

2013 IEEE 26th Conference on Software Engineering Education and Training

(CSEE&T 2013)

**San Francisco, California, USA
19 – 21 May 2013**

**IEEE Catalog Number: CFP13027-POD
ISBN: 978-1-4673-5138-6**

Contents

Preface

Message from the Chairs

Committees

Requirements and Risks

University Meets Industry: Calling in Real Stakeholders

Birgit Penzenstadler, Martin Mahaux, and Patrick Heymans — *TU Munich, Germany; University of Namur, Belgium* 1

Cooperating with a Non-governmental Organization to Teach Gathering and Implementation of Requirements

Gregor Gabrysiak, Regina Hebig, Lukas Pirl, and Holger Giese — *HPI, Germany* 11

A Look at Software Engineering Risks in a Team Project Course

Supannika Koolmanojwong and Barry Boehm — *University of Southern California, USA* 21

Team Projects

Teaching Advanced Software Design in Team-Based Project Course

Stan Jarzabek — *National University of Singapore, Singapore* 31

A Competitive-Collaborative Approach for Introducing Software Engineering in a CS2 Class

Swapneel Sheth, Jonathan Bell, and Gail Kaiser — *Columbia University, USA* 41

Understanding Individual Contribution and Collaboration in Student Software Teams

Fabio Rocha and Eleni Stroulia — *University of Alberta, Canada* 51

Architecture and Design

Teaching Software Design with Social Engagement

Damian A. Tamburri, Maryam Razavian, and Patricia Lago — *VU University Amsterdam, Netherlands* 61

Introducing Tool-Supported Architecture Review into Software Design Education

Yuanfang Cai, Rick Kazman, Ciera Jaspan, and Jonathan Aldrich — *Drexel University, USA; University of Hawaii, USA; Cal Poly, USA; CMU, USA* 70

Archinotes: A Tool for Assisting Software Architecture Courses

Juan Sebastián Urrego and Darío Correal — *Universidad de los Andes, Colombia* 80

Teaching Object-Orientation with Smartphones as Digital CRC Cards

Rainer Lutz, Sascha Schäfer, and Stephan Diehl — *University of Trier, Germany* 89

Introductory and Specialized Curricula

Motivating and Orienting Novice Students to Value Introductory Software Engineering

Daniel Port, Chris Rachal, and Jia Liu — *University of Hawaii, USA; Nanjing University, China* 99

Using GSWE2009 in the Creation and Modification of Graduate Software Engineering Programs and Related Curricula

Mark Ardis, Shawn Bohner, Lucia Camilloni, Diego Vallespir, and Sylvia Ilieva — *Stevens Institute of Technology, USA; Rose-Hulman Institute of Technology, USA; University of the Republic, Uruguay; University of Sofia, Bulgaria* 109

The Software Assurance Competency Model: A Roadmap to Enhance Individual Professional Capability

Nancy R. Mead and Dan Shoemaker — *SEI, USA; University of Detroit Mercy, USA* 119

Processes and Distributed Development

Applying Competitive Bidding Games in Software Process Education Guoping Rong, He Zhang, and Dong Shao — <i>Nanjing University, China; NICTA, Australia; UNSW, Australia</i>	129
Using Distributed Software Development in the Improvement of Communication and Collaboration Skills in SE Courses: An Observational Study Luiz Leandro Fortaleza, Sérgio Roberto Costa Vieira, Olavo Olímpio Matos, Jr., Rafael Prikladnicki, and Tayana Conte — <i>UFAM, Brazil; Fucapi, Brazil; PUCRS, Brazil</i>	139
Picking the Right Project: Assigning Student Teams in a GSD Course Ivana Bosnić, Igor Čavrak, Marin Orlić, and Mario Žagar — <i>University of Zagreb, Croatia</i>	149

