

2012 2nd Australian Control Conference

(AUCC 2012)

**Sydney, Australia
15 – 16 November 2012**

**IEEE Catalog Number: CFP1318M-POD
ISBN: 978-1-4799-1398-5**

ThAOP1 : Nano/Quantum/Nonlinear Control

- 1 **Model Reduction of Linear Quantum Stochastic Systems by Subsystem Truncation**
(Hendra I. Nurdin)
- 7 **Minimizing Probe Loss in Tapping Mode Atomic Force Microscopy Using a Switched Gain Resonant Controller**
(Matthew W. Fairbairn, S.O. Reza Moheimani)
- 13 **Sampled-Data Design for Decoherence Control of a Single Qubit with Operator Errors**
(Daoyi Dong, Ian R. Petersen, Xuexi Yi, Herschel Rabitz)
- 19 **Physical Realizability of Multi-Level Quantum Systems**
(Luis A. Duffaut Espinosa, Z. Miao, Ian R. Petersen, V. Ugrinovskii, M.R. James)
- 24 **Dissipativity-Based Feedback Design for Interconnected Nonlinear Systems on Different Time Scales**
(N. Hudon, M.J. Tippett, Jie Bao)

ThBOP2: Control Applications I

- 30 **Nonlinear Controller Design for Single-Phase Grid-Connected Photovoltaic Systems Using Partial Feedback Linearization**
(M.A. Mahmud, Hemanshu R. Pota, M.J. Hossain)
- 36 **A Distributed Algorithm for Optimal Dispatch in Smart Power Grids with Piecewise Linear Cost Functions**
(Aneela Yasmeen, Raghuraman Mudumbai, Soura Dasgupta)
- 41 **Robust Non-Linear Observer for Islanding Detection of Inverter Based Distributed Generation**
(Mohamed Al Hosani, Zhihua Qu)
- 48 **A 2-D Roesser Model for Automated Irrigation Channels and Tools for Practical Stability and Performance Analysis**
(Laven Soltanian, Michael Cantoni)
- 54 **Quantifying Error Introduced by Finite Order Discretization of a Hydraulic Well Model**
(Ulf Jakob F. Aarsnes, Ole Morten Aamo, Alexey Pavlov)

ThT1 : Process Control/Parameter Tuning

- 60 **The Relative Exergy Destroyed: A New Tool for Process Design and Control**
(Muhammad T. Munir, Wei Yu, Brent R. Young)
- 66 **A Direct Digital PID Tuning Rule for SOPDT Systems**
(Oytun Eriş, Salman Kurtulan)
- 70 **A Computer Algebra Toolbox for Finding All Stabilizing PID Controllers**
(Uğur Yıldırım, Mustafa S. Durmuş, Mehmet T. Söylemez)
- 75 **Geometric Control Analysis of Large-Scale Systems: Application to Process Control Network**
(Denny Hioe, Jie Bao)
- 81 **Multi-Loop Integral Controllability Analysis for Nonlinear Multiple-Input Single-Output Processes**
(Yi Zhang, Steven Su, Andrey Savkin, Branko Cellar, Hung Nguyen)
- 86 **Optimal Feedback Design for Mixing Enhancement in Boundary Layers of Membrane Systems**
(Hua Ouyang, Jie Bao, Gustavo A. Fimbres Weihs, Dianne E. Wiley)
- 92 **Data-Driven Parameter Tuning of IMC for Unstable Plants**
(Hien Thi Nguyen, Osamu Kaneko, Shigeru Yamamoto)

ThIT2 : Robust Control

- 98 **A Stability Result on the Feedback Interconnection of Negative Imaginary Systems with Poles at the Origin**
(Mohamed A. Mabrok, Abhijit G. Kallapur, Ian R. Petersen, Alexander Lanzon)
- 104 **Event-Based Stability and Passivity of Negative Feedback Interconnected Mechanical Systems in Network Environments**
(Jia Wang, Qing-Long Han, Fuwen Yang)
- 110 **Robust Stability Analysis of Nonlinear Sampled-Data Control Systems with Time Delay**
(Zhiyong Chen)
- 116 **Partial Feedback Two-Stage Compensator Designs Without Coprime Factorizability**
(Kazuyoshi Mori)
- 122 **Exponential Stabilization for State and Input Delay Systems via Output Feedback**
(Phan T. Nam, Pubudu N. Pathirana, Hieu M. Trinh)
- 126 **Exponential Stability for Fuzzy Time-Delay Systems with Delayed Impulses**
(Wu-Hua Chen, Dan Wei, Wei Xing Zheng)
- 132 **Robust Disturbance Attenuation for a Class of Polynomial Discrete-Time Systems with Norm-Bounded Uncertainty: An Integrator Approach**
(Shakir Saat, Sing Kiong Nguang, Faiz Rasool)

