

2013 6th International Conference on Advanced Infocomm Technology

(ICAIT 2013)

**Hsinchu, Taiwan
6 – 9 July 2013**

**IEEE Catalog Number: CFP13ICQ-POD
ISBN: 978-1-4799-0466-2**

Table of Contents

Sunday, July 7, 2013

Session Code: SU-P

Presider: Nan-Kuang Chen/ Ping Perry Shum

SU-P-1 Optical Fiber Sensor Systems for Monitoring a Variety of Engineering Structures 1

Kenneth T. V. Grattan (City Graduate School, City University London), Tong Sun (School of Engineering & Mathematical Sciences, City University London)

SU-P-5 Distributed Birefringence Measurement for Optical Fibers and Fiber Based Devices 3

Xiaoyi Bao (Physics Department, University of Ottawa), Liang Chen (Physics Department, University of Ottawa)

Session Code: SU-A

Presider: Mattias Hammar

SU-A-2 Calculation of Leaky Surface Modes in Planar Structures Involving Uniaxially Anisotropic Interfaces 5

Hung-Chun Chang (Department of Electrical Engineering, Graduate Institute of Photonics and Optoelectronics, and Graduate Institute of Communication Engineering, National Taiwan University, Taiwan), Hsuan-Hao Liu (Graduate Institute of Photonics and Optoelectronics National Taiwan University, Taiwan)

SU-A-4 The Design of an Achromatic Two Dimensional Deflection Prism 7

Wen-Tse Shih (Department of Opto-electronic System Engineering Minghsin University of Science and Technology, Hsinchu, Taiwan), Wei-Fu Lu (Department of Computer Science & Information Engineering Asia University, Taichung, Taiwan), Bor-Wen Yang (Department of Opto-electronic System Engineering Minghsin University of Science and Technology, Hsinchu, Taiwan)

Presider: Olga M. Conde

SU-A-5 Nonlinear Dynamics of Semiconductor Optical Amplifiers for High Speed All-Optical Switching 9

Yong Liu (State Key Laboratory of Electronic Thin Films and Integrated Devices, School of Optoelectronic Information, University of Electronic Science and Technology of China, Chengdu, China), Xiu Zheng (State Key Laboratory of Electronic Thin Films and Integrated Devices, School of Optoelectronic Information, University of Electronic Science and Technology of China, Chengdu, China), Ligong Chen (State Key Laboratory of Electronic Thin Films and Integrated Devices, School of Optoelectronic Information, University of Electronic Science and Technology of China, Chengdu, China), Rongguo Lu (State Key Laboratory of Electronic Thin Films and Integrated Devices, School of Optoelectronic Information, University of Electronic Science and Technology of China, Chengdu, China), Yali Zhang (State Key Laboratory of Electronic Thin Films and Integrated Devices, School of Optoelectronic Information, University of Electronic Science and Technology of China, Chengdu, China), Shangjian Zhang (State Key Laboratory of Electronic Thin Films and Integrated Devices, School of Optoelectronic Information, University of Electronic Science and Technology of China, Chengdu, China)

SU-A-6 Embedded Fiber-Optic Sensors in Carbon-Fiber-Composites for Temperature-Insensitive and Intensity-Modulated Microdisplacement Measurement 11

Bo Dong (Institute for Infocomm Research, Agency for Science, Technology and Research (A*STAR), Singapore)

SU-A-7 A Novel Scheme for Noise Suppression in Optical Comb Generation 13

Xia Zhang (State Key Laboratory of Information Photonics and Optical Communications, Beijing University of Posts and Telecommunications, Beijing, China; The Key Laboratory of Optical Communications Science & Technology in Shandong Province, Liaocheng University, Liaocheng, China), Jiachuan Lin (State Key Laboratory of Information Photonics and Optical Communications, Beijing University of Posts and Telecommunications, Beijing, China), Xiaoguang Zhang (State Key Laboratory of Information Photonics and Optical Communications, Beijing University of Posts and Telecommunications, Beijing, China), Lixia Xi (State Key Laboratory of Information Photonics and Optical Communications, Beijing University of Posts and Telecommunications, Beijing, China), Wenbo Zhang (State Key Laboratory of Information Photonics and Optical Communications, Beijing University of Posts and Telecommunications, Beijing, China)

SU-A-8 A Fast Polarimeter Calibration Method Using Vector Projection Algorithm 15

Mingyang Lv (International School, Beijing University of Posts and Telecommunications, Beijing, China), Yunhui Long (International School, Beijing University of Posts and Telecommunications, Beijing, China), Qianyun Zhang (International School, Beijing University of Posts and Telecommunications, Beijing, China), Xinyu Sheng (International School, Beijing University of Posts and Telecommunications, Beijing, China), Li Xu (International School, Beijing University of Posts and Telecommunications, Beijing, China), Hang Guo (International School, Beijing University of Posts and Telecommunications, Beijing, China), Wenbo Zhang (School of Science, Beijing University of Posts and Telecommunications, Beijing, China), Xiaoguang Zhang (State Key Lab of Information Photonics and Optical Communications, Beijing University of Posts and Telecommunications, Beijing, China)

Session Code: SU-B

Presider: Vien Van

SU-B-1 Novel Distributed Sensor Design for Corrosion Monitoring Using Photonic Crystal Fibres17

Tong Sun (School of Engineering and Mathematical Sciences, City University London, London, UK) McCague, C (School of Engineering and Mathematical Sciences, City University London, London, UK), Fabian, M (School of Engineering and Mathematical Sciences, City University London, London, UK), Karimi, M (School of Engineering and Mathematical Sciences, City University London, London, UK), Grattan, K.T.V. (School of Engineering and Mathematical Sciences, City University London, London, UK)

SU-B-2 Putting the World into A Spin – Spun Optical Fibers for Faraday Effect Current Sensor ..19

Andrew Gillooly (Fibercore, Southampton, UK), O. Perring (Fibercore, Southampton, UK)

SU-B-3 A Concentrating Photovoltaic System Based on Liquid Crystal Light Modulation21

Yu-Shih Tsou (Department of Photonics, National Chiao-Tung University, Hsinchu, Taiwan), Yi-Hsin Lin (Department of Photonics, National Chiao-Tung University, Hsinchu, Taiwan)

SU-B-4 Evaluating Partial Derivatives of Two-Variables Functions by Using Maple23

Chii-Huei Yu (Department of Management and Information Nan Jeon Institute of Technology, Tainan City, Taiwan)

Presider: Yi Wu

SU-B-6 Dynamic Control In All-Solid Soft-Glass Photonic Bandgap Fibers 28

Yasutake Ohishi (Research Center for Advanced Photon Technology, Toyota Technological Institute, Japan),
Tonglei Cheng (Research Center for Advanced Photon Technology, Toyota Technological Institute, Japan),
Yukiko Sakai (Research Center for Advanced Photon Technology, Toyota Technological Institute, Japan),
Hiroyasu Kawashima (Research Center for Advanced Photon Technology, Toyota Technological Institute, Japan),
Takenobu Suzuki (Research Center for Advanced Photon Technology, Toyota Technological Institute, Japan)

SU-B-7 A Study on Some Differential Problems with Maple 30

Chii-Huei Yu (Department of Management and Information Nan Jeon Institute of Technology, Tainan City,
Taiwan)

SU-B-8 Multifunction C+L Band EDFA/RFA Hybrid Fiber Amplifiers 35

Chin Cheng Fan (Department of Electronic Engineering National Taiwan University of Science and Technology,
Taipei, Taiwan), Hai-Yin Hsu, (Department of Electronic Engineering National Taiwan University of Science
and Technology, Taipei, Taiwan), Yi-Lin Yu (Department of Electronic Engineering National Taiwan University
of Science and Technology, Taipei, Taiwan), Shien-Kuei Liaw (Department of Electronic Engineering National
Taiwan University of Science and Technology, Taipei, Taiwan) Ren-Yang Liu (National Space Organization,
Hsin-Chu, Taiwan), Chow-Shing Shin (Department of Mechanical Engineering, National Taiwan University,
Taipei, Taiwan)

