

# **2013 NORCHIP**

**Vilnius, Lithuania**  
**11-12 November 2013**

**IEEE Catalog Number: CFP13828-POD**  
**ISBN: 978-1-4799-1645-0**

Self-Formation processes in High-Speed Integrated Circuits<sup>3</sup>

*Romualdas Navickas, VGTU (LT)*

High Aspect Ratio Lateral Electrode Nano Gap Rectangular Plate Micro-Resonator Novel Process;

*Srinivasa Reddy Kuppireddi, Oddvar Søråsen, Srinivasa Reddy Kuppireddi, University of Oslo (NO)*

An Analytical Model for Spectral Peak Frequency Prediction of Substrate Noise in CMOS Substrates<sup>35</sup>

*Ming Shen and Jan H. Mikkelsen, Aalborg University (DK)*

At-Speed Self-Testing of High-Performance Pipe-Lined Processing Architectures<sup>39</sup>

*Maksim Gorev, Raimund Ubar, Peeter Ellervee, Sergei Devadze, Jaan Raik, Mart Min, Tallinn University of Technology (EE)*

3D Volumetric Display Design Challenges<sup>45</sup>

*Krišs Osmanis, Gatis Valters, Ilmārs Osmanis, SIA EuroLCDs (LV)*

Design-Space Exploration of the Configurable 32 bit VLIW Processor CoreVA for Signal Processing

Applications<sup>49</sup>

*Gregor Sievers, Peter Christ, Julian Einhaus, Thorsten Jungeblut, Mario Porrmann, Ulrich Rückert, Bielefeld University (DE)*

1.8 W, 19 MHz Envelope Amplifier for Envelope Tracking and Envelope Elimination and Restoration<sup>53</sup>

*Simo Hietakangas, Mikko Hietanen, Timo Rahkonen, University of Oulu (FI)*

A Integrated High Voltage Controller for a Reconfigurable Antenna Array<sup>57</sup>

*Jing Ning, Klaus Hofmann, TU Darmstadt (DE)*

Design of a CMOS Single Stage Dual-Mode SC C/V Converter for Capacitive Sensors<sup>5</sup>;

*Shenjie Wang, Jose Luis Merino, Francisco Molina-Lopez, Danick Briand, Catherine Dehollain, Ecole Polytechnique Federale de Lausanne (CH)*

Trends in University Programs in Nanoelectronics and Microsystems<sup>67</sup>

*Erik Bruun, Ivan Ring Nielsen, Technical University of Denmark (DK)*

How to Implement an Experimental Course on Analog IC design in a Standard Semester Schedule<sup>73</sup>

*Ivan H. H. Jørgensen, Niels Marker-Villumsen, Technical University of Denmark (DK)*

Micro- and Nanoelectronics Education in Vilnius Gediminas Technical University<sup>79</sup>

*Vaidotas Barzdenas, Romualdas Navickas, Vilnius Gediminas Technical University (LT)*

Critical Path Analysis of Two-channel Interleaved Digital MASH Delta Sigma Modulators<sup>83</sup>

*Ameya Bhide, Atila Alvandpour, Linköping University (SE)*

Combined RF and Multilevel PWM Switch Mode Power Amplifier<sup>87</sup>

*Muhammad Fahim Ul Haque, Ted Johansson, Dake Liu, Linköping University (SE)*

Feasibility of a cryogenic SiGe amplifier at 4 K<sup>8</sup>;

*Markku Åberg, Jan Saijets, VTT (FI)*

Comparison of Static and Memory Predistortion in Envelope Tracking System<sup>95</sup>

*Marko Neitola, Timo Rahkonen, University of Oulu (FI)*

Implementing OCEAN Scripts in RF Circuit Design<sup>99</sup>

*Aleksandr Vasjanov, Vaidotas Barzdenas, John C. Liobe, Vilnius Gediminas Technical University (LT)*

A Fault Tolerant Approach for Application-Specific Network-on-Chip''''': 3  
*Somayeh Khoroush, Midia Reshadi, Islamic Azad University (IR)*

Self-heating and Memory Effects in RF Power Amplifiers Explained Through Electro-Thermal Modeling''''': 9  
*Wei Wei , Ole Kiel Jensen, Jan H. Mikkelsen, Aalborg University (DK)*

3.5 GHz Triple Cascaded Current-Reuse Low Noise Amplifier'''''; 3''  
*Muh-Dey Wei, Dirk Bormann, Stefan Kaehlert, Tobias D. Werth, Sheng-Fuh Chang, Renato Negra, Aachen University (DE)*

Modeling and Predistortion of Envelope Tracking Power Amplifiers using a Memory Binomial Model'''''; 7  
*Felice Tafuri, Torben Larsen, Aalborg University (DK)*

A 1V SiGe Power Amplifier for 81-86 GHz E-band'''''; ;  
*Tobias Tired, Henrik Sjöland, Carl Bryant, Markus Törmänen, Lund University (SE)*

A CMOS 0.23pJ Freeze Vernier Time-to-Digital Converter''''''325  
*Jan Angevare, Kristóf Blutman, Amir Zjajo, Nick van der Meijs, Delft University of Technology (NL)*