ThT3 : Nonlinear Control

- 138 **Minimax Linear Quadratic Gaussian Control of Nonlinear MIMO System with Time Varying Uncertainties**
(Obaid Ur Rehman, Ian R. Petersen, Barış Fidan)
- 144 **Tight Comparison Function Bounds for Nonlinear Systems with a Nonlinear \mathcal{L}_2 -Gain Property**
(Peter M. Dower, Huan Zhang)
- 150 **On Semiglobal Stabilization of Linear Systems with Input Saturation Using a Multiple Parametric Lyapunov Approach**
(Qingling Wang, Changbin Yu, Huijun Gao)
- 156 **An Explicit Solution to a Class of Constrained Optimal Control Problems**
(Huan Zhang, Peter M. Dower)
- 162 **An Improved AFM Model in z-Direction with Dynamics-Coupling Effect**
(Ning Chuang)
- 168 **Diagonal Stability for a Class of Graphs with Connected Circles**
(Wei Wang, Dragan Nešić)

ThT4: Applied Control

- 174 **Cascade Finite Control Set Predictive Control of Neutral Point Clamped Power Converter**
(Ki Chun Ng, Liuping Wang)
- 180 **Automatic Generation of Petri Net Supervisors for Railway Interlocking Design**
(Mustafa S. Durmuş, Uğur Yıldırım, Mehmet T. Söylemez)
- 186 **Passive Fault Tolerant Control Strategy Using Adaptive Sliding Mode Control: Application to Diesel Engine Air Path**
(Sofiane Ahmed Ali, Nicolas Langlois)
- 192 **An Adaptive Node Localization Approach for Complex Localization Requirements in Wireless Sensor Networks**
(Changying Chen, Xiuhong Yang, Qiang Guo, Yong Fu, Jialiang Lv)
- 197 **Surface Electromyogram (sEMG) Detection and Analysis in the Development of an Exoskeleton Control System**
(I. Elamvazuthi, K.A.R. Ku Nurhanim, P. Vasant, S. Parasuraman, Z. Zulika, G.A. Ling)
- 203 **Robust Zero Dynamic Excitation Controller for Power Systems under Structured Uncertainty**
(M.A. Mahmud, Hemanshu R. Pota, M.J. Hossain)
- 209 **Induction Motor Control Reconfiguration After Inverter Faults Using a Combined MPC-SVM Technique**
(Matias A. Nacusse, Mónica E. Romero, María M. Seron)

ThIT5: Stochastic/Networked Control

- 215 **A Sensitivity-Based Construction Approach to Sample-Path Variance Minimization of Markov Decision Processes**
(Yonghao Huang, Xi Chen)
- 221 **Event-Triggered \mathcal{L}_2 Controller Design of Networked Control Systems with Quantized Measurement**
(Yanpeng Guan, Chen Peng, Qing-Long Han)
- 227 **Novel Bioinspired Stochastic Tuning of a Quadrotor PD Controller**
(Abdel-Razzak Merheb, Hassan Noura)
- 233 **Analytic Prognostic Model for Stochastic Fatigue of Petrochemical Pipelines**
(Abdo Abou Jaoude, Hassan Noura, Khaled El-Tawil, Seifedine Kadry, Mustapha Ouladsine)
- 241 **Sufficiently Informative Measurements for Stability of Approximate Conditional Mean Estimators**
(Onvaree Techakesari, Jason J. Ford)
- 247 **Risk-sensitive Dissipativity of Linear Quantum Stochastic Systems Under Lur'e Type Perturbations of Hamiltonians**
(Igor G. Vladimirov, Ian R. Petersen)

FrAOP1 : Nonlinear/Extremum Seeking Control and Multiagent Systems

- 253 **Localization and Circumnavigation of a Group of Targets by a Single Agent Using Bearing Measurements**
(Lu Xia, Mohammad Deghat, Brian D.O. Anderson, Yiguang Hong)
- 259 **Distributed Consensus for Agents with Independent Position and Velocity Interactions**
(Jiahu Qin, Changbin Yu)
- 265 **Anti-Windup for Extremum Seeking**
(Y. Tan, Y.P. Li, I. Mareels)
- 271 **An Approximation Arising in Max-Plus Based Optimal Stopping**
(Peter M. Dower)
- 277 **Multidimensional Global Extremum Seeking via the DIRECT Method**
(Sei Zhen Khong, Chris Manzie, Dragan Nešić, Y. Tan)

FrBOP2 : Control Applications II

- 283 **Minimum-Energy Filtering on the Unit Circle Using Velocity Measurements with Bias and Vectorial State Measurements**
(Mohammad Zamani, Minh-Duc Hua, Jochen Trumpf, Robert Mahony)
- 289 **Implementation of a Novel Non-Overshooting Tracking Control Method on a LEGO Robot**
(Madeleine Hughes, Robert Schmid, Y. Tan)
- 295 **Attitude Control of a Miniature Helicopter Using Optimal Sliding Mode Control**
(Hamid Teimoori Sangani, Hemanshu R. Pota, Matthew Garratt, Mahendra Kumar Samal)
- 301 **Two-Dimensional Frequency Domain Analysis of String Stability**
(Steffi Knorn, Richard H. Middleton)
- 307 **Efficient and Strategy-Proof Mechanisms for General Concave User Utilities**
(Tansu Alpcan, Subhrakanti Dey)