Session Code: SU-C
Presider: Kuan-Wei Su

- SU-C-1 Toward Single-Cycle MMW Pulse Generation by Optoelectronic Switching of a High-Speed Photonic-Transmitter -Mixer 37**
Ci-Ling Pan (Department of Physics, National Tsing Hua University, Hsinchu, Taiwan), J. W. Lin (Department of Physics, National Tsing Hua University, Hsinchu, Taiwan), J. M. Wun (Department of Electrical Engineering, National Central University, Taoyua, Taiwan) J. W. Shi (Department of Electrical Engineering, National Central University, Taoyua, Taiwan)
- SU-C-3 A Bidirectional Radio-Over-Fiber System Based on Cross-Polarization Modulation Effect in a Semiconductor Optical Amplifier 39**
Shilong Pan (Nanjing University of Aeronautics and Astronautics, China), Beibei Zhu (Nanjing University of Aeronautics and Astronautics, China)

Session Code: SU-C
Presider: Yunqi Liu

- SU-C-5 High-Power Fiber Laser Technology for Wavelength Conversion..... 42**
Yoonchan Jeong (Laser Engineering and Applications Laboratory, Department of Electrical and Computer Engineering, Seoul, National University, Seoul, Korea), Luis A. Vazquez-Zuniga (Laser Engineering and Applications Laboratory, Department of Electrical and Computer Engineering, Seoul, National University, Seoul, Korea), Youngchul Kwon (Laser Engineering and Applications Laboratory, Department of Electrical and Computer Engineering, Seoul, National University, Seoul, Korea), Seung Jong Lee (Laser Engineering and Applications Laboratory, Department of Electrical and Computer Engineering, Seoul, National University, Seoul, Korea), Hyuntai Kim (Laser Engineering and Applications Laboratory, Department of Electrical and Computer Engineering, Seoul, National University, Seoul, Korea)
- SU-C-6 Fabrication of Photonic Devices Inside Glasses by High Repetition Rate Femtosecond Lasers 43**
Quanzhong Zhao (Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China), Geng Lin (Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China), Jianrong Qiu (State Key Laboratory of luminescence Physics and Chemistry, South China University of Technology, Guangzhou, China)

Session Code: SU-D

Presider: Richard J. Black

SU-D-1 Supercontinuum Generation Approaching the Whole Transparent Range of Glass..... 45

Meisong Liao (Shanghai Institute of Optics and Fine Mechanics, China), Yasutake Ohishi (Research Center for Advanced Photon Technology, Toyota Technological Institute, Japan), Tonglei Cheng (Research Center for Advanced Photon Technology, Toyota Technological Institute, Japan), Weiqing Gao (Research Center for Advanced Photon Technology, Toyota Technological Institute, Japan), Xiaojie Xue (Research Center for Advanced Photon Technology, Toyota Technological Institute, Japan), Zhongchao Duan (Research Center for Advanced Photon Technology, Toyota Technological Institute, Japan), Dinghuan Deng (Research Center for Advanced Photon Technology, Toyota Technological Institute, Japan), Hiroyasu Kawashima (Research Center for Advanced Photon Technology, Toyota Technological Institute, Japan), Takenobu Suzuki (Research Center for Advanced Photon Technology, Toyota Technological Institute, Japan)

SU-D-2 2.7 um Emissions in Er³⁺ Doped Transparent Sodium Tellurite Glass Ceramics 47

Yanyan Guo (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China; University of Chinese Academy of Sciences, Beijing, China), Feifei Huang (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China; University of Chinese Academy of Sciences, Beijing, China), Junjie Zhang (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China)

SU-D-3 Application of Maple on Evaluating Multiple Improper Integrals 49

Chii-Huei Yu (Department of Management and Information Nan Jeon Institute of Technology, Tainan City, Taiwan)

SU-D-4 Optical Property Investigation of a Tm³⁺ Doped Germanate-Tellurite Glasses for 2 um Laser 55

Ya-Pei Peng (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China; University of Chinese Academy of Sciences, Beijing, China), Yanyan Guo (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China; University of Chinese Academy of Sciences, Beijing, China), Junjie Zhang (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China)

SU-D-5 Design a Current-Mode Max/Min Circuit in CMOS Technology 57

Kuo-Hung Liao (Department of Electronic Engineering, National United University, Taiwan), Jui-Lin Lai (Department of Electronic Engineering, National United University, Taiwan), Wan-Cing Wang (Department of Electronic Engineering, National United University, Taiwan), Rong-Jian Chen (Department of Electronic Engineering, National United University, Taiwan)

Presider: Mang I Vai

| | | |
|---------------|--|-----------|
| SU-D-6 | Feedforward Equalization with Diverse Optical Filtering | 59 |
| | Lian-Kuan Chen (Department of Information Engineering, The Chinese University of Hong Kong, Hong Kong, China), Ming Li (Department of Information Engineering, The Chinese University of Hong Kong, Hong Kong, China) | |
| SU-D-7 | A Modulation Scheme with Rectangular Frequency Spectrum Based on Truncated SINC Pulse | 61 |
| | Hidenori Taga (Department of Photonics, National Sun Yat-Sen University, Kaohsiung, Taiwan) | |
| SU-D-8 | Performance Improvement of Optical Fiber Communication System by Usingπ-Rotation Low-Density Parity-Check Codes..... | 63 |
| | Lixia Xi (State Key Laboratory of Information Photonics and Optical Communications, Beijing University of Posts and Telecommunications, Beijing, China), Lei Yang (State Key Laboratory of Information Photonics and Optical Communications, Beijing University of Posts and Telecommunications, Beijing, China), Xiaoguang Zhang (State Key Laboratory of Information Photonics and Optical Communications, Beijing University of Posts and Telecommunications, Beijing, China), Wenbo Zhang (State Key Laboratory of Information Photonics and Optical Communications, Beijing University of Posts and Telecommunications, Beijing, China) | |
| SU-D-9 | SSIM for Video Representing and Matching | 65 |
| | Shi-Wei Lo (National Center for High-performance Computing, Hsinchu, Taiwan) | |

Monday, July 8, 2013

Session Code: MO-A

Presider: Chaoyang Li

MO-A-2 Feature and Future of Hydrothermal/Solvo thermal Reactions for Synthesis/Preparation of Nano-Materials with Desired Shapes, Sizes and Structures 67

Masahiro Yoshimura (Promotion Center for Global Materials Research, Dept. Mater. Sci. & Eng., National Cheng Kung University, Tainan, Taiwan; Professor Emeritus of Tokyo Institute of Technology, Japan)

MO-A-3 Properties of Epitaxial AlN Thin Film Deposited on Sapphire Substrate by ECR Plasma. 69

Satoru Kaneko (Manabu Yasui, Masahito Kurouchi, Kanagawa Industrial Technology Center, Kanagawa Prefectural Government, Ebina, Kanagawa, Japan), Takeshi Ito (Manabu Yasui, Masahito Kurouchi, Kanagawa Industrial Technology Center, Kanagawa Prefectural Government, Ebina, Kanagawa, Japan), Takatoshi Nagano (Department of Engineering, Ibaraki University, Ibaraki, Japan), Hironori Torii (MES-AFTY, Hachioji, Tokyo, Japan), Takao Amazawa (MES-AFTY, Hachioji, Tokyo, Japan), Lee Seughwan (Department of Physics, Pusan National University, Busan, Korea), Sungkyun Park (Department of Physics, Pusan National University, Busan, Korea), Takashi Tikumasu (Institute of Fluid Science, Tohoku University, Sendai, Miyagi, Japan), Hirofumi Takikawa (Department of Electrical and Electronic Information Engineering, Toyohashi University of Technology, Toyohashi, Aichi, Japan)

