

2013 IEEE 33rd International Conference on Distributed Computing Systems

(ICDCS 2013)

**Philadelphia, Pennsylvania, USA
8-11 July 2013**

**IEEE Catalog Number: CFP13040-POD
ISBN: 978-1-4799-0183-8**

2013 IEEE 33rd International Conference on Distributed Computing Systems

ICDCS 2013

Table of Contents

Message from General Chairxi
Message from Program Chairxii
Organizing Committeexiii
Program Committeexv
External Reviewersxxi

Session A1: Monitoring & Diagnostics

Volley: Violation Likelihood Based State Monitoring for Datacenters	1
<i>Shicong Meng, Arun K. Iyengar, Isabelle M. Rouvellou, and Ling Liu</i>	
Diagnosing Data Center Behavior Flow by Flow	11
<i>Ahsan Arefin, Vishal K. Singh, Guofei Jiang, Yueping Zhang, and Cristian Lumezanu</i>	
FChain: Toward Black-Box Online Fault Localization for Cloud Systems	21
<i>Hiep Nguyen, Zhiming Shen, Yongmin Tan, and Xiaohui Gu</i>	
Detecting Transient Bottlenecks in n-Tier Applications through Fine-Grained Analysis	31
<i>Qingyang Wang, Yasuhiko Kanemasa, Jack Li, Deepal Jayasinghe, Toshihiro Shimizu, Masazumi Matsubara, Motoyuki Kawaba, and Calton Pu</i>	

Session B1: Caching

Cache Privacy in Named-Data Networking	41
<i>Gergely Acs, Mauro Conti, Paolo Gasti, Cesar Ghali, and Gene Tsudik</i>	
Cache Topology Aware Mapping of Stream Processing Applications onto CMPs	52
<i>Fang Zheng, Chitra Venkatramani, Rohit Wagle, and Karsten Schwan</i>	

Coordinating In-Network Caching in Content-centric Networks: Model and Analysis	62
<i>Yanhua Li, Haiyong Xie, Yonggang Wen, and Zhi-Li Zhang</i>	
Proteus: Power Proportional Memory Cache Cluster in Data Centers	73
<i>Shen Li, Shiguang Wang, Fan Yang, Shaohan Hu, Fatemeh Saremi, and Tarek Abdelzaher</i>	

Session A2: Scheduling and Optimization

Dynamic Energy Estimation of Query Plans in Database Systems	83
<i>Zichen Xu, Yi-Cheng Tu, and Xiaorui Wang</i>	
Content-Based Scheduling of Virtual Machines (VMs) in the Cloud	93
<i>Sobir Bazarbayev, Matti Hiltunen, Kaustubh Joshi, William H. Sanders, and Richard Schlichting</i>	
HybridMR: A Hierarchical MapReduce Scheduler for Hybrid Data Centers	102
<i>Bikash Sharma, Timothy Wood, and Chita R. Das</i>	

Session B2: System Security

AUTOVAC: Automatically Extracting System Resource Constraints and Generating Vaccines for Malware Immunization	112
<i>Zhaoyan Xu, Jialong Zhang, Guofei Gu, and Zhiqiang Lin</i>	
Storing Shared Data on the Cloud via Security-Mediator	124
<i>Boyang Wang, Sherman S.M. Chow, Ming Li, and Hui Li</i>	
Watchmen: Scalable Cheat-Resistant Support for Distributed Multi-player Online Games	134
<i>Amir Yahyavi, Kévin Huguenin, Julien Gascon-Samson, Jörg Kienzle, and Bettina Kemme</i>	

Session A3: Energy Management

pVOCL: Power-Aware Dynamic Placement and Migration in Virtualized GPU Environments	145
<i>Palden Lama, Yan Li, Ashwin M. Aji, Pavan Balaji, James Dinan, Shucaai Xiao, Yunquan Zhang, Wu-chun Feng, Rajeev Thakur, and Xiaobo Zhou</i>	
Mobility-Assisted Energy-Aware User Contact Detection in Mobile Social Networks	155
<i>Wenjie Hu, Guohong Cao, Srikanth V. Krishnamurthy, and Prasant Mohapatra</i>	
Energy-Aware Web Browsing in 3G Based Smartphones	165
<i>Bo Zhao, Qiang Zheng, Guohong Cao, and Sateesh Addepalli</i>	
Datacenters as Controllable Load Resources in the Electricity Market	176
<i>Rui Wang, Nagarajan Kandasamy, Chika Nwankpa, and David R. Kaeli</i>	

