

# **2013 IEEE International Conference on Development and Learning and Epigenetic Robotics**

**(ICDL 2013)**

**Osaka, Japan  
18 – 22 August 2013**

**IEEE Catalog Number: CFP13294-POD  
ISBN: 978-1-4799-1035-9**

# 2013 IEEE Third Joint International Conference on Development and Learning and Epigenetic Robotics (ICDL)

Osaka, Japan  
August 18-22, 2013

## Table of Contents

- (i) Title page
- (ii) Copyright page
- (iii) Author list
- (iv) Technical Papers

A generative probabilistic framework for learning spatial language. Dawson, Colin (University of Arizona); Wright, Jeremy (University of Arizona); Rebguns, Antons (University of Arizona); Escárcega, Marco Valenzuela (University of Arizona); Fried, Daniel (University of Arizona); Cohen, Paul (University of Arizona) 1

A Robot to Study the Development of Artwork Appreciation Through Social Interactions.. Karaouzene, Ali (ETIS); Gaussier, Philippe (University of Cergy Pontoise); Vidal, Denis (IRD - URMIS - Paris Diderot) ;

Action Understanding using an Adaptive Liquid State Machine based on Environmental Ambiguity. Baraglia, Jimmy; Nagai, Yukie (Osaka University); Asada, Minoru (Osaka University) 38

Adaptive Reachability Assessment in the Humanoid Robot iCub. Ramirez-Contla, Salomon (Plymouth University); Marocco, Davide 44

An Enactive Approach to Autonomous Agent and Robot Learning. Georgeon, Olivier (Université de Lyon); Wolf, Christian (Université de Lyon); Gay, Simon (Université de Lyon) 46

Aquila 2.0 - Software Architecture for Cognitive Robotics. Peniak, Martin (Plymouth University); Morse, Anthony (University of Plymouth); Cangelosi, Angelo (Plymouth University) 52

Attentional Constraints and Statistics in Toddlers' Word Learning. Suanda, Sumarga (Indiana University); Foster, Seth (Indiana University); Smith, Linda (Indiana University); Yu, Chen (Indiana University) 58

Autonomous Learning Based on Depth Perception and Behavior Generation. Jeong, Sungmoon (JAIST, Kyungpook National University); Park, Yunjung (Kyungpook National University); Lee, Minho (Kyungpook National University) 64

Autonomous learning of active multi-scale binocular vision. Lonini, Luca (FIAS - Goethe University); Zhao, Yu (Hong Kong University of Science And Technology); Chandrashekhariah, Pramod (FIAS - Goethe University); Shi, Bertram (Hong Kong University of Science And Technology); Triesch, Jochen (FIAS) 66

Autonomous Learning of Domain Models using Two-Dimensional Probability Distributions. Słowiński, Witold (University of Aberdeen); Guerin, Frank (Aberdeen

University) 72

Autonomous Reuse of Motor Exploration Trajectories. Benureau, Fabien (Inria); Oudeyer, Pierre-Yves (INRIA Bordeaux Sud-Ouest) 78

Building Specific Contexts for On-line Learning of Dynamical Tasks through Non-verbal Interaction. Rengerve, Antoine De (ETIS); Hanoune, Souheil (ETIS); Andry, Pierre (ETIS); Mathias, Quoy (ETIS Lab); Gaussier, Philippe (University of Cergy Pontoise) 86

Co-learning nouns and adjectives. Orhan, Guner; Olgunsoylu, Sertac; Sahin, Erol; Kalkan, Sinan (METU) 92

Combining Synchrony and shape detection to sustain the robot focus of attention on a selected human partner. Grand, Caroline; Mostafaoui, Ghiles (ETIS); Hasnain, Syed-Khursheed; Gaussier, Philippe (University of Cergy Pontoise) 98

Continuous Adaptive Reinforcement Learning with the Evolution of Self Organizing Classifiers. Vargas, Danilo (Kyushu University); Takano, Hirota; Murata, Junichi 9:

Developing Learnability – the Case for Reduced Dimensionality. Kuppuswamy, Naveen (A.I Lab, University of Zürich); Harris, Christopher (Plymouth University) : 2

Development of self-monitoring essential for vocal interactions in marmoset monkeys. Takahashi, Daniel (Princeton University); Narayanan, Darshana (Princeton University); Ghazanfar, Asif (Princeton University) : 9

