

2013 13th International Conference on Quality Software (QSIC 2013)

**Nanjing, China
29 – 30 July 2013**

**IEEE Catalog Number: CFP13331-POD
ISBN: 978-1-4799-0500-3**

2013 13th International Conference on Quality Software

QSIC 2013

Table of Contents

Foreword.....	x
QSIC 2013 Committees.....	xi
QSIC 2013 Program Committee.....	xiii
Keynote Addresses.....	xv
Message from the TSETH Workshop Chairs.....	xviii
Message from the TVECS Workshop Chairs.....	xix
Message from the SQHE Workshop Chairs.....	xx
Message from the QUAMES Workshop Chairs.....	xxi

Session 1: Symbolic Execution

Symbolic Execution of Virtual Devices.....	1
<i>Kai Cong, Fei Xie, and Li Lei</i>	
Binary-Level Testing of Embedded Programs.....	11
<i>Sébastien Bardin, Philippe Baufreton, Nicolas Cornuet, Philippe Herrmann, and Sébastien Labbé</i>	
A Search Strategy Guided by Uncovered Branches for Concolic Testing.....	21
<i>Qixing Dong, Jun Yan, Jian Zhang, and Fanping Zeng</i>	

Session 2: QoS (1)

Measuring Qualities for OSGi Component-Based Applications.....	25
<i>Salma Hamza, Salah Sadou, and Régis Fleurquin</i>	
A Study on the Efficiency Aspect of Data Race Detection: A Compiler Optimization Level Perspective.....	35
<i>Changjiang Jia and W.K. Chan</i>	
Bayesian Probabilistic Monitor: A New and Efficient Probabilistic Monitoring Approach Based on Bayesian Statistics.....	45
<i>Yuelong Zhu, Meijun Xu, Pengcheng Zhang, Wenrui Li, and Hareton Leung</i>	

Session 3: SQIP Session

Ensuring Safety of Avionics Software at the Architecture Design Level: An Industrial Case Study	55
<i>Ji Wu, Tao Yue, Shaukat Ali, and Huihui Zhang</i>	
Outsourcing Software Testing: A Case Study in the Oulu Area	65
<i>Ilkka Tervonen, Antti Haapalahti, Lasse Harjumaa, and Jouni Similä</i>	
Using Feature Model to Support Model-Based Testing of Product Lines: An Industrial Case Study	75
<i>Shuai Wang, Shaukat Ali, Tao Yue, and Marius Liaaen</i>	

Session 4: QoS (2)

Improving Service Diagnosis through Invocation Monitoring	85
<i>Cuiting Chen, Hans-Gerhard Gross, and Andy Zaidman</i>	
Evaluating Web Service Quality Using Finite State Models	95
<i>Olga Kondratyeva, Natalia Kushik, Ana Cavalli, and Nina Yevtushenko</i>	
An Empirical Study of Adoption of Software Testing in Open Source Projects	103
<i>Pavneet Singh Kochhar, Tegawendé F. Bissyandé, David Lo, and Lingxiao Jiang</i>	

Session 5: Static Checking

An Approach for Checking OSEK/VDX Applications	113
<i>Haitao Zhang, Toshiaki Aoki, Kenro Yatake, Min Zhang, and Hsin-Hung Lin</i>	
Static Slicing for Python First-Class Objects	117
<i>Zhaogui Xu, Ju Qian, Lin Chen, Zhifei Chen, and Baowen Xu</i>	

Session 6: Software Testing

Improving Test Case Generation from UML Statecharts by Using Control, Data and Communication Dependencies	125
<i>Valentin Chimisliu and Franz Wotawa</i>	
PCTF: An Integrated, Extensible Cloud Test Framework for Testing Cloud Platforms and Applications	135
<i>Ganesh Neelakanta Iyer, Jayakhanna Pasimuthu, and Ramesh Loganathan</i>	

Session 7: Software Faults (1)