Session B3: Data Structures

A Scalable Conflict-Free Replicated Set Data Type	186
<i>Andrei Deftu and Jan Griesch</i>	
No Hot Spot Non-blocking Skip List	196
<i>Tyler Crain, Vincent Gramoli, and Michel Raynal</i>	
Mindicators: A Scalable Approach to Quiescence	206
<i>Yujie Liu, Victor Luchangco, and Michael Spear</i>	
Non-blocking Patricia Tries with Replace Operations	216
<i>Niloufar Shafiei</i>	

Session A4: Localization

MoLoc: On Distinguishing Fingerprint Twins	226
<i>Wei Sun, Junliang Liu, Chenshu Wu, Zheng Yang, Xinglin Zhang, and Yunhao Liu</i>	
Pilot: Passive Device-Free Indoor Localization Using Channel State Information	236
<i>Jiang Xiao, Kaishun Wu, Youwen Yi, Lu Wang, and Lionel M. Ni</i>	
Harnessing Mobile Multiple Access Efficiency with Location Input	246
<i>Wan Du and Mo Li</i>	
Location Privacy Preserving Dynamic Spectrum Auction in Cognitive Radio Network	256
<i>Sheng Liu, Haojin Zhu, Rong Du, Cailian Chen, and Xinping Guan</i>	

Session B4: Replication and Byzantine Fault Tolerance

Achieving High-Throughput State Machine Replication in Multi-core Systems	266
<i>Nuno Santos and André Schiper</i>	
Order-Preserving Renaming in Synchronous Systems with Byzantine Faults	276
<i>Oksana Denysyuk and Luís Rodrigues</i>	
Hybrid Replication: State-Machine-Based and Deferred-Update Replication Schemes Combined	286
<i>Tadeusz Kobus, Maciej Kokociński, and Paweł T. Wojciechowski</i>	
RBFT: Redundant Byzantine Fault Tolerance	297
<i>Pierre-Louis Aublin, Sonia Ben Mokhtar, and Vivien Quéma</i>	

Session A5: Online Social Networks

Characterizing Information Diffusion in Online Social Networks with Linear Diffusive Model	307
<i>Feng Wang, Haiyan Wang, Kuai Xu, Jianhong Wu, and Xiaohua Jia</i>	
Maximizing the Spread of Positive Influence in Online Social Networks	317
<i>Huiyuan Zhang, Thang N. Dinh, and My T. Thai</i>	
Message in a Sealed Bottle: Privacy Preserving Friending in Social Networks	327
<i>Lan Zhang, Xiang-Yang Li, and Yunhao Liu</i>	

Session B5: Think Globally, Act Locally

Gathering of Mobile Robots Tolerating Multiple Crash Faults	337
<i>Zohir Bouzid, Shantanu Das, and Sébastien Tixeuil</i>	
Ring Exploration by Oblivious Agents with Local Vision	347
<i>Ajoy K. Datta, Anissa Lamani, Lawrence L. Larmore, and Franck Petit</i>	
Zigzag: Local-Information-Based Self-Optimizing Routing in Virtual Grid Networks	357
<i>Shusuke Takatsu, Fukuhito Ooshita, Hirotsugu Kakugawa, and Toshimitsu Masuzawa</i>	

Session A6: Data Dissemination

Distributed Ranked Data Dissemination in Social Networks	369
<i>Kaiwen Zhang, Mohammad Sadoghi, Vinod Muthusamy, and Hans-Arno Jacobsen</i>	
Optimistic Atomic Multicast	380
<i>Carlos Eduardo Bezerra, Fernando Pedone, Benoît Garbinato, and Cláudio Geyer</i>	
ImageElves: Rapid and Reliable System Updates in the Cloud	390
<i>Deepak Jeswani, Akshat Verma, Praveen Jayachandran, and Kamal Bhattacharya</i>	