Do beliefs about a robot's capabilities influence alignment to its actions?. Vollmer, Anna-Lisa (Plymouth University); Wrede, Britta (Bielefeld University); Rohlfing, Katharina (Bielefeld University); Cangelosi, Angelo (Plymouth University) ::

Do humans need learning to read humanoid lifting actions?. Sciutti, Alessandra (IIT); Patané, Laura (Italian Institute of Technology); Nori, Francesco (Italian Institute of Technology); Sandini, Giulio (IIT) ; 7

Dynamic shift in isolating referents: From social to self-generated input. Yoshida, Hanako (University of Houston); Burling, Joseph (University of Houston) 323

Emergence of Flexible Prediction-Based Discrete Decision Making and Continuous Motion Generation through Actor-Q-Learning. Shibata, Katsunari (Oita University); Goto, Kenta 325

Epigenetic adaptation through hormone modulation in autonomous robots . Lones, John (University of Hertfordshire); Cañamero, Lola (University of Hertfordshire) 32:

Estimating Dynamic Properties of Objects from Appearance. Talbott, Walter (UC San Diego); Wu, Tingfan (UCSD); Movellan, Javier (UCSD) 337

Explaining Neonate Facial Imitation from the Sensory Alignment in the Superior Colliculus. Alex, Pitti (ETIS Lab, Univ. of Cergy); Kuniyoshi, Yasuo (University of Tokyo); Mathias, Quoy (ETIS Lab); Gaussier, Philippe (University of Cergy Pontoise) 343

Exploration strategies in developmental robotics: a unified probabilistic framework. Moulin-Frier, Clément (INRIA); Oudeyer, Pierre-Yves (INRIA Bordeaux Sud-Ouest) 345

Extracting image features in static images for depth estimation. Ogino, Masaki (Kansai University); Suzuki, Junji (Osaka University); Asada, Minoru (Osaka University) 34;

- Frustration as a way toward autonomy and self-improvement in robotic navigation.. Jauffret, Adrien (ETIS Laboratory); Belkaid, Marwen (ETIS); Cuperlier, Nicolas (ETIS); Gaussier, Philippe (University of Cergy Pontoise); Tarroux, Philippe (LIMSI) 353
- Goal Babbling with Unknown Ranges: A Direction-Sampling Approach. Rolf, Matthias (CoR-Lab, Bielefeld University) 35:
- Grounded Lexicon Acquisition - Case Studies in Spatial Language. Spranger, Michael (Sony CSL Paris) 367
- Grounding Abstract Action Words through the Hierarchical Organization of Motor Primitives. Stramandinoli, Francesca (Plymouth University); Marocco, Davide; Cangelosi, Angelo (Plymouth University) 373
- Impacts of environment, nervous system and movements of preterms on body map development: Fetus simulation with spiking neural network. Yamada, Yasunori (University of Tokyo); Fujii, Keiko (University of Tokyo); Kuniyoshi, Yasuo (University of Tokyo) 375
- Improving Implicit Communication In Mixed Human-Robot Teams With Social Force Detection. Hayes, Bradley (Yale University); Scassellati, Brian (Yale University) 382
- Intrinsically Motivated Reinforcement Learning in Socio-Economic Systems: the Dynamical Analysis. Zgonnikov, Arkady (University of Aizu); Lubashevsky, Ihor (University of Aizu) 389
- Intuitive Human Robot Interaction based on unintentional synchrony: a psycho-experimental study. Hasnain, Syed-Khursheed; Mostafaoui, Ghiles (ETIS); Salesse, Robin; Marin, Ludovic; Gaussier, Philippe (University of Cergy Pontoise) 38;
- Learning Semantic Components from Subsymbolic Multimodal Perception. Mangin, Olivier (INRIA); Oudeyer, Pierre-Yves (INRIA Bordeaux Sud-Ouest) 398
- Learning Spatial Relations between Objects From 3D Scenes. Fichtl, Severin (Uni Aberdeen); Guerin, Frank (Aberdeen University); Krueger, Norbert (SDU); Alexander, John (Uni of Aberdeen); Mustafa, Wail (Southern Denmark University); Kraft, Dirk (Southern Denmark University) 3: 5
- Learning Stable Pushing Locations. Hermans, Tucker (Georgia Institute of Technology); Li, Fuxin (Georgia Institute of Technology); Rehg, James (Georgia Institute of Technology); Bobick, Aaron (Georgia Institute of Technology) 3: 7
- Learning the rules of a game: neural conditioning in human-robot interaction with delayed rewards. Soltoggio, Andrea (Bielefeld University); Reinhart, Rene Felix (CoR-Lab, Bielefeld University); Lemme, Andre (Bielefeld University); Steil, Jochen (Bielefeld University) 3; 4
- Learning to recognize objects through curiosity-driven manipulation. Ivaldi, Serena (ISIR - CNRS & University Pierre et Marie Curie); Droniou, Alain (ISIR - UMR 7222 CNRS & UPMC); Sigaud, Olivier (ISIR - UMR 7222 CNRS & UPMC); Padois, Vincent (ISIR - UMR 7222 CNRS & UPMC); Filliat, David (ENSTA - ParisTech); Lyubova, Natalia (ENSTA - ParisTech); Gerardeaux, Damien; Oudeyer, Pierre-Yves (INRIA Bordeaux Sud-Ouest); Nguyen, Mai (INRIA) 3; :
- Learning to Reproduce Fluctuating Behavioral Sequences Using a Dynamic Neural Network Model with Time-Varying Variance Estimation Mechanism. Murata, Shingo (Waseda University); Namikawa, Jun (RIKEN); Arie, Hiroaki (Waseda University);