FrIT1 : Control Applications III

- 313 **Constrained Control of Low Order Adaptive Optics Systems Using a Fast Suboptimal Solution Based on “Feedback from Coupling”**
(Mikhail Konnik, José A. De Doná, James Stuart Welsh)
- 320 **Considering Active Tuned Mass Dampers in a Five Storey Structure**
(Zeinab Movassaghi)
- 324 **LQG Controller with a Vibration Compensator for the Lateral Positioning of an AFM Scanner**
(Habibullah, Hemanshu R. Pota, Ian R. Petersen)
- 330 **A Grouping Protocol for Improving Localization Bias-Correction**
(Yu Zhang, Yiming Ji, Peng Wang)
- 337 **Design of a Norm-Bounded LQG Controller for Power Distribution Networks with Distributed Generation**
(N.K. Roy, Hemanshu R. Pota, M.A. Mahmud)
- 343 **A Note on Prognosis of System Based Expert Knowledge**
(Radouane Ouladsine, Rachid Outbib)
- 349 **MPC-Based Reference Management for Automated Irrigation Channels**
(Michael Kearney, Michael Cantoni)

FrIT2 : Robotics/Automotive Control/Multiagent Systems

- 355 **Trajectory Tracking of Redundant Manipulators Using an Adaptive Fuzzy Algorithm**
(Alireza K. Tehrani, Morteza Barari)
- 361 **Active Control of Car Suspension Systems Using IDA-PBC**
(Christopher Renton, Yik R. Teo, Alejandro Donaire, Tristan Perez)
- 367 **Left Conjugate Product of Polynomial Matrices and Solutions to the Dual Sylvester-Conjugate Matrix Equations**
(Ai-Guo Wu, Ye Chen, Victor Sreeram, Wanquan Liu, Tyrone Fernando)
- 373 **Performance and Information Pattern Trade-Offs in a Consensus Based Distributed Optimization Method**
(Alireza Farhadi, Michael Cantoni, Peter M. Dower)
- 381 **Multi-Agent Consensus Based on the Group Combined Information**
(Jian Hou, Gangfeng Yan, Zhiyun Lin, Changbin Yu)
- 386 **Model Predictive Flight Controller for Longitudinal and Lateral Cyclic Control of an Unmanned Helicopter**
(Mahendra Kumar Samal, Matthew Garratt, Hemanshu R. Pota, Hamid Teimoori Sangani)

FrIT3 : Control Systems

- 392 **An Adaptive Multi-Controller Architecture Using Particle Filtering**
(Nicolò Malagutti, Vahid Hassani, Arvin Dehghani)
- 399 **Tracking Control for 2DOF Helicopter via Robust LQ Control with Adaptive Law**
(Yusuke Watanabe, Isao Takami, Gan Chen)
- 405 **Fault Tolerant Control of Systems with Polytopic Uncertainties Based on Virtual Sensor Reconfiguration**
(Raheleh Nazari, María M. Seron, José A. De Doná)
- 411 **On the Computation of Reachability, Stabilisability and Output-Nulling Subspaces Using the Rosenbrock System Matrix**
(Lorenzo Ntogramatzidis, Robert Schmid, Augusto Ferrante)
- 417 **Solving Optimal Control Problems Using a Gegenbauer Transcription Method**
(Kareem T. Elgindy, Kate A. Smith-Miles, Boris Miller)
- 425 **Adaptive Controller Design Using Gamma Neural Networks**
(Hanif Tahersima, Mohammadjafar Saleh, Navid Hamed, Vagif Hasanov)
- 431 **Rejecting Disturbances by Output Feedback in Linear Hyperbolic Systems**
(Ole Morten Aamo)
- 437 **NOUS: A MATLAB Toolbox for the Design of Nonovershooting and Nonundershooting Multivariable Tracking Controllers**
(Amit Pandey, Robert Schmid)

FrIT4: Quantum/Nano Systems

- 443 **On the Lossless Property of a Class of Nonlinear Quantum Systems**
(Aline I. Maalouf, Ian R. Petersen)
- 448 **Multi-Variable Resonant Controller for Fast Atomic Force Microscopy**
(Sajal K. Das, Hemanshu R. Pota, Ian R. Petersen)
- 454 **Robust Filtering for Adaptive Homodyne Estimation of Continuously Varying Optical Phase**
(Shibdas Roy, Ian R. Petersen, Elanor H. Huntington)
- 459 **Singular Perturbation Approximations for General Linear Quantum Systems**
(Shanon L. Vuglar, Ian R. Petersen)
- 464 **High Performance Control of a PZT Scanner for Fast Nanoscale Positioning of Atomic Force Microscope**
(M.S. Rana, Hemanshu R. Pota, Ian R. Petersen, Habibullah)
- 470 **Improved Control of Atomic Force Microscope for High-Speed Image Scanning**
(M.S. Rana, Hemanshu R. Pota, Ian R. Petersen)
- 476 **Locking a Three-Mirror Optical Cavity : A Negative Imaginary Systems Approach**
(Mohamed A. Mabrok, Abhijit G. Kallapur, Ian R. Petersen, Dirk Schütte, Toby K. Boyson, Alexander Lanzon)