The Right Choice Matters! SMT Solving Substantially Improves Model-Based Debugging of Spreadsheets	139
<i>Simon Außerlechner, Sandra Fruhmann, Wolfgang Wieser, Birgit Hofer, Raphael Spörk, Clemens Mühlbacher, and Franz Wotawa</i>	
An Approach to Fully Recognizing Addressable Expression	149
<i>Yukun Dong, Ying Xing, Dahai Jin, Yunzhan Gong, and Kai Liu</i>	

On the Correlation between the Effectiveness of Metamorphic Relations and Dissimilarities of Test Case Executions	153
<i>Yuxiang Cao, Zhi Quan Zhou, and Tsong Yueh Chen</i>	

Session 8: DSL

Requirements-Driven Testing of Domain-Specific Core Language Models Using Scenarios	163
<i>Stefan Sobernig, Bernhard Hoisl, and Mark Strembeck</i>	
Improving the Quality of Context-Aware Applications: An Activity-Oriented Context Approach	173
<i>Xuansong Li, Xianping Tao, and Jian Lu</i>	
Providing Support for Specifying Redundancy Tactics Using Aspect-Oriented Modeling	183
<i>Xiang Qiu and Li Zhang</i>	

Session 9: Software Faults (2)

A Comparison of Mutation Analysis Tools for Java	187
<i>Mickaël Delahaye and Lydie du Bousquet</i>	
Automatically Mining High Level Patterns of Software Faults within Methods	196
<i>Hailong Zhang, Dalin Zhang, Dahai Jin, Yunzhan Gong, and Chengcheng Wang</i>	
An Empirical Study of Bugs in Software Build Systems	200
<i>Xin Xia, Xiaozhen Zhou, David Lo, and Xiaoqiong Zhao</i>	

Session 10: Fault Localization

CLPS-MFL: Using Concept Lattice of Program Spectrum for Effective Multi-fault Localization	204
<i>Xiaobing Sun, Bixin Li, and Wanzhi Wen</i>	
ColFinder Collaborative Concurrency Bug Detection	208
<i>Zhendong Wu, Kai Lu, Xiaoping Wang, and Xu Zhou</i>	
Backward-Slice-Based Statistical Fault Localization without Test Oracles	212
<i>Yan Lei, Xiaoguang Mao, and Tsong Yueh Chen</i>	

The Symposium on Engineering Test Harnesses (TSETH)

Using the 5W+1H Model in Reporting Systematic Literature Review: A Case Study on Software Testing for Cloud Computing	222
<i>Changjiang Jia and Yuen Tak Yu</i>	
Incremental Identification of Categories and Choices for Test Case Generation: A Study of the Software Practitioners' Preferences	230
<i>Pak-Lok Poon, Tsong Yueh Chen, and T.H. Tse</i>	
Similarity-Based Search for Model Checking: A Pilot Study with Java PathFinder	238
<i>Elmin Ibrahimov, Jixing Wang, and Zhi Quan Zhou</i>	
Oracles Are Hardly Attain'd, and Hardly Understood: Confessions of Software Testing Researchers	245
<i>W.K. Chan and T.H. Tse</i>	

