

2013 18th International Conference on Engineering of Complex Computer Systems (ICECCS 2013)

**Singapore
17-19 July 2013**

**IEEE Catalog Number: CFP13077-POD
ISBN: 978-1-4799-0744-1**

2013 International Conference on Engineering of Complex Computer Systems

ICECCS 2013

Table of Contents

Preface	ix
Committees	x
Program Committee	xi

Keynotes

Expressiveness of Notations for Reasoning about Concurrency	1
<i>Cliff Jones</i>	
Hybrid Relation Calculus	2
<i>Jifeng He</i>	
Goal Model Elaboration for Software Evolution	3
<i>Shinichi Honiden</i>	

System Modeling and Verification 1

Modeling and Verification of Component-Based Systems with Data Passing Using BIP	4
<i>Chen Su, Min Zhou, Liangze Yin, Hai Wan, and Ming Gu</i>	
Modeling and Verifying Real-Time Properties of Reactive Systems	14
<i>Fenglin Han, Peter Herrmann, and Hien Le</i>	
Knowledge-Based Verification of Service Compositions—An SMT Approach	24
<i>Sven Walther and Heike Wehrheim</i>	
CosyVerif: An Open Source Extensible Verification Environment	33
<i>Étienne André, Yousra Lembachar, Laure Petrucci, Francis Hulin-Hubard, Alban Linard, Lom Hillah, and Fabrice Kordon</i>	

System Evaluation

Measurements for Adaptation Level and Efficiency of Adaptive Software Systems	37
<i>Wenpin Jiao</i>	
Network Performance Evaluation for Distributed Embedded Systems Using Feature Models	46
<i>Martin Manderscheid and Christian Prehofer</i>	
A Model-Driven Approach for Evaluating System of Systems	56
<i>Xiaokai Xia, Ji Wu, Chao Liu, and Luo Xu</i>	

Logic and Algorithm

An Adequate Logic for Heterogeneous Systems	65
<i>Marc Aiguier, Boris Golden, and Daniel Krob</i>	
A Refinement Calculus for Promela	75
<i>Asankhaya Sharma</i>	
Reusing Search Tree for Incremental SAT Solving of Temporal Induction	85
<i>Liangze Yin, Fei He, Min Zhou, and Ming Gu</i>	

System Modeling and Verification 2

Formal Modelling and Analysis of AODV	93
<i>Xiaofeng Wu, J.W. Sanders, and Huibiao Zhu</i>	
Spatio-temporal Properties Analysis for Cyber-physical Systems	101
<i>Zhucheng Shao, Jing Liu, Zuohua Ding, Mingsong Chen, and Ning kang Jiang</i>	
Using Bounded Fairness to Specify and Verify Ordered Asynchronous Multi-agent Systems	111
<i>Qin Li and Graeme Smith</i>	
Automatic Analysis of TiMo Systems in PAT	121
<i>Gabriel Ciobanu and Manchun Zheng</i>	

Real-Time Systems

Observer Patterns for Real-Time Systems	125
<i>Étienne André</i>	
Model-Based Verification of Energy-Aware Real-Time Automotive Systems	135
<i>Eun-Young Kang, Gilles Perrouin, and Pierre-Yves Schobbens</i>	
Tool Support for the Analysis of TADL2 Timing Constraints Using TimeSquare	145
<i>Arda Goknil, Julien DeAntoni, Marie-Agnès Peraldi-Frati, and Frédéric Mallet</i>	

Model-Driven Performance Prediction of Distributed Real-Time Embedded Defense Systems	155
<i>Katrina Falkner, Vanea Chiprianov, Nickolas Falkner, Claudia Szabo, James Hill, Gavin Puddy, Dan Fraser, Adrian Johnston, Marianne Rieckmann, and Andrew Wallis</i>	

Short Papers Session 1

Web Services Testing via Goal and Mutation	159
<i>M. Shaban Jokhio, Gillian Dobbie, Jing Sun, and Tianming Hu</i>	
GUI Ferret: GUI Test Tool to Analyze Complex Behavior of Multi-window Applications	163
<i>Hajime Nakajima, Takeshi Masuda, and Ikuya Takahashi</i>	
Merging Test Models	167
<i>Mohamed Mussa and Ferhat Khendek</i>	
History-Based Test Case Prioritization with Software Version Awareness	171
<i>Chu-Ti Lin, Cheng-Ding Chen, Chang-Shi Tsai, and Gregory M. Kapfhammer</i>	
Exploiting Concurrency for the ESB Architecture	173
<i>Ridha Benosman, Kamel Barkaoui, and Yves Albrieux</i>	

Non-functional Property Analysis: Security and Reliability

A Comprehensive Client-Side Behavior Model for Diagnosing Attacks in Ajax Applications	177
<i>Xinshu Dong, Kailas Patil, Jian Mao, and Zhenkai Liang</i>	
Protecting Web Browser Extensions from JavaScript Injection Attacks	188
<i>Anton Barua, Mohammad Zulkernine, and Komminist Weldemariam</i>	
Automated Analysis of Reliability Architectures	198
<i>Marco Bozzano, Alessandro Cimatti, and Cristian Mattarei</i>	
A Software Environment for Confining Malicious Android Applications via Resource Virtualization	208
<i>Xiaolei Li, Guangdong Bai, Zhenkai Liang, and Heng Yin</i>	

Software Engineering

How Do Developers Use APIs? A Case Study in Concurrency	212
<i>Stefan Blom, Joseph Kiniry, and Marieke Huisman</i>	
Software Internationalization and Localization: An Industrial Experience	222
<i>Xin Xia, David Lo, Feng Zhu, Xinyu Wang, and Bo Zhou</i>	
Runtime Prediction of Failure Modes from System Error Logs	232
<i>Atef Shalan and Mohammad Zulkernine</i>	

Orion: A Software Project Search Engine with Integrated Diverse Software Artifacts	242
<i>Tegawendé F. Bissyandé, Ferdian Thung, David Lo, Lingxiao Jiang, and Laurent Réveillère</i>	
Short Papers Session 2	
Rigorous Analysis of Temporal Access Control Properties in Mobile Systems	246
<i>Mustafa Al-Lail, Ramadan Abdunabi, Robert B. France, and Indrakshi Ray</i>	
CARE: A Platform for Reliable Comparison and Analysis of Reverse-Engineering Techniques	252
<i>Sylvain Lamprier, Nicolas Baskiotis, Tewfik Ziadi, and Lom Messan Hillah</i>	
Resilient Architecture for Complex Computing Systems	256
<i>Ichiro Satoh</i>	
Linking Algebraic Semantics and Operational Semantics for Web Services Using Maude	260
<i>Peng Liu, Huibiao Zhu, Shengchao Qin, Phillip J. Brooke, and Xi Wu</i>	
Game-Based Monitors for Scenario-Based Specification	264
<i>Pengcheng Zhang, Jun Yu, Wenrui Li, and Hareton Leung</i>	
Author Index	268
