

**2013 IEEE 2nd International
Conference Actual Problems of
Unmanned Air Vehicles Developments
Proceedings**

(APUAVD 2013)

**Kiev, Ukraine
15-17 October 2013**

**IEEE Catalog Number: CFP1329V-POD
ISBN: 978-1-4799-3307-5**

Table of Contents

PLENARY SESSION.....	7
Energy System Design of Solar Aircraft <i>V. M. Sineglazov, D. P. Karabetsky</i>	9
Unmanned Aerial Vehicles and Technologies by NTUU “KPI” <i>O. V. Zbrutsky, O. V. Prokhorchuk, V. B. Kolesnichenko, O. P. Marynoshenko</i>	12
Section A. UAV Design: Advanced Methods of Computer-Aided Design, Aerodynamics, Flight-Technical Characteristics, Durability of UAV.....	15
Experimental Investigation of Aerodynamic Performance of a Small UAV With a Telescopic Wing <i>I. S. Kryvokhatko, V. V. Sukhov</i>	17
Multiobjective Optimization during Choice of UAV Constructive-Layout Scheme <i>A. V. Brykalov</i>	21
Improvement of a Small Design and/or Production Organization Exposition Scheme <i>S. A. Iasenko, O. O. Tryzna</i>	24
The Generalized Classification of Unmanned Air Vehicles <i>A. G. Korchenko, O. S. Ilyash</i>	28
Diagnostics of Aircraft Aerodynamics Changes in Emergency Situation in Flight <i>D. O. Shevchuk</i>	35
Simplified and Adopted to the MatLab Fuzzy Filter of UAV’s Flight Parameters <i>V. P. Bocharnikov, I. V. Bocharnikov</i>	41
Adaptive Identification of Mathematical Model of UAV Lateral Movement <i>V. M. Sineglazov, A. N. Silvestrov</i>	47
Computer Aided Design of UAV Navigation Complexes with Given Characteristics <i>V. M. Sineglazov, Sh. I. Askerov</i>	50
Computer-Aided Design of Cleanrooms for Navigation Complexes Electronic Elements Manufacturing <i>V. M. Sineglazov, V. N. Fedosenko</i>	53
Flying Wing Design for Solar Rechargeable Aircraft <i>V. M. Sineglazov, D. P. Karabetsky</i>	56
Balloon-parachute System of Aerospace Pilotless Aircraft <i>A. P. Kozlov</i>	59
Forecasting the Demand for UAV Using Different Neural Networks Topology <i>O. I. Chumachenko, V. S. Gorbatiuk</i>	62
Unsteady Flow Around Airfoil at Large Angles of Attack <i>E. P. Udartsev, O. V. Shvets, O. M. Pereverzev, S. I. Alekseenko</i>	65
Substantiation of Requirements to Unmanned Aerial Vehicle Automatic Flight Control System Development <i>A. A. Tunik, K. V. Melnyk, V. P. Trikoz, E. V. Vyshnyakova</i>	68
Ground Control Station Power Supply Control System <i>A. V. Osadchiy, V. N. Belyi</i>	72
Image Processing in UAV <i>E. I. Chumachenko, A. V. Gilevoy</i>	75
Data Processing in Exploitation System of Unmanned Aerial Vehicles Radioelectronic Equipment <i>O. V. Solomentsev, M. U. Zaliskyi, O. V. Zuiev, M. M. Asanov</i>	77

