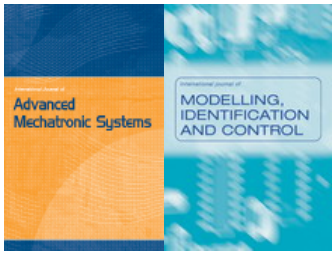
2013 International Conference on Advanced Mechatronic Systems

(ICAMechS 2013)

Luoyang, China
25-27 September 2013

IEEE

IEEE Catalog Number: CFP1318R-POD
ISBN: 978-1-4799-2520-9



2013 International Conference on Advanced Mechatronic Systems

September 25-27, 2013

Luoyang, China

CONTENTS

Poster Session

Nonlinear sensorless cooling control for a Peltier actuated aluminum plate thermal system
Kazuki Takahashi, Mingcong Deng 1

Examples where the conjunctive and Dempster's rules are insensitive
Florentin Smarandache, Valeri Kroumov, Jean Dezert 7

Studies on the cold trap control system of China experimental fast reactor
Jianru Lin, Jianming Ma, Ning Lu, Jian Liu 15

Design of one control system specially dedicated to China experimental fast reactor
Jianru Lin, Tuanjie Yu, Jipin Gu, Jian Liu, Zheng Xie 18

Flexible penalty functions for SQP algorithm with additional equality constrained phase
Bo Wang, Dingguo Pu 22

The simulation of energy braking circuit of frequency converter
Shuyan Ren, Tao Zhou, Deyi Cui 28

The compliance control study of Chinese chess robot in Cartesian coordinate system
Guangyue Du, Shuhui Bi, Yongfei Xiao, Wenguang Li 31

Automatic elliptical trajectory planning algorithm for pick and place operation
Wenguang Li, Yongfei Xiao, Shuhui Bi, Guangyue Du 36

Control for unknown systems preceded by hysteresis and its application to nanopositioner
Xinkai Chen 40

Optimal weighted state fusion white noise deconvolution estimator
Xiao-Jun Sun 46

Hybrid algorithm based on Levenberg-Marquardt bayesian regularization algorithm and genetic algorithm
Feng Song, Hongchun Wang 51

Operator-based robust nonlinear perfect tracking control design to a robot arm with uncertainties
Aihui Wang, Dongyun Wang, Shengjun Wen, Mingcong Deng 57

System design for aluminum plate with Peltier device using an operator-based observer
Min Zheng, Yan Wang, Aihui Wang, Dongyun Wang, Wudai Liao, Qiang Zhang 63

Tracking control of a class of time-varying nonlinear systems based on right coprime factorization
Wudai Liao, Min Zheng, Aihui Wang 69

The study on an adaptive terminal sliding mode excitation control of the grid-connected doubly-fed wind generator
Xinyu Liu, Tiejun Chen, Aihui Wang 74

Low disturbance sampling design of the cutter head in soft sediment of the Yellow river reservoir
Yong Yang, Lei Zhang, Bin Zhang, Jun Zheng 79

Preliminary study on the mechanism of electromagnetic eddy current effect on non-conductive nano-composite materials
Jing-Wei Song, Yun Guo, Ji-Hui Zhou 84

Synthesis of CdHgTe quantum dots and in vivo multispectral fluorescence imaging
Sihai Han, Ying Mu, Jianxue Liu, Denglin Luo, Baocheng Xu 87

Study of the sedative and hypnotic effects of total alkaloids in male Eucommia flowers
Xin Li, Mei Yang, Lipeng Yang, Jinling Fan, Lei Luo, Yan Liu, Shaoyang Liu, Wenxue Zhu 90

Antioxidant activity and phenolic components of sea buckthorn (Hippophae rhamnoides) seed extracts
Jinling Fan, Jindi Zhang, Huijuan Song, Wenxue Zhu, Yunhong Liu 96

Changes in vitamin C, total phenolics and antioxidant capacity during liquid fermentation of Hovenia dulcis peduncle
Jinle Xiang, Xiangfeng Guo, Jinling Fan, Wenxue Zhu, Zhixi Li 106

The cooperation control of multiple robotic manipulators with disturbance observers
Shuming Deng, Zhijun Li, Chun-Yi Su, Min Wang 112

Spectrum analysis and gray prediction of the micro combustor
Bin Xu, Yi Cheng, Jian Wu 118

Spray characterizations from outward-opening DISI engine injector under various fuel superheat degree conditions
Bin Xu, Ming Li, Yuyin Zhang, Jian Wu 123