Presider: Masahiro Yoshimura

MO-A-4 Simultaneous Control of Chirality and Growth Position of Single-Walled Carbon Nanotube 71

Nobuyuki Iwata (Department of Electronic Engineering, College of Science & Technology, Nihon University, Japan), Takumi Sagara (Department of Electronic Engineering, College of Science & Technology, Nihon University, Japan), Yusaku Tsuda (Department of Electronic Engineering, College of Science & Technology, Nihon University, Japan), Keisuke Yoshida (Department of Electronic Engineering, College of Science & Technology, Nihon University, Japan), Hiroshi Yamamoto (Department of Electronic Engineering, College of Science & Technology, Nihon University, Japan), Koji Ishii (Department of Applied Chemistry, Faculty of Science, Tokyo University of Science, Japan), Hirofumi Yajima (Department of Applied Chemistry, Faculty of Science, Tokyo University of Science, Japan)

MO-A-5 Modified Cone Shapes on Patterned Sapphire Substrates for High Performance InGaN LED Applications 73

Ray-Hua Horng (Institute of Precision Engineering, National Chung Hsing University, Taichung, Taiwan; Department of Photonics, National Cheng Kung University, Tainan, Taiwan), Hsu-Hung Hsueh (Institute of Precision Engineering, National Chung Hsing University, Taichung, Taiwan), Sin-Liang Ou (Department of Materials Science and Engineering, National Chung Hsing University, Taichung, Taiwan), Chiao-Yang Cheng (Wafer Works Optronics Corporation, Taoyuan, Taiwan), Dong-Sing Wu (Department of Materials Science and Engineering, National Chung Hsing University, Taichung, Taiwan)

MO-A-6 UV Control of Electric/Magnetic Properties of Transition Metal Oxides Grown on SrTiO₃ Single Crystal 75

Hiroaki Nishikawa (Faculty of Biology-Oriented Science and Technology, Kinki University, Kinokawa, Japan)

Presider: Shug-June Hwang

MO-A-7 High Luminance Nano-Structured Zinc Oxide Thin Film Fabrication..... 77

Chaoyang Li (Institute for Nanotechnology, Kochi University of Technology, Kami, Japan), Toshiyuki Kawaharamura (Institute for Nanotechnology, Kochi University of Technology, Kami, Japan), Dapeng Wang (Institute for Nanotechnology, Kochi University of Technology, Kami, Japan), Xin Li (Department of Electronic and Photonic Engineering, Kochi University of Technology, Kochi, Japan), Akimitsu Hatta (Department of Electronic and Photonic Engineering, Kochi University of Technology, Kochi, Japan)

MO-A-8 Nanostructured Plasmonic Devices and Their Applications..... 79

Min Qiu (State Key Laboratory of Modern Optical Instrumentation, Department of Optical Engineering, Zhejiang University, Hangzhou, China; School of Information and Communication Technology, Royal Institute of Technology, Sweden), Qiang Li (State Key Laboratory of Modern Optical Instrumentation, Department of Optical Engineering, Zhejiang University, Hangzhou, China), Weichun Zhang (State Key Laboratory of Modern Optical Instrumentation, Department of Optical Engineering, Zhejiang University, Hangzhou, China), Lijun Meng (State Key Laboratory of Modern Optical Instrumentation, Department of Optical Engineering, Zhejiang University, Hangzhou, China), Ding Zhao (State Key Laboratory of Modern Optical Instrumentation, Department of Optical Engineering, Zhejiang University, Hangzhou, China), Xi Chen (School of Information and Communication Technology, Royal Institute of Technology, Sweden), Yiting Chen (School of Information and Communication Technology, Royal Institute of Technology, Sweden), Min Yan (School of Information and Communication Technology, Royal Institute of Technology, Sweden)

MO-A-9 Long-Period Fiber Gratings Written in the Microstructure Specialty Fibers 81

Yunqi Liu (Key Lab of Specialty Fiber Optics and Optical Access Networks, School of Communication and Information Engineering, Shanghai University, China)

Presider: Shien-Kuei Liaw

MO-A-10 Technology Advances for the 2nd Stage Next-Generation Passive-Optical-Network (NG-PON2)..... 83

Chi-Wai Chow (Department of Photonics and Institute of Electro-Optical Engineering, National Chiao Tung University, Hsinchu, Taiwan), C. H. Yeh (Information and Communications Research Laboratories, Industrial Technology Research Institute (ITRI), Hsinchu, Taiwan; Graduate Institute of Applied Science and Engineering, Fu Jen Catholic University, New Taipei, Taiwan)

Session Code: MO-B

President: Ho-Pui Ho

- MO-B-1 Optical Fibers for Biomedical Photonics Applications 85**
Gerd Keiser (Consulting and Education Dept., Photonics Comm Solutions, Inc, Newton, USA)
- MO-B-2 Nanotemplates as an Innovative Material for Optic Application 87**
Ming-Yu Lin (Instrument Technology Research Center, National Applied Research Laboratories, Hsinchu, Taiwan), Yen-Pei Lu (Instrument Technology Research Center, National Applied Research Laboratories, Hsinchu, Taiwan)
- MO-B-3 Design a Potentiostat for Glucose Bio-Sensing System in CMOS Technology 89**
Wan-Cing Wang (Department of Electronic Engineering, National United University, Miao-Li, Taiwan), Jui-Lin Lai (Department of Electronic Engineering, National United University, Miao-Li, Taiwan), Kuo-Hung Liao (Department of Electronic Engineering, National United University, Miao-Li, Taiwan), Rong-Jian Chen (Department of Electronic Engineering, National United University, Miao-Li, Taiwan)

President: Chien-Yuan Han

- MO-B-6 Optical Spectroscopic Sensors: From the Control of Industrial Processes to Tumor Delineation 91**
Olga M. Conde (Photonics Engineering Group (Dep. TEISA), University of Cantabria, Santander, Spain), Alma Eguizabal (Photonics Engineering Group (Dep. TEISA), University of Cantabria, Santander, Spain), Eusebio Real (Photonics Engineering Group (Dep. TEISA), University of Cantabria, Santander, Spain), José M. López-Higuera (Photonics Engineering Group (Dep. TEISA), University of Cantabria, Santander, Spain), Pilar B. Garcia-Allende (Institute for Biological and Medical Imaging, München, Germany), Ana M. Cubillas (Max-Planck-Institut für die Physik des Lichts, Erlangen, Germany)
- MO-B-7 Direct Near-Field Phase Measurements of Lensed Fiber Employing a Single-Mode Fiber Interferometer 93**
Wen-Hsuan Hsieh (Department of Photonics, National Sun Yat-sen University, Kaohsiung, Taiwan), Yi-Chung Huang (Department of Photonics, National Sun Yat-sen University, Kaohsiung, Taiwan), Jian-Li Chen (Department of Photonics, National Sun Yat-sen University, Kaohsiung, Taiwan), Wen-Chi Hung (Department of Photonics, National Sun Yat-sen University, Kaohsiung, Taiwan), Wood-Hi Cheng (Department of Photonics, National Sun Yat-sen University, Kaohsiung, Taiwan), Yi-Cheng Hsu (Department of Biomechatronics Engineering, National Pingtung University of Science and Technology, Pingtung, Taiwan), Ying-Chien Tsai (Department of Mechanical Engineering, Cheng-Shiu University, Kaohsiung, Taiwan), Maw-Tyan Sheen (Department of Electronic Engineering, Yung Ta Institute of Technology and Commerce, Pingtung, Taiwan)