Agile Methods

Scrum in a Software Engineering Course: An In-Depth Praxis Report Andreas Scharf and Andreas Koch — <i>University of Kassel, Germany</i>	159
Academic Education of Software Engineering Practices: Towards Planning and Improving Capstone Courses Based upon Intensive Coaching and Team Routines Christoph Johann Stettina, Zhao Zhou, Thomas Bäck, and Bernhard Katzy — <i>Leiden University, Netherlands; CeTIM, Netherlands</i>	169
Teaching Agile Software Development at University Level: Values, Management, and Craftsmanship Martin Kropp and Andreas Meier — <i>FHNW, Switzerland; ZHAW, Switzerland</i>	179
A Double Comparative Study: Process Models and Student Skills Paolo Ciancarini, Caroline Dos, and Sara Zuppiroli — <i>University of Bologna, Italy</i>	189

Programming within Software Engineering

Explorable Code Slides Michael Fritz, Benjamin Biegel, and Stephan Diehl — <i>University of Trier, Germany</i>	199
A Spirit of Camaraderie: The Impact of Pair Programming on Retention Zhen Li, Christopher Plaue, and Eileen Kraemer — <i>University of Georgia, USA</i>	209
Designing Grace: Can an Introductory Programming Language Support the Teaching of Software Engineering? James Noble, Michael Homer, Kim B. Bruce, and Andrew P. Black — <i>Victoria University of Wellington, New Zealand; Pomona College, USA; Portland State University, USA</i>	219

Formal Methods, Testing and Evaluation

Specification and Reasoning in SE Projects using a Web IDE Charles T. Cook, Svetlana V. Drachova-Strang, Yu-Shan Sun, Murali Sitaraman, Jeffrey C. Carver, and Joseph Hollingsworth — <i>Clemson University, USA; University of Alabama, USA; Indiana University Southeast, USA</i>	229
An Empirical Study of the Effects of Personality on Software Testing Tanjila Kanij, Robert Merkel, and John Grundy — <i>Swinburne University of Technology, Australia; Monash University, Australia</i>	239
Automated Evaluation of Regular Lab Assignments: A Bittersweet Experience? Pavel Ježek, Michal Malohlava, and Tomáš Pop — <i>Charles University, Czech Republic</i>	249

Short Papers

The Cost of Problem-Based Learning: An Example in Information Systems Engineering Vincent Ribaud and Philippe Saliou — <i>UBO, France</i>	259
Team Characteristics for Maximizing the Educational Effectiveness of Practical Lectures on Software Intensive Systems Development Shota Inaga, Hironori Washizaki, Yusuke Yoshida, Katsuhiko Kakehi, Yoshiaki Fukazawa, Shoso Yamato, Masashi Okubo, Teruhiko Kume, Manabu Tamaki, and Toshikazu Kanou — <i>Waseda University, Japan; University of Tsukuba, Japan; NEC, Japan</i>	264
Towards a Model of Faculty Development for FOSS in Education Heidi J. C. Ellis, Gregory W. Hislop, Michelle Purcell, Mel Chua, and Sebastian Dziallas — <i>Western New England University, USA; Drexel University, USA; Purdue University, USA; Olin College, USA</i>	269
Toward Infusing Modular and Reflective Design Learning throughout the Curriculum John C. Georgas — <i>Northern Arizona University, USA</i>	274

Analyzing Coordination among Students in a Software Engineering Project Course Bonnie K. MacKellar — <i>St. John's University, USA</i>	279
Guidance for Exploratory Testing through Problem Frames Shreya Kumar and Charles Wallace — <i>Michigan Tech, USA</i>	284
Test-Driven Learning in High School Computer Science Ryan Stejskal and Harvey Siy — <i>University of Nebraska at Omaha, USA</i>	289
Bringing Undergraduates to the Web: Baby Steps in Webifying a Software Engineering Curriculum Matti Luukkainen and Arto Vihavainen — <i>University of Helsinki, Finland</i>	294
A Project Spine for Software Engineering Curricular Design Kevin Gary, Timothy Lindquist, Srividya Bansal, and Arbi Ghazarian — <i>Arizona State University, USA</i>	299
Essence: A Framework to Help Bridge the Gap between Software Engineering Education and Industry Needs Pan-Wei Ng and Shihong Huang — <i>Ivar Jacobson Int., Singapore; Florida Atlantic University, USA</i>	304
Teaching Software Processes to Professionals: The Approach Taken by an Evening Master's Degree Program Yadran Eterovic, Gemma Grau, and Jorge Bozo — <i>Pontificia Universidad Católica de Chile, Chile</i>	309
Software Engineering Projects with Social Significance: An Experience Report at a Minority University Debzani Deb, Luel Gonzales, and Michael Geda — <i>Winston-Salem State University, USA</i>	314
Killer App: A Eurogame about Software Quality James H. Andrews — <i>University of Western Ontario, Canada</i>	319
What Makes It Hard to Teach Software Engineering to End Users? Some Directions from Adaptive and Personalized Learning Sridhar Chimalakonda and Kesav V. Nori — <i>IIIT Hyderabad, India</i>	324