Section B. UAV Production and Service: Maintenance, Methods and Systems of Navigation and Flight Control Equipment Testing	81
Multiwave Laser Doppler Anemometer <i>V. M. Zemlyanskiy, M. O. Gusev</i>	83
Phase Doppler Signal Filtering in Two-Wave Laser Doppler Anemometer <i>V. M. Zemlyanskiy, M. O. Gusev, A. P. Chudesov</i>	86
Convergence Properties of an Online Learning Algorithm in Neural Network Models of Complex Systems <i>V. N. Azarskov, L. S. Zhiteckii, S. A. Nikolaienko</i>	89
Structural Identification of Unmanned Supercavitation Vehicle Based on Incomplete Experimental Data <i>S. I. Osadchiy, V. M. Kalich, O. K. Didyk</i>	93
Optimal Filtering of Temperature Errors for Coriolis Vibratory Gyroscopes <i>V. O. Apostolyuk</i>	96
Spread-Spectrum Control Channels for UAV Based on the Generalized Binary Barker Sequences <i>A. G. Holubnychy, G. F. Konakhovych</i>	99
The Complex Navigation and Landing Equipment for "Small Aviation" <i>A. A. Osipchuk</i>	104
Integration of Unified Modules of Aircraft Onboard Navigation and Landing Equipment for "Small Aviation" <i>A. A. Osipchuk</i>	107
Providing Guaranteed Accuracy of Control at Arbitrary Disturbances <i>O. E. Kopysov</i>	110
Modernization of Steering Servodrive Control System of Autonomous Vehicle by its Experimental Data <i>I. Yu. Prokofieva</i>	113
Experimental UAV Flight Data Structuring, Transmission and Visualization by Narrowband Telemetry Transmission <i>O. Yu. Mykhatsky, N. S. Kuzmenko, O. V. Savchenko</i>	118
Knowledge - Oriented Support of Complex Technical Object Design <i>E. Y. Abramov, A. V. Abramova, D. I. Konotop</i>	122
INS Errors Compensation Algorithm based on Luenberger Observer <i>I. O. Rataichuk, V. I. Kortunov</i>	126
Expediency of Unmanned Air Vehicles Application in the Framework of Subjective Analysis <i>A. V. Goncharenko</i>	129
Qualification Level Control of Remotely Piloted Aircraft Pilots <i>V. M. Sineglazov, Yu. N. Shmelev</i>	134
Using PV/Wind Hybrid Systems in the Autonomous Power of Unmanned Aerial Vehicle Control Centre <i>V. M. Sineglazov, B. I. Dmitrenko, A. V. Kulbaka</i>	137
HardWare-In-the-Loop Simulation Table for UAV Navigation Complexes Testing <i>V. M. Sineglazov, S. O. Dolgorukov</i>	141
UAV Test Bench with High Carrying Capacity <i>V. M. Sineglazov, V. P. Podolskiy</i>	146
Section C. UAV Equipment: Data Transmission Channels, Adaptive, Robust and Optimal Control Systems, Useful Load, Air Traffic Control Centre, Navigation Systems and Sensors, Motion Control Systems, Ground Equipment of UAV	151
Performance Parameters Comparison of Ring Laser, Coriolis Vibratory and Fiber-Optic Gyros Based on Allan Variance Analysis <i>V. V. Chikovani</i>	153
Urgent Problems of UAV Navigation System Development and Practical Implementation <i>V. P. Kharchenko, V. B. Larin, V. M. Kondratyuk, S. I. Ilytska, O. V. Kutsenko</i>	157

Methods for Solving Problem of Aircraft Attitude Estimation <i>L. M. Ryzhkov, D. I. Stepurenko</i>	161
Comparison of UAV Control Systems Designed by Means of Kalman Filter and Luenberger Observer <i>T. A. Galaguz</i>	165
Integrated Aircraft Navigation System <i>J. A. Malysheva</i>	169
Problem Statement and Algorithms for Structural Identification of Unstable Vehicles <i>L. N. Blokhin, A. P. Krivonosenko, Y. N. Bezkorovayniy</i>	173
Robust Stabilization of UAV Observation Equipment <i>O. A. Sushchenko, A. A. Tunik</i>	176
Optimal Aerospace Monitoring by Means of UAV Intelligent Control <i>A. V. Skripets, A. G. Sytnyk, A. A. Polozhevets, M. O. Onyshchuk</i>	181
Flight Control System Design via Static Output Feedback: LMI – Approach <i>M. N. Komnatszka</i>	184
Radiochannel of Unmanned Aircraft System <i>L. V. Sibruk, R. O. Zadorozhny, D. P. Bondarenko</i>	187
Digital Control of Lateral Autopilot System Applied to UAV: Optimal Control Strategy <i>K. V. Melnyk, L. S. Zhiteckii, A. M. Bogatyrov, A. U. Pilchevsky</i>	189
Signal Processing System of Intelligent Sensor with Nonlinear Characteristic <i>I. Yu. Sergeev</i>	193
Kinesthetic Panel for Quasi-Object Control by UAV <i>V. I. Kashmatov</i>	196
Features of UAV Control Systems Assessing <i>V. M. Konyushko</i>	199
Adaptive Control System for UAV with State Observer <i>O. K. Ablesimov, A. Yr. Gonchar</i>	203
Prediction of Inertial Navigation System Error Dynamics in INS/GPS System <i>N. K. Filyashkin, V. S. Yatskovsky</i>	206
Development of Analytical Model of Not Page Memory Dynamic Allocation <i>V. M. Sineglazov, A. S. Yurchenko</i>	210
Analysis of Visual Correlation-Extreme Methods of UAV Navigation <i>M. P. Mukhina, D. M. Demchenko</i>	213
Technique Calculation of UAV Kinematical Parameters at Take-off with Springboard <i>V. I. Silkov, A. V. Samkov, N. F. Tupitsin</i>	217
Author Index	221
