

2013 IEEE Conference on Computer Aided Control System Design

(CACSD 2013)

**Hyderabad, India
28-30 August 2013**

**IEEE Catalog Number: CFP13CAC-POD
ISBN: 978-1-4799-1564-4**

TABLE OF CONTENTS

Handling Fault Detection Latencies in Automata-Based Scheduling for Embedded Control Software	1
<i>Santhosh Prabhu, Aritra Hazra, Pallab Dasgupta, Partha Pratim Chakrabarti</i>	
A Mixed Approach to Rigorous Development of Control Designs	7
<i>Manoranjan Satpathy, S. Ramesh, Colin Snook, Neeraj Kumar Singh, Michael Butler</i>	
Characterizing Feedback Signal Drop Patterns in Formal Verification of Networked Control Systems	13
<i>Dip Goswami, Samarjit Chakraborty, Purandar Bhaduri, Sanjoy K. Mitter</i>	
Scalable Model-Checking for Precise End-to-End Latency Computation	19
<i>Swarup Mohalik, Devesh B. Chokshi, Manoj G. Dixit, A. C. Rajeev, S. Ramesh</i>	
Improving Approximate Reachability by Dynamic Interleavings of Projections-Based Algorithms	25
<i>Seetha Jayasankar, Supratik Chakraborty</i>	
Robust Fixed Order Controller Design by a Mixed Randomized/Deterministic Method	31
<i>Ulo Nurges, Sergei Avanesov</i>	
Systems Modeling, Analysis and Control (SMAC) Toolbox: An Insight into the Robustness Analysis Library	37
<i>Clément Roos</i>	
Sequential Randomized Algorithms for Sampled Convex Optimization	43
<i>Mohammadreza Chamanbaz, Fabrizio Dabbene, Roberto Tempo, V. Venkataramanan, Qing-Guo Wang</i>	
A Tuning Procedure for ARX-Based MPC	49
<i>Daniel Haugaard Olesen, Jakob KjÅ, bsted Huusom, John Bagterp Jorgensen</i>	
Online Failure Diagnosis of Stochastic Discrete Event Systems	55
<i>Jun Chen, Ratnesh Kumar</i>	
NLControl: Symbolic Package for Study of Nonlinear Control Systems	61
<i>Juri Belikov, Ulle Kotta, Maris Tonso</i>	
PolyRMPC: A New Matlab Toolbox to Robustify Predictive Controllers Under Unstructured and Structured Uncertainties	67
<i>Valentin Preda, Cristina Nicoleta Stoica, Pedro Rodriguez-Ayerbe, Didier Dumur</i>	
Free Computer-Aided Control System Design (CACSD) Tools for GNU Octave	73
<i>Lukas Felix Reichlin</i>	
Fractional-Order Controller Design and Digital Implementation Using FOMCON Toolbox for MATLAB	79
<i>Aleksei Tepljakov, Eduard Petlenkov, Juri Belikov, Jevgeni Finajev</i>	
A Framework for Nonlinear Model-Predictive Control Using Object-Oriented Modeling With a Case Study in Power Plant Start-Up	85
<i>Per-Ola Larsson, Francesco Casella, Fredrik Magnusson, Joel Andersson, Moritz Diehl, Johan Akesson</i>