Presider: Tuan Guo

| | | |
|---------------|---|-----------|
| MO-B-9 | Long Term Stability of a Long Intra-Cavity Saturable Absorber External Cavity Semiconductor Laser | 95 |
| | Raman Kashyap (Department of Electrical Engineering, Polytechnique de Montréal, Montréal, Canada; Department of Physics Engineering, Polytechnique de Montréal, Montréal, Canada), Mamoun Wahbeh (Department of Electrical Engineering, Polytechnique de Montréal, Montréal, Canada), Wen-Yi Lin (Institute of Electro-Optical Engineering, National Taipei University of Technology, Taipei, Taiwan), Po-Yi Wu (Institute of Electro-Optical Engineering, National Taipei University of Technology, Taipei, Taiwan), Hai-Han Lu (Institute of Electro-Optical Engineering, National Taipei University of Technology, Taipei, Taiwan), Joe Seregelyi (Centre for Research in Photonics, School of Information Technology and Engineering, University of Ottawa, Ottawa, Canada) | |

| | | |
|----------------|--|-----------|
| MO-B-12 | Dispersion Compensation Photonic Crystal Fibers with Ultra-High Dispersion Coefficient and Extremely Low Loss | 97 |
| | Jui-Ming Hsu (Department of Electro-Optical Engineering, National United University, Miaoli, Taiwan; Optoelectronics Research Center, National United University, Miaoli, Taiwan), Bing-Liang Wang (Department of Electro-Optical Engineering, National United University), Wen-Hao Zheng (Department of Electro-Optical Engineering, National United University), Ruei-Jie Chen (Department of Electro-Optical Engineering, National United University), Hung-Kai Wei (Department of Electro-Optical Engineering, National United University), Bo-Sian Li (Department of Electro-Optical Engineering, National United University) | |

Presider: Bo Dong

| | | |
|----------------|--|-----------|
| MO-B-13 | Silicon Photonic Microring Components for On-Chip WDM Networks | 99 |
| | Vien Van (Electrical and Computer Engineering, University of Alberta, Edmonton, Alberta, Canada), Daniel Bachman (Electrical and Computer Engineering, University of Alberta, Edmonton, Alberta, Canada), Ashok P. Masilamani (Applied Nanotools, Edmonton, Alberta, Canada) | |

| | | |
|----------------|--|------------|
| MO-B-14 | Improved Transfer Function with Phase Response from Quasi-Static Field Modeling for Galvanic-Type Intra-Body Communication | 101 |
| | Mang I Vai (University of Macau, Macau), Xi Mei Chen (University of Macau, Macau), Peng Un Mak (University of Macau, Macau), Sio Hang Pun (University of Macau, Macau), Yue Ming Gao (Fuzhou University, China), Chan-Tong Lam (Macau Polytechnic Institute, Macao), Ze Tian Wang (University of Macau, Macau), Jia Wen Li (University of Macau, Macau), Meng Wang (University of Macau, Macau), Min Du (Fuzhou University, China) | |

| | | |
|----------------|---|------------|
| MO-B-15 | A Time-Interleaved Pipelined ADC Chip Design for 4-G Application | 104 |
| | Wen Cheng Lai (Department of Electronic Engineering, National Taiwan University of Science and Technology, Taipei, Taiwan), Jhin-Fang Huang (Department of Electronic Engineering, National Taiwan University of Science and Technology, Taipei, Taiwan), Wei-Jian Lin (Department of Electronic Engineering, National Taiwan University of Science and Technology, Taipei, Taiwan) | |

Session Code: MO-C
Presider: Richard Black

- MO-C-2 A Technique for Short Pulse Generation Using Stimulated Brillouin Scattering 109**
Raman Kashyap (Department of Engineering Physics, Polytechnique Montreal, Montreal, Canada; Centre for Radio Engineering and Electrical Engineering, Polytechnique Montreal, Montreal, Canada; Department of Electrical Engineering, Polytechnique Montreal, Montreal, Canada), Victor Lambin Iezzi (Fabulas Laboratory, Polytechnique Montreal, Montreal, Canada), Sebastien Loranger (Department of Engineering Physics, Polytechnique Montreal, Montreal, Canada)
- MO-C-3 A Rotational Angle Sensor Based on Fiber Bragg Gratings 111**
Jinhone He (Department of Electrical Engineering, Feng-Chia University, Taichung, Taiwan), Pei-Tsung Tsai (Department of Electrical Engineering, Feng-Chia University, Taichung, Taiwan), Hao-Jan Sheng (Department of Electrical Engineering, Feng-Chia University, Taichung, Taiwan), Ming-Shin Lin (Department of Electrical Engineering, Feng-Chia University, Taichung, Taiwan), Hai-Tao Sun (Department of Electrical Engineering, Feng-Chia University, Taichung, Taiwan), Wen-Fung Liu (Department of Electrical Engineering, Feng-Chia University, Taichung, Taiwan), Guei-Ru Lin (Ph.D. Program in Electrical and Communications Engineering, Feng-Chia University, Taichung, Taiwan), Meng-Fu Tsai (Ph.D. Program in Electrical and Communications Engineering, Feng-Chia University, Taichung, Taiwan)
- MO-C-4 Micro Tapered Mach-Zehnder Fiber Interferometer for Monitoring Pressure Fluctuation and Its Applications in Pulse-Rate Detection 113**
Yu-Hsin Hsieh (Department of Electro-Optical Engineering, National United University, Miaoli, Taiwan), Nan-Kuang Chen (Department of Electro-Optical Engineering, National United University, Miaoli, Taiwan; Optoelectronics Research Center, National United University, Miaoli, Taiwan)

Presider: Tong Sun

- MO-C-5 Optical Fiber Humidity Sensor Based on Michelson Interferometric Structures..... 116**
Xinyong Dong (Institute of Optoelectronic Technology, China Jiliang University, Hangzhou, China), Pengbing Hu (Institute of Optoelectronic Technology, China Jiliang University, Hangzhou, China), Chi Chiu Chan (Division of Bioengineering, School of Chemical and Biomedical Engineering), Ping Shum (School of Electrical & Electronic Engineering, Nanyang Technological University, Singapore)
- MO-C-6 Fiber Sensors Based on Fiber Gratings..... 118**
Wen-Fung Liu (Department of Electrical Engineering, Feng-Chia University, Taichung, Taiwan)
- MO-C-7 Refractive Index Sensor Based on the Nanofilm Coated Double Cladding Fiber 120**
Ying Zhao (Key Lab of Specialty Fiber Optics and Optical Access Networks, School of Communication and Information Engineering, Shanghai University, Shanghai, China), Fufei Pang (Key Lab of Specialty Fiber Optics and Optical Access Networks, School of Communication and Information Engineering, Shanghai University, Shanghai, China), Yanhua Dong (Key Lab of Specialty Fiber Optics and Optical Access Networks, School of Communication and Information Engineering, Shanghai University, Shanghai, China), Jianxiang Wen (Key Lab of Specialty Fiber Optics and Optical Access Networks, School of Communication and Information Engineering, Shanghai University, Shanghai, China), Tingyun Wang (Key Lab of Specialty Fiber Optics and Optical Access Networks, School of Communication and Information Engineering, Shanghai University, Shanghai, China)
- MO-C-8 Polarization-Maintaining Fiber-Optic-Grating Torsion Sensor..... 122**
Tuan Guo (Institute of Photonics Technology, Jinan University, Guangzhou, China), F. Du (Institute of Photonics Technology, Jinan University, Guangzhou, China), F. Liu (Institute of Photonics Technology, Jinan University, Guangzhou, China), L. B. Shang (Institute of Photonics Technology, Jinan University, Guangzhou, China), Z. C. Zhang (Institute of Photonics Technology, Jinan University, Guangzhou, China), B. O. Guan (Institute of Photonics Technology, Jinan University, Guangzhou, China)