Session B6: Data-Center Economics

Dynamic Cloud Resource Reservation via Cloud Brokerage	400
<i>Wei Wang, Di Niu, Baochun Li, and Ben Liang</i>	
Present or Future: Optimal Pricing for Spot Instances	410
<i>Peijian Wang, Yong Qi, Dou Hui, Lei Rao, and Xue Liu</i>	
SmartDPSS: Cost-Minimizing Multi-source Power Supply for Datacenters with Arbitrary Demand	420
<i>Wei Deng, Fangming Liu, Hai Jin, and Chuan Wu</i>	

Session A7: Networking

Longer Is Better: Exploiting Path Diversity in Data Center Networks	430
<i>Fung Po Tso, Gregg Hamilton, Rene Weber, Colin S. Perkins, and Dimitrios P. Pezaros</i>	
Signal-Aware Green Wireless Relay Network Design	440
<i>Chenfei Gao, Jian Tang, Xiang Sheng, Weiyi Zhang, and Chonggang Wang</i>	
Ease the Queue Oscillation: Analysis and Enhancement of DCTCP	450
<i>Wen Chen, Peng Cheng, Fengyuan Ren, Ran Shu, and Chuang Lin</i>	

Session B7: Parallel Data Processing

Ripple: Improved Architecture and Programming Model for Bulk Synchronous Parallel Style of Analytics	460
<i>Mike Spreitzer, Malgorzata Steinder, and Ian Whalley</i>	
Efficient Geo-distributed Data Processing with Rout	470
<i>Chamikara Jayalath and Patrick Eugster</i>	
Towards an Efficient Online Causal-Event-Pattern-Matching Framework	481
<i>Sukanta Pramanik, David Taylor, and Bernard Wong</i>	

Session A8: Resource Provisioning and Load Balancing

S3: Characterizing Sociality for User-Friendly Steady Load Balancing in Enterprise WLANs	491
<i>Chaoqun Yue, Guangtao Xue, Hongzi Zhu, Jiadi Yu, and Minglu Li</i>	
On Server Provisioning for Distributed Interactive Applications	500
<i>Hanying Zheng and Xueyan Tang</i>	
Harmony: Dynamic Heterogeneity-Aware Resource Provisioning in the Cloud	510
<i>Qi Zhang, Mohamed Faten Zhani, Raouf Boutaba, and Joseph L. Hellerstein</i>	

Session B8: Thwarting Adversaries

RAC: A Freerider-Resilient, Scalable, Anonymous Communication Protocol	520
<i>Sonia Ben Mokhtar, Gautier Berthou, Amadou Diarra, Vivien Quéma, and Ali Shoker</i>	
Recursive Fact-Finding: A Streaming Approach to Truth Estimation in Crowdsourcing Applications	530
<i>Dong Wang, Tarek Abdelzaher, Lance Kaplan, and Charu C. Aggarwal</i>	
Least Cost Rumor Blocking in Social Networks	540
<i>Lidan Fan, Zaixin Lu, Weili Wu, Bhavani Thuraisingham, Huan Ma, and Yuanjun Bi</i>	

Session A9: Network Security

Identifying and Addressing Protocol Manipulation Attacks in “Secure” BGP	550
<i>Yang Song, Arun Venkataramani, and Lixin Gao</i>	
A Formal Framework for Network Security Design Synthesis	560
<i>Mohammad Ashiqur Rahman and Ehab Al-Shaer</i>	
Peer Pressure: Exerting Malicious Influence on Routers at a Distance	571
<i>Max Schuchard, Christopher Thompson, Nicholas Hopper, and Yongdae Kim</i>	

Session B9: Theory

Efficient Identification of Additive Link Metrics via Network Tomography	581
<i>Liang Ma, Ting He, Kin K. Leung, Don Towsley, and Ananthram Swami</i>	
On the k-Atomicity-Verification Problem	591
<i>Wojciech Golab, Jeremy Hurwitz, and Xiaozhou (Steve) Li</i>	
Safety of Deferred Update in Transactional Memory	601
<i>Hagit Attiya, Sandeep Hans, Petr Kuznetsov, and Srivatsan Ravi</i>	
Parallel Consensus is Harder than Set Agreement in Message Passing	611
<i>Zohir Bouzid and Corentin Travers</i>	
Author Index	621
