

2013 22nd Australian Software Engineering Conference

(ASWEC 2013)

**Melbourne, Australia
4 – 7 June 2013**

IEEE Catalog Number: CFP13134-POD
ISBN: 978-1-4799-0226-2

2013 22nd Australasian Conference on Software Engineering

ASWEC 2013

Table of Contents

Message from General Chair.....	viii
Message from Research Programme Chairs.....	ix
Organizing Committee.....	x
Research Programme Committee.....	xi
Steering Committee.....	xii
Additional Reviewers.....	xiii
Sponsors.....	xiv
Keynotes.....	xv

ASWEC 2013

On the Semantics of Scenario-Based Specification Based on Timed Computational Tree Logic.....	1
<i>Wenrui Li and Pengcheng Zhang</i>	
Productive Development of Dynamic Program Analysis Tools with DiSL.....	11
<i>Aibek Sarimbekov, Yudi Zheng, Danilo Ansaloni, Lubomír Bulej, Lukáš Marek, Walter Binder, Petr Tuma, and Zhengwei Qi</i>	
Rule-Based Behaviour Engineering: Integrated, Intuitive Formal Rule Modelling.....	20
<i>Lin Wah Chan, Rene Hexel, and Lian Wen</i>	
Decomposing Distributed Software Architectures for the Determination and Incorporation of Security and Other Non-functional Requirements.....	30
<i>Anton V. Uzunov, Katrina Falkner, and Eduardo B. Fernandez</i>	
A Method for Selecting a Model to Estimate the Reliability of a Software Component in a Dynamic System.....	40
<i>M. Garg, R. Lai, and P.K. Kapur</i>	
Duals in Spectral Fault Localization.....	51
<i>Lee Naish and Hua Jie Lee</i>	

Evaluating the Application and Understanding of Elementary Programming Patterns	60
<i>Rachel Cardell-Oliver</i>	
A Change Impact Size Estimation Approach during the Software Development	68
<i>Mehran Halimi Asl and Nazri Kama</i>	
An Empirical Investigation on the Simulation of Priority and Shortest-Job-First Scheduling for Cloud-Based Software Systems	78
<i>Jia Ru and Jacky Keung</i>	
Integrating Issue Tracking Systems with Community-Based Question and Answering Websites	88
<i>Denzil Correa and Ashish Sureka</i>	
A Taxonomy of Data Quality Challenges in Empirical Software Engineering	97
<i>Michael Franklin Bosu and Stephen G. MacDonell</i>	
What Can Developers' Messages Tell Us? A Psycholinguistic Analysis of Jazz Teams' Attitudes and Behavior Patterns	107
<i>Sherlock A. Licorish and Stephen G. MacDonell</i>	
On the Application of Inequality Indices in Comparative Software Analysis	117
<i>Olga Goloshchapova and Markus Lumpe</i>	
A Model-Driven Approach for Ensuring Change Traceability and Multi-model Consistency	127
<i>Claudia Szabo and Yufei Chen</i>	
Significant Requirements Engineering Practices for Software Development Outsourcing	137
<i>Javed Iqbal, Rodina Ahmad, Mohd Hairul Nizam, Md Nasir, and Muhammad Asim Noor</i>	
Development of Robust Traceability Benchmarks	145
<i>Xiaofan Chen, John Hosking, John Grundy, and Robert Amor</i>	
From Toy to Tool: Extending Tag Clouds for Software and Information Visualisation	155
<i>Jessica Emerson, Neville Churcher, and Chris Deaker</i>	
An Empirical Experiment on Analogy-Based Software Cost Estimation with CUDA Framework	165
<i>Passakorn Phannachitta, Jacky Keung, and Ken-Ichi Matsumoto</i>	
A Method of Specifying and Classifying Requirements Change	175
<i>Shalinka Jayatilleke and Richard Lai</i>	
OwnKit: Inferring Modularly Checkable Ownership Annotations for Java	181
<i>Constantine Dymnikov, David J. Pearce, and Alex Potanin</i>	
Support Formal Component-Based Development with UML Profile	191
<i>Dan Li, Xiaoshan Li, Zhiming Liu, and Volker Stolz</i>	

Unifying Configuration Management with Merge Conflict Detection and Awareness Systems	201
<i>H. Christian Estler, Martin Nordio, Carlo A. Furia, and Bertrand Meyer</i>	
Predicting Fault-Prone Software Modules with Rank Sum Classification	211
<i>Jaspar Cahill, James M. Hogan, and Richard Thomas</i>	
Author Index	220