President: Bai-Ou Guan

MO-C-9 Laser Dynamics of Asynchronous Mode-Locked Fiber Lasers 124

Yinchieh Lai (Department of Photonics and Institute of Electro-Optical Engineering, National Chiao-Tung University, Hisnchu, Taiwan), Siao-Shan Jyu (Department of Photonics and Institute of Electro-Optical Engineering, National Chiao-Tung University, Hisnchu, Taiwan), Sheng-Min Wang (Department of Photonics and Institute of Electro-Optical Engineering, National Chiao-Tung University, Hisnchu, Taiwan)

MO-C-10 Ytterbium Doped Tunable Fiber Lasers with Near Single Frequency Operation 126

Shien-Kuei Liaw (Department of Electronic Engineering, National Taiwan University of Science and Technology, Taipei, Taiwan), W. C. Hsu (Department of Electronic Engineering, National Taiwan University of Science and Technology, Taipei, Taiwan), N. K. Chen (Department of Electro-Optical Engineering, National United University, Maoli, Taiwan), Y. L. Yu (Department of Electronic Engineering, National Taiwan University of Science and Technology, Taipei, Taiwan), M. H. Shih (Research Center for Applied Sciences, Academia Sinica, Taipei, Taiwan)

MO-C-11 Fabrication of Few-Mode Crystalline Core Fiber 128

Chih-Wei Chuang (Department of Photonics, National Sun Yat-sen University, Kaohsiung, Taiwan), Wei-Lun Wang (Department of Photonics, National Sun Yat-sen University, Kaohsiung, Taiwan), Fang-Yen Lo (Department of Photonics, National Sun Yat-sen University, Kaohsiung, Taiwan), Chun-Nien Liu (Department of Photonics, National Sun Yat-sen University, Kaohsiung, Taiwan), Yi-Chung Huang (Department of Photonics, National Sun Yat-sen University, Kaohsiung, Taiwan), Ta-Lung Chou (Department of Photonics, National Sun Yat-sen University, Kaohsiung, Taiwan), Wood-Hi Cheng (Department of Photonics, National Sun Yat-sen University, Kaohsiung, Taiwan), Sheng-Lung Huang (Graduate Institute of Photonics and Optoelectronics, National Taiwan University, Taipei, Taiwan)

MO-C-12 Multi-Wavelength Light Source in 50GHz Channel Spacing Using Semiconductor Optical Amplifier 130

Tsung-Yu Lu (Department of Electronic Engineering, National Taiwan University of Science and Technology, Taipei, Taiwan), Yi-Lin Yu (Department of Electronic Engineering, National Taiwan University of Science and Technology, Taipei, Taiwan), Yen-Hung Lu (Department of Electronic Engineering, National Taiwan University of Science and Technology, Taipei, Taiwan), Shien-Kuei Liaw (Department of Electronic Engineering, National Taiwan University of Science and Technology, Taipei, Taiwan), Nan-Kuang Chen (Department of electro-optical engineering, National United University, Maoli, Taiwan), Wen-Fang Wu (Department of Mechanic Engineering, National Taiwan University, Taipei, Taiwan)

Presider: David Mikolas

MO-C-14 All-Optical Analog Signal Processing Technologies 132

Xinliang Zhang (Wuhan National Laboratory for Optoelectronics & School of Optical and Electronic Information, Huazhong University of Science and Technology, Wuhan, P.R.China), Jianji Dong (Wuhan National Laboratory for Optoelectronics & School of Optical and Electronic Information, Huazhong University of Science and Technology, Wuhan, P.R.China), Sisi Tan (Wuhan National Laboratory for Optoelectronics & School of Optical and Electronic Information, Huazhong University of Science and Technology, Wuhan, P.R.China), Dexiu Huang (Wuhan National Laboratory for Optoelectronics & School of Optical and Electronic Information, Huazhong University of Science and Technology, Wuhan, P.R.China)

MO-C-15 Semiconductor Lasers at Period-One Nonlinear Dynamics for DSB-To-SSB Conversion 133

Yu-Han Hung (Department of Photonics, National Cheng Kung University, Tainan, Taiwan), Cheng-Hao Chu (Department of Photonics, National Cheng Kung University, Tainan, Taiwan), Sheng-Kwang Hwang (Department of Photonics, National Cheng Kung University, Tainan, Taiwan; Advanced Optoelectronic Technology Center, National Cheng Kung University, Tainan, Taiwan)

MO-C-16 Performance Evaluation of N-Well/P-Sub Photodiodes in 65nm CMOS Process 135

Waqas Ahmad (Department of Electrical and Information Technology (EIT), Lund University, Lund, Sweden), Markus Törmänen (Department of Electrical and Information Technology (EIT), Lund University, Lund, Sweden), Henrik Sjöland (Department of Electrical and Information Technology (EIT), Lund University, Lund, Sweden)

Session Code: MO-D

Presider: Yoonchan Jeong

MO-D-2 Theoretical Studies of Frequency Domain Mode-Locked Fiber Lasers 137

Ping-Kong Alexander Wai (Photonics Research Centre, Department of Electronic and Information Engineering, The Hong Kong Polytechnic University, Hung Hom, Hong Kong, China), Feng Li (Photonics Research Centre, Department of Electronic and Information Engineering, The Hong Kong Polytechnic University, Hung Hom, Hong Kong, China), Nathan Kutz (Department of Applied Mathematics, University of Washington, Seattle, USA)

MO-D-3 Full-Band Tunable V-Cavity Laser for Low-Cost Access and Data Center Networks 139

Jian-Jun He (State Key Laboratory of Modern Optical Instrumentation, Department of Optical Engineering, Zhejiang University, Hangzhou, China), Wenxiong Wei (State Key Laboratory of Modern Optical Instrumentation, Department of Optical Engineering, Zhejiang University, Hangzhou, China), Sen Zhang (State Key Laboratory of Modern Optical Instrumentation, Department of Optical Engineering, Zhejiang University, Hangzhou, China), Jianjun Meng (State Key Laboratory of Modern Optical Instrumentation, Department of Optical Engineering, Zhejiang University, Hangzhou, China), Shanli Guo (State Key Laboratory of Modern Optical Instrumentation, Department of Optical Engineering, Zhejiang University, Hangzhou, China), Hongli Zhu (State Key Laboratory of Modern Optical Instrumentation, Department of Optical Engineering, Zhejiang University, Hangzhou, China), Li Zou (Hangzhou Lightip Technologies Co. Ltd., Zhejiang University Science and Technology Park, Hangzhou, China)

Presider: Raman Kashyap

MO-D-4 Room-Temperature Operation of 980-nm Transistor-Vertical-Cavity Surface-Emitting Lasers 141

Mattias Hammar (School of Information and Communication Technology, KTH – Royal Institute of Technology, Sweden), Yu Xiang (School of Information and Communication Technology, KTH – Royal Institute of Technology, Sweden), Xingang Yu (School of Information and Communication Technology, KTH – Royal Institute of Technology, Sweden), Jesper Berggren (School of Information and Communication Technology, KTH – Royal Institute of Technology, Sweden), Thomas Zabel (School of Information and Communication Technology, KTH – Royal Institute of Technology, Sweden), Muhammad Nadeem Akram (Institute of Micro Nano Systems Technology, University of Vestfold, Tønsberg, Norway)

MO-D-5 1.3µm DFB Laser Array Based on Reconstruction-Equivalent-Chirp (REC) Technique.. 143

Xiangfei Chen (Microwave-Photonics Technique Laboratory National Laboratory of Microstructures & School of Engineering and Applied Sciences, Nanjing University, Nanjing, China), Linlin Lu (Microwave-Photonics Technique Laboratory National Laboratory of Microstructures & School of Engineering and Applied Sciences, Nanjing University, Nanjing, China)

MO-D-6 Polarization-Modulated Microwave Photonic Signal Processing 145

Shilong Pan (Microwave Photonics Research Laboratory, College of Electronic and Information Engineering, Nanjing University of Aeronautics and Astronautics, Nanjing, China), Yamei Zhang (Microwave Photonics Research Laboratory, College of Electronic and Information Engineering, Nanjing University of Aeronautics and Astronautics, Nanjing, China).