Performance assessment for three kind of condenser in refrigerating system
Zhiyuan Wang, Liu Wang, Weigang Fu, Yuxiang Sun 129

Spectral analysis of various radiation materials of micro-burner in MTPV system
Jian Wu, Bo Li, Bin Xu, Jia-Xuan Miao, Yi Cheng 134

Error analysis of a semi-discrete discontinuous subgrid eddy method for the Boussinesq equation
Yunzhang Zhang 138

Weighted essentially non-oscillatory method for solving population balances in crystallization processes
Chunlei Ruan, Xuhui Zhao, Kunfeng Liang, Xianjie Chang 143

Operator-based sliding mode nonlinear control for a twin-tank process with constraint inputs
Dongyun Wang, Fengguang Li, Shengjun Wen, Xiaomin Qi, Mingcong Deng 147

SVM based fault classifier design for a water level control system
Dongyun Wang, Xiaomin Qi, Shengjun Wen, Mingcong Deng 152

Optimization of LQR controller for inverted pendulum system with artificial bee colony algorithm
Haiquan Wang, Huaqiang Zhou, Dongyun Wang, Shengjun Wen 158

Modeling of DC motor and its controller optimization design
Junming Xiao, Lihong Hou, Haiquan Wang, Wentai Zhang 163

Research of control recipe modeling for system shortest path planning
Ting-Ting Wang, Zong-Xiao Yang, Li-Xiang Hao, Meng-Yang Li, Yan-Feng Wu 168

Three non-linear α-discounting MCDM-method examples
Florentin Smarandache 174

An operator-based robust nonlinear control system for nonlinear plants with uncertain backlash dynamics
Tomohito Hanawa, Mingcong Deng, Luige Vladareanu 177

Experimental studies on power control of semiconductor thermoelectric power generation system
Michiya Takahashi, Mingcong Deng 182

Development of wind permanent-magnet generator experimental platform
Guan-Qiang Dong, Zong-Xiao Yang, Lei Song, Rui-Tao Deng 187

Optimal energy distribution for eco-industrial park in extreme arid areas of Xinjaing based on the statistics method
Litifu Zulati 191

Self-tuning reduced dimension weighted fusion white noise estimator with input estimation
Xiao-Jun Sun 197

Iron and steel process energy consumption prediction model based on selective ensemble
Na Wei, Li Li, Jun Zhu, Na Li 203

Operator-based robust control for nonlinear feedback systems with noise disturbance
Ni Bu, Ximei Liu, Mingcong Deng 208
A research on the operational characteristics of WPT considering reliability limitation
Xi-Tong Li, Hai-ju Kuang, Litifu Zulati 213
Design of adaptive control algorithm for automotive dashboard stepper motor pointer
Jian-Hui Ma, Yan-Qiang Li, Gang Wang, Yuan-Yang Liu 219
An optimal robust controller with multi-rate output feedback by using symbolic computation
Akira Inoue, Mingcong Deng 224
An integral global optimization algorithm for mixed programming problem
Yirong Yao, Manli Zhang, Quan Zheng 229
Energy management strategy for a full hybrid electric vehicle based on cruise
Ai-Yun Gao, Xiao-Zhong Deng, Ming-Zhu Zhang, Zhu-Mu Fu 233
A New Coupled Reaction-diffusion System with the Cross-diffusion Effect and Its Application to Secure Communication
Hongyan Li, Wanli Yang, Junzhi Luo, Hong Ju, Suna Cao 736

Advanced Control Systems (ThuM01)

Bus-clamping-based switch vector table of DTC
Chuang Li, Hongxia Yu 238
An improved logic threshold approach of energy management for a power-split hybrid electric vehicle
Zhu-Mu Fu, Bin Wang, Peng-Ge Zhou 244
Stabilization analysis for fractional-order systems with input delays
Xiaona Song, Shanzhong Liu, Zhumu Fu 249
Switched reluctance motor speed performance simulation study based on torque ripple suppression
Xiaoshu Zan 253
Research of the dynamic performance of DC servo control system based on fractional order $PI^{\lambda}D^{\mu}$
Pei-Zhi Xiao, Qing-Song Lin 258
Identification of a solid-core magnetic bearing using incommensurate fractional-order models
Jianpeng Zhong, Lichuan Li 262

Energy and Power Engineering (ThuM02)