A 7-bit 50MS/s Single-ended Asynchronous SAR ADC in 65nm CMOS''''''329  
*Ye Xu, Trond Ytterdal, Norwegian University of Science and Technology (NO)*

A 31.25/125MSps Continuous-Time  $\Delta\Sigma$  ADC with 64/59dB SNDR in 130nm CMOS''''''333  
*Shubo Yan, Mattias Andersson, Henrik Sjöland, Lund University (SE)*

Algorithmic Time-to-Digital Converter''''''337  
*Pekka Keränen, Juha Kostamovaara, University of Oulu (FI)*

Evaluation of Non-contact Flexible Electrodes Connected with a Customized IC –Steps towards a Fully Integrated ECG Sensor''''''33;  
*Geng Yang, Li Xie, Li-Rong Zheng, Royal Institute of Technology (SE)*

Interpolation by a Prime Factor other than 2 in Low-Voltage Low-Power sigma-delta DAC''''''346  
*Peter Pracný, Ivan H. H. Jørgensen, Liang Chen, Erik Bruun, Technical University of Denmark (DK)*

Limited Active Harmonic Compensation in a Grid-Connected Photovoltaic Inverter''''''352  
*Andrius Platakis, Algirdas Baskys, Nerijus Paulauskas, Vilnius Gediminas Technical University (LT)*

Settling Performance Enhancement by Pre-charging Technique in Switched-Capacitor Circuit''''''356  
*Jia Sun, Timo Rahkonen, University of Oulu (FI)*

A Simple All MOS Voltage Reference for RFID Applications''''''35:  
*Shailesh Singh Chouhan, Kari Halonen, Aalto University (FI)*

SRT Radix-2 Dividers with (5,4) Redundant Representation of Partial Remainder''''''363  
*Alexandru Amaricaï, Oana Boncalo, University Politehnica of Timisoara (RO)*

Sleep Apnea Pre-Screening on Neonates and Children with Shoe Integrated Sensors''''''368  
*Mairo Leier, Gert Jervan, Tallinn University of Technology (EE)*

Area and Power Reduction in DFT Based Channel Estimators for OFDM Systems''''''372  
*Michal Stala, Rakesh Gangarajiah, Ove Edfors, Viktor Öwall, Lund University (SE)*

Analysis of Band-to-band Mixing Distortion Contributions in Some Usual Circuit Topologies''''''376  
*Janne Aikio, Timo Rahkonen, Tero Korkala, University of Oulu (FI)*

Low Power Front End Electronics for In-Probe Beamforming in Ultrasound Imaging""37:  
*Surya Sharma, Prof Trond Ytterdal, Norwegian University of Science and Technology (NO)*

A Temperature Sensor with  $3\sigma$  Inaccuracy of  $+0.5/-0.75$  degree C and Energy per Conversion of  $0.65 \mu\text{J}$   
Using a  $0.18 \mu\text{m}$  CMOS Technology""384  
*Mikail Yucetas, Mika Pulkkinen, Jakub Gronicz, Kari Halonen, Aalto University (FI)*

Implementation of a Highly-Parallel Soft-Output MIMO Detector with Fast Node Enumeration""388  
*Stefan Granlund, Liang Liu, Chenxin Zhang, Viktor Öwall, Lund University (SE)*

An LC-Based Tunable Low-Isolation Device for Adaptive Duplexers""392  
*Mohammadreza Pourakbar, Markus Törmänen, Michael Faulkner, Henrik Sjöland, Lund University (SE)*

A Study of Low-Power Crystal Oscillator Design""396  
*Kin Keung Lee, Kristian Granhaug, Nikolaj Andersen, University of Oslo (NO)*

Correlator design and implementation for GNSS receivers""39:  
*Ville Eerola (FI)*

An FPGA-Based High-Performance Wireless Vibration Analyzer""3: 6  
*Khurram Shahzad, Bengt Oelmann, Mid Sweden University (SE)*

Highly Linear Open-loop Output Driver Design for High Speed Capacitive DACs""3: ;  
*Quoc-Tai Duong, Jerzy J. Dąbrowski, Atila Alvandpour, Linköping University (SE)*

Single Poly Non-Volatile Memory Cells for Miniaturized Sensors in 90nm CMOS Technology""3; 5  
*Ali Zaher, Philipp Häfliger, Oslo University (NO)*

Next Generation Digital Front-End for Multi-Standard Concurrent Reception""3; 9  
*Isael Diaz, Chenxin Zhang, Lieven Hollevoet, Jim Svensson, Joachim Rodrigues, Liesbet Van der Perre, Lund University (SE)*

A 13 bits 4.096 GHz 45 nm CMOS Digital Decimation Filter Chain Using Carry-Save Format Numbers""425  
*Yanxiang Huang, Ajay Kapoor, Robert Rutten, José Pineda de Gyvez, Technical University of Eindhoven (NL)*

A Low-Power 2nd-order CT Delta Sigma Modulator with a Single Operational Amplifier ""429  
*Dejan Radjen, Pietro Andreani, Martin Anderson, Lars Sundström, Lund University (SE)*