- Tani, Jun (KAIST); Sugano, Shigeki (Waseda University) 428
- Learning Versatile Sensorimotor Coordination with Goal Babbling and Neural Associative Dynamics. Reinhart, Rene Felix (CoR-Lab, Bielefeld University); Rolf, Matthias (CoR-Lab, Bielefeld University) 434
- Reinforcement Learning with State-Dependent Discount Factor. Yoshida, Naoto (NAIST); Uchibe, Eiji (OIST); Doya, Kenji (OIST) 43;
- Robot Learning Simultaneously a Task and How to Interpret Human Instructions. Grizou, Jonathan (INRIA); Lopes, Manuel (INRIA Bordeaux); Oudeyer, Pierre-Yves (INRIA Bordeaux Sud-Ouest) 447
- Saliency-based reinforcement of a spiking neural network leads to increased syllable production. Warlaumont, Anne (University of California, Merc) 455
- Structural bootstrapping at the sensorimotor level for the fast acquisition of action knowledge for cognitive robots. Aksoy, Eren (Goettingen University); Tamosiunaite, Minija; Vuga, Rok; Ude, Ales; Geib, Christopher; Steedman, Mark ; Woergoetter, Florentin 462
- Tactile stimuli from amniotic fluid guides the development of somatosensory cortex with hierarchical structure using human fetus simulation. Sasaki, Ryosuke (University of Tokyo); Yamada, Yasunori (University of Tokyo); Tsukahara, Yuki (University of Tokyo); Kuniyoshi, Yasuo (University of Tokyo) 46:
- Temporal Emphasis for Goal Extraction in Task Demonstration to a Humanoid Robot by Naive Users. Theofilis, Konstantinos (University of Hertfordshire); Lohan, Katrin Solveig; Dautenhahn, Kerstin (University of Hertfordshire); Wrede, Britta (University of Bielefeld); Nehaniv, Chrystopher (University of Hertfordshire) 476
- The Significance of Social Input, Early Motion Experiences, and Attentional Selection. Burling, Joseph (University of Houston); Yoshida, Hanako (University of Houston); Nagai, Yukie (Osaka University) 482
- Touch and Emotion: Modeling of developmental differentiation of emotion lead by tactile dominance. Horii, Takato (Osaka University); Nagai, Yukie (Osaka University); Asada, Minoru (Osaka University) 484
- Towards a robotic model of the mirror neuron system. Rebrová, Kristína (Comenius University SR); Pecháč, Matej (Comenius University in Bratislava); Farkaš, Igor (Comenius University in Bratislava) 48:
- Towards understanding the origin of infant directed speech: A vocal robot with infant-like articulation. Sasamoto, Yuki (Osaka Univ.); Nishijima, Naoto (Osaka University); Asada, Minoru (Osaka University) 496
- Transfer Learning for Direct Policy Search: a Reward Shaping Approach. Doncieux, Stephane (ISIR/UPMC-CNRS) 498
- Understanding Embodied Visual Attention in Child-Parent Interaction. Bambach, Sven (Indiana University); Crandall, David (Indiana University); Yu, Chen (Indiana University) 4: 4
