Q. Pan, P. Suganthan, I. Dizbay</i>	
System For Product-Based Control Of Production Processes	138
<i>M. Ostgathe, M. Zaeh</i>