Leveraging a Constraint Solver for Minimizing Test Suites	253
<i>José Campos and Rui Abreu</i>	
Impacts of Test Suite’s Class Imbalance on Spectrum-Based Fault Localization Techniques	260
<i>Peifeng Rao, Zheng Zheng, Tsong Yueh Chen, Nan Wang, and Kaiyuan Cai</i>	
The ART of Divide and Conquer: An Innovative Approach to Improving the Efficiency of Adaptive Random Testing	268
<i>Cliff Chow, Tsong Yueh Chen, and T.H. Tse</i>	
Concise Papers	
Taming Deadlocks in Multithreaded Programs	276
<i>Yan Cai, W.K. Chan, and Y.T. Yu</i>	
Energy Efficiency in Testing and Regression Testing—A Comparison of DVFS Techniques	280
<i>Edward Y.Y. Kan</i>	
Adaptive Combinatorial Testing	284
<i>Changhai Nie, Hareton Leung, and Kai-Yuan Cai</i>	
A Theoretical Study: The Impact of Cloning Failed Test Cases on the Effectiveness of Fault Localization	288
<i>Yichao Gao, Zhenyu Zhang, Long Zhang, Cheng Gong, and Zheng Zheng</i>	
International Workshop on Testing and Verification of Embedded Computing Systems (TVECS)	
Automated Test Case Generation for Embedded Software Using Extended Interface Automata	292
<i>Chao Zhang, Xiaoying Bai, Junlong Li, and Renwei Zhang</i>	
A Low-Cost Fault Tolerance Technique in Multi-media Applications through Configurability	299
<i>Lanfang Tan and Ying Tan</i>	
An Approach to Reliable Software Architectures Evolution	305
<i>Xu Li and Linpeng Huang</i>	
A Bidirectional Framework for Model Synchronization in Component-Based Software Development	313
<i>Luxi Chen, Linpeng Huang, Chen Li, and Tao Zan</i>	
On Schedulability Analysis for Embedded Systems with AADL Model	320
<i>Yunwei Dong, Yao Cheng, Tingting Wu, and Hong Ye</i>	
An Approach for Fault Localization Based on Program Slicing and Bayesian	326
<i>Yingqi Liu, Wei Li, Shujuan Jiang, Yanmei Zhang, and Xiaolin Ju</i>	
Automatic Validation of Design Decision Based on Multiple Analysis Methods Integration	333
<i>Jiayu Luo, Ruiying Huang, and Xiangping Chen</i>	

International Workshop on Software Quality Assurance of Healthcare Systems and Embedded Systems (SQHE)

Abstraction Based Domain Ontology Extraction for Idea Creation	341
<i>Delin Jing, Hongji Yang, and Yingchun Tian</i>	
Performance Testing Framework for REST-Based Web Applications	349
<i>Chia Hung Kao, Chun Cheng Lin, and Juei-Nan Chen</i>	
Applying Cloud Computing Technologies to Gerontology and Geriatrics Health Care System (GGHCS)	355
<i>Tse-Chuan Hsu, Chih-Hung Chang, William C. Chu, Shinn-Ying Ho, Nien-Lin Hsueh, and Wei-Bin Lee</i>	
A Mobile Centered and Web Service Integrated Approach for Legacy eHealth Web Migration	361
<i>Nien Lin Hsueh, Pei-Sheng Chen, Cheng-Chung Chu, Chao-Tung Yang, Chih-Wei Lu, and Chih-Hung Chang</i>	
Towards Designing a Quality Software System for Mental Disease Treatment through Artistic Painting Therapy	367
<i>Yingmei Wang, Jia Jiang, and Hongji Yang</i>	
Considerations in Designing Human-Computer Interfaces for Elderly People	372
<i>Drew Williams, Mohammad Arif Ul Alam, Sheikh Iqbal Ahamed, and William Chu</i>	

International Workshop on Quality and Measurement of Software Model-Driven Developments (QUAMES)

Workflow-Based Modeling of Web Application and Automatically Generating Test Sequences	378
<i>Lulu Dong, Hua Li, and Sumei Zhang</i>	
Interaction Models Matter in the Evaluation of Quality of Conceptual Models	382
<i>Beatriz Marín, Giovanni Giachetti, Oscar Pastor, and Alain Abran</i>	
Supporting Reliability Modeling and Analysis for Component-Based Software Architecture: An XML-Based Approach	390
<i>Weichao Luo and Linpeng Huang</i>	
Dealing with Software Model Quality in Practice: Experience in a Research Project	396
<i>Jose Luis de la Vara and Huáscar Espinoza</i>	
Author Index	406