Research on SR wind power system
Chao Liu, Y. Huo, Q. Wang 268
On development of a novel control scheme for a thermal simulation device
Qi Lu, Hao Gu, Liwei Qi, Yunze Li 274
Study on the geometrical properties and working resistance performance of bionic bulldozing plate
Shuai Zhang, Zhi-Jun Guo 280
The performance test of heat exchanger under low-temperature frosting conditions
Zhiyuan Wang, Zhiwen Tong 286
The drive system design for magnetorheological fluid brake test bench
Zhiwei Wang, Zhongli Li, Zhijun Guo, Jingbo Wu, Zhengwei Sun 290
The effects of DOC and DPF on the particulate properties of diesel engine
Zhi-Hao Ma, Lei Li, Ying Chao, Yuan Ren, Xin Xu, Fan-Hua Ma 296

Mechatronics and Learning (ThuM03)

A method of camera calibration by iterative optimization algorithm
Jianwei Ma, Baoxi Li 302
3D offline path planning for surveillance aerial vehicle using B-splines
Razieh Nabi-Abdolyousefi, Afshin Banazadeh 306

Design of the up-film transplanter and kinematic analysis of its planting devices
Jiang-Tao Ji, Ya-Kai He, Xin-Wu Du, Zhi-Tao He, Meng-Meng Du, Zhi-Hua Zheng, Shi-Tong Jia, Jian-Jun Liu, Qing Liu 312

Design and finite element analysis of rotary tillage blade based on Solidworks
Xin-Wu Du, Shi-Tong Jia, Jiang-Tao Ji, Xiu-Fang Yu, Zhi-Tao He, Zhi-Hua Zheng, Ya-Kai He, Jian-Jun Liu 317

Parameters optimization design of air-liquid-combined impact pickaxe
Xinglong Zhang, Shengli Song, Zhitao Tan, Yang Chen 326

Complex Nonlinear Systems Modeling (ThuM04)

Forced oscillation criteria of solutions for a class of impulsive parabolic equations with two delays
Junhong Liu, Wanli Yang, Suwen Zheng, Lifeng Li 332

Experimental study of nonlinear vibration control for vertical tail with considering low order mode
Yuta Katsurayama, Changan Jiang, Mingcong Deng 335

Inventory control of supply chain based on network control approach
Junzhi Luo, Wanli Yang, Hongyan Li, Feiyan Chen 341

Mean-square stability of a class of supply chain based on switched model of stock level
Junzhi Luo, Wanli Yang, Yanxia Liu, Hongyan Li 347

Experimental study of position control with tube-type dielectric elastomer actuator
Changan Jiang, Kentaro Takagi, Tatsuya Suzuki, Shigeyuki Hosoe, Akitoshi Nozawa, Kazunobu Hashimoto 352

Prediction models of the number of end-of-life vehicles in China
Guangdong Tian, Mengchu Zhou, Jiangwei Chu, Bing Wang 357

Hybrid Mobile Robots (ThuM05)

Design and analysis of a hybrid two-wheel-hopping robot
Hongbo Wang, Jingjing Liu, Li He, Qi Li, Ning Zhao, Hongnian Yu 363

Kinematics analysis for the leg mechanism of a wheel-leg hybrid rescue robot
Xiaoyun Wang, Hongbo Wang, Hongnian Yu, Lingfeng Sang, Xiaojie Wang 369

Nodes deployment algorithm based on perceived probability of heterogeneous wireless sensor network
Shi-Wei Li, Dong-Qian Ma, Qiang-Yi Li, Ju-Wei Zhang, Xue Zhang 374

The singularity research of a class of 4-DOFs parallel mechanism and configuration analysis
Ye Ji 379

Control method of a human support robot for independent living by center of gravity information of upper body
Bo Shen, Shuoyu Wang, Yinlai Jiang, Yina Wang 384

Research on conic curve fitting in central catadioptric system
Ruifeng Li, Liangliang Wang, Ke Wang 390

New Developments on ESP (ThuP01)

The effectiveness of collaborative learning: a case study of academic summary
Yan Yu 396

ESP: a needs-oriented approach for scientific English education
Jie Shi 400

Developing research presentation skills for international conferences
Jie Shi 406

A corporal and LDA analysis of abstracts of academic conference papers
Sébastien Louvigné, Jie Shi, Yoshihiro Kato, Neil Rubens, Maomi Ueno 412

Energy and Power Engineering II (ThuP02)

Combusition simulation for diesel engine with high-press common rail system
Jian Wu, Hongming Wang, Lili Zhu 417

Research progress on numerical models of falling film evaporation
Tao He, Yuxiang Sun, Liu Wang 422