Presider: Kai-Ming Feng

- MO-D-7 High-Speed Semiconductor All-Optical Conversion Device Based on Field-Driven Quantum Well..... 147**
Yi-jen Chiu (Institute of Electro-Optic Engineering and Department of Photonics, National Sun Yat-Sen University, Kaoshiung, Taiwan), Tsu-Hsiu Wu (Institute of Electro-Optic Engineering and Department of Photonics, National Sun Yat-Sen University, Kaoshiung, Taiwan), Jui-Pin Wu (Institute of Electro-Optic Engineering and Department of Photonics, National Sun Yat-Sen University, Kaoshiung, Taiwan)
- MO-D-8 Mixed Technology Platform for Terabit Optical Ethernet Applications 149**
Lars Zimmermann (IHP, Im Technologiepark 25, 15236 Frankfurt (Oder), Germany), Stefan Lischke (IHP, Im Technologiepark 25, 15236 Frankfurt (Oder), Sascha Fedderwitz (u2t Photonics AG, Reuchlinstraße 10/11, 10553 Berlin, Germany), Tino Brast (u2t Photonics AG, Reuchlinstraße 10/11, 10553 Berlin, Germany), Andreas G. Steffan (u2t Photonics AG, Reuchlinstraße 10/11, 10553 Berlin, Germany), Matthew O'Keefe (u2t Photonics UK Limited, NETPark incubator, Thomas Wright Way, Sedgefield, TS21 3FD, UK), Despoina Petousi (Technische Universitaet Berlin, HFT 4, Einsteinufer 25, 10587 Berlin, Germany), Christos Stamatiadis (Technische Universitaet Berlin, HFT 4, Einsteinufer 25, 10587 Berlin, Germany), Karsten Voigt (Technische Universitaet Berlin, HFT 4, Einsteinufer 25, 10587 Berlin, Germany), Giovanni Battista Preve (Universidad Politécnica de Valencia (UPVLC), Camino de Vera s/n, 46022 Valencia, Spain), Ioannis Lazarou (National Technical University of Athens, 9 Iroon Polytechniou Str., Zografou, GR15773, Athens, Greece), Hercules Avramopoulos (National Technical University of Athens, 9 Iroon Polytechniou Str., Zografou, GR15773, Athens, Greece), Dietmar Korn (Karlsruhe Institute of Technology (KIT) Institutes IPQ and IMT, Engesserstr. 5, 76131 Karlsruhe, Germany), Philipp Schindler (Karlsruhe Institute of Technology (KIT) Institutes IPQ and IMT, Engesserstr. 5, 76131 Karlsruhe, Germany), Christian Koos (Karlsruhe Institute of Technology (KIT) Institutes IPQ and IMT, Engesserstr. 5, 76131 Karlsruhe, Germany), Wolfgang Freude (Karlsruhe Institute of Technology (KIT) Institutes IPQ and IMT, Engesserstr. 5, 76131 Karlsruhe, Germany), Juerg Leuthold (now with ETH-Zurich, Inst. of Electromagnetic Fields, Gloriastrasse 35, 8092 Zurich, Switzerland), Rogerio Nogueira (Coriant Portugal SA, Rua Irmãos Siemens, 2720-093, Amadora, Portugal), Diego Roccató (Telecom Italia S.p.A.Turino, Via G. Reiss romoli 274, 10148, Torino, Italy), Efstratios Kehayas (Constelex Technology Enablers Ltd, Microelectronics Center, 12 Sorou Str.,Marousi 15125, Athens, Greece), Leontios Stampoulidis (Constelex Technology Enablers Ltd, Microelectronics Center, 12 Sorou Str.,Marousi 15125, Athens, Greece)
- MO-D-9 Intelligent Service-Integrated Platform Based on IOT Technology Using FCM and FQFD Method 151**
Rui Yang Chen (Department of Business Administration, Aletheia University, Taipei, Taiwan)
- MO-D-10 Temperature Instability of Amorphous In-Ga-Zn-O Thin Film Transistors 153**
Yih-Shing Lee (Department of Optoelectronic System Engineering, Minghsin University of Science & Technology, Hsin-Fong, Hsin-Chu, Taiwan), Sheng-Kai Fan (Institute of Electronics, Minghsin University of Science and Technology, Hsin-Chu, Taiwan), Chii-Wen Chen (Institute of Electronics, Minghsin University of Science and Technology, Hsin-Chu, Taiwan), Tung-Wei Yen (Institute of Electronics & Department of Electronic Engineering, National Chiao Tung University, Hsin-Chu, Taiwan), Horng-Chih Lin (Institute of Electronics & Department of Electronic Engineering, National Chiao Tung University, Hsin-Chu, Taiwan)

Presider: Hsiang-Chen Chui

MO-D-11 High-Quality Frequency-Locked Multi-Carrier Source for a Terabit Optical Communication System 155

Xiaoguang Zhang (State Key Lab of Information Photonics and Optical Communications, Beijing University of Posts and Telecommunications, Beijing, China)

MO-D-12 Survivable Architectures and Optical Multicast Overlay for WDM Passive Optical Networks 157

Calvin C K Chan (Department of Information Engineering, The Chinese University of Hong Kong, Shatin, N.T., Hong Kong)

MO-D-14 Determination of Effective Modulation Strength for Asynchronous Rational Harmonic Mode-Locked Fiber Lasers with Variational Method 159

Siao-Shan Jyu (Department of Photonics and Institute of Electro-Optical Engineering, National Chiao Tung University, Hsinchu, Taiwan), G.-H. Jiang (Department of Photonics and Institute of Electro-Optical Engineering, National Chiao Tung University, Hsinchu, Taiwan), Y. Lai (Department of Photonics and Institute of Electro-Optical Engineering, National Chiao Tung University, Hsinchu, Taiwan)

Session Code: MO-PS

MO-PS-1 1× 8 Signal Router Using Cascading the Mach-Zehnder Interferometers..... 161

Santosh Kumar (Photonics Lab, Department of Electronics Engineering, Indian School of Mines, Dhanbad, Jharkhand, India), Sanjeev Kumar Raghuwanshi (Photonics Lab, Department of Electronics Engineering, Indian School of Mines, Dhanbad, Jharkhand, India), Ajay Kumar (Photonics Lab, Department of Electronics Engineering, Indian School of Mines, Dhanbad, Jharkhand, India)

MO-PS-2 UV Nonvolatile Sensor by Using SONOS Capacitor Device 163

Wen-Ching Hsieh (Department of Opto-Electronic System Engineering, Minghsin University of Science and Technology, Hsin-Chu, Taiwan), Hao-Tien Daniel Lee (ETOMS Electronics Corp), Fuh-Cheng Jong (Southern Taiwan University of Technology), Shich-Chuan Wu (National Nano Device Laboratories)

MO-PS-3 Effect of Residual Stress Relaxation in Boron-Doped Double Cladding Fibers by CO2 Laser 165

Wen-Ching Hsieh (Key Lab of Specialty Fiber Optics and Optical Access Networks, School of Communication and Information Engineering, Shanghai University, Shanghai, China), Fufei Pang (Key Lab of Specialty Fiber Optics and Optical Access Networks, School of Communication and Information Engineering, Shanghai University, Shanghai, China), Ying Zhao (Key Lab of Specialty Fiber Optics and Optical Access Networks, School of Communication and Information Engineering, Shanghai University, Shanghai, China), Hui Xu (Key Lab of Specialty Fiber Optics and Optical Access Networks, School of Communication and Information Engineering, Shanghai University, Shanghai, China), Tingyun Wang (Key Lab of Specialty Fiber Optics and Optical Access Networks, School of Communication and Information Engineering, Shanghai University, Shanghai, China)

