

2013 IEEE Conference on Computational Complexity

(CCC 2013)

**Palo Alto, California
5 – 7 June 2013**

IEEE Catalog Number: CFP13035-POD
ISBN: 978-1-4673-6466-9

2013 IEEE Conference on Computational Complexity

CCC 2013

Table of Contents

Preface.....	viii
Organizing Committee.....	ix
Program Committee.....	x
Reviewers.....	xi
Awards.....	xii

CCC 2013

Random Arithmetic Formulas Can Be Reconstructed Efficiently	1
<i>Ankit Gupta, Neeraj Kayal, and Youming Qiao</i>	
Formulas are Exponentially Stronger than Monotone Circuits in Non-commutative Setting	10
<i>Pavel Hrubeš and Amir Yehudayoff</i>	
On Medium-Uniformity and Circuit Lower Bounds	15
<i>Rahul Santhanam and Ryan Williams</i>	
Towards a Reverse Newman's Theorem in Interactive Information Complexity	24
<i>Joshua Brody, Harry Buhrman, Michal Koucký, Bruno Loff, Florian Speelman, and Nikolay Vereshchagin</i>	
Shared Randomness and Quantum Communication in the Multi-party Model	34
<i>Dmitry Gavinsky, Tsuyoshi Ito, and Guoming Wang</i>	
On the Power of Non-adaptive Learning Graphs	44
<i>Aleksandrs Belovs and Ansis Rosmanis</i>	
The Correct Exponent for the Gotsman-Linial Conjecture	56
<i>Daniel M. Kane</i>	
Approaching the Chasm at Depth Four	65
<i>Ankit Gupta, Pritish Kamath, Neeraj Kayal, and Ramprasad Saptharishi</i>	
Approximating Boolean Functions with Depth-2 Circuits	74
<i>Eric Blais and Li-Yang Tan</i>	

Constructing Hard Functions Using Learning Algorithms	86
<i>Adam Klivans, Pravesh Kothari, and Igor C. Oliveira</i>	
Short Lists with Short Programs in Short Time	98
<i>Bruno Bauwens, Anton Makhlin, Nikolay Vereshchagin, and Marius Zimand</i>	
Lower Bounds for DNF-refutations of a Relativized Weak Pigeonhole Principle	109
<i>Albert Atserias, Moritz Müller, and Sergi Oliva</i>	
LS+ Lower Bounds from Pairwise Independence	121
<i>Madhur Tulsiani and Pratik Worah</i>	
Just a Pebble Game	133
<i>Siu Man Chan</i>	
Quantum XOR Games	144
<i>Oded Regev and Thomas Vidick</i>	
Two-Message Quantum Interactive Proofs and the Quantum Separability Problem	156
<i>Patrick Hayden, Kevin Milner, and Mark M. Wilde</i>	
Collapse of the Hierarchy of Constant-Depth Exact Quantum Circuits	168
<i>Yasuhiro Takahashi and Seiichiro Tani</i>	
How Low Can Approximate Degree and Quantum Query Complexity Be for Total Boolean Functions?	179
<i>Andris Ambainis and Ronald de Wolf</i>	
Composition Limits and Separating Examples for Some Boolean Function Complexity Measures	185
<i>Justin Gilmer, Michael Saks, and Srikanth Srinivasan</i>	
On Rigid Matrices and U-polynomials	197
<i>Noga Alon and Gil Cohen</i>	
Covering CSPs	207
<i>Irit Dinur and Gillat Kol</i>	
Optimal Inapproximability for Scheduling Problems via Structural Hardness for Hypergraph Vertex Cover	219
<i>Sushant Sachdeva and Rishi Saket</i>	
On the Lattice Smoothing Parameter Problem	230
<i>Kai-Min Chung, Daniel Dadush, Feng-Hao Liu, and Chris Peikert</i>	
A Derandomized Switching Lemma and an Improved Derandomization of AC ⁰	242
<i>Luca Trevisan and Tongke Xue</i>	
The Distinguishability of Product Distributions by Read-Once Branching Programs	248
<i>John Steinberger</i>	

Strong LTCs with Inverse Polylogarithmic Rate and Soundness	255
<i>Michael Viderman</i>	
On the Parameterized and Approximation Hardness of Metric Dimension	266
<i>Sepp Hartung and André Nichterlein</i>	
An $O(n^{1/2+\Sigma})$ -Space and Polynomial-Time Algorithm for Directed Planar Reachability	277
<i>Tatsuya Imai, Kotaro Nakagawa, A. Pavan, N.V. Vinodchandran, and Osamu Watanabe</i>	
Superlinear Lower Bounds for Multipass Graph Processing	287
<i>Venkatesan Guruswami and Krzysztof Onak</i>	
Author Index	299