Economic performance of CRDI engine fueled with biodiesel
Chenyang Fan, Bin Xu, Zhihao Ma, Jian Wu, Zhancheng Wang 426

Temperature control of polymer electrolyte fuel cell reformer
Chihiro Masuda, Mingcong Deng 429

Operator based fault detection and compensation design of an unknown multivariable tank process
Kohsuke Furukawa, Mingcong Deng 434

Food Science and Technology I (ThuP03)

The mechanism of honeysuckle quality degeneration in hot air drying
Lei Luo, Yanyan Zhou, Yunhong Liu, Yingchao Hao, Wenxue Zhu, Suixia Guan, Bin Yang 440

Study of a terrestrial microbial fuel cell and the effects of its power generation performance by environmental factors
Daxing Zhang, Yubing Ge, Weidong Wang 445

The research on the application of electronic nose in discriminate the rice varieties
Huichun Yu, Miaojuan Meng, Yong Yin 449

Analysis of the influences from battery impedance on behaviors of switched reluctance drive
D.S. Yu, H. Chen 455

Optimization Methods and Applications I (ThuP04)

The optimization of passenger transference on Lanzhou railway station square
Kun Jiang, Yuguang Wei 461

A QP-free algorithm without a penalty function and a filter for nonlinear constrained optimization
Ruina Zhang, Weiai Liu, Dingguo Pu 466

A new nonmonotone QP-free infeasible method
Ailan Liu, Dingguo Pu 472

Global dynamics of a TB transmission model with TB defaulters
Luju Liu, Yusen Wu 477

A new penalty-free-type method for nonlinear inequality constrained optimization
Dingguo Pu, Weiai Liu 482

Mechatronic System Analysis and Control (ThuP05)

Stress distribution on the femoral head at different anteversion angle: a finite element analysis
Yue Zhou, Jia-Xin Chen 487

Walking mechanism and kinematic analysis of humanoid robot
Bing Chen, Minzhou Luo, Fayong Guo, Saixuan Chen 491

Controllability of periodic switched Boolean control networks
Huimin Xiao, Zhiqiang Li 495

Modular virtual assembly design of double-track power chassis
Jiang-Tao Ji, Meng-Meng Du, Xin-Wu Du, Zhi-Tao He, Zhi-Hua Zheng, Ya-Kai He, Shi-Tong Jia, Jian-Jun Liu 500

Quantifying information technology's generated services and incurred costs by applying empirical artificial neural networks/expert systems modeling
Mahmud Mavaahebi, Ken Nagasaka 505

Advanced Intelligent Control Methods in Robotics and Mechatronics (FriM02)

Robots extension control using fuzzy smoothing
Victor Vladareanu, Paul Schiopu, Mingcong Deng 511

The 3D elastic quasi-static contact applied to robots control
Luige Vladareanu, Nicolae Pop, Alexandru Gal, Mingcong Deng 517

Applications of the extension theory in machine learning field
Ovidiu Ilie Sandru, Luige Vladareanu, Paul Schiopu, Alexandra Sandru, Victor Vladareanu 524

A real-time walking robot control system based on Linux RTAI

Liming Deng, Xianchao Zhao, Chenkun Qi, Feng Gao 530

Spring parameters design to increase the loading capability of a hydraulic quadruped robot

Xianbao Chen, Feng Gao, Chenkun Qi, Xianchao Zhao 535

Payload capability analysis of a new kind of parallel leg hexapod walking robot

Yang Pan, Feng Gao 541

Advanced Control System Design-Theory and Applications (FriM03)

Comparison of 2DOF GMVC-based PID control laws

Takao Sato, Nozomu Araki, Yasuo Konishi 551

Design of a data-oriented GPC

Zhe Guan, Shin Wakitani, Toru Yamamoto 555

Design of a partial model matching based PID controller for a temperature control system

Shin Wakitani, Yuanbi Zhao, Toru Yamamoto 559

An attitude control of a helicopter by adaptive PID Controller

Yoshihiro Ohnishi, Shinnosuke Mori 565

A direct control parameters tuning method for random disturbances using CARMA models based on variance evaluation

Shiro Masuda, Kazuma Ando 571

Industrial Control and Optimization (FriM04)

Multiobjective optimization for planning of mineral processing under varied equipment capability

Jinliang Ding, Houchang Wang, Rei Nie, Tianyou Chai 576

A multiobjective operational optimization approach for iron ore beneficiation process