MO-PS-4 A Simple Algorithm for Generation of Collision Free S-Random Interleavers for Turbo Codes 167

Hongjian Cao (Provincial Key Lab of Information Coding and Transmission, School of Information Science and Technology, Southwest Jiao Tong University, Chengdu, China), Hongyu Zhao (Provincial Key Lab of Information Coding and Transmission, School of Information Science and Technology, Southwest Jiao Tong University, Chengdu, China)

MO-PS-5 Femtosecond Laser Assisted Selective Infiltration of Dual-Core Photonic Crystal Fiber 169

Meng Zhang (School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore), Yicheng Lai (Data Storage Institute, Singapore), Wu Yuan (Singapore Institute of Manufacturing Technology, Singapore), Yen Peng Seah (Singapore Institute of Manufacturing Technology, Singapore), Ping Shum (School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore)

MO-PS-6 Magneto-Optical Fiber Sensor Based On Magnetic Fluid Surrounded Tilted Fiber Bragg Grating 171

Jie Zheng (Institute of Optoelectronic Technology, China Jiliang University, Hangzhou, China), Xinyong Dong (Institute of Optoelectronic Technology, China Jiliang University, Hangzhou, China), Li-Yang Shao (Institute of Optoelectronic Technology, China Jiliang University, Hangzhou, China), Peng Zu (School of Chemical and Biomedical Engineering, Nanyang Technological University, Singapore), Chi Chiu Chan (School of Chemical and Biomedical Engineering, Nanyang Technological University, Singapore)

- MO-PS-7 A Location Aided Cooperative Caching Protocol for Mobile Ad Hoc Networks 173**
 Preetha Theresa Joy (Dept. of Computer Science, Cochin University of Science and Technology, Kochi ,Kerala ,India), K .Poulose Jacob (Dept. of Computer Science, Cochin University of Science and Technology, Kochi ,Kerala ,India)
- MO-PS-8 Analysis of the Tunable Optical Comb Filter by Using Mach-Zehnder Interferometer..... 179**
 Santosh Kumar (Photonics Lab, Department of Electronics Engineering, Indian School of Mines, Dhanbad, Jharkhand, India), A. Kumar (Photonics Lab, Department of Electronics Engineering, Indian School of Mines, Dhanbad, Jharkhand, India), S. K. Raghuwanshi (Photonics Lab, Department of Electronics Engineering, Indian School of Mines, Dhanbad, Jharkhand, India)
- MO-PS-9 The Effect of Introducing Teo2 on 2.7 μ m Emission In Zblan Glass 182**
 Ya-Pei Peng (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China; University of Chinese Academy of Sciences, Beijing, China), Yanyan Guo (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China; University of Chinese Academy of Sciences, Beijing, China), Yaoyao Ma (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China; University of Chinese Academy of Sciences, Beijing, China), Junjie Zhang (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China)
- MO-PS-10 2.7 μ m Emission Properties of Er³⁺/Nd³⁺-Codoped Fluorotellurite Glasses 184**
 Ya-Pei Peng (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China; University of Chinese Academy of Sciences, Beijing, China), Yanyan Guo (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China; University of Chinese Academy of Sciences, Beijing, China), Yaoyao Ma (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China; University of Chinese Academy of Sciences, Beijing, China), Junjie Zhang (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China)
- MO-PS-11 2 μ m Spectroscopy in Tm³⁺ Doped Geo₂-Teo₂-Based Glasses 186**
 Ya-Pei Peng (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai 201800, China; University of Chinese Academy of Sciences, Beijing, China), Pei-Wen Kuan (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai 201800, China; University of Chinese Academy of Sciences, Beijing, China), Junjie Zhang (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai , China)

| | | |
|-----------------|---|------------|
| MO-PS-12 | 2.0μm Emission Property of Ho³⁺/Yb³⁺ Codoped Germanate-Tellurite Glasses | 188 |
| | Ya-Pei Peng (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China; University of Chinese Academy of Sciences, Beijing, China), Yaoyao Ma (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China; University of Chinese Academy of Sciences, Beijing, China), Feifei Huang (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China; University of Chinese Academy of Sciences, Beijing, China), Junjie Zhang (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China) | |
| MO-PS-13 | 2.7μm Emission of Highly Erbium Doped Fluoride Glasses..... | 190 |
| | Feifei Huang (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China; University of Chinese Academy of Sciences, Beijing, China), Yanyan Guo (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China; University of Chinese Academy of Sciences, Beijing, China), Junjie Zhang (Key Laboratory of Materials for High Power Lasers, Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences, Shanghai, China) | |
| MO-PS-18 | Four Element Rectangular Dielectric Resonator Antenna for 5.0 Ghz Wlan and Wimax Band Application | 192 |
| | Pinku Ranjan (Department of Electronics Engineering, Indian School of Mines, Dhanbad, India), R. K. Gangwar (Department of Electronics Engineering, Indian School of Mines, Dhanbad, India) | |
| MO-PS-19 | Bandwidth Enhancement of L-Probe Proximity-Fed Annular Ring Microstrip Slot Antenna | 195 |
| | Anil Singh (Electronics Engineering, Indian School of Mines, Dhanbad, India), Ravi Kumar Gangwar (Electronics Engineering, Indian School of Mines, Dhanbad, India), Binod K. Kanaujia (Electronics and Comm. Eng., IAICTR, Gita Colony, Delhi, India) | |
| MO-PS-20 | Crosstalk in Dissimilar Four Core Coupled Multi-Core Fiber Due To Bend | 198 |
| | Jitendra Kumar Mishra (Department of Electronics Engineering, Indian School of Mines, Dhanbad, India), Vishnu Priye (Department of Electronics Engineering, Indian School of Mines, Dhanbad, India) | |
| MO-PS-21 | Real Time Monitoring of Superoxide Generation in Zebrafish Liver Using a Sensitive Fiber-Optic Probe..... | 200 |
| | Hsu-Fu Chang (Department of Electrical Engineering, National Changhua University of Education, Changhua, Taiwan), Che-Wei Hsu (Department of Electrical Engineering, National Changhua University of Education, Changhua, Taiwan), Hsu-Fu Chang (Department of Electrical Engineering, National Changhua University of Education, Changhua, Taiwan), Chuian-Fu Ken (Graduate Institute of Biotechnology, National Changhua University of Education, Changhua, Taiwan), Ya-Ging Liu (Graduate Institute of Biotechnology, National Changhua University of Education, Changhua, Taiwan) | |
| MO-PS-23 | Biologically Inspired Routing Protocol for Vehicular Adhoc Network | 202 |
| | V.A Gajbhiye (Department of CSE, GHRCE, Nagpur ,India), R. W. Jasutkar (Department of Computer Science & Engineering, GHRCE, Nagpur ,India) | |

Tuesday, July 9, 2013

Session Code: TU-A

Presider: Xinyong Dong

TU-A-1 Precise Lightwave Modulation for Digital and Analogue Optical Communications..... 207

Tetsuya Kawanishi (Lightwave Devices Laboratory, Photonic Network Research Institute, National Institute of Information and Communications Technology, Koganei, Tokyo, Japan)

TU-A-3 Using Maple to Study the Integrals of Trigonometric Functions 209

Chii-Huei Yu (Department of Management and Information Nan Jeon Institute of Technology, Tainan City, Taiwan)

