### **Statement by the Lord Mayor of Nuremberg**

I cordially welcome all participants to IMCS 2012 – The 14th International Meeting on Chemical Sensors here in Nuremberg from 20–23 May 2012.

For four days, Nuremberg is the international meeting place for scientists from the fields of chemistry, physics, materials science and engineering disciplines, including biomedical engineering.

It gives me great pleasure to welcome you as our guests in Nuremberg. The general conditions at the Nuremberg congress location are ideal for exchanging views, training and developing ideas in joint discussions, and the City of Nuremberg would like to be a good host for your congress activities.

Chemical sensors are shaping the future – you secure and create sustainable jobs with innovative products, processes and technologies. This is a major factor that is also expressed in the patent statistics. Incidentally, the first German patent was issued on 2 July 1877 to the Nuremberg industrialist Johann Zeltner for a “process for the manufacture of a red ultramarine pigment”. As at that time, the special strengths of the business location Nuremberg still include the development of technical solutions for energy, transport and medicine, and the research, manufacture and testing of new materials.

I wish the 14th International Meeting on Chemical Sensors every success and the participants interesting, informative and profitable days. I hope you will also find a little time to escape from the hectic daily routine of the meeting and get to know Nuremberg better. I wish you lots of fun exploring Nuremberg’s varied tourist, cultural and culinary trails and a pleasant stay.

## Welcome to the 14<sup>th</sup> International Meeting on Chemical Sensors

Dear chemical sensor colleagues:

It is my great pleasure to welcome you to the 14<sup>th</sup> International Meeting on Chemical Sensors (IMCS), held from May 20<sup>th</sup> to May 23<sup>rd</sup> 2012 in Nuremberg, Germany. IMCS is the world's largest interdisciplinary forum on all aspects of chemical sensors encompassing physics, chemistry, materials science and engineering disciplines including biomedical engineering. IMCS is an interdisciplinary platform for discussions between experienced researchers and younger students.

I am sure that this conference will perfectly continue the successful IMCS conference series from the first one taking place in 1983 in Fukuoka, Japan to the last one in 2010 in Perth, Australia. In 2012, IMCS is held in conjunction with the world's largest sensor expo, the SENSOR+TEST. The entrance to the fair, lasting from May 22<sup>nd</sup> to May 24<sup>th</sup>, is only a stone's throw away and there is no entrance fee for conference participants. I sincerely hope that this combination of academic research and sensor business will bring advanced science in close contact to market needs.

I would like to express my thanks to all persons who have contributed to the conference and its preparation - the IMCS steering committee, the reviewers of the submissions, the local organizing committee, the AMA organizing team, our top sponsor Heraeus Sensor Technology, all other sponsors, the City of Nuremberg, our exhibitors, our plenary and invited speakers, and of course all participants of the conference.

Please allow a personal remark. Besides science, I highly recommend to visit beautiful Nuremberg. Enjoy the historical old town, visit one of the excellent museums, or savor Franconian traditional food. In short: explore Nuremberg, the city where tradition is alive.

I wish you fruitful and pleasant days in Nuremberg.

Ralf Moos