Jinliang Ding, Hongfei Wang, Chunbo Liu, Tianyou Chai 582

Strongly absolute stability of Lur'e-type discrete-time descriptor systems: strict LMI-based popov criterion

Chunyu Yang, Fei Yin, Ding Zhai 588

Unmodeled dynamics and data driven balance control for a class of underactuated mechanical systems

Liangyong Wang, Chengyan Zhao, Wenjuan Cui 594

Estimation of distribution algorithm based gas scheduling method

Na Li, Li Li, Jun Zhu, Na Wei 598

Optimization Methods and Applications II (FriM05)

The investigation into the exact solutions of the nonliear evolution equations with positive fractional power term

Xinrui Wang, Wei Li 604

Spectral collocation methods for a class of nonlinear singular boundary value problems

Yan-Hong Yin, Ao Sun, Tian-Jun Wang 609

Planning of renewable energy considering the conditions of system control and location

Xi-Tong Li, Hai-Ju Kuang, Litifu Zulati 613

A hierarchical sequence deviation integral algorithm for multi-objective optimization

Liyuan Zeng, Yirong Yao, Quan Zheng 619

New QP-free method without a penalty function and a filter

Dingguo Pu, Youlin Shang 624

Food Science and Technology II (FriP02)

Ultrasound assisted osmotic dehydration pretreatment on carrot followed by hot-air drying

Yunhong Liu, Cuijuan Chong, Jianye Wu, Shuai Miao, Lei Luo, Xin Li 634

Rearch on quality preservation drying technology of salvia leaves green tea

Lili Liu, Xu Duan, Guangyue Ren 638

Study on the purification of polysaccharide from purple sweet potato by sephadex G-100
Haoguo Tang, Mimi Guo, Hongjuan Yao, Jiezhi Guo 642

The research on dynamic modeling of thin layer carrots
Wenxue Zhu, Cuijuan Chong, Yunhong Liu, Jianye Wu, Jinling Fan, Lei Luo 648

The statistic characters of positive external effect from intensive-developed renewable energy in extreme arid areas of Xinjiang
Litifu Zulati 654

Systems Prediction and Supply Chain Management (FriP03)

Automatic extraction of information on hill fires based on FY-3A/VIRR data
Jian Wang, Yongqin Luo, Minrui Qiao 660

Fuzzy comprehensive evaluation of forest fire risk on transmission lines based on entropy weight method
Jian Wang, Weiqing Ma, Shuting Song, Fangqiu Xu 666

Medium and long term load forecasting based on fuzzy times series
Tao Zhou, Zhong Tang, Shuyan Ren 671

Theoretical discussion for supply chain coordination mechanisms of decentralized decision structure
Lijun Yang 674

University-enterprise cooperation innovation mechanism and countermeasure research of our country
Yawen Yang, Xinbao Guo, Qingxiao Wang 678

Wind Power Systems and Algorithm (FriP04)

A hierarchical planning algorithm based on network topology analysis for minimal Steiner tree problems
Meng-Yang Li, Zong-Xiao Yang, Li-Xiang Hao, Hou-Kun Dai 683

Performance and structure optimization for a new type of vertical axis wind turbine
Lei Song, Zong-Xiao Yang, Rui-Tao Deng, Xiao-Guang Yang 687

An artificial immune algorithm for minimal Steiner tree problems
Yan-Ping Gao, Zong-Xiao Yang 693

An energy storage strategy with two-parameter controller and buffercapacitor for windmill generator
Li-Xiang Hao, Zong-Xiao Yang, Meng-Yang Li, Peng Wang, Guan-Qiang Dong 698

Research and development of intelligent test equipment for vertical axis wind turbines
Yan-Feng Wu, Lei Song, Zong-Xiao Yang, Rui-Tao Deng 704

Robotics and Control Techniques (FriP05)

Operator-based robust control for nonlinear uncertain systems with backlash-like hysteresis
Shuhui Bi, Mingcong Deng, Lei Wang, Shiguo Ma 710

Analysis and optimization for the counter-balancing method of heavy-load palletizing manipulators
Yongfei Xiao, Jie Sun, Tie Chen, Xinjian Fan 716

Approximately 2-local derivations on the finite von neumann algebras
Fazhan Tao, Chengjun Hou, Mingcong Deng 720

A novel predictive approach to prosthetic control for digit amputations using grip classification
Adithya C. Ganesh, Vinjai Vale 724

The application of adaptive backstepping sliding mode for hybrid humanoid robot arm trajectory tracking control
Li Qin, Lihuan Liang, Fucai Liu, Zhenlin Jin 730