Presider: Xinyong Dong

**TU-A-5 Deterministic VS Random Access Schemes -- A Case Study in Mobile Ad Hoc Networks
..... 216**

Yi Wu (College of Photonic and Electronic Engineering, Fujian Normal University, Fuzhou, China), Kenneth W. Shum (The Institute of Network Coding, The Chinese University of Hong Kong, Hong Kong)

Session Code: TU-B

Presider: Nan-Kuang Chen

| | | |
|---------------|---|------------|
| TU-B-1 | Injection-Locked Optical Orthogonal Frequency-Division Multiplexing for Radio-Over-Fiber Communications..... | 219 |
| | Jia-Ming Liu (Department of Electrical Engineering, University of California, Los Angeles, Los Angeles, California, U.S.A.), Haleh Karkhaneh (Department of Electrical Engineering, University of California, Los Angeles, Los Angeles, California, U.S.A.) | |
| TU-B-2 | Ultra-Thin Electro-Optical Films | 221 |
| | Glen Porter (Optoelectronics Research Center, National United University, Miaoli, Taiwan) | |
| TU-B-4 | Scheduling Control of AGV System Based on Game Theory | 223 |
| | Guanghua Zhang (School of Electronics and Information, Northwestern Polytechnical University, Xi'an China), Huang Dengshan (School of Electronics and Information, Northwestern Polytechnical University, Xi'an China) | |

Presider: Bo Dong

| | | |
|---------------|--|------------|
| TU-B-5 | Lithium Iron Phosphate Battery for Cloud Data Storage System and Telecom Uninterruptible Power System | 228 |
| | Mike Yang (Phoenix Silicon International Corporation, Hsinchu, Taiwan) | |

Session Code: TU-C

Presider: Xiangfei Chen

- TU-C-1 Chaotic Random Bit Generation by Optical Injection of Laser Diodes 230**
Sze-Chun Chan (Department of Electronic Engineering, City University of Hong Kong, Hong Kong, China; State Key Laboratory of Millimeter Waves, City University of Hong Kong, Hong Kong, China), Xiao-Zhou Li (Department of Electronic Engineering, City University of Hong Kong, Hong Kong, China)
- TU-C-2 All-Optical Switching Using Cesium Two-Photon Transition..... 232**
Hsiang-Chen Chui (Department of Photonics, National Cheng Kung University, Tainan, Taiwan ; Advanced Optoelectronic Technology Center, National Cheng Kung University, Tainan, Taiwan), Chin-Chun Tsai (Department of Photonics, National Cheng Kung University, Tainan, Taiwan; Department of Physics, National Cheng Kung University, Tainan, Taiwan) , Yi-Chi Lee (Department of Photonics, National Cheng Kung University, Tainan, Taiwan; Department of Physics, National Cheng Kung University, Tainan, Taiwan)
- TU-C-3 Architecture Design of Reconfigurable Reed-Solomon Error Correction Codec 234**
Sheng-Zhong Fu (National United University, Miaoli, Taiwan), Bo-Xuan Lu (National United University, Miaoli, Taiwan), Ying-Hung Pan (National United University, Miaoli, Taiwan), Jyun-Hong Shen (National United University, Miaoli, Taiwan), Rong-Jian Chen (National United University, Miaoli, Taiwan)
- TU-C-4 Evaluating the Risk of Android Application: Design and Implementation of Static Analysis System 236**
Hsiang-Yuan Hsueh (Information and Communications Research Laboratories, Industrial Technology Research Institute, Hsin-Chu County, Taiwan), Kun-Fu Huang (Information and Communications Research Laboratories, Industrial Technology Research Institute, Hsin-Chu County, Taiwan), Wei-Ming Wu (Information and Communications Research Laboratories, Industrial Technology Research Institute, Hsin-Chu County, Taiwan), Chih-Lin Li (Information and Communications Research Laboratories, Industrial Technology Research Institute, Hsin-Chu County, Taiwan)

Presider: Nan-Kuang Chen

- TU-C-5 *Micro Tapered Fiber Mach-Zehnder Interferometer and Its Applications* 238**
Nan-Kuang Chen (Department of Electro-Optical Engineering, National United University, Miaoli, Taiwan; Optoelectronics Research Center, National United University, Miaoli, Taiwan), Yu-Hsin Hsieh (Department of Electro-Optical Engineering, National United University, Miaoli, Taiwan), Jheng-Jyun Wang (Department of Electro-Optical Engineering, National United University, Miaoli, Taiwan)
- TU-C-6 *Ultraviolet Step-Index Silica Single Mode Fiber as a Spatial Filter for Interference Lithography* 240**
David Mikolas (Institute of NEMS, National Tsing Hua University, Hsinchu, Taiwan), En-Chiang Chang (Institute of NEMS, National Tsing Hua University, Hsinchu, Taiwan), Pao-Te Lin (Institute of NEMS, National Tsing Hua University, Hsinchu, Taiwan), Yi-Lin Sun (Institute of NEMS, National Tsing Hua University, Hsinchu, Taiwan), Chien-Chung Fu (Institute of NEMS, National Tsing Hua University, Hsinchu, Taiwan)

Session Code: TU-D

Presider: Xiaoguang Zhang

- TU-D-1 Orthogonal-Polarimetric Differential Tilted Fiber Grating Biosensor..... 242**
Tuan Guo (Institute of Photonics Technology, Jinan University, Guangzhou, China), Z. C. Zhang (Institute of Photonics Technology, Jinan University, Guangzhou, China), F. Liu (Institute of Photonics Technology, Jinan University, Guangzhou, China), X. Y. Zhu (Department of Biochemistry, Medical School, Jinan University, Guangzhou, China), Y. Liu (Department of Biochemistry, Medical School, Jinan University, Guangzhou, China), B. O. Guan (Institute of Photonics Technology, Jinan University, Guangzhou, China), Z. C. Zhang (Institute of Photonics Technology, Jinan University, Guangzhou, China), J. Albert (Department of Electronics, Carleton University, Ottawa, Canada)
- TU-D-2 MRI-Based Noninvasive Electrical Property Retrievals 244**
Shaoying Huang (Engineering Product Development, Singapore University of Technology and Design, Singapore), Shaohui Foong (Engineering Product Development, Singapore University of Technology and Design, Singapore)
- TU-D-4 A Modified Decoding Algorithm Involving Priori Characteristics Bits for LDPC 245**
Wei Bi (State Key Laboratory of Information Photonics and Optical Communications, Beijing University of Posts and Telecommunications, Beijing, China), Wenbo Zhang (State Key Laboratory of Information Photonics and Optical Communications, Beijing University of Posts and Telecommunications, Beijing, China), Wenxue He (State Key Laboratory of Information Photonics and Optical Communications, Beijing University of Posts and Telecommunications, Beijing, China), Chao Li (State Key Laboratory of Information Photonics and Optical Communications, Beijing University of Posts and Telecommunications, Beijing, China)

Presider: Tetsuya Kawanishi

- TU-D-5 *Next Generation Fiber Optic Sensing Systems..... 247***
Richard Black (Intelligent Fiber Optic Systems Corporation (IFOS), Santa Clara, USA), Behzad Moslehi (Intelligent Fiber Optic Systems Corporation (IFOS), Santa Clara, USA)
- TU-D-6 *Optical Power Monitoring for O-OFDM Superchannel Based on Wiener Deconvolution 249***
Zhaohui Li (Institute of Photonics Technology, Jinan University, Guangzhou, China), Hongwen Lin (Institute of Photonics Technology, Jinan University, Guangzhou, China), Tao Gui (Institute of Photonics Technology, Jinan University, Guangzhou, China), Yuan Bao (Institute of Photonics Technology, Jinan University, Guangzhou, China), Jianping Li (Institute of Photonics Technology, Jinan University, Guangzhou, China), Gordon Ning Liu (Huawei Technologies Co. Ltd., Shenzhen, China)