ASEE&T Position Papers

Model-Driven Development and the Future of Software Engineering Education Tony Cowling — <i>University of Sheffield, UK</i>	329
Education Impact of Evolutionary Software Development Václav Rajlich — <i>Wayne State University, USA</i>	332
What Should Students Learn in Their First (and Often Only) Software Engineering Course? James Vallino — <i>Rochester Institute of Technology, USA</i>	335
Software Engineering in CS 2013 Richard LeBlanc — <i>Seattle University, USA</i>	338

Panel Sessions

Undergraduates and Research: Motivations, Challenges, and the Path Forward W. Eric Wong, Junhua Ding, Gene Fiorini, and Christian Hansen — <i>University of Texas at Dallas, USA; East Carolina University, USA; Rutgers University, USA; Eastern Washington University, USA</i>	341
Software Engineering Education via the Use of Corporate-Sponsored Projects: A Panel Discussion of the Approaches, Benefits, and Challenges for Industry-Academic Collaboration Linda Werner, Geoff Kuenning, Mark Sebern, James Vallino, and W. Eric Wong — <i>UC Santa Cruz, USA; Harvey Mudd College, USA; Milwaukee School of Engineering, USA; Rochester Institute of Technology, USA; University of Texas at Dallas, USA</i>	346
Recent Trends in Graduate Software Engineering Mark Ardis, Shawn Bohner, Dick Fairley, Dennis Frailey, Tom Hilburn, Gregory W. Hislop, and Todd Sedano — <i>Stevens Institute of Technology, USA; Rose-Hulman Institute of Technology, USA; Colorado Technical University, USA; Southern Methodist University, USA; Embry-Riddle Aeronautical University, USA; Drexel University, USA; Carnegie-Mellon University Silicon Valley, USA</i>	351

Workshop

Workshop on Revisions to SE 2004 Mark Ardis, David Budgen, Gregory W. Hislop, Jeff Offutt, Mark Sebern, and Willem Visser — <i>Stevens Institute of Technology, USA; University of Durham, UK; Drexel University, USA; George Mason University, USA; Milwaukee School of Engineering, USA; University of Stellenbosch, South Africa</i>	356
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Tutorials

Project Selection for Student Involvement in Humanitarian FOSS	
Heidi J. C. Ellis, Gregory W. Hislop, and Michelle Purcell — <i>Western New England University, USA; Drexel University, USA</i>	359
Teaching Software Development Processes by Simulation: Quality Assurance as a Factor of Success	
Andreas Bollin, Elke Hochmüller, and Ladislav Samuelis — <i>University of Klagenfurt, Austria; Carinthia University of Applied Sciences, Austria; TU Kosice, Slovakia</i>	362
Positive Transitions from the Classroom to the Cubicle: Creating Strategies for Augmenting Professional Development in the Software Engineering Curriculum	
C. Shaun Longstreet and Kendra M. L. Cooper — <i>Marquette University, USA; University of Texas at Dallas, USA</i>	365
Software Enterprise Pedagogy for Project-Based Courses	
Kevin Gary, Srividya Bansal, and Arbi Ghazarian — <i>Arizona State University, USA</i>	368
Adding Software Testing to Programming Assignments	
Stephen H. Edwards — <i>Virginia Tech, USA</i>	371
